that practice may keep pace with competition. All such improvement is merely standing still. To get increased profit practice must do more than keep pace; it must be in advance—far in advance; it must use science to the utmost—science not scattered hither and thither, houseless and homeless, and frittered away, but science consolidated and organised to the utmost, science comfortably housed, and that is the aim of an agricultural college. I shall now gather together in a bunch the points already mentioned, in which science specially touches the pocket, and I would warn you that I am chiefly engaged in bringing into prominence the botanical points. (1) Weed destroyers and weed destruction; (2) preventive measures against attack, and spread of parasitic fungi; (3) means of increasing fertility of land; (4) means of increasing the value of grass land; (5) finding the most profitable mixture of grass and clover; (6) finding the most profitable varieties of roots and corns; (7) testing the germination of seeds, and so forth. These and many other things of prime importance for most profitable agriculture constitute one side of the business of an agricultural college and of its staff.

FARM.

Acreage of Potatoes.

Preliminary Statement of the Acreage under Potatoes in the several Counties of Great Britain, compiled from the Returns collected on the 4th June, 1900, with a Comparative Statement for 1899.

Counties.	1900. Acres.	1899. Acres.

Utilisation of Sewage.

The losses in fertilising material which are sustained, as has been mentioned, on account of the neglect or unscientific treatment of barn-yard manure, are very trifling when compared with those which the community suffers in the almost total loss of the nitrogen, phosphoric acid, and potash contained in human excreta. The utilisation of such always becomes a subject for discussion when the question is raised as to how a cheaper class of manures than the artificial fertilisers can be obtained for use in agriculture.

Where the water carriage system of removing sewage and excrement has been introduced, nothing is to be hoped for in the recovery of their fertilising constituents. Even in cases where, at large expense, establishments have been erected for the treatment of sewage by precipitation or similar methods, the products have been found to be entirely destitute of agricultural value. The greater part of the fertilising constituents of sewage are in such a soluble condition, and have been diluted with water to such an extent, as to render their recovery economically impossible. It has been attempted in the neighbourhood of many cities in England and on the Continent of Europe to use the sewage for irrigation and as liquid manure, but this method of utilisation has been found to be in the highest degree imperfect. At Berlin it has been proved that of the nitrogen contained in its sewage, at the very most only 13.8 per cent. is found in the agricultural products of all the magnificent farms irrigated by it in the neighbourhood of the city. When the use of water for removing house refuse is excluded, and ordure and urine are removed as manure in their natural state, their utilisation is possible, and is made a source of revenue in such towns as Stuttgart, Groningen, Greifswald, etc. But the systems of this class which are in use have all their disadvantages, as is proved by the tendency which municipal authorities constantly show to adopt the water carriage system. The greatest disadvantage under which these systems labour is the difficulty caused by the offensiveness to sight and smell of the material with which they have to deal. This has been entirely met by the use of moss litter as an absorbent, deodoriser, and disinfectant.

The first public mention of the usefulness of moss litter as a deodoriser and absorbent seems to have been made by Dr. Ludwig Happe, in Braunschweig, in December, 1880, since which time its application for the purpose has gradually increased until now, when the system has been introduced into several towns in Germany, and is also practised in Congleton, Cheshire, England. In Canada this method of deodorising human refuse has been in use for years at Caledonia Springs. It, of course, at once recalls the dry earth system, regarding which great expectations were at one time entertained. The advantages of moss litter over dry earth for the purposes in question are, however, very decided. They consist in the perfect inoffensiveness of the moss litter product, in the fact that one part of moss litter will deodorise and dry at least six parts of mixed excreta, and in the greater agricultural value of the resulting manure. Dry earth (which is required in quantity at least equal to that of the excreta) is valueless from an agricultural point of view, but this is not the case with moss litter, which, as the above analysis shows, often contains as much nitrogen as ordinary barnyard manure. Numerous analyses have been made of moss litter manure as produced in Germany, and its average contents from seven different towns may here be stated.

	Per cent.	Lbs. per ton.		Value per ton. Dols.
Nitrogen	0·664	13·28 at	13c.	1 72
Phosphoric acid	0·350	7·00	5	0 35
Potash	0·285	5·70	5¼	0 30
Water	83·00			2 37

Numerous trials have been made on various crops with this manure, and very satisfactory results are always reported. In all cases it is stated to excel barnyard manure even when the latter is used in much greater quantity.

The manufacture of moss litter has been attempted at Musquash, in New Brunswick, and also in Welland County, Ontario. From the latter locality I was supplied with several bales of the moss litter for experimental purposes, and Dr. Laberge, of Montreal, undertook to superintend the carrying out of an experiment to determine its deodorising and absorbent qualities. He reported that 100 pounds of moss litter were sufficient for drying 800 pounds of ordinary excreta from privy pits in Montreal, and rendering it entirely inoffensive. A sample of the product remained for days in my office without attracting notice, and, indeed, it was quite devoid of odour. Its analysis gave the following results:—

	Per cent.	Lbs. per ton.		Value per ton. Dols.
Nitrogen	1·31	26·2 at	13c.	3 41
Phosphoric acid	0·90	18·0 at	5	6 90
Potash	0·14	2·8 at	5½	0 15
Water	65·47			4 46

The valuation of ordinary fresh barn-yard manure with 75 per cent. of water is about 2dols. per ton; with 67 per cent. water, as in the case of the average given above by Dr. Goessmann, the value is nearly 2.25dols. Therefore, much better results might be expected agriculturally from a "moss manure" of the composition just described.

Moss litter might also be applied with great advantage in public urinals. When a sample of it was supersaturated with urine and dried, and this process repeated several times, no offensive odours were developed, and the product was found on analysis to contain 12.41 per cent of nitrogen, which is equal to a valuation of 29.78dols. per ton.

These facts are reported in order to show that Canada possesses in her waste lands abundance of material which might be used in our towns and villages for the production of very valuable manure, with the simultaneous introduction of very many sanitary advantages. It is not to be expected that cities or towns which are advantageously situated for the water carriage system, or which have already adopted it, will make any changes, but there are many towns and villages in the Dominion where the application of the moss litter system would be very suitable, and the authorities of which, by selling the product or giving it gratis to the farmers of the neighbourhood, might confer a great advantage on agriculture.

Acquisition of Nitrogen.

Not only can the farmer save almost the whole of the nitrogen contained in the fodder fed to his cattle, but he can actually increase the stock of it stored away in his fields, agricultural products and manure heaps, by a judicious course of crop rotation. For more than a century agricultural chemists have discussed the question as to whether free atmospheric nitrogen can be assimilated by plants, but it may now be regarded as perfectly settled in the affirmative, if regard is had only to the plants of the order leguminosæ, such as beans, peas, lentils, vetches, clovers, alfalfa, serradella, etc. Even the great English agriculturists, Sir J. B. Lawes and Sir Henry Gilbert, who had previously been of an opposite opinion, have now admitted that this appropriation of nitrogen has been completely proved. This acknowledgment was made by Sir Henry Gilbert at a great meeting of agricultural chemists held at Halle, in Germany, in September, 1891. Thus, modern research has confirmed not only modern agricultural practice, but also the experience of antiquity, for Prof. W. Strecker has pointed out a passage in Pliny which says: "Lupines require so little manure that they, in fact, replace it; vetches make the land more fertile. Corn should be sown where previously lupines or vetches have stood, because they enrich the land."

It is not, however, to be supposed that this utilisation of atmospheric nitrogen by leguminous plants can take place upon very poor soils or upon those destitute of the inorganic constituents which they require. The latter must in such cases be supplied in the shape of potash with some phosphoric acid, as was done with great success by Schultz, of Lupitz, a practical agriculturist in North Germany. In fact, had it not been for his investigations, the controversy above referred to might have continued without results up to the present hour.

Professor König, of Münster, gives the following summary of Schultz's experience:—

"Schultz acquired the farm Lupitz in the year 1855; its soil consisted of a poor, cold, diluvial sand; the profit in working it was very small. Lupines yielded, indeed, as fodder tolerable results, but when used as green manuring for rye and oats, no return was obtained from them. The application of artificial manures produced good crops, but they did not pay; burnt lime showed itself to be too heating. The use of manure was more favourable, especially when fertilisers containing phosphoric acid were used at the same time. But at the best the total results were not satisfactory.

"Shortly after Schultz acquired Lupitz, the great discovery of potash salts was made, and about 1860 they began to be produced from the mines of Stassfurth. Schultz made up his mind to try them as manure, and he obtained the most surprising results. After lupines had shown themselves to be useless as forerunners of grain, they were excluded from the rotation, and grown on a separate field without any manuring, and alternating with sheep pasture. But the harvest on these became worse and worse, until the field in question became quite lupine 'sick.' Schultz made his first trial on this field, manuring it with 300lb. kainit per morgen (1 Prussian morgen = 0.631 acre); the sickness was at once cured, and for twenty-five years afterwards Schultz has grown lupines on this ground without interruption, always with the application of 300 pounds kainit. Schultz obtained similar good results on the ground which had received the marl, by the application of potash salts. This ground had indeed yielded well with lupines for two years after the application of the marl, but in the third year they sickened here too. When, however, 300 pounds kainit were applied here and ploughed in the fall, the ground was cured, although an application of phosphates had not produced the desired results.

"The favourable influence which the manuring with kainit or potash salts had exerted on lupines induced Schultz to try them on grain, in conjunction with phosphates. But in this case he obtained con-

tradictory results according to the nature of the crops which preceded the grain. For instance, while grain sowed after lupines and manured with potash and phosphates yielded very good and remunerative harvests, these were not to be obtained if grain was grown after grain or after potatoes. This behaviour of these crops was explained by Schultz in this way: that lupines as deep-rooted plants leave in the soil after harvest a residue of root, in which a considerable amount of nitrogen has accumulated, an amount sufficient to supply the wants of the following grain crops; that, on the other hand, the application of potash and phosphates to grain, after a preceding grain crop, is without effect, for the reason that the latter had consumed the stock of nitrogen. Grain crops always reduce this stock, never increase it. Schultz has given the name 'nitrogen collectors' to the lupines and similar plants, while grains are called 'nitrogen consumers.' His system of rotation is, therefore, the following:—Sow first nitrogen collectors (lupine pease, beans, vetches, clover, lucerne, serradalla, etc.) or, as they have been called, renovating crops, and give them 300lbs. kainite per morgen, with perhaps an addition of 20lbs. phosphoric acid. After harvesting the nitrogen collectors, so a nitrogen consumer, raising a grain or exhausting crop, giving it also 300lbs. kainite and 20lbs. phosphoric acid, the grain crop is perfectly successful, because the first crop left behind it nitrogen enough to supply the wants of the grain. In this way the keeping of stock, which is expensive on a poor sandy soil, can be reduced and the purchase of nitrogenous fertilisers dispensed with, because the nitrogen collectors are able to stock the soil with that valuable element."

The foregoing description is taken from Professor Konig's "Stickstoff Vorrath," published in 1887 (Paul Parey, Berlin). It was in 1884, nearly thirty years after the purchase of his sandy farm, that Schultz, of Lupitz, published the results of his experience, although they did not contain anything very new, and although they only confirmed experiences still older than his own. But his case was surprising, and his explanation of the cause of his successful farming challenged the attention of scientific agriculturists. The consequence has been the issue of many pamphlets on the subject, and an activity in the region of agricultural experimenting which is not yet ended. Atwater, Wagner, Heiden, Hellriegel, and many others, have participated in these investigations, and Professor Wood, of the Storrs Agricultural School in Connecticut, has given the following general conclusions as the result of the work:—

1. "Pease, alfalfa, serradella, lupine, clover in all probability, and apparently leguminous plants in general, are able to acquire large quantities of nitrogen from the air during their period of growth.

2. "There is scarcely room to doubt that the free nitrogen of the air is thus acquired by plants.

3. "That there is a connection between root tubercles and this acquisition of nitrogen is clearly demonstrated. What this connection is, what are the relations of micro-organisms to the root tubercles and the acquisition of nitrogen, and in general how the nitrogen is obtained are questions still to be solved.

4. "The cereals with which the experiments have been completed have not manifested this power of acquiring nitrogen, nor do they have such tubercles as are found on the roots of legumes.

5. "In the experiments here reported, the addition of soil infusions did not seem necessary for the production of root tubercles. A plausible supposition is that the micro-organisms or their spores were floating in the air and were deposited in the pots in which the plants grew.

6. "As a rule the greater the abundance of root tubercles in these experiments, the larger and more vigorous were the plants and the greater was the gain of nitrogen from the air.

7. "In a number of these experiments, as in similar ones previously reported, there was a loss of nitrogen instead of gain. The loss occurred where there were no root tubercles; it was especially large with oat plants, and largest where they had the most nitrogen at their disposal in the form of nitrates. As the gain of nitrogen by the legumes helps to explain why they act as renovating crops, the loss in the case of the oats suggests a possible reason why they should appear to be an exhausting crop.

"Practical inferences:—The ability of legumes to gather nitrogen from the air helps to explain the usefulness of clover, alfalfa, pease, beans, vetches, and cow pease as renovating crops, and enforces the importance of these crops to restore fertility to exhausted soils. The judicious use of mineral fertilisers (containing phosphoric acid, potash, and lime) will enable the farmer to grow crops of legumes which, after being fed to his stock, will, with proper care to collect and preserve all manure, both liquid and solid, enable him to return a complete fertiliser in the shape of a barn-yard manure to his land. A further advantage of growing these crops is that the nitrogenous material, protein, which they contain in such great abundance, is especially valuable for fodder."

From the foregoing, it seems that, in the present condition of our knowledge, the conclusion may be drawn that the atmosphere stands ready to furnish the farmer, gratis, with all the organic constituents which his crops require, provided always that he, on his part, will exercise a sufficient amount of skill and intelligence in appropriating and retaining on his farm the fertilising materials, and especially the nitrogen. If he does this, all that is necessary for him to provide, in order to replace the losses which his farm sustains from the sale of stock or produce, are the inorganic or mineral constituents of these, and especially the phosphoric acid and potash. There is much in all this to remind one of Sprengel and Liebig's teaching of fifty years ago, according to which a plant cannot thrive if its soil does not contain all the substances which are to be found in its ash.

(To be continued.)

LITERARY NOTICES.

From the *Estates Gazette* Office, 6, St. Bride Street, E.C., has been issued a handbook on "The Valuation of Agricultural Tenant-Right," by G. S. Mitchell, F.S.I. In this work Mr. Mitchell, who is well qualified to speak on the subject, has brought together a large number of valuable notes intended for the use of students, and to them the work should prove an invaluable one. An idea of the style and usefulness of the work may be gathered from an extract given in another column, and entitled "Agricultural Tenants and Dilapidations."

The Cheshire County Council has now issued a report on the grain experiments carried out at its Agricultural and Horticultural School, Holmes Chapel, during the present year. The experiments were four in number, and the objects in view were: (1) To test a number of varieties for yield, character, and quality of grain; (2) to see which varieties produced the strongest and best standing straw, and the greatest yield; (3) to see which varieties were most liable to bunt and smut; and (4) to try the effects of pickling or steeping with sulphate of copper to prevent bunt and smut.

There has come to hand an advance copy of "A Practical Guide to Dairying," by William Smith, Edinburgh. It gives some sound advice on the principal things a dairyman ought to know, such as the breeding of cows for commercial purposes, and feeding for general dairy purposes; the buying and selling of milk; how to pasteurise and sterilise, how to make butter and cheese in both large and small quantities, and how to organise, build, and work a creamery; whilst there is some useful information for dairy pupils. The advice given may be fully relied upon, for Mr. Smith has gained a comprehensive knowledge of all branches of the dairy through a long connection with the dairy trade, and what he has written has been proved in his own experience. The book is nicely illustrated, there being about fifty photographs of dairy cattle, and of modern dairy machines. Messrs. Boakes and Co., Grange Printing Works, Edinburgh, are the publishers.

There has just been published in pamphlet form the lecture on the "Famine in India," delivered in the Natural History Lecture Theatre, Old University Buildings, Edinburgh, on the 18th inst., by Professor Robert Wallace. It is published at 1s. net by Messrs. Oliver and Boyd, Edinburgh, and Messrs. Simpkin, Marshall, and Co., Ltd., London.

We have also received another pamphlet by Professor Wallace. This is entitled "The Garton Lectures on Colonial and Indian Agriculture in Edinburgh University," and has been reprinted from the "Imperial and Asiatic Quarterly Review and Oriental and Colonial Record" for October, 1900. This pamphlet is published by the Oriental Institute, Woking.

Messrs. Vinton and Co., Limited, 9, New Bridge Street, London, E.C., have lately published "Ponies Past and Present," by Sir Walter Gilbey, Bart. This is just such another work as Sir Walter's book on horses, being very readable, and full of useful information. In it is given a number of facts concerning various breeds of ponies, such as the New Forest, Welsh, Exmoor, Cumberland, Shetland, and polo ponies. Sir Walter first gives a chapter on the origin of ponies, and then proceeds to deal in detail with each breed. The Welsh pony is the most numerous, and concerning him Sir Walter says: "Accustomed from earliest foalhood to the roughest ground, he is sure-footed as the goat, and neither punishment nor persuasion will induce him to venture upon unsafe bog. He has good shoulders, strong back, neat head, and most enduring legs and feet; he is, in short, a strong, sound, and useful animal."

England has the Exmoor and Dartmoor ponies, which belong to an old breed; the New Forest breed, of which over three thousand may be found in Hampshire; and the Cumberland and Westmoreland ponies. In Ireland there is the Connemara pony, which stands from 12 to 14 hands, and which run practically wild in mountainous country, but under the auspices of the Congested Districts Board, they are being improved by the introduction of Hackneys; whilst Scotland has her Shetland ponies. "Each," says Sir Walter, "stand upon a different footing to the other breeds. In him we have a pony whose characteristics are equally valuable to [illegible] animal, and as one in a state of domestication. It is the only one of our half-wild breeds which gains nothing from an infusion of alien blood; its [illegible] depends upon the careful preservation of distinctive peculiarities of size and make, which unfit them for all others for special purposes."

The concluding chapter is devoted to some advice on breeding polo ponies, and what is said on it, briefly summarised, is as follows: "Pony, with blood, speed, courage, and the many qualities essential to make a first-class polo pony are rare. They command fancy prices when trained, but it is only when trained and proved that they command high prices. The difficulty of producing a breed of polo ponies is due to the long-continued and persistent endeavour to increase the size of the thoroughbred, and to the fact that racehorses are bred for speed only, whereas speed is but one of the many qualities essential to the polo pony. To avoid this difficulty the sire chosen for the foundation stock should be a small and compact thoroughbred or an Arab, the dam used for foundation stock should be chosen from the best of our forest or moorland ponies. The tendency to undue increase in height should be counteracted in the individual by a free and natural life as far as climate permits, and in the breed by occasional further infusion of forest or moorland blood when necessary." The volume is octavo size, and consists of a little over one hundred pages, is nicely bound, and on the cover is a drawing in gilt of a shooting pony. It has a few illustrations that add to its attractiveness, and is altogether a work which will be read with interest and advantage by breeders and sportsmen.

We are in receipt of a copy of "The Wealth and Progress of New South Wales, 1898-9," forwarded to us by the Agent-General of the Colony, whose address is 9, Victoria Street, S.W. The volume, which was written by Mr. T. A. Coghlan, Statistician of New South Wales, is a bulky one, consisting of over a thousand pages, and it deals with every industry, also social questions, public and private finance, law and crime, education, constitution and government, etc., whilst at the beginning of the work there is an interesting historical sketch. It may be of some interest to our readers to know that in no branch of industry has the progress of the colony been more conspicuous than in agriculture. The breadth of land devoted to the plough was, in 1860, not much more than 246,000 acres, whereas at the present time Mr. Coghlan states it can hardly be less than 2,439,000 acres; or, including lands sown with European and American grasses, 261,000 acres in 1850, and 2,814,000 acres in 1900. The progress for each decennial period was: 1860, 260,798 acres; 1870, 426,976; 1880, 710,337; 1890, 1,241,419; and in 1900, 2,813,961 acres, the figures in each case including sown grasses. Wheat, of course, is the main crop of the colony. In 1860 there were 129,000 acres devoted to this seed, and as late as 1880 the area under cultivation was only 253,000 acres, which in 1900 had expanded to 1,425,000 acres.

"Mark Lane Express" Diary.

Nov.
2 and 3. Cheshire Dairy Farmers' Association's Nantwich Cheese Show.
5. Meeting of the Farmers' Club. Paper for discussion, "Weeds and their Eradication."
6. Meeting of the Council of the Central and Associated Chambers of Agriculture.

29 and 30. Chippenham Agricultural Association's Show, at Chippenham, Wilts.

Gainsborough Autumn Fair.—The usual autumn cattle and sheep fair was held at Gainsborough on Wednesday. There was a large number of good quality beasts shown, while the sheep in numbers also showed an improvement. Trade, however, ruled slow, prices being rather high. Cross-bred hoggs made up to 39s., but some small long wools made as little as 26s. per head. The average price of lambs on the day was 34s. Fresh forward beasts were good to sell; two to three-year-olds made from £13 to £16 each; older beasts up to £18 10s.; young steers sold from £10 to £11. The horse fair, as usual, took place near the Pye Bridge, and attracted a large attendance of farmers and others interested in the trade. On the whole, the animals were of a rough class, but were more numerous than for many years. Trade was fairly good for Welsh ponies, £10 to £14 being obtained; [illegible] were priced from £13 to £22; yearlings were scarce; two-year-olds from £20 to £35; trappers about £15 to £20. The best horses found a ready sale.

MOLASSINE

FOOD FOR HORSES, CATTLE, SHEEP, PIGS, etc.

Replacing an equal quantity of Fodder.

A STAPLE FOOD AND CONDIMENT COMBINED. **Patented in all the principal Countries in the World.**

ANNUAL CONSUMPTION, 1,200,000 CWT.

Manufactured by Messrs. Henry Tate & Sons, Sugar Refineries, London and Liverpool, exclusively for the Molassine Company, Ltd. Introduced into the Imperial and Royal Stables of **GERMANY** and **RUSSIA.** It is adopted throughout **THE GERMAN ARMY,** and during the few months it has been on the Market in the United Kingdom it has met with a **most favourable reception,** which is evidenced by the **many Repeat Orders** we are daily receiving, and assurances of its **permanent adoption.**

MOLASSINE contains 36 to 40 per cent. of **Sugar,** and is a combination of **Sugar, Treacle,** or **Syrup with Vegetable substances.** It is guaranteed to consist exclusively of natural organic materials.

RESULTS OF FEEDING WITH MOLASSINE.

IT STIMULATES APPETITE, IMPROVES DIGESTION. GRIPE AND DIARRHŒA COMPLETELY DISAPPEAR.

HORSES. From 2 to 4 lbs. per day.

After a few weeks' feeding are in the **best condition,** and show **strength, highest working power,** and a **smooth** and **glossy coat.**

CATTLE. 8 lbs. per day.
SHEEP. 1½ lbs. per day.

VOL. LXXXIII. No. 3606. LONDON, MONDAY, NOVEMBER 5, 1900. THIRTY-TWO PAGES PRICE 3D.

SOCIETIES.

THE NATIONAL ASSOCIATION of ENGLISH HOP GROWERS.
(Founded June, 1894.)

PRESIDENT.—COLONEL BROOKFIELD, M.P.

HON. TREASURER.—E. ALBERT WHITE, ESQ., Beltring, Kent.

SECRETARY.—THOMAS IRONMONGER.

CENTRAL OFFICE.—61, HOP EXCHANGE, BOROUGH, LONDON.

GENERAL OBJECTS.

To promote united action among English hop growers as a body for the improvement of the industry.

To promote, support, or oppose such legislative and other measures as may affect the industry.

To collect and publish, for the benefit of members, special statistical and other useful information relating to English and foreign hop culture.

To arrange for arbitrations in cases of dispute between sellers and buyers of hops, for the avoidance of litigation.

ANNUAL SUBSCRIPTIONS.

Ordinary members, 3d. per acre of hops under cultivation; honorary members, £1 1s.; hop factors, £1 1s.

CENTRAL AND ASSOCIATED CHAMBERS OF AGRICULTURE.

NOTICE OF MEETING.

A MEETING of the COUNCIL of the CENTRAL AND ASSOCIATED CHAMBERS OF AGRICULTURE will be held (by permission of the Society of Arts) at the House of the Society of Arts, John Street, Adelphi, on Tuesday, November 6, 1900, at 11 o'clock in the forenoon.

Members of Council representing either the Central Chamber or Associated Chambers are requested to attend.

Subscribing Members of the Central Chamber are invited to be present, and may speak by permission of the Chairman, but are not entitled to move resolutions or to vote.

AGENDA.

To transact General Business.
To receive Communications.
To consider Alterations in the Laws and Bye-Laws proposed by the Business Committee.
To receive Reports of Committees (if any).
To receive "Statement of Legislation required in the Agricultural Interest," prepared by the Business and Parliamentary Committees in pursuance of Council's resolution of May 29th last.
To consider the following subjects:—
(1) The Report of the Royal Commission on Local Taxation (if issued).
(2) Agricultural Insurance.

Associated Chambers and Clubs are requested to consider the above subjects, and to send up any resolutions which they may pass thereupon to the Secretary of the Central Chamber before the Meeting of the Business Committee, at 8 p.m. on Monday, November 5th, 1900. Suggestions of subjects for discussion at future Meetings of the Council should be forwarded at the same time.

ERNEST H. GODFREY, Secretary.

LINCOLNSHIRE AGRICULTURAL SOCIETY.

ALTERATION OF DAYS FOR BRING EXHIBITION.

The Exhibition of the Lincolnshire Society will be held at Brigg, on THURSDAY, FRIDAY, and SATURDAY, the 11TH, 12TH, and 13TH of JULY, 1901.

AUCTION SALES.

IPSWICH.

FOURTEENTH ANNUAL SALE OF SHORTHORN BULLS.

TUESDAY NEXT, NOVEMBER 6TH, AT 12.30 P.M.

ROBERT BOND and SONS will SELL by AUCTION, at their SALE YARD,
30 GRAND YOUNG SHORTHORN BULLS, from 10 to 18 months old, mostly roans, with plenty of hair and bone, bred in the best Shorthorn Districts of Cumberland and Westmoreland, noted for their milking strain.

Catalogues on application.
Auctioneers' Offices: Old Bank House, Ipswich.

AUCTION SALES.

ROTHERHITHE, within about three-quarters of a mile of the Tower Bridge, near the entrance to the proposed new Rotherhithe and Ratcliff Tunnel and the Surrey Commercial Docks.—Very extensive Freehold Riverside Premises and Steam Flour Mills, fitted with valuable modern plant and machinery on the roller system, with granaries, warehouses, engine and boiler houses, dwelling-houses, yards, stabling, etc., now and for many years past in the occupation of Messrs. J. B. and T. H. Perks, and for sale, in its entirety, with possession on completion of the purchase. The property possesses the important frontage to the Thames of about 96ft. 6in., with wharfage and lay-by for barges, frontages of about 98ft. 9in. on the north side, and 109ft. on the south side of Rotherhithe-street, also a long side frontage to Gilham's-court, the total ground area being about 18,000 square feet, exclusive of the site of the old mill stream, which extends to Paradise Street in the rear, and has an area of about 7,400ft. super. The property, from its considerable river frontage, situation, and extent, would also be suitable for wharfingers, timber merchants, large manufacturing premises, electric engineering works or other purposes.—Messrs.

DEBENHAM, TEWSON, FARMER, and BRIDGEWATER will SELL, at the Mart, Tokenhouse Yard, London, on Tuesday, November 27, at 2, in one lot, with possession, the exceedingly important FREEHOLD PROPERTY known as Rotherhithe Mill, and 9, 11, and 13, Rotherhithe-street, together with the whole of the valuable fixed plant and machinery. The premises comprise on the north side of Rotherhithe-street and abutting upon the River Thames a range of three two-storey granaries, all communicating, and dwelling-house adjoining; on the south side of Rotherhithe-street an open courtyard, with double entrance gates, extensive mill-house of five floors, with all necessary rolling and other machinery, gearing and accessories, engine and boiler houses, with 25-horse power beam engine and two horizontal boilers, tall chimney shaft, mill stores, yards, stabling for thirteen horses, coach-houses, large van shed, harness room, man's rooms, and loft, a dwelling-house, No. 26, Gilham's-court, piece of vacant ground adjoining, also the old mill stream and water course from the River Thames. The mill premises communicate with the waterside granaries by an iron bridge over Rotherhithe-street.

Particulars of Messrs. HARRIES, WILKINSON, and RAIKES, Solicitors, 38, Nicholas-lane, Lombard-street, London; and of the Auctioneers, No. 80, Cheapside, London.

"MARK LANE EXPRESS" OFFICE, 1, ESSEX STREET, STRAND.

SILCOCK'S CALF REARING.

CALF MEAL

To rear Calves economically and profitably use SILCOCK'S SOLUBLE CALF MEAL. Thousands of Calves are reared on it annually; it is a true milk substitute, is very easily digested, dissolves at once in water, gives least trouble in preparing, does not scour, is very economical in use, as one pint makes one gallon of thick gruel, and it fits early for cake feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter-milk, and whey the figures stand at 12½, 9, and 6 per cent. respectively. With the minimum of cost and trouble SILCOCK'S CALF MEAL gives the maximum results. Use SILCOCK'S SOLUBLE CALF MEAL, feed regularly, in right quantity and at correct temperature and you will have little trouble in rearing paying calves.

Price, 12/6 per cwt., carriage paid. 5 cwt. lots, 12/-.

R. SILCOCK & SONS,

BIBBY'S

"CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the "Cream Equivalent" fed Calves as having been fed on New Milk.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

SOLE MANUFACTURERS:—

J. BIBBY & SONS,
Exchange Chambers, Liverpool.

MACKINDER'S PORRIDGE MEAL FOR WEANING CALVES.

Price 11s. per cwt., free at all Stations.

See directions for use. Testimony from every county.

Wm. Joscelyn, Esq. (Suffolk), writes:—"I find my calves do better on your Porridge Meal than anything I have ever used."

Mr. Harry Fidler (Wilts) writes:—"Your Porridge Meal keeps calves remarkably clean, mastering the one great difficulty in calf-weaning."

OUGHT COAL EXPORTATION TO BE PROHIBITED?

The Manchester Chamber of Commerce is about to take into consideration this important question. Last Wednesday at the usual quarterly meeting the President, Mr. Thompson, reported that a proposal made by Mr. Harwood, the member for Bolton, dealing with it, was not put on the agenda for discussion because the directors were of opinion that they ought to have much more information than they at present possessed as to the magnitude or diminished supply of coal according to the estimates of the best authorities before taking action. The motion was to the effect that an export duty ought to be imposed on coal, on the ground that it is a product urgently required by the nation to be utilised at home. The consideration of the question was therefore adjourned, but will be fully discussed at the next meeting, if meantime the board can obtain satisfactory facts on the all-important point stated.

This is a matter vitally affecting the interests of agriculturists, as well as those of the manufacturers of Lancashire. In fact, it is one which more or less concerns everybody, although, of course, those who use steam engines suffer most in a pecuniary point of view, when coal is so abnormally dear as it has been since last winter. During the whole of the past half century the great part of the farmer's corn has been thrashed by steam-driven machines. The flail was thrown aside in numerous cases for the horse and hand-worked machines in the forties, but the greater economy of thrashing by steam thoroughly asserted itself in the fifties, since when the marvellously artistic combined machines have come extensively into use on all the larger farms, which not only thrash but winnow and grade the grain, consign it to sacks which ring a bell for removal when filled to a given weight, and, if requisite, deal with the straw likewise, by chaffing it.

This is only one example of the omnipotence of the steam engine on the farm. The cultivation of the soil itself is not, it is true, carried on so extensively by the agency of steam as the advanced agriculturists of the sixties and seventies desired, but there are still large acreages in many parts of the kingdom where it prevails, and the dearness of coal is felt to be a harassing, fresh impost bearing on the farmer's already too heavily weighted circumstances. Indeed, we have heard of cases where farmers having steam tackle of their own, ready for action, have this year allowed it to remain idle, through dread of the magnitude of the coal bill. At numerous farm homesteads the preparation of food for stock, and the performance of well-nigh all other important work, has long been rendered easy by putting the steam engine in action. But if the high rates now demanded for coal are at all likely to remain permanent, vapour power engines will have to be substituted for steam engines, or horse gear wheels will once more come into fashion; the misfortune being that all such important changes involve heavy expenditure, which few farmers in the present depressed times can afford to make.

The information which the directors of the Manchester Chamber of Commerce are desirous of acquiring is therefore precisely what farmers would like to know: Is the scarcity and dearness of coal due to the natural falling off of supply, or to the artificial rings and combinations of pit-owners and merchants? We trust that it will be found to be largely due to the scheming machinations of the latter, in which case the chief difficulty to be grappled with seems to be whether some means cannot be devised to prevent these severe privations and sufferings of the public at large being permitted for their special aggrandisement.

Should the result of inquiry prove that the coal supply is in reality failing the Legislature ought at once to be appealed to, that action may be promptly taken either to impose an export duty on coal, or to prohibit altogether parting with to foreigners a commodity we want so badly. Probably it will be fresh in remembrance that Mr. T. Duckham, the veteran ex-M.P. for Herefordshire, some months ago proposed the latter alternative, and his letter, which had extensive circulation, contained figures showing how enormous the exports of coal have become both direct and indirect, large quantities going into foreign ships at the coaling stations. Seemingly the adoption even of the latter stringent measure should not be

refrained from if there is the slightest danger of present coal-bearing veins being worked out in the century. If there is no danger of that kind the plea may still be raised and be held to be a perfectly legitimate one, that we cannot afford to allow the vast volume of export to swell still bigger unchecked, and that while an impost on foreign purchases will be the best check, it would at the same time add to the National coffers and prevent home taxation.

"Oh," but it is said, "this would be against the principles of free trade." Most assuredly it would if by free trade is meant universal licence to traffic in anything and everything, which we are very far from permitting at present. The true way to look at the matter is, Would a starving man, having as yet a loaf of bread in his cupboard, part with half of it to another who would buy it, or even if he were not starving, but knew that his supply of bread was becoming limited or uncertain, would he not scrupulously keep for himself the little remaining regardless of sentiment or the violation of a political Shibboleth? Coal is almost as necessary a commodity as bread itself, and a coal famine would prove a disaster for the British nation such as we dread to contemplate.

May we not depend, then, on our Central Chamber of Agriculture co-operating with the Manchester Chamber of Commerce in dealing with this matter? No more important one, even in the interests of the farming community, could possibly be considered. There was very intimate co-operation between Chambers of Commerce and those of Agriculture a few years since in opposing the unnatural rates sought to be imposed by the railway companies. Let there be now similar united action in defeating the monopolists and rings if it be their nefarious handiwork that we suffer from. But if there should be real danger of a falling off in a commodity so much wanted, let town and country join hands in ceaseless agitation until the Government adopt Mr. Harwood's proposition.

SAMPLES.

By a Man of Mark Lane.

The Money Lenders Act, passed by the late Government, came into force on Thursday. This Act restores the practice of the Courts of Equity to give relief against money-lending bargains that are shown to be unconscionable. Its working will be watched with incessant interest, because every bargain must be judged by its own circumstances. That power to reopen transactions and determine what is fairly due in respect of principal, interest, and charges is combined with penal provisions of which the necessity might not have been seen but for the fertile ingenuity of the late Isaac Gordon. Every money-lender is to register his trade name and all his addresses, is not to carry on business otherwise than as he is registered, and if he offends is liable to a fine of £100 for the first offence, and another fine with three months' imprisonment for the second.

A borrower, too, is given the right to obtain a copy of any document relating to his transactions on payment of reasonable expenses. Fraudulent misrepresentation—dishonest concealment of material facts, or the holding out of false inducements by any money-lender or his agent—is now a misdemeanour, and renders the offender liable to imprisonment for two years, with or without hard labour, or a fine not exceeding £500, or to both.

A deputation representative of local authorities in Kent and Sussex waited upon the directors of the South-Eastern and Chatham Railway on Wednesday, and called their attention to what they described as the unsatisfactory character of the company's passenger and goods services. Mr. Cosmo Bonsor, Chairman of the Joint Managing Committee, agreed that the deputation had stated a strong case, but pointed out that the company had been making efforts to remedy the grievances of which they complained. They had ordered large quantities of rolling stock and a number of locomotives at a cost of more than a million sterling. The war, however, had delayed the output, the contractors having first to do the work of the Government. The directors were doing their best, and he firmly believed that in a reasonable time they would bring about an improved condition of things. Mr. J. S. Forbes also replied, explaining the difficulties with which the directors have to contend.

The *Statist*, in discussing Argentina affairs, says that the floods in that republic chiefly affect the southern part of the province of Buenos Ayres—that is, the region served by the Buenos Ayres Great Southern Railway Company—and the falling off in the traffic of that company shows how serious has been the damage done. Of course, a good deal of the loss of traffic really is not loss in the strict sense of the word, but is merely a postponement of traffic that will have to be marketed by and by. The country being inundated it is impossible to carry the goods; and where those goods have not been spoiled they will be sent to market when the occasion serves. The district is practically pastoral. Therefore the crops are nearly a negligible quantity; and although, doubtless, there has been a good deal of loss both in the case of sheep and of cattle, still sheep and cattle can be driven away, and therefore the losses now occurring will be made good by and by.

Our contemporary adds that "it is curious to find that while the falling off in earnings is so great in the case of the two Buenos Ayres railways, there is an actual increase in the case of the Rosario Company. The wheat and the maize crops are promising well. There is no talk, as yet at all events, of locusts, and the pastoral industry is likewise beginning to improve. It has suffered undoubtedly from disease and from the prohibition of importing live cattle into this country. But the dead meat industry is growing rapidly."

On the other hand, the *Economist* takes a somewhat modified view of the position in the Argentine. It remarks first that the gold market is slowly but steadily yielding to the unusually promising aspect of the immediate agricultural future, as the wheat and flax crops promise the largest yield on record in this country. There are many experts, however, who consider that both the crops in question are much too far grown for the season, and unlikely—at least, the wheat—to prove of as good quality as last year's crop. It is feared that the wool clip—the backbone of the country—will be very short, and of inferior quality this year, and if it should prove so, the increased production of cereals will go but a short way towards filling the void created by a short and inferior wool clip."

According to the monthly Indian tea crop report the out-turn last month was good in Assam normal in Cachar, the Duars, and Terai, and poor in Sylhet. In Assam and Sylhet immediate prospects are fair, while in Cachar, the Duars, and Terai they are bad. In Darjeeling the season is practically closed. In all the districts cold weather has generally set in.

News from Queensland is unfavourable, according to the *Statist*. No rain has fallen for many months, and grievous accounts are being received of the damage done. "At the same time the injury is not universal, for we hear of some extraordinary cases, even in the districts which are reported to have suffered most, where there has been no extraordinary mortality amongst sheep, and where, indeed, in many cases sheep have been fattened and sold at good prices. In the north of New South Wales there are also complaints that more rain is wanted. But in the southern half the season is excellent, and people are looking forward much more hopefully. The important thing is that the drought has now come to an end everywhere except in Queensland and northern New South Wales, and that even in the latter district there have been good rains." Now that there is a revival of confidence, that trade is very much better, that the seasons are fairly good, and that confederation is effected, we may hope for a strengthening of credit and a gradual increase of prosperity.

Movements in the prices of the articles produced in our principal centres of industry are of considerable interest just now, since they afford a fairly accurate indication of the course of trade. There has been a very appreciable setback in the average level of prices during the past month, and from the directions in which the decline has manifested itself there can no longer be any doubt as to the slackening of activity in some important branches of our national industries.

The receipts on account of Revenue from April 1st, 1900, when there was a balance of £3,517,047, to October 27th, 1900, were £58 610,199 against £57,492,946 in the corresponding period of the preceding financial year, which began with a balance of £8,919,173. The net expenditure was £103,932,700 against £64,333.854 to the same date in the previous year. The Treasury balances on October 27th, 1900, amounted to £2,406,345, and at the same date in 1899 to £3,048,985.

AGRICULTURAL POLITICS.

By a Lobbyist.

It is certainly not difficult to comprehend the thought which induced the newspaper quidnuncs, speaking with no authority whatever, to declare that Mr. Walter Long would be sent to the Irish Office as Chief Secretary. The most important work connected in the near future with the Irish Office will be the development of the agricultural department, and the initiation of a career of usefulness on sane and diplomatic lines. Mr. H. Plunkett being removed from the House of Commons by electoral defeat, what better man—so argued these quidnuncs—could undertake the work than Mr. Long, a politician who had revealed a practical comprehension of agricultural necessities?

Besides, Lady Doreen Long comes of a family which has given to Ireland some of its best landlords; and, moreover, she possesses that delightful insouciance and bright vivacity which never fail to charm and even fascinate the Celt. On the whole, indeed, it was not a bad guess. Had the story only been true, the first two appointments which Lord Salisbury made would have been of Wiltshire men.

It is a singular fact that the denudation of our village life should have, while seemingly a matter of unimportance to the villages themselves, suddenly thrust itself as a matter of strident importance into urban municipal politics. It was the famous Dr. Guthrie who spoke of our great towns as beacons of liberty in the path of national progress. Shall we yet have to acclaim the towns as the saviours of the villages, and the saviours in spite of the villages themselves?

Now, during the municipal contest in London one of the questions discussed with keenest anxiety was how to prevent the continual flow of the tide of human life into the metropolis—a tide which has no ebb, and which in its unceasing regularity is embittering the conditions of life, is emphasising the poverty of the poorer districts, and is accentuating with a tragic significance the grave question of how to house the poor.

To Lord Rosebery rather than Mr. Chaplin—the honesty of whose intention I, however, frankly confess—must we attribute the practical significance which has been given to this question. The Lord of Dalmeny may not altogether echo the opinion of that sage philosopher Mr. Frederic Harrison, that the population of the economically-perfect city should never exceed two millions; but at least he does perceive that unless some steps be taken to relieve the terrible congestion of life in the British metropolis we shall have created for the future a grave social and domestic danger.

So serious is this matter, indeed, that it is the duty of our statesmen to suggest not mere palliatives, mere anodynes, after the manner of Mr. Chaplin, but panaceas. The worst of Lord Rosebery's methods is that he only points to the danger without suggesting the remedy. He is, in fact, a pessimist rather than a statesman.

Of course, the question, so far as the London municipal elections are concerned, has been

not as to how the denudation of the villages can be arrested, but as to how, while damning the tide of oncoming people, a continual outflow from the metropolis can be created. The London politician has, for instance, placed a fascinated vision upon the wide reaches of Essex, which he regards as calculated to yield a health-giving home to migrating Cockneys.

However, the principle, once adopted, cannot be limited in its application. If once you, for the sake of the social sanity of town life, proceed to devise means for a systematic migration to the villages, you will soon proceed to devise means for the retention of villagers in the villages. The one is the inevitable corollary of the other. Hence the importance which the question has suddenly attained in municipal politics is an incident which is full of hope. It is, in a word, a portent. Mr. Rider Haggard would, I am thus persuaded, do well to encourage this departure on the part of the town politician.

If Lord Rosebery ever again secure the reins of power he will—and I am speaking with some authority on this matter—direct a clear attention to the housing of the poor, not merely in the towns, but in the villages. In this connection he, I know, regards Mr. Chaplin's proposals as hopelessly inefficient. The conditions under which housing accommodation could only be provided under the scheme of the late Government would, in his view, prevent any serious good resulting from it. In Lord Rosebery's opinion the villager who is driven from his situation, perhaps from the place of his birth—and there is not a county in England in which incidents of this kind are not being continually reproduced—because of his inability to secure a home at a fair and honest rent, is the victim of a circumstance which is a disgrace to the State and to its civilisation.

The careful politician may already perceive in any attempt to remedy this evil a serious growth of the rates. This is a suspicion which may prove unfounded. The provision of houses under the communal system may prove a good investment. At all events, the tide of migration—a migration due originally to the alluring attractions of the great towns—ought not to be malevolently increased by a refusal to provide proper sanitary cottages. This, I repeat, is Lord Rosebery's view. But is his lordship also disposed to continue posing as a political Laodician, as a man never anxious for the responsibility which comes with authority?

By whom will the taxes rendered inevitable by the war be borne? This is a question which will soon become of serious political moment, and, particularly, to the farmers. Already the brewers have placed themselves into a defensive attitude. Why should not the farmers? I can tell the agricultural leaders that suggestions are being made of an alteration in the application of the income tax which would mean a serious financial infliction upon rural cultivators. There are limits, for instance, at what is described as the "unwisdom" of permitting certain abatements. It may be that the authors of these suggestions are not men of position in the world of statecraft. It would, however, be a mistake to altogether neglect them. A whisper sometimes compels attention by its pertinacity.

THE DAIRY.

Preston Cheese Fair.

This monthly cheese fair was held on Tuesday. There was a good attendance, and an unusually large supply of cheese, the market being flooded with produce that had been held in the anticipation of realising higher rates. The pitch consisted of 125 lots, comprising 2,024 cheeses, an increase of 53 lots and 811 cheeses, compared with the corresponding fair last year. The demand was slow at prices showing a decline of 2s. 6d. on those obtained last month. Quotations:—Common, 50s. to 55s.: medium, 57s. 6d. to 60s.; best, 65s. to 72s.

Suicide of Two Hampshire Farmers.—Two well-known Hampshire farmers have hanged themselves within the past few days—Mr. John Freeman Sheppard, of Swaythling, and Mr. William Bowden, of West Tytherley. A verdict of "Suicide during temporary insanity" was returned in each case.

PRACTICE WITH SCIENCE.

The National Diploma of Agriculture.

The National Agricultural Examination Board, which is appointed by the Royal and Highland Societies, has issued the regulations and syllabus of the 1901 examination for the National Diploma in the science and practice of agriculture. The examination will take place in the Great Hall of the Yorkshire College, Leeds, on Monday, May 6th, 1901, and five following days. It has to be taken in two parts, the first comprising mensuration and land surveying, agricultural botany, general chemistry, geology, and agricultural entomology; and the second practical agriculture, agricultural book keeping, agricultural chemistry, agricultural engineering, and veterinary science.

A candidate will not be entitled to take both parts of the examination at one time. A year at least must elapse between the passing of the first part and sitting for the second part; and the second part must, except with the special permission of the Board, be taken within two years of the passing of the first part. A deposit of £1 will be required from each candidate for each part of the examination. This deposit will be returned only to those who at the first attempt obtain pass marks in all the subjects included in that part. The Board may at their discretion allow an unsuccessful candidate to sit for one subsequent examination in the same part without payment of a further deposit.

Forms of application for permission to sit at the examination and also copies of the syllabus may be obtained from either Sir Ernest Clarke, Secretary, Royal Agricultural Society of England, 13, Hanover Square, London, W., or Mr. James Macdonald, Secretary Highland and Agricultural Society of Scotland, 5, George IV. Bridge, Edinburgh.

Experiments on Spraying Charlock in North Wales.

The Agricultural Department of the University College of North Wales has now issued a report (written by Professor Winter) on the experiments on spraying charlock in corn carried out this year. The experiments were conducted at the following three centres in Carnarvonshire: Penrhyn Home Farm, Bangor, Right Hon. Lord Penrhyn; Lonisa, Llandegai, Bangor, Messrs. O. and J. Williams; and Henfaes, Aber, Mr. John Griffith; and the plan of the experiment was as follows: Plot I., 50 gallons of a 2 per cent. solution of sulphate of copper per acre; Plot II., 50 gallons of a 3 per cent. solution of sulphate of copper per acre; Plot III., 25 gallons of a 4 per cent. solution of sulphate of copper per acre. The plots were each one-eighth of an acre in size, and the dressings were applied by means of Strawson's Twinspray machine. Sulphate of iron was not used in 1900, as it utterly failed to produce any result in 1899. The spraying was carried out by two members of the College staff, and each centre was visited at intervals on three different occasions.

Professor Winter's remarks on the various plots are given below:—

Penrhyn Home Farm.

When the plots were sprayed on May 23rd the charlock plants were vigorous and thick upon the ground, but none of them were in bloom. On May 29th the corn (oats) was considerably tinged on all the plots, but the charlock was only partially affected. On June 6th the corn had recovered and looked even better than on the surrounding parts of the field. There was a fall of rain on the evening of May 23rd which, it was thought, might have affected the action of the copper sulphate, so one-half of each plot was redressed on May 31st with a 1 per cent. solution of sulphate of copper at the rate of 50 gallons per acre. On the subsequent visits it was noticed that this second dressing had succeeded in checking the growth of charlock to a considerable extent, although the plants were far from being entirely destroyed. The other portions of the plots were not much affected, Plot III. being the least satisfactory.

Lonisa.

At this centre the plots were sprayed on June 1st. The weather was fine, and remained so for a considerable time. The charlock was very thick on all the plots, but the plants, a few of which were in bloom, were not very strong. The dressings had a considerable effect on all the plots, Plots I. and II., which received 50 gallons per acre, showing the best results. On these about 60 per cent. of the charlock was destroyed, and a large number of the plants which remained were stunted and less vigorous than those which had not been sprayed. The leaves of the corn (barley) were considerably damaged at the time of spraying, particularly on Plots I. and II., and did not recover for about four weeks.

Henfaes.

The solutions were applied on May 25rd. The charlock plants were not so thick on the ground as at the other centres, but there were a large number of plants of the smooth-leaved wild turnip (*Brassica campestris*). Some of them were in bloom. When visited on May 29th, the true charlock was considerably damaged, particularly on Plot II., least of all on Plot III. The leaves of the wild turnip were only slightly tinged, and the spraying did not appear to have checked its growth. On June 20th, when the plots were again visited, very few true charlock plants could be found on Plots I. and II., and several of these appeared to have come up after the spraying was done. The old plants, which had not been destroyed, appeared weak and stunted and not likely to produce much seed. On Plot III. the charlock appeared to have quite recovered from the effects of the dressings, which apparently had been of little use. The barley was much damaged at the time of spraying, but it recovered, and in a little while looked as well as the crop on the adjoining land.

Conclusions.

It cannot be claimed that any one of the dressings was entirely successful, for all failed to destroy the charlock. On Plots I. and II., which received 50 gallons per acre of a 2 per cent. and of a 3 per cent. solution respectively of sulphate of copper, the dressings destroyed a large proportion of the weed, possibly about 60 per cent. of it, at two of the centres, and checked the growth of the remainder. The 3 per cent. solution being most effective. The poor results obtained on Plot III. show that even when a strong solution is used, it must be applied in greater quantity than 25 gallons per acre, if it is to be successful. The results were on the whole rather disappointing. Although the conditions were very favourable at two of the centres, the dressings were only partially effective. In 1899, 50 gallons of a 2 per cent. solution of sulphate of copper gave the best results, but only succeeded in destroying part of the charlock. In 1900, the results were very similar. Where the wild turnip occurred, the results were also the same as in 1899, further tending to prove that the charlock plants are attacked because the dressings adhere to their rough leaves, while the smooth-leaved plants are but little affected. The corn at the different centres was discoloured more than was the case last year, but at no centre did the crop appear to ultimately suffer. The grass and clover seeds growing in the corn at two of the centres were also unaffected by the dressings, indeed at one place they appeared to have been improved. Although the results have not been so favourable as some obtained elsewhere, they yet show that the operation is one which will do much more than repay the outlay, and justify the belief that if the spraying be carried out for a number of years the charlock will ultimately be got rid of.

A "Cattle King" Sent to Prison.—Arthur Horsley, a fireman, was sentenced to eighteen calendar months' hard labour at the Suffolk Quarter Sessions, Bury St. Edmunds, on the 23rd ult., for obtaining money, etc., by false pretences at Moulton, near Newmarket. The prisoner passed himself off as a "cattle king," and was driven round to see sheep flocks. He promised marriage to a young lady, whose father gave up his situation on the promise of one pound per week from the prospective son-in-law, and also promised to make an employé at the Jockey Club steward on his estate.

Adulterated Milk and Butter Cases.—At the Thames Police Court, on the 26th ult., John Wildin, 67, Woodgrange Road, Forest Gate, was charged with selling milk adulterated with 21 per cent. of added water. Mr. Milner Jutsam prosecuted on behalf of Mile End Vestry. On Sept. 24th Mr. Cox, sanitary inspector, purchased a sample of milk at defendant's shop, 222, Bow Common Lane, and on being analysed it was found to be adulterated as stated above. Defendant said he sold the milk as he purchased it, and he had a warranty. Mr. Jutsam pointed out that the warranty was dated 29th September, whereas the sample was purchased on the 24th. Mr. Dickenson, having heard defendant had already been convicted under the Adulteration Act, imposed a penalty of £10 and 25s. cost. On the same day, at the North London Police Court, Mr. Bramall, solicitor to the Islington Vestry, prosecuted in several cases under the Foods and Drugs Acts. The following were the principal convictions:—David Jones, of Benwell Road, Highbury, for exposing margarine for sale without the printed label, fined £10, with 12s. 6d. costs.—Sidney Charles Hopkins, of Fonthill Road, Holloway, for selling as butter a substance containing less than 80 per cent. of butter fat, was fined £5, with 12s. 6d. costs.—Frederick Johns, of Shepperton Road, who was charged with a like offence, said that the business was not his, but his sister-in-law's. Mr. Fordham said the defence failed, and he imposed a fine of £10, with 12s. 6d. costs. Mr. Fordham said that it was a very bad offence to cheat poor people in articles of food, but it seemed very difficult to stop the practice.

Foreign Notes.

Nuremberg.

Not much change is observable in the position of affairs in this market. A steady demand continues for exportation, principally for Continental consumption, and at the same time local consumers are operating rather more freely, so that values are well maintained and the general tone of the trade is healthy and strong. The tendency is, therefore, rather in favour of sellers, and as supplies are falling off to some extent, it appears more than probable that quotations will be raised as the season advances.

Munich.

Although the arrivals of the past week have exceeded the sales, and the stocks in hand are therefore increased, holders show no disposition to force business, but are firm at recently current quotations. The prices now being asked are approximately as follows:—Holledaus of good quality, 145s. to 148s.; Franconians, medium, 150s.; Spalt and Kinding, 165s. to 170s.; Badens and Wurtembergs, 135s. to 140s.; Saaz, 185s.; Auschas, 175s.; Styrians, 165s.

France.

In the Department du Nord, the chief hop growing district, business continues to be lively, the demand being in excess of the supply. Prices have, therefore, moved upward, present quotations being firm at 120 francs (nearly 100s.) per cwt. In Burgundy activity prevails, but business is limited by the small parcels on offer, which sell freely at 110 to 120 francs.

The second hop fair of the season was held at Dijon, October 20th, when there were a large number of transactions at advanced rates. Planters were generally indisposed to sell, and those who are holding their growths are now demanding 125 francs.

French imports of hops for the first nine months of this year show a substantial increase upon the corresponding periods of 1899 and 1898, the exports of native growth also somewhat exceeding those of last year. The consumption of hops in France increases annually in proportion to the growing taste of the town populations for beer, and there is a prospect that eventually the hop trade in that country will become important.

Belgium.

A large amount of business has recently been done in the country districts of Alost and Poperinghe at improved prices. Buyers are offering, but can hardly induce growers to accept, 100 francs. Comparatively small quantities now remain in first hands, it being estimated that four-fifths of the crop has been disposed of. The speculation market at Brussels is equally animated and firm, with a distinct tendency towards higher values, both for present and future deliveries. It is a singular fact that only in Belgium are hops dealt with in this speculative manner, a large business being done in "futures," after the fashion usually adopted on the various Stock Exchanges. I do not refer to it as an example worthy of imitation, as such a system seriously disturbs and deranges the legitimate trading to which this produce should be confined.

America.

The amount of actual business passing in New York market is comparatively small, both dealers and brewers evidently endeavouring by their abstention from buying to check the upward movement of values which is possessing the minds of growers. But apart from the surface indication there is an undercurrent of strength which must soon make itself felt, and will result in a general advancement of quotations. Both on the Pacific Coast and in New York State holders are extremely firm in their demands, and resolutely decline to entertain any offers below 17cwt. to 19cwt. A curious hindrance to business has arisen in the scarcity of baling cloth, which can hardly be obtained at any price. The lack of it is creating great inconvenience both to planters and dealers.

More extended knowledge of the situation, both with regard to the new crop and the stocks left over from last year, confirms previous conclusions that statistically there should be no surplus available for export from the U.S.A. But figures do not always rule, except those that have a money value attached to them, and if the higher quotations created by the small English crop offer any advantage to American merchants, it is certain that hops will be shipped. We may, however, be quite certain that shipments to this country will be very limited, for the American brewers cannot afford to allow themselves to be denuded of their necessary supplies, and any indication of an important movement of hops to our market will be promptly closed by advanced local offers. The crop is too small to be neglected or trifled with, and there is no doubt that the trade in this produce between America and England will this season be reduced to a lower point than has been known for many years.

(*For Hop Market Reports, see pages* 591, 593.)

**All official reports and notices of the National Association of English Hop Growers will be printed in the* Mark Lane Express, *which will also contain all current information likely to be of interest and benefit to the members of the society.*

Pontefract statute hirings were held on Thursday, when quite as much business was done as in previous years. Farm hands all secured engagements at £1 to £4 advance, and domestic servants were eagerly engaged up to £15 10s.

Sir John Bennet Lawes, of Rothamstead, Herts, and of John Bennet Lawes and Company (Limited), of 21, Mincing Lane, chemical manufacturers, who died on August 31st last, aged eighty-five years, has left personal estate of the net value of £565,242 0s. 1d. His will bears date June 5th, 1899, with codicils of July 9th and August 30th last, and the executors and executrix are his son, Sir Charles Bennet Lawes, his granddaughter, Miss Everilda Creyke, of 3, Seamore Place, and Mr. Thomas Bennett, of 21, Mincing Lane. The testator left to his son the studio in Chelsea Gardens, and his personal and household effects, and 400 fully-paid shares in J. B. Lawes and Co. (Limited), and he bequeathed the remainder of his shares in that company to his grand-nephew, Eustace Henry Tylston Hodgson, and his grandchildren, Lilian Hodgson, Everilda and Diana, and Sylvia Creyke, and Walter Launcelot Creyke. The testator appointed as trustee of his colonial property in Australia Mr. Frederick Bolton, and he left the proceeds of sale of his colonial property, and the residue of his estate in trust as to one half for his son and as to the other half for his said five grandchildren. Mr. Bennett and Mr. Bolton may receive such remuneration as the executors think proper, and the depositors in the Harpenden Savings Bank are to have the option of leaving their deposits, carrying interest at the rate of 4 per cent. for not exceeding two years. The gross value of the whole of the late Sir John Bennet Lawes's estate has been entered at £583,115 2s. 10d.

To Hop Growers.—Users of Wire Work should buy the Best English Galvanised Steel Hop Strand, made by Rylands Bros., Ltd., Warrington, Lancs. For prices, &c., apply to their London office: 86, Leadenhall-street, E.C.; or their Sole Agent for Kent and Sussex, Mr. Edward Ball, 3, Newstead-road, Lee, S.E.—[Advt.]

BARLEY AND MALT.

By Hordeum.

The Barley Shows.

In Table II. last week the lowest weight of British grain should have been 52·1 lbs. per bushel, not 58·1. Had there been room for Table III. the error would have been set right at once, although it was quite sufficiently obvious.

The following table furnishes the weights of the samples shown for four years, and gives in a very simple and useful way the comparative and relative weights of the British and foreign exhibits for each year.

Table III.

Weights per Imperial Bushel, 1897-1900.

		1897. Number weighed.		1898. Number weighed.		1899. Number weighed.		1900. Number weighed.

43	42	—	—	—	1	..	—	—	—
Total		87	23	139	28	174	21	151	8

Notwithstanding the much greater care given this year to dressing, it is obvious the general weight of barley is lower than for several years past; still it is satisfactory to note that 110 samples weigh 56lb. and upward, with only forty-one lower than that weight. Of these no less than sixteen were within half-a-pound of 56lb.

The actual weights of highest and lowest, the mean (or true) average for all the entries of each and every county, and the distribution of the weights amongst the varieties of seed grown, separating the prize-winning samples, and in accordance with the dates of sowing, furnish several tables of unusual interest. Space precludes setting them out in the simplest form to follow with ease, but anyone interested in the matter can readily compare the separate tables when published.

The following table (IV.) shows the highest, lowest, and average weight for every county represented, with the number of samples actually weighed:—

Table IV.

Weights.

County.	Number of Samples weighed.	Number of prizes won.	Highest weight per bushel.	Lowest weight per bushel.	Average weight per bushel.
	No.	No.	lbs.	lbs.	lbs.
Bedford	14	4	58·0	56·1	56·8
Berkshire	8	2	58·0	56·0	57·0
Buckingham	4	2	59·1	57·9	58·4
Cambridge	1	—	54·5	—	54·5
Cornwall	1	—	53·9	—	53·9
Devon	12	2	59·8	57·7	58·3
Dorset	5	2	57·6	55·9	57·0
Elgin	1	1	57·0	—	57·0
Essex	14	2	58·3	52·1	56·1
Gloucester	5	2	57·1	55·7	56·4
Hampshire	4	2	58·3	56·2	57·4
Herts	5	2	58·5	55·0	56·3
Huntingdon	2	1	57·3	55·5	56·4
Kent	4	2	58·3	55·8	57·2
Leicester	1	—	56·0	—	56·0
Lincoln	3	2	56·0	54·8	55·3
Middlesex	2	2	57·5	57·0	57·2
Montgomery	1	—	55·6	—	55·6
Norfolk	5	4	56·1	55·0	55·5
Northampton	4	2	56·8	54·4	55·9
Oxon	3	2	56·7	55·6	56·3
Rutland	5	2	57·0	53·8	54·4
Salop	3	2	58·7	57·1	57·8
Somerset	7	2	59·0	54·7	57·3
Suffolk	19	7	58·0	55·0	56·0
Surrey	2	1	56·6	54·8	55·7
Sussex	2	1	56·8	55·6	56·2
Warwick	6	3	57·5	55·8	56·9
Wiltshire	3	2	57·5	54·8	56·5
Worcester	3	3	58·0	55·1	56·6
Yorkshire	2	1	56·3	56·0	56·1
	151	60			56·6

The strange position in the list of a number of the counties was scarcely expected beforehand. That the heaviest samples from Cornwall and Cambridge should not go above 54·5lb. and the lightest from Devon should be 57·7lb. is most remarkable; and also it seems strange that Norfolk sent in no sample weighing less than 55lb. Eight counties

sent no sample of less than 56lb., whilst as many as twenty-three reach or exceed an average of 56lb.

It is sometimes urged that the weight of the samples sent to this exhibition are not a real guide to the weights of ordinary samples as marketed, but only within very narrow limits is this the case.

Happily, the encouragement to study weight in preference to quality is no longer given. Still, the fact remains that every improvement in quality, and especially in superior deliveries, must tend to foster weight. The average of good malting barley should be fully 56lb., and the true mean average of the whole of the samples works out at 56·6lb.

The champion sample weighed 57·7lb. The average weight of the sixty prize winners was 56·9, only eleven falling under 56lb.

NEWS NOTES.

At a meeting of agriculturists and townspeople at Mansfield on Monday it was unanimously decided to form an agricultural society for Mansfield and district. The meeting was convened by the Mayor (Councillor W. J. Chadburn).

The London offices of the *Sydney Morning Herald* and the *Sydney Mail* have been removed from 76, Queen Victoria Street, to 40, King Street, Cheapside, E.C., where files of these newspapers can be seen, and to which address visitors from Australia are at liberty to have their letters sent, care of Messrs. B. S. Lloyd and Co., the London representatives of the proprietors of these journals.

It is with regret that we have to record the death of Mr. William Smith, formerly of Woolston, which took place lately at Egginton, Leighton Buzzard. Mr. Smith had a long and trying illness, but he retained his mental powers as long as he lived. As to his special subject of steam cultivation we cannot but remember that he claimed to be "the father of steam culture." It may be worthy of note that Mr. Smith for many years subsequently used the same tackle exhibited by him at the Chelmsford Royal Show, and of which an anecdote is told in another column by Mr. Clare Sewell Read.

The Merchandise Marks Act and Foreign Meat.—Justices Lawrance and Kennedy on Saturday gave judgment in a case under the Merchandise Marks Act, in relation to the sale of foreign meat. A butcher of Blackpool had been summoned for selling as a leg of New Zealand mutton that which did not come from the Colony. The local magistrates, however, dismissed the information, being of opinion that the letters "N.M." on the invoice did not constitute a trade description within the statute, and that the facts did not disclose the application of a false trade description. The judges held that the magistrates were wrong, and sent the case back to them to be reheard.

A Destructive Farm Fire.—A destructive fire broke out on Sunday morning last at Strudes Farm, Wivelsfield, Sussex, which is in the occupation of Mr. W. Avery, a farmer widely known in the district, having represented the parish as Rural District Councillor, etc. The fire was discovered by a farm employé named Seymour, who lives in a cottage on the farm. He was awakened about four o'clock in the morning by a glow of light in his bedroom window, and, looking out, saw that a large barn was well alight. He raised the alarm, and assistance was speedily obtained. It was impossible to save the property alight, but the fire brigade effectually checked the fire spreading to other buildings, thereby rendering valuable assistance. The large barn, valued at £100, the property of the executors of the late Mr. Cecil Long, was destroyed, together with its contents of unthreshed oats and peas. A stack of meadow hay, containing about twelve tons, and a straw stack of about 200 trusses, were involved in the conflagration and destroyed. The produce was valued at about £160, and both owners and tenant are, luckily, insured. The fire, without doubt, originated in the barn, but the cause of the outbreak could not be ascertained.

Serious Farm Fire.—The second of what has been designated the "three in one series" of farm fires in the Cholmondeley district, broke out on Saturday morning on the premises of Mr. G. M. Shone, of Broomhall Bank Farm, Hampton. It was discovered by the tenant's brother, who, in the course of his early morning rounds saw flames issuing from the top of a bay in which had been placed the whole of the corn from about twelve acres. At the one end of the building some cattle were tied up, and so rapidly did the fire spread that before they could be released one of the cows was injured in such a manner that she had to be slaughtered. Others were more or less damaged. There was an unfortunate scarcity of water, the main supply having to be got from a neighbouring farm, but the fire was eventually got under hand. The building was destroyed, and the whole of the corn, the estimated damage being £600. The building, which is used for storage, is cut off from intercourse with the other portion, its two inlets only being closed. Only the usual ventilating interstices in brickwork were open, and this suggests at once the theory of incendiarism. The aggravating frequency of these farm fires is causing a considerable amount of uneasiness among farmers, who in many cases are known to get up in the middle of the night in order to assure themselves of safety.

LETTERS TO THE EDITOR.

New and Old Breeds of Wheat.

Sir,—I ask your permission for a short reply to the letter of Mr. Beddall in the MARK LANE EXPRESS of October 29th.

In my report on the Square Head and White Monarch wheats, I was careful to give full particulars of the cultivations and of the previous cropping of the land, and all I intended was to let agriculturists and others to draw their own conclusions from my statement of facts.

I am afraid age does not always bring wisdom, or I might be free from mistakes. Mr. Beddall mentions having grown Square Head wheat in 1871, and I will give him a date for reflection. I sold in 1855 forty-nine quarters of thoroughly winnowed Browick red wheat from seven acres of land, and I can go farther back than this, but if he is old enough to be my father, he must have been born so very early in this century that he may have forgotten all he learnt in his youthful days.—Yours faithfully,

HENRY H. CAVE.

Estate Office, Rugby, November 2nd, 1900.

Dead Leaves.

Sir,—It was only last week that a well-known scientific authority recommended farmers to burn all their couch grass and other root weeds, assuring them that all the mineral manure would be left in the ashes, and the small quantity of nitrogen that escaped into the air would probably descend again in a fertilising shower upon some neighbouring farm. And now we have Mr. Spencer Pickering blaming us for burning the leaves of the trees in our squares! In London, leaves begin to fall early in September, and a few remain on the trees until Christmas, so for nearly three months these leaves have to be swept up twice a week. What should we do with them, where could we stow them? In the parks there may be some out-of-the-way corner, but in a square no one would like to see a heap of rotting leaves from Michaelmas to Christmas opposite his front door. In this square we burn them early in the morning upon the broad gravel paths, and sow the ashes under the shrubs, and as there are a hundred kitchen fires all sending forth their black smoke, the burning leaves with their country smell and their curl of white smoke need hardly call forth the powers of the County Council to extinguish so small a nuisance. I would rather suggest that the newspaper boys, especially on Sunday mornings, should be suppressed.

Your faithful servant, CLARE SEWELL READ.

91, Kensington Gardens Square, W., Nov. 2nd.

Dead Friends.

Sir,—Death has indeed made a fearful raid among our practical agriculturists during the past month. In East Anglia we shall miss the stalwart form, the genial greeting, and sound practical genius of my good friend, Mr. Biddell. The farmers of the North have to lament the loss of that worthy business, liberal-minded man, Samuel Rowlandson, whose sun went down while it was yet day; and in the Midlands the original and vigorous champion of steam cultivators has been gathered to his fathers in a ripe old age. Well do I remember Smith, of Woolston, at the R.A.S.'s Chelmsford Show (I think some forty-five years ago) his rating us judges of steam ploughs, when he saw that his single roundabout cultivator must take a back seat when competing with John Fowler's grand set of double engine ploughs. Waving his hands above his head, he concluded his lecture with words to this effect:—"I don't ask you to give me a prize, I don't even look for a commendation, but I desire that you should let it go forth to all the world that Smith, of Woolston, was the first man who applied steam to the cultivation of the soil."—Your faithful servant,

CLARE SEWELL READ.

91, Kensington Gardens Square, W., Nov. 2nd.

A Polo Pony Stud Farm.

Sir,—I am glad to see that in your issue of this week you refer to the proposal of Sir Richard Green-Price in *Land and Water* to start a polo pony stud farm, and that you give Mr. John Hill's able letter on the subject. I can only say that I consider that the breeders of riding ponies, if no one else, should welcome Sir Richard's proposal with sympathy and enthusiasm. He has given us the broad outlines of a great scheme. The undertaking, if carried out—and I see no reason why it should not be worked out to a practical commencement—should in the future be of great use to all breeders of riding ponies. No doubt it would be carried out not only practically, but scientifically; and, being conducted on a fairly large scale, smaller breeders would benefit by the experience of the company. It is a good idea of Sir Richard Green-Price's that the company should be composed only of those directly interested in the breeding of riding and polo ponies. The shareholders would in this case meet with patience the declaration of a possibly small divident at the commencement. The proposer of this idea invited suggestions and remarks. As a breeder of ponies for the last ten years, and as a dabbler in the art, having thirty-seven ponies of all sorts, sizes, and ages on my farm at the present time, I take the liberty to make a few remarks, which I do with much diffidence, and with your kind permission.

It is not wise of us, and I doubt if we have the right, to damp, or try to damp, the ardour of enthusiasts. We should all work together for the common end—the breeding of high-class riding ponies. I am glad Sir Richard has admitted that a larger capital will be needed than he at first mentioned. I would suggest that such a large amount should be guaranteed at the start. Better have good backing at first, even though it is a smaller one. Mr. John Hill puts the price of the mares at £50 apiece. Can you get the right sort for that? I doubt it, especially as he recommends that each mare be quiet to ride and drive and, of course, sound. The stallions, too, whether thoroughbred pony or Arab, should be the very best procurable. Can they be bought for £100 each? But these are only details; yet I think for the scheme to succeed it is of vital importance that there can be to breed the highest class of pony possible at present; not improved mountain ponies, not nondescript stock suitable, it may be, in the future for the Government to buy for the much-talked-of Mounted Infantry.

But all these details will be mere child's play if only the main principles of this great scheme be well discussed and sympathetically met. I have been suggested to me that the idea is premature—and that it would be better if the breeding of the particular class of pony were left a little while longer in the hands of private breeders till the type be more fixed. Private enterprise is good, but an amalgamation of separate interests into a society is, I submit, far better. I therefore hope that this proposal of the president of the Polo and Riding Pony Society will meet with sympathy and success.—I am, Sir, yours truly,

D. B. MONTGOMERY.

Mursley, October 30th.

Progressive Education.

A correspondent sends us the following:—

"Baxter's Library of Agricultural Knowledge (then and still a standard work on agriculture), published at Lewes, in Sussex, in 1832, on the question of the education of the agricultural labourer, says:

1832.

"We do not esteem reading and writing essentially necessary for agricultural labourers.

"The important question is what is to be done with a child till he is wanted by the farmer at the age of nine, ten, and eleven.

"Indeed the very circumstance of there being too many labourers for the farmers to employ profitably, gives us the moral means of effecting a moral improvement among them.

"Those paupers who are maintained by the parish in idleness, might be employed in superintending and educating the children. Suppose there are five men in a parish constantly out of work. Give them a certain quantity of ground for a village school; let one teach them to read, another to write, another to dig, another to plough, another to carpenter, etc.

"What objection there is to this we never yet could learn."

They then go on to say:—"Our supernumerary men are good for nothing, not qualified for any useful purpose. But without some education the child is learning harm, educating himself for a pauper, a poacher, and for the Assizes.

They then continue: "The labourer is born like other men, and with the same faculties and powers, and if he had been born, and educated, a gentleman, he would have sat on the Bench. But as he is born and educated a pauper he stands at the Bar, a criminal.

"Again, why are the chief criminals of society (sic) found amongst the labourers?—because they are ignorant and poor: they have no property to protect of their own, and no principle to induce them to protect that of others—the majority of such burners cannot read."

Note. Burning of stacks and farm homesteads was very prevalent about this period, because the farmers were beginning to use machinery; I, myself, having been sworn in special constable, and at fourteen had to do night duty.

1894.

In this year I read in a shop window, not a hundred yards from the High Street, in Oxford, in the centre of the University:—

Bussness Garred on as Wswal
during alteration
also
Old Portrates.

1900

The following is an exact copy of an entry in a Sussex farmer's book, not twenty miles from Lewes, taken this year:—

"20 Oligus [illegible] of Jon P . . k for grafel anaten BobS's Coe."

Translation—

1900 7 August Deered 25 of Jon P . . k for Gravel and attending Bob S's Cow.

FARM PROSPECTS.

North Lancashire.

Weather is much too wet for farm work, and there is difficulty in making progress in lifting the good crops of turnips and mangolds. Ploughing is getting very much in arrears, and land too wet to allow of manure being carted freely. We have had very much rain the past six weeks, and really need a change to allow work to be concluded before frost sets in. Pastures are full of meat, but owing to the wet and cold nights most of the feeding cattle had to be housed earlier that otherwise would have been necessary.

Poor Cereal Crops.

Our surmises as to the results of the late harvest are fully borne out by the test of the threshing machine, and wheat will be quite 10 per cent. under an average yield. Oats show an even larger deterioration from an average crop, and barley is no better than we estimated it in August. Potatoes also, as lifting proceeds, show a larger percentage of disease than we anticipated in August. Fruit came off a very heavy crop, but price was extremely low, and in many cases would hardly repay the cost of gathering and marketing. Prices of both beef and mutton keep appreciably better than in former years at the same period, and graziers should be able to show a fair profit on the summer's feeding in spite of the rather high prices they had to pay for lean stock. – Exors. of the late Jos. Smith.

North Somerset.

At last we have had a good soaking of rain, which was very much needed by all classes of farmers. Most of the autumn wheat is planted, but the birds levied heavy toll. Vetches that are up look well. Most of the mangolds are lifted and stored, the bulbs being large, sound, and extremely good, and thus a good bulk of feed is stored. Grass lands are bare, and, as a rule, farmers are giving hay. Stock of all kinds are looking well, but trade is a trifle duller for all kinds, with the exception of milch cows with calves suitable for weaning. These command good prices. Porkers are rather scarcer, 10s. 6d. per score being paid in Bristol for them. Taken all round the farmer would have had a much better year had it not been for the extra demands of labour. The apple crop has been a good one, the general price for cider fruit being 2s. per sack of 200lb.; in some districts even lower prices have been taken. Despite the cheapness of fruit it is not a good cider year, either in quality or quantity of yield. Table fruits are getting worth more money, there being an absence of really fine specimen fruits. Now that the potatoes are out, it is seen that they will prove a very short crop. Swedes have been greatly injured by mildew. On the trees the leaves are very loath to don the usual gorgeous tints of autumn, preparatory to their downfall.—North Somerset.

Somerset.

The threshing machine is proving that the crop of corn in this neighbourhood is considerably under average, especially oats, which are little more than half a crop. Mangolds are a good crop, and those secured before the rain were in splendid condition. Swedes and turnips are a light crop, and finger-and-toe and grub have damaged many pieces. Potatoes are far from good crop; tubers small with a large amount of diseased ones. Apples are a good crop, and cider will be plentiful this winter. Pastures are looking well, and have more keep on them than usual at this time of the year, and the hayricks are large and generally well made, so that there is a good prospect that farmers will have sufficient keep to see the winter through. Cattle and sheep are looking well and selling at fair prices.—E. D. (Nov. 4th).

Salop.

A drying day, inclined to a little frost –31.3, 52 shade. Farmers very busy storing mangolds, which have now become the most important crop. They stand more drought but less frost. Both have grown well lately. Swedes have attained a very large size over 20lb. weight; mangolds making a fair crop. At first we did not know the value and proper use of mangolds. Too many were given to fat stocks, souring them instead of feeding; now a mixture of cotton cake and other astringents corrects that tendency.—J. G.

North Wilts.

In this part of Wilts we have had very little rain till just lately; the land was too dry for sowing wheat, but now there is a prospect of getting it in well. Pastures have grown very little since hay harvest, and very bare, but the mild autumn has been greatly in favour of stock. Roots plentiful, and sheep are doing well. Beef is cheap, but mutton prices satisfactory. Calving heifers, if showing a good prospect of milk, make fair prices.—J. S. (November 3rd).

Foreign Prospects.

France.—Recent weather has been favourable for agriculture, and farmers appear to be well pleased with present conditions. The rain having replenished many of the streams, the water-mills will be able to start work, but with the poor demand for flour, there is scant encouragement to add to stocks already too large for healthy trading.

Belgium.—Finer weather has enabled farmers to prosecute field work in good condition.

Holland.—Weather having improved after too much rain, farmers are pleased at the change.

Sweden.—A report from Stockholm states that the cereal crops were carried in splendid condition, and have yielded abundantly in all directions, so that the import requirements in the present cereal campaign would be much reduced.

Spain.—The sowings are being prosecuted in the Peninsula under most favourable conditions. The development of the seedlings is healthy and regular, and the early-sown fields have a splendid appearance.

Germany.—Mild and rainy weather has led to larger supplies from the interior so that the better tendency in wheat prices mentioned last week was of short duration, and, considering the abstention of buyers and the general weakness of the international market, such a result was inevitable.

Hungary.—The drought has been broken and rain has removed anxiety about the autumn sowings.

Russia.—With a mild season and timely rains in the principal grain-growing regions, trade is dull all round, and although the rotten state of the roads interferes with vehicular transport, supplies are sufficient for local and export requirements.

United States.—The *Cincinnati Price Current* says that there are further complaints of fly among the early-sown wheat. There is an enlarged proportion of late-sown and the crop is doing well. The quantity marketing is being reduced. Maize is being cribbed more than usual, but the general conditions are unchanged.—*Dornbusch.*

Germany.

The following report concerning the autumn-sown crops was issued by the Imperial Bureau of Statistics in the middle of October. No. 1 represents very good; 2, good; 3, an average; 4, below an average; 5, bad.

Against October, 1899	2·3	2·4	2·7

After a long period of drought, rain fell in the beginning of October, which was most beneficial for the sowing and growth of seedlings. Field operations were hindered owing to the hardness of the ground. This was especially the case in East Prussia, Brunswick, Mecklenburg, Oldenbury, Anhalt, Saxony, Saxe-Meningen, Saxe-Coburg-Gotha, and Schwarzburg Rudolstadt. Seeds were put in quickly after the rain, came up well, and development is good. We hear from Bavaria, Wirtemberg, and Hesse that meadows are yielding a third and even a fourth crop of hay.

The late harvest, continued drought, scarcity of labour, and in South Germany the vintage and fruit harvest have made the winter sowing late, especially in the case of wheat. Seedlings are not up in some places. The note for wheat and rye is a little less favourable than in October, 1899, but is still satisfactory.

Reports concerning young clover are very varied: most of them are satisfactory. It suffered from the drought, but recovered after the rain and yielded an autumn crop. We hear of ravages of field mice from Silesia, Saxony, and Saxe-Meiningen. A great deal had to be ploughed over in East Prussia, and the condition of young clover was very unsatisfactory in Marienwerder, Posen, and Bromberg, where the average note is 4.5 and 4.8; 5 representing very bad.

Settle Stot Fair.—This fair for store stock was held on Tuesday, when there was a large show of cattle, but a slow trade. Geld heifers made £11 to £13; smaller ditto, £8 to £10; geld cows, £10 to £14; calving cows, £17 to £22; lying-off calving cows, £14 to £18; two-year-old bullocks, £11 to £13; yearlings, £5 to £7; Highland heifers, £10 to £13 per head. Large number of Scotch sheep, which met a slow trade. Ewes, 17s. to 20s.; half-bred lambs, 18s. to 23s.; white-faced lambs, 22s. to 27s.; smaller, 18s. to 20s.; Scotch lambs, 9s. to 11s.; half-bred sheep, 35s. to 40s.; rams, £4 to £7 each. Lambs and sheep realised 1s. to 2s. per head more than last year.

THE WEATHER.

Monday (October 29th).—Rainy and unsettled weather prevailed over the greater portion of our islands, and a mild, south-westerly wind was blowing. Rain was measured in the morning, as the result of the fall in the preceding twenty-four hours, over nearly the entire country, and in places the fall was heavy. Sunday night was very warm in the south of England, and the mid-day temperatures were generally high.

Tuesday (October 30th).—Rain fell over a large part of our islands, and the weather was generally overcast. Large amounts of rain were measured in the morning, as the result of the fall in the preceding twenty-four hours, in the southern and midland districts of England, as well as at several places in the western portion of the kingdom. A warm and moist south-west wind was blowing, but it was for the most part light. Heavy rain fell in London throughout Monday night, and it continued during the greater part of the day.

Wednesday (October 31st).—The weather was very fine in most parts of England, but rain again fell at several places in Scotland and Ireland. Rain was measured in the morning, as the result of the fall since Tuesday, over the entire kingdom, and the fall was exceptionally heavy in the south-west of Ireland. The wind was southerly, and under its influence the air was very warm, the thermometer in the central parts of England and in the central and northern parts of Ireland being ten degrees above the average during a great part of the day. Exceptionally fine weather occurred in London, and the thermometer, sheltered from the sun's rays, registered sixty-five degrees, which is eleven degrees above the average.

Thursday (November 1st).—The weather was again unsettled over our islands, and the temperature was high. Rain had fallen since Wednesday over the entire kingdom, and the amounts were large in the northern and western districts. There was a further fall of rain during the day in most parts of Great Britain. A cyclonic disturbance was situated on our North-West coasts, and the whole of the British Islands was under its influence, the winds being southerly in England and Scotland, but in Ireland they had shifted to the North-West, with a slight fall of temperature, and with some improvement in the weather. The day was chiefly dull and wet in London, and the temperature rose to sixty-two degrees, which is about eight degrees above the average.

Friday (November 2nd).—Rain was measured again in the morning over nearly the whole of our islands as the result of the fall since Thursday, but the amounts were mostly small. Very little rain fell in any part of the kingdom during the day, but the weather was generally dull and gloomy, and fog or mist occurred in many places. A very light westerly breeze was blowing over England, but the wind had again become southerly in Ireland, and it was increasing somewhat in strength. Thursday night was very warm in the western and southern portions of the kingdom, the thermometer not falling below 50deg. The midday temperatures were generally lower than on the preceding day. The day was dull and gloomy in London, and the thermometer was steady at about 56deg.

Saturday and Sunday (November 3rd and 4th). Mild and rainy weather prevailed over our islands during the two days, and fog or mist occurred in many places. There was very little rain reported on Saturday morning for the preceding twenty-four hours, but on Sunday morning rain was measured over nearly the entire Kingdom, and at places in the West the fall was heavy. The nights were again very warm for the time of year, and in many parts of England the thermometer did not fall below fifty degrees, although in Scotland the weather was somewhat colder. The winds continued mostly Southerly, and were still light in force. In London the weather was gloomy and wet, but the air was rather cooler on Sunday than of late, the thermometer only touching fifty-two degrees.

Thirsk October Beast Fair.—On Monday both the larger and the smaller greens were literally packed with cattle, sheep, and horses. Owing to the floods in the district large numbers of sheep were unable to reach Thirsk on Saturday, and were shown on Monday instead. Almost every class of cattle met with a demand at prices well in advance of last year, and sheep made 4s. to 5s. per head more. Good three-year-old agricultural horses found purchasers at remunerative prices. Good English calving cows made £18 10s. to £22; half-bred calvers and calving heifers, £13 10s. to £16; drape cows, £10 10s. to £12 10s.; two-year-old English bullocks and heifers, £12 to £15; year-old stirks, fresh in condition, £6 10s. to £7 10s.; two-year-old Irish bullocks and heifers, £8 to £8 10s. each. Good bred hoggets, 36s. to 38s.; good bred ewes, 46s. to 50s.; half-bred ewes, 37s. to 40s.; half-bred hoggets, 22s. to 28s.; good bred shearlings, 50s. to 52s.; half-bred shearlings, 42s. to 48s.; twice crossed lambs, 31s. to 33s.; Scotch and Masham-shire lambs, 18s. to 22s.; shearling Wensleydale tups, £4 to £5; Wensleydale tup lambs, £2 to £2 10s. each. Three-year-old agricultural horses, £32 to £36.; and ponies, £8 to £12 each. There was a fair attendance of buyers, and a great bulk of the stock was sold.

FARM.

Report on Clover and Grass Seeds.

Messrs. John Donaldson and Co., wholesale seed merchants, of Edinburgh, last week issued their annual autumn report on the crop of clover and grass seeds, and below we give some extracts from it:—

Clovers.

Looking over all the usual sources of supply, we are of opinion that this season's crop of red will be considerably short of an average. The United States of America and Canada (from whence come our principal supplies) are reported to yield less than half an average crop, and the quality, so far as we have yet seen samples, shows a very inferior seed. France will this year again be a buyer instead of a seller. Germany also requires to import part of her wants. There seems to have been a fairly good crop in Bohemia and Hungary. Russia is reported to have some surplus stock, but it will not amount to much.

The yield of English red and cow grass will be considerably under an average. Any new samples that have been showing are pale in colour and small in size. Considerable stocks of yearling English cow grass were carried over from last season, but the bulk of these have already been shipped to Germany, Denmark, and Sweden, so that this year's small supply, coming on a bare market, leads us to believe that prices will be considerably higher than they have been for some years past.

White is said to have yielded a fair average crop both here and on the Continent, yet prices are getting higher every day, and it is very difficult to get good clean, level seeds, free from weeds.

Alsike clover is again reported to be a small yield in Canada and America, and higher prices will rule this season. Very little is saved now in Germany.

Trefoil has been almost a failure, anu prices are about double those prevailing last year.

Timothy is also very much dearer, ordinary American bringing 7s. to 10s. more than last year at this time. Canada has also a small yield, and prices are correspondingly high. Germany is reported to have a fair crop, but this seed does not compare favourably with the fine Canadian.

Ryegrasses.

The perennial crop when growing appeared to be a very large one, but after being harvested and threshed the yield was found to be disappointing. The seed weighs 3lbs. to 4lbs. per bushel lighter than last year, and the tonnage, so far as has been ascertained, is under last year's quantity (and last year's yield was considerably below an average). Owing to the unfavourable weather during harvesting the condition of the seed is not as fine as last year.

The French Italian crop almost totally destroyed by drought. It is now ascertained beyond a doubt that under a third of an average crop has been harvested. The prices are fully 50 per cent. higher than those ruling this time last year, and the quality is as a rule very poor.

In Ireland a fair average crop of Home Italian has been harvested, and prices would have been moderate had the Continental demand been of the usual volume, but large quantities have already been sold for shipment to the Continent, and this has had the effect of raising prices 50 per cent. over last year's. The crop in England this year was also much below an average.

Natural Grasses.

The crop of cocksfoot in New Zealand has turned out a very abundant one, and prices are moderate. In fact, they are safe for holding over for another year. In America the crop has been much under an average, and we need expect no supplies from this quarter this season. Continental supplies are smaller than usual.

With regard to meadow fescue, we have again to report a large decrease in the yield of this important grass. When this became fully known a brisk demand set up, and prices have advanced considerably since the opening of the market.

There is a smaller crop of crested dogstail, and much higher prices than last year.

The other natural grasses are all reported to be under an average, and higher prices are being made this year.

A Blackburn Corn Miller's Estate.—The will of the late Edgar Appleby, head of the firm of Appleby and Sons, corn millers, Blackburn, Bootle, Burnley, and Liverpool has been sworn at £146,000. The testator leaves £500 and an annuity of £800 to his wife. £10,000 is left to his daughter Alexandra May, who was born during his Mayoralty of Blackburn in the Jubilee year, and the residue of the estate is equally divided among his sons. There is no public bequest.

Unlabelled Skim Milk.—Before the Bolton county magistrates on Thursday, Messrs. Langton and Johnson, Blackrod, and Aspull, farmers, were charged with not affixing labels to milk kits showing they contained skim milk. The cases were the first in the Bolton division, and the defendants pleaded that they were not aware of the law, which came into operation this year. The Bench dismissed the cases, and suggested that the county authorities should issue notices to farmers.

Farmers and the Manufacture of Alcohol for Lighting Purposes.

The illumination of the "Orangerie" in the Tuileries Gardens at the close of the International Press Congress in Paris with the alcohol-burning lamps invented by M. Louis Denayrouse, together with the results now obtained at the Pont d'Jena and elsewhere by the same system of lighting, seem to indicate that alcohol will be one of the chief illuminating agencies of the near future. *Prima facie* this appears incredible, for the flame of alcohol, with which everybody is familiar, is singularly deficient in luminous power.

Without entering into details that would be too technical here, it may be stated that the admixture of hydrocarbon with alcohol is one of the means by which M. Denayrouse has been able to render the latter a light-giving agency of extraordinary brilliancy. The system has the advantage of great simplicity, and its application to domestic as well as public purposes appears to be free from danger. If this method of lighting should be largely adopted, its influence upon agricultural industry will be very considerable, all alcohol being of vegetable origin.

In France, where agriculture is languishing, for reasons of an economic and fiscal order, a largely-increased demand for crops, such as beetroot, potatoes, and Jerusalem artichokes, suited to the distillation of cheap alcohol, would bring an important amelioration to the condition of the peasantry in many districts, and go far to solve the perplexing question of protecting the French wheat-grower from foreign competition.

One of the great changes of the new century may be that the vegetable kingdom will take the place now occupied by the mineral kingdom in the production of artificial light, in other words, that coal gas and petroleum will be both succeeded by alcohol. Even the fairy that science has discovered and named electricity may be put out of fashion as an illuminating power, on account of its costliness, in which case one of the probable consequences would be less work for metallurgists and mechanicians.—*Leisure Hour.*

Horncastle October Sheep Fair.—At this fair, on Monday, there were only 1,500 sheep penned, this being half as many as last year. But few lots changed hands, prices being well maintained. Wethers made up to 50s., blackfaced ewes 30s., and useful lambs 30s. A large number of horses were shown, mainly of the carting class, and those of a better quality found ready purchasers.

To obtain a crop of wheat, oats, or barley entirely free from smut is the earnest desire of all farmers, but in not many cases is the desire realised. One of the best and cheapest dressings for seeds that has been brought under our notice is D. Clarke's Carbolised "Wheat Protector," manufactured by G. B. Clarke, Woburn, Bedfordshire. This dressing, which has been in use over fifty years, takes the place of bluestone, and by its use the seed is strongly carbolised, and is protected both by the smell and taste from being eaten by birds and other pests, whilst it is claimed for it, and numerous testimonials bear out the claim, that it prevents smut, the seed germinates a fortnight earlier, and it saves a quarter bushel of seed per acre. It is not expensive, for a ninepenny packet will dress no fewer than eight bushels of seed. A striking illustration of the value of this preparation is given in a testimonial from a Herefordshire farmer, who says: "I have used your protector for 40 years, and have never grown a smutty ear of corn."

Bankruptcy of a Westmoreland Cattle Breeder.—Mr. William Graham, late of Edengrove, and High Sheriff of Westmorland, attended at the Kendal Bankruptcy Court on the 27th ult., for his public examination. The statement of affairs showed gross liabilities amounting to £26,730 3s. 10d., of which £26,163 5s. 8d. was expected to rank for dividend. The gross assets were £6,355, preferential claims amounted to £266 18s. 2d., and the deficiency was £20,075 3s. 10d. In answer to the Official Receiver, Mr. Graham said he went in for breeding cattle of the very highest class, and it had paid for a time; but there had been considerable losses, especially about ten years ago, when there was a great outbreak of foot-and-mouth disease in the neighbourhood, which really stopped sales. It was about three years ago when he really found himself in difficulties, and he then sold his real estate to his cousin for £19,000. Since then he had rented the farm for £900 a year. He had continued to breed and buy high-class cattle, but he had had further losses, and to recover himself he tried speculation in American railway shares. For a time he made a profit, but with the commencement of the Chinese trouble he began to lose money, and it was really when he had to close his account with Messrs. Gibbs, of London, stockbrokers, whom he owed £2,848, that he found he could not go on any longer. The Registrar thought the bankrupt had been a very lucky man in not being opposed. If he had been, it was very likely some very unpleasant disclosures might have come out, and things might have looked even worse than they did. It seemed to him that the debtor had gone on recklessly for three years. When he knew, three years ago, that he was so near the line, it did not become him to go on as he had done. As his examination was not opposed, he would, however, be allowed to pass.

LITERARY NOTICES.

Continuing his series of translations of foreign maritime codes, Mr. Effingham Wilson, Royal Exchange, E.C., has just published the "Maritime Code of Italy," translated and annotated by His Honour Judge Raikes. This volume is on the same lines as the others of the series, but is somewhat larger, and is published at 12s. 6d. net.

There has come to hand a copy of the Report of the Technical Education Committee of the Parts County Council, dated October 27th last. The committee give grants to various institutions in the county for subjects covering a wide area, but agriculture does not receive much attention. With the exception of a short note on agricultural scholarships and the agricultural exhibitions at the Downton Agricultural School, Wilts, the only mention of agriculture is made on the last page, where it is stated that "the attention of the committee having been drawn by a member of the County Council to the question of instruction in various processes of agriculture, and the possibility of a demand for such instruction in this county, the committee resolved to make some inquiries in the matter. There could be little doubt as to the desirability, in agricultural counties, of technical skill in carrying out these processes. The Cambridgeshire County Council had already inquired into and issued a report upon the matter, which it courteously placed at teh disposal of your committee. This Council, from the replies received from the various counties, came to a conclusion distinctly unfavourable to the carrying on of such instruction by Technical Education Committees. But Cambridgeshire had sent its inquiries to *all* counties, some of which could hardly be called agricultural. From its report, the work appeared to have been successful in a minority of counties, typically agricultural ones.

"Your committee therefore addressed some inquiries to these counties, twelve in number, viz.:—Westmorland, in the North; Lincolnshire (Kesteven and Lindsey), Norfolk, Essex, and Herts, in the East; Devon, Dorset, and Somerset, in the South, and Hereford in the West of England; Stafford and Worcester among the Midland counties. All these counties kindly replied fully. The replies of Herts, Somerset, and Westmorland were, on the whole, unfavourable to the instruction, those of the remaining nine counties were, with some reservations, favourable. The chief subjects of instruction appeared to be ploughing, draining, hedging, ditching, stacking, thatching, rick-making, sheepshearing.

"The instructors were generally local farmers, and, especially, labourers who had gained first and champion prizes at competitions, and were recommended by local committees. Young farm labourers and farmers' sons had attended, but there was some difficulty in getting the two sets of young men in the same class. Some instructors appeared to give their services; in other instances 10s. per lecture seemed to be a fair payment. The average length of a course was six lessons of two hours each, except in ploughing, where the hours were rather longer. The average number of pupils in a class appeared to be six, and the attendance to be regular, generally. Nine of the counties addressed spoke favourably as to the results of the instruction.

"The general conclusion to which the committee has come is that while the results of its inquiries are not sufficiently encouraging to induce it to undertake a general system of instruction in such subjects for the whole county, in any district where a definite desire for such instruction is expressed, it will, upon a responsible application, give the matter careful consideration."

Messrs. William Barron and Son, of the Elvaston Nurseries, Borrowash, near Derby, have just issued a new catalogue of fruit-trees, roses, herbaceous and alpine plants, greenhouse and bedding plants, etc. This firm is noted for its landscape gardening, and in this catalogue there are several illustrations of private grounds and parks they have laid out.

Messrs. Little and Ballantyne, of Carlisle, have now published their general tree and plant catalogue for 1901, and in it they state that in no previous year have they been in a position to offer forest trees, game covert slants, coniferous and ornamental park trees, evergreen and deciduous shrubs, fruit trees, rhododendrons, roses, Alpine and herbaceous plants, etc., of finer quality or in such quantities as they do this.

Messrs. Dey, Son, and Hewitt, of 22, Doerr Street, Baker Street, London, W., have recently issued a new edition of "Veterinary Practice at Home: or, Key to Farriery." This little book has now run through seventeen editions, representing nearly three-quarters of a million copies, which speaks as to its appreciation amongst all classes of the farming community. The present edition has undergone a complete revision, many additional diseases being treated upon, and all brought up to date in a concise, intelligible form. It is published at one shilling, so that it is within the reach of even the poorest stockbreeder.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—There is a little more home-grown wheat being now submitted here, but farmers still find better encouragement on the country exchange, where there is sufficient offering. The condition is good. Fine white, 31s 6d, and red of similar sample, 30s 6d 63lb, delivered. American descriptions unaltered, whites being quite neglected. The market for flour was again deserted, and, with granaries still well stocked, consumers show no signs of moving with any degree of freedom for the present. Of feeding stuffs grinding barley continues in sufficient supply to meet requirements. Arrivals of oats continue on a moderate scale, and holders remain reserved in a measure. American mixed clipped, 14s 3d ex ship to come up, and 14s 6d to 14s 9d ex quay. Maize unchanged.

Mark Lane, Friday.—Breadstuffs again inclined against sellers, but feeding stuffs, on landed terms, were supported without effort. Home-grown wheat continues to be submitted chiefly on the country exchange, but there is quite sufficient now on the London market, and the tendency is easier. Fine white, 32s, and red of similar sample, 31s 63lb, delivered. American descriptions unchanged and nominal. The market for flour was unaltered to day, while generally lower on the week, and granaries continue well supplied. The London Millers' Association made no alteration at this afternoon's meeting. Grinding barley steady, and a sufficient supply on hand to meet requirements. Oats, except ex ship, steady. Maize again dearer for flat landed, and round corn well maintained. The demand for beans and peas was again very slight, holders, however, remaining indifferent, pending sharper weather.

COUNTRY.

Ashford, Tuesday.—Wheat was slow of sale at last week's rates, nothing being quoted above 32s per quarter. Maize was rather dearer, running from 24s for flat to 28s for round varieties. Malting barley met with a limited demand.

Aylesbury, Saturday.—Wheat trade very quiet, last week's prices being barely maintained. Other grain unaltered.

Banbury, Thursday.—Wheat (white) (old), 29s to 31s per qr; wheat (red) (new), 26s to 28s 6d per qr; beans (new), 28s to 30s per qr; beans (old), 33s to 34s per qr; oats (new), 16s to 18s per qr; oats (old) (black), 21s to 22s per qr. Market firm at last week's prices; small show.

Barnsley, Wednesday.—A fair attendance and business steady. Wheat, though not so firm as last week, generally sold at late rates. Barley for malting purposes still dull, whilst other grain was unaltered.

Braintree, Wednesday.—Small supply of wheat, prices ranging from 28s 6d to 29s 6d per qr for reds. Barley trade firm, and a good supply.

Brighton, Thursday.—Small attendance. Quotations:—New white wheat, 29s to 30s; new red ditto, 28s to 29s; barley 29s to 33s; grinding ditto, 21s to 22s; English oats, 18s to 21s.

Bristol, Thursday.—Only a moderate trade since our last. English wheat was not in such large supply at to-day's market, barely making last week's prices. Foreign without change. Grinding barley the turn easier. Flat maize and Irish oats 3d lower. Flour very little enquiry.—GRACE BROTHERS.

Cambridge, Saturday.—During the week the wheat trade has been lifeless. Supplies are still limited, and condition is not quite so good. We have had nice rains, and farmers are busy wheat sowing. At this market to-day a small supply met a dull trade, without any change in value for dry lots; but some concession had to be made on damp parcels. Wheat, red, 28s to 31s; and white up to 31s per 504lb. Beans 6d dearer. Barley was in better demand and firm in price.

Canterbury, Saturday.—Wheat and oats a quiet trade; barley slow. Ruling prices:—White wheat, 30s to 32s 6d; red ditto, 29s to 32s; malting barley, 28s to 35s; grinding ditto, 21s to 24s; white oats, 18s to 21s; ditto black, 15s to 20s; peas, 29s to 31s; tick beans, 30s to 32s; mazagans, 27s to 29s; flat maize, 22s to 24s; round ditto, 27s to 28s per qr; winter tares, 6s per bushel.

Carlisle, Saturday.—Fair supply of oats in our market to-day, quick sale, at last week's prices. New, 17s to 18s per 336 lb; old, 23s to 24s per 336lb.—THOMAS ROBINSON.

Chester, Saturday.—English wheat was more freely offered, but the general run of samples was below the average, and former prices were barely maintained. Oats steady, at last week's prices; beans and barley quiet. Quotations:—Wheat, white and red, 4s to 4s 2d 75lb.; grinding barley, 3s to 3s 6d 64lb; beans, new, 4s 8d to 4s 10d; old, 5s 6d 80lb; oats, new, 2s 2d to 2s 5d; old, 3s 2d to 3s 7d 46lb; Indian corn, 11s to 11s 6d 240lb.

Chichester, Wednesday.—There was not a large attendance, and with the supply of wheat on a limited scale business was quiet without alteration in prices. In other departments also there was little or no change.

Colchester, Saturday.—Wheat small supply, condition affected by damp weather, prices unaltered. Barley, very small show for this period of the year, all descriptions selling readily at fully late rates. Brans, peas, and oats scarce, and prices fully maintained.—FRANCIS AND CO.

Dorchester, Saturday.—English wheat met a quiet trade at last week's prices. Foreign steady. Best qualities only of malting barley maintained the price, medium and secondary qualities 1s per quarter cheaper. Grinding barley unchanged. Feeding stuffs very quiet owing to the mild weather.

Glasgow, Wednesday.—There was a small attendance at our Corn Exchange to-day. Wheat and flour steady, but quiet. Indian corn is in moderate request at 1½d per boll under last week's price. Grinding beans and Canadian peas quiet, but unchanged. Foreign oats the turn dearer on spot; home quiet but steady. Barley steady. Oatmeal dull. Bran and thirds quiet.—GIBSON AND CLARK.

Glasgow, Wednesday.—Wheat steady but quiet. Indian corn is in moderate request at 1½d per boll under last week's prices. Grinding beans and Canadian peas quiet, but unchanged. Foreign oats the turn dearer on spot; home quiet, but steady. Barley steady. Oatmeal dull.

Ipswich, Tuesday.—Moderate supply of wheat. Trade slow, at a reduction of 6d per quarter. New reds, 29s to 29s 6d; old, 30s 6d. Good supply of barley. Trade firm at rather more money. Oats slow. Maize unaltered. Beans and peas quiet.

Leeds, Tuesday.—Stronger American advices exert little influence in face of heavy shipments and liberal imports. The trade for wheat continues slow, with only a limited consumptive demand, but there is less pressure to sell on the part of holders, prices being about 6d lower on the week. Barley unchanged, fine qualities meeting a steady sale. Maize 6d lower. Beans and oats unchanged.—DUNNS AND CO.

Leeds, Friday.—The wheat trade remains very quiet, and for both English and foreign descriptions prices are a turn easier than on Tuesday, the top price for new English being 29s, and for old 33s. Malting barley and maize rather lower. Oats, beans, peas, grinding barley, and flour unchanged.

Leicester, Saturday.—Moderate supplies of home-grown wheat in variable condition. Trade steady, at 28s to 31s per 36 stones. Barley in fair request. Fine oats in good demand.

Lincoln, Friday.—There was a fair supply of English wheat; trade ruled slow, at last week's rates. Reds, 27s to 28s; whites 28s to 29s. Foreign quiet. Large show of barley, only good sorts being saleable; prices, 25s to 34s. Oats made late rates. No change in beans, peas, and maize.

Liverpool, Friday.—Wheat in moderate demand, Kansas 1d, Spring 1d dearer; white unchanged. Flour steady with small consumptive trade for foreign at about Tuesday's prices. The Liverpool Millers' Association make no change in the minimum prices of bakers. Maize is in good demand, and is more firmly held at about unchanged prices for mixed; European steady and occasionally easier. Plate moves steadily into consumption, with small kinds scarce and dearer. Barley for malting and feeding is quiet, with a slow trade at quotations. Beans are firm, especially for English and flat kinds, which make 3d advance on the week. Peas steady but quiet at late rates. Oats firm, with a fair business at full prices for English. Oatmeal steady but quiet, values being generally 3d under last market day. Oilcake firm with a fairly good demand at about late rates.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—Plenty of wheat at the market to-day for the demand, trade very slow and 6d to 1s per qr cheaper. The weather affects the condition of the samples, which does not please the millers. In other grain but a slight business done all round.

Manchester, Thursday.—American wheat commands 1d to 1½d per cental more money than last week; whilst English is held at the full rates of Thursday last. Flour is quiet at unaltered rates. Oats, peas, and beans are without change. Indian corn is rather easier on the past few days, in some cases by 3½d per cental. Trade generally at the moment is quiet.

Newark, Wednesday.—Wheat a quiet trade at rather less money than last week. Barley dull at previous prices. Oats and beans at last week's full quotations.

Newcastle-on-Tyne, Saturday.—At our to-day's market wheat favoured buyers. Msize slow demand, and 6d per 480lb. under last week's prices. Barley neglected. Fine oats ruled steady at late rates. Common sorts 3d to 6d lower to sell. Beans and peas steady; demand, however, limited. Flour quiet, no change in value.—JOSEPH POLLARD AND CO.

Newcastle-on-Tyne, Saturday.—This day's market was moderately attended, and the demand for wheat was nominal, prices being to the side of buyers. Flour was dull and disappointing for the time of year. Barley for malting is 6d per qr lower to sell. Oats being more freely offered, lost 6d per qr for new samples. Beans, peas, and maize keep fairly steady.

Peterborough, Saturday.—There is no alteration in the wheat trade since last Saturday, supply to-day has been very small, but demand was slack. Fair demand for good barley, others still neglected. Oats firm, not many offering.—THOMAS HILL AND SON.

Newport (Mon.), Wednesday.—No change in price of wheats; oats dearer; good trade in maize, but 6d cheaper; barley and oats unchanged; beans and offals firm. Vines 24s.

Northampton, Saturday.—About the usual attendance. As regards wheat and barley, supply for the former was limited the latter was abundant. The trade was dull and inactive—quotations scarcely up to last market day. White wheat, 30s to 32s; red, old wheat, 29s to 31s; red, new wheat, 27s to 29s; malting barley, 25s to 30s; grinding barley, 21s to 24s; oats, 17s to 22s; old, fine, 24s to 25s; beans, 28s to 32s; fine old, 35s; peas, 26s to 36s; flour, 23s to 27s.

Norwich, Saturday.—Wheat still in small supply with a firm trade, and prices about the same as last week. Barley a slow trade with values unaltered. Wheat, red, 29s to 30s per qr, weight 63lbs. per bushel imperial. Barley, 26s to 28s for medium runs, very fine rather more. Corn Inspector's return for the week ending 29th October, 1900:—Wheat, 2,912-4, 27s 9½d, barley, 15,149, 26s 5d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat, good supply, with a quiet trade at last week's prices. Barley, smaller supply of better sorts at previous rates. Oats firmer, with smaller show. Beans, no change.—ROBERT HUBBLE.

Oxford, Saturday.—Wheat dull and rather easier. Barley good demand for best and low qualities, medium quiet but steady. Oats firm.

Plymouth, Thursday.—There was an average attendance at our Corn Exchange to-day. The market was very quiet, prices of all stuffs remain unchanged. Flour is much firmer, although there is no advance in the price.—ORLANDO DAVIS AND CO.

Reading, Saturday.—Wheat was in fair supply at the Corn Exchange to-day, but the demand was not very brisk, and prices must be quoted as being the same as last week. Barley was plentiful, and rates were slightly in favour of buyers; while other descriptions of corn changed hands at recent rates. The attendance was unusually numerous.

Ripon, Thursday.—There is a light show of wheat, the bad weather interfering with thrashing. An average attendance. Wheat, English, new, 27s to 28s; ditto old, 31s; ditto foreign, 30s 6d to 34s 6d; barley, malting, 24s to 29s; ditto, grinding, 21s to 23s; oats, old, 25s to 26s; ditto new, 17s to 19s; maize, round, 26s to 27s 6d; ditto flat, 23s 6d per qr; beans, old, 1s per stone.

Romford, Wednesday.—Wheat trade very slow at last week's prices. Red wheat made 28s to 29s, and white wheat, 29s to 31s 6d; winter beans, 30s per qr.

Salisbury, Tuesday.—There was again a good supply of all kinds of grain. Wheat sold at a further decline of 6d per quarter on the week. Best malting barley had an upward tendency. Oats were quite 6d dearer, and beans firm at late rates. Quotations:—Wheat, 26s to 32s; barley (best malting), 32s to 37s; ditto (secondary), 26s to 30s; oats (black), 16s to 20s; oats (white), 18s to 23s; beans, 30s to 36s.

Sheffield, Tuesday.—Small attendance. Trade slow, former prices asked for all kinds of grain, but to make a sale a reduction of 6d per qr had to be submitted to. Quotations:—Wheat, white, 32s to 33s; red, 31s to 32s; new, 30s to 31s per 504lb; oats, old white, 26s; ditto, new white, 17s 6d to 19s; ditto old black, 22s; ditto new black, 16s to 17s per 336lb; peas, grinding, 32s to 34s; ditto blue, 53s to 70s per 504lb; beans, Egyptian, 33s; ditto, English (new), 31s 6d to 32s per 532lb; barley, grinding, 23s 6d to 24s 6d; ditto malting, 27s to 35s per 448lb; Indian corn, small old, 29s to 30s; ditto American mixed, 23s 6d to 24s per 480lb.

Spalding, Tuesday.—The wheat trade was 6d per qr lower, making 26s 6d; oats, 17s to 17s 6d per qr. Barley unchanged, being a dull trade. Beans, peas, and other articles remained as last week, trade being slow.

Stockton, Wednesday.—There was a fair quantity of farmers' wheat showing in very moderate condition, which made about 29s per qr. Foreign wheat trade keeps very quiet and millers are buying very sparingly. Prices show a reduction of about 6d per qr, particularly on white qualities. Maize 6d down, and oats about unchanged. A moderate show of malting barley, which made 23s to 27s per qr.

Sunderland, Saturday.—Wheat, slow trade at about late rates. Barley neglected. Oats unchanged. Arrivals coastwise:—Barley, 482 qrs; foreign wheat, 20,813; barley, 1,030.—E. AND F. RICHARDSON.

Taunton, Saturday.—Wheat a quiet trade at last week's prices, but only a small quantity offering. Best qualities of malting barley firm, secondary unchanged. Maize and grinding barley 3d per quarter lower. Oats unchanged.

Wakefield, Friday.—Wheat is a slow trade at our market, and last week's prices. In the small business doing are accepted. Common qualities of new Yorkshire barley are totally neglected, the only demand being for best sorts, and the general supply is good. No alteration in feeding stuffs.—MICHAEL SANDERSON AND SON, LIMITED.

Wakefield Friday.—The spasmodic ups and downs in America do not benefit the trade, which just now suffers simply from oversupply, otherwise it is sound enough. Wheat is steadily held at last week's rates, the demand being still limited. The best Yorkshire barleys find a steady sale, secondary sorts hang on hand. Maize, beans, and oats very slow.—DUNNS AND CO.

Wisbech, Saturday.—A small supply of grain. Wheat changed hands at late rates. Red 28s, white 29s, old 30s. Oats steady, 17s to 19s. Barley irregular, 25s to 28s.—JAMES FLETCHER.

Wolverhampton, Wednesday.—A large number of farmers and dealers present, but the transactions were of a limited nature. English wheat, new, 12s to 12s 6d; wheat old, 13s per 216lb; oats, old 15s to 16s; ditto new 11s to 11s 6d; beans, old 14s 6d to 15s 6d, ditto new 12s 6d to 13s 6d per 196lb; maize, 24s to 24s 6d per 480lb.

Worcester, Saturday.—Fair supply of English wheat; trade ruled slow at barely last week's prices. Whites, 28s to 29s; reds, 27s to 28s per qr. Foreign wheats quiet, but steady. Grinding barley and oats sold at late rates, but maize was scarcely so firm.

Worksop, Wednesday.—Fair attendance, but smaller show of grain. Barley sold at late rates, wheat was 6d per qr lower, and oats scarce. Wheat, old white, 31s to 32s; old red, 30s to 31s; new white, 28s to 29s; new red, 27s to 28s; best malting barley, 30s to 32s; secondary, 28s to 29s; grinding, 23s to 25s; old white oats, 25s to 27s; old black, 24s to 25s; new white, 18s to 20s; new black, 17s to 18s; flat maize, 24s to 25s; round, 28s to 29s per qr.

FOREIGN.

The Antwerp wheat market has remained without material change. The young wheats are beginning to come up well in the French country districts. French farmers are, however, still a good deal occupied with field work; and the French provincial markets have been thinly attended in consequence. The milling trade, finding its supplies running short, has shown more readiness to do business, and prices have been hardening rather than otherwise. The business passing in wheat at Marseilles has been restricted to the requirements of local consumption; transactions have at the same time taken place to a moderate extent in hard Tunisian wheat. Only a restricted business has been passing in French wheat at Paris, holders standing out for somewhat higher terms. Flour for consumption has shown little change in the French capital. Scarcely any variation has been noted in wheat at Konigsberg and Dantzic. The demand for wheat has exhibited no great activity at Odessa, and prices have been supported with some difficulty. Quotations have presented little change at Ibrail; maize has, however, been somewhat firmer. Rain has fallen in the districts about Ibrail, and farmers will now be able to proceed actively with field work, which has been delayed by drought. The quantity of wheat now en route for Europe is returned at 1,170,000qr., as compared with 1,370,000qr. at the corresponding date of 1898. The total of 1,170,000qr., representing the quantity of wheat now en route for the Continent, is made up as follows:—France, 120,000qr.; Belgium, 370,000qr.; Holland, 265,000qr.; Germany and the North, 135,000qr.; and Italy, Spain, etc., 260,000qr.

Hamburg, Saturday.—Weather rainy. There is no animation in the trade, and last week's prices are barely supported. The imports during the week amounted to 3,088 tons wheat, 9,492 tons rye, 12,733 tons barley, 16,021 tons maize. Fine dry German wheat, being taken by inland millers, maintains its value, white inferior sorts are next to unsaleable. Best dry Saale, Holstein, and Mecklenburg is firmly held at 27s 6d to 28s 3d, common Holstein is offering at 25s 9d to 26s 6d per 504 lb f.o.b. River Plate and Hard Winter is selling at 27s 9d to 29s per 480lb. Rye quiet. 9 10-15 South Russian on the spot and floating is offering at 22s 3d to 22s 6d per 480lb, c.i.f. There is not much business doing in malting barley. Maltsters and brewers having acquired a sufficient quantity to last them for some time, they see no inducement for entering upon forward deliveries. Good Saale is offering at 31s to 33s, fine quality at 34s 6d to 37s, while choice lots are scarce. Bohemian, Moravian, and Hungarian is held at 34s to 38s., good Holstein at 26s to 26s 6d per 448lb, f.o.b. Russian and Danubian feeding barley is selling at 18s 3d to 19s per 400lb. c.i.f. Hamburg. Prices of mixed maize for prompt delivery, owing to scanty supplies, are maintained, while later deliveries meet less attention. We quote spot value, 21s 3d, November shipment 19s 6d to 19s 9d, December-March 18s 9d to 19s per 480lb, c.i.f., Hamburg.—JOHN TATLOCK.

POULTRY AND PROVISIONS.

Smithfield, Saturday.—A slight improvement prevailed all round this morning, market being much clearer. Quotations:—Fowls: Yorkshire, 2s 3d to 2s 9d; Essex, 2s 3d to 2s 6d; Welsh, 1s 8d to 2s; Surrey, 2s 6d to 3s 6d; Sussex, 2s 9d to 3s 3d; Boston, 2s to 2s 6d; Irish, 1s 6d to 1s 9d; turkeys (cocks), 6s to 8s 6d; hen, 4s 6d to 5s 6d; Bordeaux pigeons, 8d to 10d; feathered ditto, 7d to 9d; wild rabbits, 8d to 10d; tame, 1s to 1s 3d each; Australian, 7s 6d to 8s 9d per dozen; pheasants, 3s 6d to 4s; young grouse, 4s to 5s; old, 3s; young partridges, 3s to 3s 6d; old, 1s 6d to 1s 8d per brace; hares, 2s 6d to 3s 3d; leverets, 1s 6d to 2s; pintail, 1s 6d; teal, 8d to 10d; wild duck, 1s 6d; widgeon, 1s; snipe, 4d to 8d; woodcock, 2s to 2s 6d; golden plover, 6d to 9d; black, 4d to 6d each.

Glasgow, Wednesday.—Few or no arrivals this week, owing to the trade having been well stocked at Kilmarnock Show. In the absence of business, last week's prices continue to rule, but to promote business buyers would concede a reduction.

Liverpool, Saturday.—Bacon: The consumptive demand is of moderate dimensions, but under the influence of the reduced stocks there is a firmer feeling on the part of importers, with some hardening of values, especially of bellies, which are extremely scarce. We quote, to-day, choice Cumberland cut, 20lb to 22lb, 48s to 51s; 26lb to 30lb, 46s to 49s; 32lb to 38lb, 43s to 48s; long middles, rib-in, 18lb to 22lb, 51s to 56s; clear bellies, 14lb to 16lb, 51s to 53s; 18lb to 20lb, 51s to 52s 6d; Staffordshire cut (lean on), 35lb to 40lb, and Birmingham cut, 33lb to 38lb, 45s to 48s; clear Staffords (lean off), 40lb to 44lb, and Yorkshire cut, 40lb to 45lb, 43s 6d to 45s; singed Wiltshire, Canadian, 45lb to 55lb, 53s to 58s; American, 40lb to 50lb, 44s to 49s; short clear backs, 12lb to 16lb, 43s to 44s 6d; 16lb to 20lb, 42s to 43s; fat backs (export), 37s 6d to 38s 6d; long clear middles, 35lb to 40lb, 44s to 45s; 40lb to 45lb, 43s 6d to 44s 6d; short clear middles, 45lb to 50lb, 40s to 41s; short middles, (rib in), 18lb to 23lb, 46s to 48s; shoulders, square cut, 12lb to 14lb, 35s to 39s 6d; 14lb to 16lb, 34s to 38s; New York cut, 11lb to 13lb, 31s to 34s per cwt. Hams rule fairly steady, with fresh light weights in good request. We quote choice long cut, 8lb to 12lb, 46s 6d to 51s; 14lb to 16lb, 45s to 50s; short cut and A.C., 10lb to 12lb, 44s 6d to 49s; 12lb to 14lb, 43s to 48s; 14lb to 16lb, 41s to 45s per cwt. Lard is in better demand, with some improvement in value. We quote pails and kegs, 38s 3d to 39s 6d; prime Western (in tierces), 37s 6d to 38s per cwt. Beef a shade easier, with small inquiry. We quote extra India mess, 70s to 73s 9d; Plate and Packet, 65s to 67s 6d per 304lb. Pork is reduced in value, with limited business passing. We quote finest prime mess, 65s to 68s per 200lb. Cheese.—The demand rules moderate, the easier cable quotations causing buyers to hold off. Prices on the spot, however, show little alteration. We quote finest Canadian, coloured, late makes, 54s to 56s; white, 48s to 48s 6d finest States coloured, 53s to 54s 6d; white, 53s to 54s; summer cheese, ripe and ready, are freely offered from 50s to 52s 6d; but lower grades are a slow sale, nominally 28s to 42s per cwt. Butter rules quiet; the inquiry for Canadian and American is still restricted. We quote Finest Irish in factory lb boxes, 102s to 107s; second quality, 98s to 100s; finest States (nominal), 92s to 96s; finest Irish in 56lb to 112lb casks, 78s to 84s; finest Danish, 110s to 112s; Australian and New Zealand, 102s to 104s; Irish creamery, 105s to 110s; Cork factory, 98s; seconds, 94s; thirds, 88s per cwt.—Hodgson Brothers.

Newport, Wednesday.—A good attendance, an average supply and a good demand. The following were the prices: Cheese, 48s to 52s per cwt; fancy dairy, 56s to 58s; Irish, 52s to 56s; singles, 50s to 52s; twins, 48s to 50s; and Canadians, 50s to 52s per cwt.

BUTTER.

Tuesday.—Bedale: 1s 4d to 1s 5d per lb. Cambourne: 1s 1d to 1s 3d per lb. Leeds: Danish, 120s to 127s per 112lb. Irish creameries, 106s to 112s; York lump, 15s to 16s per stone; ditto long rolls, 14lb, 1s 6d to 1s 7d per lb; ditto in 1lb prints, 1s 3d to 1s 6d per lb. Settle: 1s to 1s 1d per lb. Sheffield: 1s 3d to 1s 4d per lb. Spalding: 1s 1d to 1s 2d per lb. Stone: 1s 4d to 1s 5d per lb.

Wednesday.—Barnsley: 1s 3d to 1s 4d per lb. Colne: 1s 2½d per lb. Goole: 1s 2d per lb. Hereford: 1s 3d to 1s 4d per lb. Keighley: 1s 3d per lb. Kirbymoorside: 11d to 1s per lb. Knaresborough: (wholesale), 1s 6d to 1s 8d; (retail), 1s 7d to 1s 9d per roll of 24oz. Louth: (wholesale), 1s to 1s 1d per lb. Market Drayton: best, 1s 1d to 1s 2d per lb; seconds, 1s to 1s 1d per lb. Market Weighton: 1s 1d per lb. Northallerton: 1s 5d to 1s 8d per roll of 24oz. Stockton: 1s 2d to 1s 3d per lb. Whitby: 1s to 1s 1d per lb. Worksop: 1s 4d per lb. Dorchester: 1s 2d to 1s 3d per lb.

Thursday.—Brigg: 1s to 1s 1d per lb. Devizes: (wholesale), 1s 1d to 1s 2d; (retail), 1s 2d to 1s 3d per lb. Driffield: 1s per lb. Penistone: 1s 3d per lb. Ripon: 1s 6d to 1s 7d per single roll of 24oz. Scarborough: 1s 3d per lb.

Friday.—Altrincham: 1s 3d to 1s 4d per lb. Crewe: 1s 3d per lb. Derby: 1s 2d per lb. Easingwold: 1s to 1s 1d per lb. Grimsby: Danish, 120s to 126s per 120; Finnish, 110s to 118s; Dutch, 112s to 118s; Canadian, 100s to 112s per cwt. Helmsley: 10d to 11d per lb. Leeds: Danish, 120s to 127s per 112lb; Irish creameries, 106s to 112s; York lump, 15s to 16s per stone; ditto long rolls, 14lb to 15lb, 1s 6d to 1s 7d; fresh butter in 1lb prints, 1s 3d to 1s 4d per lb. Leyburn: 1s 5d to 1s 6d per roll of 24oz. Lincoln: 1s 2d to 1s 3d per lb. Stratford-on-Avon: 1s to 1s 3d per lb. Whitchurch: 1s 1d to 1s 2d per lb.

EGGS.

Tuesday.—Bedale: 7 or 8 for 1s. Gainsborough: 8 or 9 for 1s. Leeds (Yorkshire): 14s 6d to 15s 6d per 120. Irish: 11s to 12s. Danish: 8s 6d to 10s 3d. Austrian blues: 7s to 8s; ditto reds, 6s 3d to 6s 9d. Settle: 8 or 9 for 1s. Sheffield: 8 or 9 for 1s. Spalding: 8 for 1s. Stone: 8 or 9 for 1s.

Wednesday.—Barnsley: 6 or 7 for 1s. Colne: 2s 8d per score. Dorchester: 1s 6d to 1s 8d per score. Goole: 9 for 1s. Hereford: 8 or 10 for 1s. Keighley: 6 for 1s. Kirbymoorside: 8 or 9 for 1s. Knaresborough: 7 or 8 for 1s. Louth (wholesale): 10 for 1s. Market Drayton: 7 or 9 for 1s. Market Weighton: 9 or 10 for 1s. Northallerton: 7 for for 1s. Stockton: 6 for 1s. Whitby: 8 or 9 for 1s. Worksop: 3s per score.

Thursday.—Brigg: 8 or 9 for 1s. Devizes: 10 to 12 for 1s. Driffield: 11 for 1s. Penistone: 8 for 1s. Ripon: 6 or 7 for 1s. Scarborough: 7 for 1s.

Friday.—Altrincham: 5 and 6 for 1s. Crewe: 7 for 1s. Easingwold: 7 to 9 for 1s. Grimsby: Austrian, 6s 3d to 7s 7d per 120; Russian, 5s 7d to 7s 10d; Canadian, 6s 5d to 8s. Helmsley: 8 for 1s. Leeds: Yorkshire, 16s to 16s 6d per 120; Irish, 11s 6d to 12s 6d; Danish, 9s to 11s; Austrian blues, 7s to 8s; ditto reds, 6s 3d to 6s 9d. Leyburn: 7 for 1s. Lincoln: 8 or 9 for 1s. Stratford-on-Avon: 2s to 2s 11d per score. Whitchurch: 7 and 8 for 1s.

COLONIAL DAIRY PRODUCE.

London, Friday.—Butter.—The demand for choicest quality of Australian butter remains good, although there is not so much business doing in the finest grade. Prices remain unchanged on the week. New Zealand stored butter, ex "Gothic," is bringing 102s to 108s per cwt according to quality. A certain class of buyers, who have to cater for the shilling retail trade, cannot well pay more than 102s for this butter, but those who make a thirteen-penny retail trade pay the higher price. The Copenhagen official quotation is this week unaltered at 105 kroner, against 103 kroner twelve months since. Cheese.—The market for Canadian, both spot and c.i.f., continues dull, notwithstanding the fact that arrivals appear to go into consumption, and stocks do not accumulate as they would do if there was a diminished demand. Strictly cool cheese are making 55s to 56s, against summery goods at 52s to 53s, so that relatively September quality is at present the better value.—W. WEDDEL AND CO.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Apples: Very little doing; moderate, for which a fair demand prevailed. Pears: Trade quiet. Good supplies of fruit came to hand, and cleared at a good sale. Greensmith: Cabbages, 2s 6d to 3s; beans, 2s 6d per tally; cauliflowers, 1s to 1s 3d per dozen; Brussels sprouts, 1s 6d per half-sieve; seconds, 2s 6d per sieve; carrots, 2s; turnips, 2s; parsnips, 1s 6d per dozen bunches; horseradish, 1s to 1s 6d per bundle; celery, 1s to 1s 6d per dozen bulbs; English apples, 4s to 6s per bushel; Normandy, 6s 9d per case; Pears, Marie Louise, 1s 6d; Seckle, 2s; Uvedales, 4s; Beurre Diel, 2s; Beurre Clairgeau, 2s per dozen; Fine English grapes, 1s to 1s 6d per lb; Valencia oranges, 9s to 12s per case; Nova Scotian, 10s to 14s per barrel; English pears, 3s to 6s per bushel; Californian, 7s to 8s per case; Canadian, 2s per dozen; Valencia nuts, 3s to 3s 6d per bag; Brazils, 4s to 4s 6d per cwt; Barcelonas, 4s to 4s 6d per cwt; Cobs, 4s to 4s each; bananas, 5s to 6s per bunch; Jamaican oranges, 6s to 8s per case; Grenoble walnuts, 1s to 1s 2d per bag.

POTATOES.

Borough and Spitalfields, Saturday.—Up to noon moderate demand; heavy trade. Supplies of Scotch have been heavy, and prices have had a downward tendency. Quotations: Scotch Regents, 3s 6d to 4s 6d; Early Puritans, 3s 6d to 4s 6d; Snowdrops, 3s 6d to 4s 6d; Reading Giants, 3s 6d to 4s; Dunnes, 3s 6d to 4s; Markhams, 3s 6d to 3s 9d; Up-to-Dates, 3s 6d to 4s per cwt.

Goole, Wednesday.—Potatoes: The demand for Scotch was 6d per ton lower than last week, and 1,000 tons were done at 80s per ton. Best samples up to 85s.

HOPS.

Canterbury, Saturday.—Attendance and business [illegible] high a figure.

Worcester, Saturday.—[illegible] pockets have passed the public scales to-day, and 819 during the week making a total of 17,139 pockets.—PERRY AND CO.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The mild weather enables farmers to keep their cattle out and reduces the cost of feed. It is stimulating to the wheat sown in late September or early October and to the rye and winter oats of a like sowing. Catch crops put in immediately after the harvest are also benefiting. The rainfall of October in the home counties was fairly satisfactory, but in the north there was a flooding downpour during the last seven days of the month, and round Newcastle two inches fell in four days. In the west, the fall was almost three inches. Our own returns thus compare with recent years and with the 25 years' average :—

October average	2·81 inches
October, 1900	2·07 inches
,, 1899	2·22 ,,
,, 1898	3·01 ,,
,, 1897	0·57 ,,
,, 1896	3·75 ,,

At most stations in the South, East, and West of England the rainfall for the ten completed months of 1900 corresponds very closely to the mean, but in the North, including Scotland and also in Ireland, the year has been wetter than the average. The figures for Wales vary, but for the most part are moderate. The air of late has been very "muggy," and decidedly adverse to grain threshing. Farmers will do well not to thresh until we get cool winds and a crisp air.

The foreign advices may be summarised as follows :—

America	Increased wheat sowings.
Argentina	Poorer prospect than last year.
Australia	Medium promise.
New Zealand	Good promise.
India	Good promise.

These reports relate to future yields. From Russia we have a preliminary official report, which thus compares with recent yields :—

1900	45,150,000 qrs.	estimate.
1899	56,555,000 ,,	yield.
1898	57,180,000 ,,	,,
1897	42,390,000 ,,	,,

The Russian wheat exports compare very curiously with the crop returns, as the following figures will show :—

WHEAT EXPORTS TO ALL COUNTRIES.

1899	7,437,000 qrs.
1898	13,131,000 ,,
1897	15,076,000 ,,
1896	16,133,000 ,,

If out of the 1897 crop of under forty-three millions thirteen millions were exported in 1898, how is it that out of 57,180,000 qrs. in 1898 only 7,437,000 qrs. were exported in 1899 ? The Board of Agriculture would do a great service in appointing a special commissioner to visit Russia, for Consular reports are really useless in so vast a country. The Consul is not peripatetic, and only a travelling commissioner can get at the truth of the fifty-two vast provinces each of them the area of an ordinary Western nation.

The home markets of the past week have been rather dull for breadstuffs, but the temperature has been against retail wants, and the time of year is opposed to wholesale or speculative business. A good show of North German, Polish, and Baltic wheat at Mark Lane has been a feature of the last two markets, and sales of these samples have been brisk enough. The newly-threshed home samples are often lacking in condition, and the market is decidedly overdone for the time being with American wheat, both Pacific and Atlantic. The American flour shippers have reduced their terms since the end of October, and have thereby made trade at Mark Lane worse for all American sorts, from the fine strong flour of Pittsburg or Washburn down to the commoner baking kinds.

The following return of a dozen county union contracts recently put through has points of interest to the whole country trade. Oddly enough, flour is dear in Cornwall where wheat is cheap, and if flour is obtainable at Mountmellick for 21s 8d, the price of bread should scarcely be 5½d.

WHOLESALE CONTRACTS

	Bread per lb.	Flour per sack.	Wheat per qr.
Ballymahon	4d	—	—
Killarney	4½d	—	—
Mountmellick	5½d	21s 8d	—
Quinn	5½d	—	—
Redruth	—	24s 6d	—
Ross	—	22s 9d	—
Rugby	4½d	—	—
Sevenoaks	—	23s 6d	—
Tiverton	—	23s 6d	—
Uxbridge	4½d	22s	—
Westmid	—	20s	—
Wolverhampton	—	17s 8d	—

These figures pay incidentally a very high tribute to the milling trade, for whereas a majority of unions find it an advantage to buy flour and do their own baking, not one of the twelve finds any saving in trying to do without the miller, or in buying their own wheat, either for their own manufacture into flour and for delivery at local mills to be ground and returned as flour to the union. The great difference in the prices paid requires explanation both with respect to bread and to flour.

There are now on passage to the United Kingdom the following quantities of wheat :—

	Qrs.
From America	370,000
California	105,000
Argentina	235,000
Australia	200,000
Russia	105,000
All other Countries	15,000
Total Nov. 1, 1900	1,730,000
,, ,, 1899	1,600,000
,, ,, 1898	1,200,000
,, ,, 1897	1,878,000
,, ,, 1896	1,905,000

Of flour there are now 432,000 sacks on passage against 366,000 qrs. on November 1st, 1899, while quantities of spring corn thus compare :—

	Maize. Qrs.	Barley. Qrs.	Beans. Qrs.
Nov. 1, 1900	560,000	560,000	12,000
1899	1,085,000	520,000	8,000
1898	564,000	497,000	15,000
1897	255,000	665,000	14,000
1896	1,022,000	830,000	19,000

The American visible supply is thus cabled :—

	Bushels. Wheat.	Maize.
Nov. 1, 1900	59,773,000	8,144,000
1899	48,940,000	13,716,000

The supplies of grain into the United Kingdom for the past week have been as follows :—

Wheat, 333,000 qrs.; a large supply.
Flour, 196,000 sacks ; a fair supply.
Maize, 272,000 qrs.; a heavy supply.
Barley, 137,000 qrs.; a bare average.
Oats, 116,000 qrs.; under average.

The markets for barley have shown that degree of firmness which the arrivals would suggest, but oats have not benefited as they should have done by the respite in new arrivals. Holders have too often shown an eagerness to clear old stocks which has injuriously affected values. English oats are now selling noticeably better than foreign.

The sales of British wheat being added to those of imported wheat and flour, we have had the following changes in breadstuffs statistics :—

	Qrs.
Total Supplies	626,000
Wants	567,000
Surplus	59,000
Stocks October 27	2,818,000
Stocks November 3	2,877,000

The stocks in granary a year ago were reckoned at 2,350,000 qrs., so that the nett increase on the twelvemonth has been about half a million qrs.

The following particulars of the oilseed trade from Jan. 1 to Oct. 31 will be found of interest :—

1900.	Linseed Oil. Per ton. £ s. d.	Calcutta Linseed. Per qr. £ s. d.	Linseed Cake. Per ton. £ s. d.
January	23 12 0	2 8 2	8 10 0
February	24 6 2	2 8 9	8 13 9
March	25 0 4	2 7 9	8 3 2
April	27 18 0	2 10 0	7 19 4
May	33 17 9	2 14 4	7 18 0
June	34 6 8	2 12 10½	7 13 9
July	34 7 9	2 15 1	7 17 6
August	33 8 1	2 13 1	7 19 2
September	33 14 9	2 17 0	8 7 4
October	32 17 6	3 1 0	8 15 0

1900.	Cotton Oil. Per ton. £ s. d.	Cotton Seed. Per ton. £ s. d.	Cotton Cake. Per ton. £ s. d.
January	20 16 0	7 6 0	4 19 8
February	22 2 4	7 7 8	5 3 6
March	20 15 2	6 11 9	5 0 8
April	21 10 0	6 14 2	4 16 7
May	22 12 4	6 16 3	4 13 6
June	21 16 6	6 2 6	4 7 1
July	22 12 3	6 5 8	4 7 8
August	22 3 9	6 11 0	4 6 3
September	22 3 4	7 8 9	4 17 11
October	19 10 0	8 0 0	5 6 3

The above prices represent average values on the monthly sales in London.

FOREIGN CORN TRADE.

The shipments of grain from the chief exporting countries last week were as follows :—

	Wheat. Qrs.	Flour. Sks.	Maize. Qrs.	Barley. Qrs.	Oats. Qrs.
United States	360,000	190,000	400,000	50,000	105,000
Russia	266,000	—	5,000	144,000	100,000
France	—	5,000	—	—	—
Austria-Hungary	—	5,000	—	—	—
Roumania	105,000	—	5,000	10,000	—
Argentina	53,000	—	52,000	—	—
Chili	—	—	—	—	—
India	—	—	—	—	—
Australasia	—	—	—	—	5,000
Miscellaneous	30,000	6,000	20,000	20,000	10,000
Total	814,000	206,000	482,000	224,000	220,000

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

Some 64lb. samples of new English wheat to-day witnessed to the fact that heavy weight is not at all unknown among this season's samples. At 31s. for red and 32s. for white they were probably a good bargain. Somewhat an excess of new wheat not fully conditioned was on offer, and 28s. to 30s. being accepted for these lots average values were rather prejudicially affected. Foreign wheat was in fair retail request. Baltic samples were more looked after than others. The large American visible supply of wheat is against buyers in this country readily paying spot prices asked. Some good Australian wheat sells well. Malting barley has been a livelier trade ever since the Brewing Exhibition started the October business in earnest. To-day anything worth 35s. or over was in request. It is the lots offered at 28s. to 30s. which wait for a sale. The demand for feeding barley is very fair. The market for English oats was steady but far from active. There were some buyers of foreign at currencies. Beans, peas, and rye are 6d. lower on the week, but lentils are dearer. New Russian buckwheat made 27s. per qr.

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

THE MARKET CLOSED STEADY. MAIZE MADE FULL TERMS FOR ANYTHING OF WHICH REASONABLY PROMPT DELIVERY COULD BE PROMISED.

THE FLOUR TRADE.

MARK LANE, Nov. 5th.

The trade, although dull, was not so weak as it often is on a mild, close day in November. Top price is maintained at 30s., and Households are not offered, as a rule, under 24s. 9d. per sack. Country flour is rather pressed on sale, and 6d. decline is usually conceded. Hungarian is steady at a 30s. level for the better makes and 31s. 6d. for extra fine. French is neglected, and is barely saleable at last week's terms. Australian is in fair request, but 6d. decline is sometimes allowed to effect a clearance. The finest grades of American start with Star at 27s., after which come Washburn's, Pilsbury's, and Morrison's best at 26s. We then have Guinea Gold at 23s. 6d., Golden Lily at 24s. 6d., and Gold Medal at 25s. 6d. per sack. The second grades are headed by Iron Duke at 19s. 6d., Improved Nicollet at 19s., and Manhattan at 18s. 9d. Red Dog, Violet, and Phœnix are three sorts of feeding flour which range from 13s. to 16s. per sack.

LONDON TERM MARKET.

This market is held twice a day, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made :—

WHEAT.—		Nov.	Dec.	March
		s. d.	s. d.	s. d.
Oct. 29	11 a.m.	6 7	6 7	6 9
	4 p.m.	no calls.		
Oct. 30	11 a.m.	6 6	6 7	6 9
	4 p.m.	6 6	6 7	6 9
Oct. 31	11 a.m.	6 6	6 7	6 9
	4 p.m.	6 7	6 8	6 9
Nov. 1	11 a.m.	6 6	6 8	6 9
	4 p.m.	6 7	6 8	6 9
Nov. 2	11 a.m.	6 7	6 8	6 9
	4 p.m.	6 7	6 7	6 10
Nov. 3	11 a.m.	6 6	6 7	6 10
To-day	11 a.m.	6 7	6 7	6 10

There were no offerings of maize this morning for November delivery, but for Dec., transactions were put through at 4s. 1d. per cental.

The deposit required from members of the Term Market has been fixed at £50. "Call" hours from Nov. 1 have been fixed at 11 a.m. and 4 p.m.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

The Term Market (while the "Baltic" is rebuilding) is temporarily situated at the Great Eastern Hotel, No. 190, Bishopsgate Street, ground floor.

PROVISIONS.

London, Monday.—The arrivals from Ireland last week were 3,050 bales bacon, and from foreign ports 9,263 bales bacon. The continued slowness of demand again brought prices of bacon down, and on Friday official rates were 5s lower all round on Irish and Danish. Canadian quotations were 2s lower, but this altogether inadequate, and selling rates shillings under paper prices. Irish, 50s, 54s up to 58s; Danish, 50s, 56s up to 58s; Canadian, 48s, 54s. The butter market was a slow one, and prices again giving way, the demand being very restricted; Danish, 120s, 124s; Canadian, 100s, 104s; Colonial, 100s, 114s. Lard.—A strong demand for Irish at an advance of 6s to 8s. Prices 54s, 65s. American pails fair demand, 40s, 41s

GRAIN AND FLOUR FACTORS' REPORTS.

Our trade continues in a very quiet state, but the general tone is firm. A few lots of New English red clover seed are offering, mostly of poor quality, which do not attract buyers. Germany offers some very fine parcels American seed this season is very inferior and dear. In other clovers and trefoil there is little passing. Perennial and Italian ryegrasses are firmer. Spring tares of good quality are offering, but at high prices, and no sales are reported. Canary seed neglected. Blue peas quiet.—JOHN PICARD AND CO., Mark Lane.

Supplies of wheat are heavy, while, in consequence of the continued difficulty in working, demand has been of the most nominal character. Values have been in the main unaltered. Maize and barley without alteration in price. Oats are quiet but steady.—W. P. WOOD AND CO., Mark Lane.

The trade for bran is firm, at full prices, and London mills are clear of stock. Pollard is in smaller demand, and is 2s. 6d. cheaper on the week. Fine middlings are steadily held, but coarse sorts are sold at 2s. 6d. reduction. The trade is affected by the difficulties attending lighterage.—RICHARD DOGGETT, Mark Lane.

Flour steady, unchanged, with a moderate trade doing.—T. S. MEDILL, Mark Lane.

The arrivals of wheat and flour are liberal. The trade is quiet, and prices of both articles are unchanged. There is no change in value of maize, barley, and oats.—COVENTRY, Mark Lane.

Offals.—For prompt delivery small brans are again rather easier. Recent prices fully maintained for forward delivery. Farmers are using up farm produce, and weather is mild, bran, consequently, not yet gone much into consumption.—GREENHILL BROTHERS, Belfast, November 3.

Flour.—Reduced estimates of the prospective Argentine crop have steadied markets this week, and there is considerable firmness, without, however, much flour changing hands. Grain.—The decline on Indian corn is checked, and values 1½d. to 3d. per boll higher, supplies being readily absorbed. Canadian peas dull. There is a good demand for Canadian oats at unchanged prices. Barley more plentiful and in buyers' favour. Oilcake very firm. Oatmeal steady. Mill stuffs.—Bran quiet and unchanged. Thirds firm.—MCKINNON AND MCDONALD, Glasgow, November 3.

Wheat in moderate demand, Kansas 1d. per cental, spring ½d. dearer; white unchanged. Flour steady with a small consumptive trade for foreign at about Tuesday's prices. The Liverpool Millers' Association make no change in this minimum prices of bakers. Maize in good demand, and is more firmly held at about unchanged prices for mixed; European steady and occasionally easier. Plate moves steadily into consumption, with small kinds scarce and dearer. Barley for malting and feeding is quiet, with a slow trade at quotations. Beans are firm, especially for English and flat kinds, which make 3d. advance on the week. Peas steady but quiet at late rates. Oats firm with a fair business at full prices for English. Oatmeal steady but quiet, values being generally 3d. under last market day. Oilcake firm with a fairly good demand at about late rates.—ROSS T. SMYTH, Liverpool, November 3.

THE BALTIC, MONDAY, 1 p.m.

STATE OF TRADE.

There is rather more trade passing than there was last week.

The holders of wheat cargoes are rather more confident than on Saturday and there are not very many offers for future shipment at currencies. Barley is steady, with a fair business doing. Oats, beans, and maize are all quiet. Maize cargoes are strong for near dates, but weak for 1901 delivery. Oilseed cargoes are weaker from Saturday.

BUSINESS DONE.

WHEAT.—Californian, 30s 3d, arrived; Californian, 30s 6d, nearly due; Walla Walla, 29s, arrived; Argentine, 29s 9d, Feb. shipment; Australian, 30s 6d, on passage; Baltic (Konigsberg), 31s 9d. prompt shipment; No. 2 Red winter, 29s 6d, Nov. shipment; No. 2 Hard winter, 28s 6d, Nov. shipment; No. 1 Hard Duluth, 32s 3d, Nov. shipment; No. 1 Northern Spring, 31s, Nov. shipment.

MAIZE.—Galatz, 19s 6d, May shipment; Roumanian, 21s 3d, November shipment; American, 19s, December shipment; ditto, 17s 6d, February shipment.

BARLEY.—Azoff, 18s 9d, November shipment; Persian, 17s, November shipment; Kustendje, 18s 6d. on passage; Californian, 27s, on passage.

OATS.—Canadian, 14s 6d, arrived; ditto, 14s 3d, on passage; Petersburg, 13s 9d, arrived; New Zealand, 22s 6d, on passage.

BEANS.—Saida, 29s, November shipment.

LINSEED.—Bombay, 53s 3d, April shipment; Argentine 53s, February shipment.

RAPESEED.—Guzerat, 17s, April shipment.

COTTONSEED.—Egyptian, £6 18s 9d, on passage: Egyptian, £ 12s. 6d. December shipment.

CATTLE.

Metropolitan Market, Islington

Monday, Nov. 5th, 1900.

	British	Total.	Nov. 6th 1899.
Beasts	1,469	1,469	3,611
Sheep and lambs	5,130	5,130	6,050
Calves	10	10	5
Pigs	60	60	—
Milch cows	60	60	76

Quotations per 8lbs (sinking the offal).

ENGLISH.

	Inferior.	Second.	First.
	s. d.	s. d.	s. d.
Beasts	3 0 — 4 2	—	4 10
Sheep	3 2 — 5 2	—	5 6
Pigs	2 10 .. 4 0	..	4 8

Milch cows, per head, £15 to £22.

British arrivals include as follows:—Scotland, —; Eastern Counties, 42; Midland, Home and Western Counties, 1,214; Devon, 40; Ireland, 164.

There was a decrease of 170 head in the supply of beasts compared with Monday last, the majority of these being of an inferior quality, trade ruled dull with a slight drop in value; the few best on offer made late rates. Among the Irish arrivals were 41 stores, for which there were no inquiries when our report left. Fat butchering cows and bulls were slow of sale, but a clearance of these is expected.

The following are top quotations per 8lb. (sinking the offal):—

	To-day.	Nov. 6th, 1899.
Scotch	— to —	4s 6d to 4s 8d
Devons	4s 8d to 4s 9d	— to —
Herefords	4s 8d to 4s 10d	4s 6d to 4s 7d
Runts	4s 8d to 4s 9d	4s 6d to 4s 7d
Lincolns	4s 4d to 4s 6d	3s 9d to 4s 0d
Fat cows	3s 6d to 3s 8d	3s 6d to 3s 8d

The supply of sheep and lambs compared with Monday last showed a slight decrease, and consisted of 190 Scotch, 1,400 Irish, and 760 from the Eastern Counties, and a few lambs from Hertfordshire. These latter were in slack demand. Weather sheep were steady of sale at late rates, whilst heavy descriptions were rather higher in prices. Ewes were in fair demand at late rates. There was little inquiry for lambs.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class penned:—

	To-day.	Nov. 6th, 1899.
7½ to 8 stone Downs	5s 10d to 6s 0d	5s 8d to 5s 10d
9-stone ditto	5s 8d to 5s 10d	5s 6d to 5s 8d
10-stone half-breds	5s 4d to 5s 6d	5s 2d to 5s 4d
Lincolns	— to —	4s 10d to 5s 0d
12-stone half-breds	5s 0d to 5s 2d	4s 10d to 5s 0d
10-stone Irish	5s 0d to 5s 2d	5s 0d to 5s 2d
10 stone Down ewes	3s 10d to 4s 0d	4s 2d to 4s 4d
11-stone half-bred ditto	3s 6d to 3s 8d	— to —
4½ to 5-stone Down lambs	5s 10d to 6s 0d	— to —

There was a rather large supply of pigs; rates ruled steady with a slow trade. Best small breeds made 4s 8d to 4s 10d per 8lb.

London Central, Monday.—Large supplies, trade very bad. Beef: Carcases, 3s 7d to 3s 9d; hindquarters, 4s 4d; roastings, 5s to 5s 4d. Sheep: Ewes, 3s to 3s 2d; wethers, 4s to 4s 4d; hindquarters, ewe, 4s to 4s 4d; wether, 5s 2d to 5s 6d. Pigs, large, 3s 2d to 3s 6d; small, 3s 6d to 4s.

St. Ives (Hunts), Monday.—Beasts, 203; sheep, 584; pigs, 350. Beef, 7s 6d to 8s 3d; mutton, 8s to 9s; pork, 6s to 7s; sows, 5s 3d to 6s. Fat beast sharp trade. Store sheep fair. Fat pigs good. Stores fair. Milch cows fair, £14 to £22.

FOREIGN CATTLE.

Deptford, Monday.—Beasts, 309. To-day's supply compared with last market day showed an increase of 2,254 and consisted entirely of consignments from Canada, for which there was a fairly steady trade, though competition was wanting owing to the small number on sale failing to draw many buyers; the best beasts on offer to dress from 720lb to 760lb made 4s 2d per 8lb, offal given in; plain ditto to dress from 560lb to 640lb were quoted at 3s 9d. No sheep on market. The following were the numbers on offer on the corresponding day last year, with the current top rates:—Beasts, 1,820, 4s 2d per 8lbs to dress about 720lbs; sheep, 751, 4s 2d per 8lb to dress about 68lb to 70lb.

FEEDING STUFFS.

London, Monday. — Linseed Cake; Market quiet, prices about unchanged. Cotton cake nominally unaltered; not much doing. Linseed: Calcutta lower; Russian steady.

English linseed cake	£8 12 6 to 8 15 0	ex mill
American Western linseed cake	8 0 0 to 8 2 6	ex quay
Russian oil cake	7 18 9 to 8 5 0	ex quay
Feeding cake, Samuelson's S.P.F. (10 to 12 per cent. oil)	6 17 6 —	ex warehouse
Decorticated cotton cake	6 17 6 —	ex quay Oct.-Nov. shipt.
Decorticated cotton meal	6 15 0 —	ex quay On passage.
London made cotton cake (best)	5 5 0 —	ex mill
Egyptian cotton cake (in bags)	5 0 0 to 5 1 3	ex quay
Burton desiccated ale grains (bags included)	4 10 0	on rail, Burton
Rangoon Rice Meal	4 12 6 to 4 15 0	ex warehouse
Russian linseed in bulk, per 416lbs	2 16 0 to 2 18 0	ex warehouse
American linseed in bulk, per 416 lbs	2 16 0 to 2 17 0	ex warehouse
Calcutta linseed in bags, per 410 lbs	3 1 0 to 3 2 0	ex warehouse.

—ROBT. AND JOHN HEWETSON.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., write that extreme quietude now characterises the trade for seed seeds, all speculation being for the moment dead, whilst there are no present consumptive sowing wants to be satisfied. Meantime values of clover and grasses all round show no important variation. Winter tares move off slowly at the unsatisfactory rates now accepted. Rye is likewise neglected. In rapeseed an advance is noted of 1s. per qr., whilst full prices are asked for mustard seed. New Zealand [illegible] feet being now cheap meets with a fair export inquiry. Canaryseed shows some improvement, and a parcel of fine Spanish seed is now offering at attractive rates. [illegible] change in hempseed. Longpod and Windsor beans are wanted. In blue peas and haricot beans the trade moves in moderate limits.

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough High street, London, S.E., report There has been a further clearance of the large growths during the past week. [illegible] of the entire Kent crop [illegible] now been sold. Prices are hardening.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

Although the supply of fat beasts at Islington on the chief market day of the week (Monday) was much lighter, business was of a decidedly slower nature, but, nevertheless, primest quality maintained about last week's quotations, all beasts answering this description selling early in the day. Middling quality of all breeds, of which the majority were composed, met a dull and dragging trade, with a marked downward tendency in value. Though towards the close 2d. per 8lb. less money was willingly accepted, a clearance could not be made. Fat butchering cows and bulls were in steady demand by both town and country buyers, but, nevertheless, were easier in price, more especially so on Thursday. At the Foreign Cattle Market, Deptford, the supply at the beginning of the week being light, rates ruled somewhat firmer, with freer sales; but on Saturday, owing to the large number of arrivals (2,873, only 2,663 of which were shown), trade was of a slow and heavy nature, at a decline of from 2d. to 3d. per 8lb., at which reduction sales were forced. The total number on offer at both markets was 5,512 (previous week 4,841), consisting of 1,780 British (decrease 380) and 3,732 foreign (increase 1,051). These latter comprised 3,432 from the United States and 300 from Canada. The following were the top rates per8lb. (sinking the offal):—80 to 90-stone Polled Aberdeens, 4s. 11d.; 80-stone Devons, 4s. 8d. to 4s. 9d.; 90-stone Herefords, 4s. 10d.; 90-stone runts, 4s. 8d. to 4s. 9d; 95-stone Dublins, 4s. 4d.; 100-stone Waterfords, 4s. to 4s. 2d.; 85-stone States, 4s. 6d. to 4s. 7d. on Monday, and 4s 2d. on Saturday; 90-stone Canadians, 3s. 6d.; 100-stone fat cows, 3s. 6d.; 100-stone fat bulls, 3s. 4d. to 3s. 6d. The sheep trade was confined to Islington. The number penned was 7,920, as against 7,960 during the previous week. Amongst the supply on Monday were a few lambs, the best of which found buyers at 6s. per 8lb. Small prime quality wether sheep met a steady demand, and were unaltered in value, but other descriptions were slower of sale at 2d. per 8lb. less money, whilst ewes met with forced sales at a still further decline. Best pens made per 8lb. as follows (sinking the offal):—7½ to 8 stone Downs, 6s.; 9-stone ditto, 5s. 10d.; 8-stone Scotch, 5s. 10d. to 6s.; 10-stone Downs, 5s. 8d.; 10-stone halfbreds, 5s. 4d. to 5s. 6d.; 10-stone Irish, 5s. to 5s. 2d.; 12-stone halfbreds, 5s.; 10-stone Down ewes, 3s. 10d. to 4s.; 11-stone halfbred ditto, 3s. 6d. Calves numbered fifty, and sold readily on Thursday, the best making 5s. 6d. per 8lb. For pigs (310 on offer) trade ruled firm, there being more demand; best small breeds were quoted at 4s. 8d. per 8lb.

Trade in the West.

Store stock are in increased demand at very firm and in some instances slightly increased rates, barreners being sought after at prices ranging up to £33 per pair, down to £18 or £20 for rough-condition bullocks. Milch beasts have suffered a trifling check in price, but this will, we think, only prove of a temporary character, but even become dearer. In-calvers are making good prices, and there is a very healthy tone pervading the trade. Store sheep are dear, and buyers' wants are by no means easily met. Fat stock is marketing exceedingly well, bullocks making a firm sale at 11s. to 11s. 6d. per score for steers and heifers, and 10s. to 10s. 6d. for cows. Fat sheep are quite in sympathy with beef, milkers making 8d. to 8½d. and ewes 7½d. Lamb meets a steady sale, and veal and pork maintain recent high figures.

Trade in Ireland.

At Thursday's Dublin market there was a good attendance of buyers, but a big decrease in both cattle and sheep. Cross-Channel buyers were obliged to pay the full rates of last week, but ordinary beasts sold with the turn against sellers, while rough sorts were decidedly cheaper. Best ox and heifer beef may be quoted at from 52s. 6d. to 56s., and in a few exceptional cases 57s. 6d. per cwt.; second quality, 47s. 6d. to 50s.; and inferior, 42s. 6d. to 45s. Business in the mutton department was very discouraging to sellers, being slow and dragging all round, and even with a shrinkage of over 1,100 sheep it was impossible to effect a clearance. For shipment to London and Lancashire markets hoggets met with a fair inquiry, but to do business smart concessions had to be made. Choice heavy-weight wethers and ewes, which generally go so well, in the absence of shippers to compete with home victuallers, moved off very sluggishly at reduced values. Rough sheep were neglected, and the market must be written down from 1s. to 2s. per head. Prime wether mutton was worth from 6½d. to 6¾d. per lb.; ditto ewe, 5d. to 6d.; and inferior, 4½d. to 5d. Heavy hoggets sold at from 41s. to 50s. each, and lighter sorts from 21s. to 42s. In the dairy department there was a brisk demand for choice springers and new milkers for English and home use, selling freely at extreme rates of last week. Secondary and inferior cows met with only a slack inquiry. The pig market was fully supplied, but though shippers were well represented, buying was very lifeless, and a drop of fully 2s. per cwt. on late rates was experienced. Ham and middle pigs made from 42s. to 46s. per cwt; heavy, from 42s. to 44s.; and coarse, 34s. to 40s. per cwt.

Trade in Scotland.

John Swan and Sons, Limited, give the following as their report on above for the current week:—The numbers of fat cattle on offer this week have again been large, and the quality generally good. The trade has been steady throughout, and prices quite equal to those of last week, bullocks of prime quality making, if anything, more money; fat sheep and lambs a good show. Trade has been fairly good, and prices for all classes have been easily maintained. Fat calves were a considerably smaller show, and also fat pigs; both met a very dear trade at prices over those of last week. In the store market there was a good supply of sheep for the time of year. A fair good selling trade was got, and prices have been unchanged. Store cattle have again been a very large show. Owing to the very bad weather there were few buyers forward, and trade was very stiff, prices being very unremunerative to sellers, even for the best class, while secondary sorts were almost impossible to cash. The smallest show of milch cows for some time met a dear trade at higher prices. Quotations:—Top price best beef, 8s. 6d. per stone; current, 7s. 9d. to 8s. 3d. per stone; mutton from 7½d. to 8¼d. per lb.

LONDON.

London Central, Wednesday.—Supplies fair, but trade very slow, and prices in some cases lower. Arrivals of beef included 35 tons Scotch, 880 Liverpool sides, 1,350 hindquarters, and 700 forequarters American refrigerated. Quotations:—Scotch, 4s 2d to 4s 3d; English, 4s to 4s 2d; American, Deptford killed, 3s 8d to 3s 11d; Liverpool, 3s 8d to 3s 10d; American refrigerated hindquarters, 3s 8d to 4s; forequarters, 2s 6d to 2s 8d. Mutton: Scotch, 4s to 4s 4d; English wethers, 3s 8d to 4s; ewes, 2s 9d to 3s. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s to 4s 4d; and Dutch. 3s 10d to 4s per 8lb.

London Central, Friday.—Supplies this morning were on a good scale, but trade remained slow. Arrivals of beef included 80 tons Scotch, 650 Liverpool sides, 3,800 hindquarters, and 2,400 forequarters American refrigerated. Quotations: Beef, Scotch, short sides, 4s 4d to 4s 8d; long, 4s to 4s 2d; English, 4s to 4s 2d; American, Deptford killed, 3s 8d to 3s 9d; Liverpool, 3s 8d to 3s 9d; American refrigerated hindquarters, 3s 6d to 3s 10d; forequarters, 2s 5d to 2s 8d. Mutton: Scotch, 4s to 4s 4d; English wethers, 3s 8d to 4s; ewes, 2s 8d to 3s; Canterbury, 2s 8d to 2s 10d; Wellington, 2s 6d to 2s 8d; Sydney and River Plate, 2s 5d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s to 4s 4d; Dutch, 3s 8d to 4s; and Irish, 3s 4d to 3s 8d per 8lb.

Islington, Thursday.—A good supply of beasts; moderae demand at about late rates. Sheep entries small; very slow demand; late values without appreciable change. 7½-stone to 8-stone Down wethers, 5s 8d to 5s 10d; 9-stone, 5s 6d to 5s 8d; 10-stone half-breds, 5s 2d to 5s 4d; 10-stone Down ewes, 3s 10d to 4s; 11-stone half-bred, 3s 4d to 3s 6d. Calves evidenced generally quiet support, the best on offer making 5s 6d. Pig trade moved quietly. Neat small, 4s 6d per 8lb, to sink the offal. Total supplies, 150 beasts, 640 sheep, 40 calves, 180 pigs, and 5 milch cows.

COUNTRY.

Ashford, Tuesday.—Best beef was in fair demand at about recent rates, making 11s to 11s 6d per score; but there was a rather large proportion of cow beef, which was difficult to dispose of, even at 6d per lb. Mutton sold rather better on the whole. Small neat Kent and halfbred wethers and maids making 6s to 5s 4d per stone. Large wethers fetched 4s 4d to 5s, and barrens, which were not much wanted, 3s 4d to 3s 8d per 8lb, Veal and pork were without change, the former making about 5s 4d per 8lb, and the latter up to 12s per score.

Basingstoke, Wednesday.—At Raynbird and Sons' sale-yard there was a good attendance of buyers to meet a supply of 35 fat beasts, 60 calves, 756 fat sheep and lambs, 354 pigs, and 139 head of dairy and store cattle, for which the following prices were realised:—Fat beasts, £13 to £22 5s; fat calves, 75s to 92s 6d; small, 20s to 45s; fat wethers, 36s to 55s; fat ewes, 30s to 42s; fat lambs, 27s to 36s; fat hogs, 65s to 109s; fat porkers, 40s to 58s; small, 25s to 38s; store pigs, 10s 6d to 21s 6d; dairy cows, £8 5s to £20. The show of fat beasts included some prime quality Devon steers, which met a good inquiry, and were cleared at full prices. Half fat and inferior beasts continue a slow trade. Prime Devon steers made up to £22 5s; two-year-old heifers, £17; Shorthorn steers, £18 15s; heifers, £15 5s; and cows, £14. A good amount of business was done in fat sheep and lambs, but at a reduction from the late high rates, the depression being most in second rate and infirm lots. Hants Down wethers and young ewes made 40s 6d, 42s, 44s 6d, 48s, 55s, 41s 6d, 48s 6d, 48s, 47s, 46s, 41s; Southdowns, 47s 6d; Exmoors, 38s 6d; ten-months-old ewes and wethers, 43s 6d, 40s, 46s, 47s, 46s 6d, 35s, 45s, 43s 6d, 44s, 47s, 49s, 39s, 31s, 37s; old ewes, 36s, 34s, 30s, 38s 6d, 35s, 32s; Dorset ewes, 30s; rams, 43s, 45s, 37s 6d; Southdown ewes, 35s 6d; three-months-old sucking lambs, 25s 6d, 24s, 22s 6d. Dairy cows and heifers of a good description realised high prices; secondary sorts are difficult to sell. The store cattle trade all round is very dull, and it is most difficult to effect sales. Fat calves met a fair trade, at a trifle less money than quoted last week. Fat hogs met a brisk trade, and were easily cleared at an advance. Fat porkers continue to sell readily at satisfactory prices. Store pigs were cleared, with a fair sale. Fat sows are in demand, with a ready trade. Ruling values:—Prime Devon beasts, 7d to 7½d; ditto Shorthorn, 6d to 6¾d; cows, bulls, and inferior beasts, 5d to 5¾d per lb; best quality sheep, 8¼d to 8¾d; second ditto, 7d to 7¾d; old ewes, rams, and inferior, 5½d to 6d; choice fat lambs, 8d to 9d per lb; fat calves, 6d to 8¾d per lb; fat hogs, 4s to 10s per score; porkers, 9s 6d to 11s.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs	2½ in. and under.. ..	8s 6d
Under 10 sc 10 lbs	Not exceeding 2½ in.	8s 0d
Under 11 sc 10 lbs	Not exceeding 2¾ in.	7s 3d
Under 12 sc	Not exceeding 3 in.	—

Any pigs outside these limits at their value. Half truck 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND CO., Limited, Calne, Wilts.

Cambridge Monday. The stock exhibited for sale at this market and the prices obtained were as follows:—Beasts, 1,192; sheep, 714; pigs, 365; horses, 12. Beef, 7s to 8s per stone; mutton, 4s 6d to 5s; pork, 6s to 7s. A larger show store beasts, fair trade, not all cleared. Fat beasts a good supply, prices unchanged. Fat sheep a fair number to hand, very little alteration in the trade. Stores only a few lots shown, and all sold. Fat pigs a good brisk trade all round. Stores a better trade. Hay, straw, and roots short supply.

Canterbury, Saturday.—There was a large supply of store beasts, including many polled animals, but trade was slow. Large steers ranged from £13 15s to £15, useful two-year-olds from £11 to £12, and young cattle from £5 to £7 7s 6d. Good useful lambs were making from 20s to 24s, and by auction up to 27s. Ewes were quoted at from 18s to 28s, and wether tegs from 28s to 36s. Ewe tegs, 30s to 36s per head.

Carlisle, Saturday.—About 400 Irish store cattle, the bulk of which were animals in fine condition, were offered on the Sands. There was a good attendance of buyers, and trade was fairly brisk at prices similar to those of recent weeks, viz.: from £7 10s to £15 10s, according to quality. Young pigs a small show, and dull trade at about 27s each.

Chichester, Wednesday.—Supplies were on a moderate scale, and business ruled quiet. Beef sold slowly, and the mutton trade was inactive, store sheep meeting with a dull sale.

Dorchester, Saturday.—A very fair entry and a good trade except for fat beasts, of which only the best lots met a demand. Only small supplies of sheep came to hand. Down ewes sold from 44s 6d to 48s; down wethers, 17s 6d to 50s; horn ewes, 38s 6d to 43s 6d.

Dublin, Thursday.—No alteration in price of prime finished beef, demand for which is still brisk. Rough and unfinished sorts much in excess of requirements, and continue unsettled in values, no improvement in quotations being apparent. Slow, unsatisfactory, dragging trade for sheep, choicest qualities barely realising late rates, other sorts lower, and a poor finish. Cattle (best), 30s to 33s per cwt. Other sorts, 26s to 29s per cwt. Mutton, 5d to 6¾d per lb.—GANLY, SONS AND CO.

Dumfries, Wednesday.—Large supplies met a good demand, realising up to 32s per live cwt. Galloway bullocks, to £20; polled ditto, to £21; Hereford stirks, to £16; horned bullocks, to £17; calving cows and heifers, to £13; Highland bullocks to £16.

Glasgow, Wednesday.—Bad weather was against the attendance, and consequently trade generally was slow, with prices suffering. Top Scotch cattle ruled at 66s per cwt, with rather more for choice lots; secondary, 62s to 64s; best Canadian and States, 58s to 60s; top Irish, 58s to 60s. Sheep steady, with lambs over for the season; best sheep, 8d per lb; secondary, 7¾d. Dead meat market fully stocked.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 1,060, calves 77 sheep and lambs 1,225, pigs (fat and sows) 42, sucking pigs 73, pigs (stores, not more than ten) 225, pigs (stores, more than ten) 143, horses 9, colts 15. Prices of stock: Best beef, 6d to 7d per lb; wether sheep, 6¾d to 8d per lb; ewes, 5¾d to 6d per lb; veal, 9d per lb; lamb, 8¾d per lb; pork, 4¾d to 5d per lb; bacon, 4d to 5d per lb.

Ipswich, Tuesday.—Messrs. Robert Bond and Sons report a short supply of fat cattle and a good trade for stall-fed beasts, which made up to £24. Fat sheep were fairly represented, and rather better prices were realised. Calves were short, and with plenty of buyers excellent prices were realised up to 71s. Fat pigs were well represented. This being the fourth annual sale of grazing cattle, 231 steers and heifers were penned. There being plenty of buyers trade was slightly better than last week. 20 Shorthorn steers averaged £9 7s 6d. Cows were not numerous, and the best were in good demand up to £17. The annual sale of pedigree cattle was held at the Drill Hall; about 70 cows and heifers were catalogued, making up to 32½ guineas. Numbers at sales and market:—Beasts 865, calves 40, sheep 990, pigs 1,818, horses 13.

Leeds, Tuesday.—There was an excellent display of fat stock in the market to-day, numbering 631, against 595 at the previous market. The entries were chiefly from the North of England. A large consignment of Irish cattle was also on sale. The primest home-fed heifers and bullocks about maintained last week's values, but secondary and inferior cattle met a dull and slow market, and prices had an easier tendency. Dealers were fully represented, but there was a scarcity of buyers, and investments were very cautiously made. Nice stall-fed heifers and bullocks realised 6¼d to 6¼d per lb; Irish cattle, 6d; cow and inferior beef, from 5d. Sheep numbered 100 below last Tuesday, business generally ruling very slow and disappointing to sellers. The best small shearlings received a moderate inquiry, heavy and rough sheep being almost unsaleable. Choicest shearlings realised 8¼ to 8½d, the higher figure being the exception; large and heavy sheep, 7d to 7½d; ewes, etc., 5d to 5½d per lb. Calves were in rather smaller supply, a moderate trade being done at 7d to 7½d per lb for the best veal descriptions. A good assortment of dairy cattle were on sale. Business was rather slow, the best milkers making from £15 to £21. Numbers at market—Cattle 631, sheep 2,020, calves 15.

Leicester, Saturday.—Good attendance of buyers and dealers, with fair supplies of home-bred bullocks in good condition. Trade steady. Milch cows, £17 to £27 per head. Bullocks, £10 to £14 per head. Calves and sheep a slow trade.

Lincoln, Tuesday.—The show of beasts was larger, numbering 96, and trade was good. Prime beef, 7s 3d to 7s 9d; secondary, 6s 6d to 7s 3d per stone. Moderate number of sheep—449—and a fair trade; ewes, 5½d to 6d; wethers, 7½d to 8d per lb.

Lincoln, Friday.—Fair show of store cattle and milch beasts; slow trade. Milch beasts, £14 to £20; store bullocks, £14 to £16; two-year-olds, £10 to £13; and young stock, £7 to £9. Several pens of lambs, which made from 25s to 35s each.

Newcastle, Tuesday.—Good average supplies, quality superior. Prices steady. Numbers:—Cattle, 1,932; sheep and lambs, 6,256; calves, 74; pigs, 1,017. Prices (sinking the offal): Cattle, 5s to 8s; pigs, 5s to 9s 6d per stone: sheep, 5d to 8d: lamb, 6d to 8d; veal, 5d to 8½d per lb.

Newport (Mon.), Wednesday.—Good supply, brisk trade. Quotations: Best beef, 6½d to 6¾d; seconds, 5¾d to 6d; wether mutton, 7¾d to 8d; ewes, 6d to 6½d; lamb, 8d; veal, 7d to 7½d; porker pigs, 10s 3d to 10s 6d; bacon pigs, 9s 6d to 9s 9d.

Norwich, Saturday.—The supply of store beasts here to-day was large. Trade was not very active, but the business done was effected at former terms. Fat beasts, which were in moderate supply, made 7s 6d to 8s and 8s 3d per 14lb. Sheep were not freely offered; sales, however, proceeded slowly, hoggets making 26s to 40s, and keeping shearlings 16s to 18s per head. Fat sheep were quoted at 8s 6d to 9s and 9s 6d per 14lb.

Romford, Wednesday.—An average supply of fat beef, trade about the same. Best 6s 4d to 6s 6d, and middlings 4s to 4s 2d per stone. Veal about an average supply, trade slow at 5s to 5s 4d per stone. Mutton, average supply, trade slow. Best 5s 4d to 5s 6d, middling 4s to 5s 2d per stone. No stores on offer. Owing to change in weather pig trade not so brisk. Good supply small animals, 4s 4d to 4s 6d, large 3s 8d to 3s 10d.

Saffron Walden, Tuesday.—Sheep were an average supply, prices ruling slightly lower, demand was also slack. Fat ewes made up to 53s, wether, 63s; hoggets, 48s; store lambs, 34s 6d. Beasts were an average supply and met with fair trade. Shorthorns realised up to £22 10s; small bullocks £15 15s. Fat calves made £2 17s 6d and weanels, 44s. A useful lot of yearlings made £8 each. Pigs were in short supply. Hogs made 80s; porkers, 42s 6d; and small stores 17s.

Salford, Tuesday.—The supply of cattle was smaller. Trade was better, and prices, though not quotably higher, had an upward tendency. There was an increase of about 500 in the number of sheep on offer. Choice light weights were scarce and in good demand at late full prices, but other kinds changed hands slowly. About the same number of calves in market and trade ruled slow at about last week's prices. Quotations—Cattle, 5d to 6¾d; sheep, 6d to 8¼d; calves, 5d to 7½d per

lb. At market—Cattle, 2,719 ; sheep, 7,436 ; calves, 126 ; pigs, 112.

Sheffield, Tuesday.—The show of milch beasts was about equal to last week, and not much variation in prices, best lots making £17 to £23 10s ; secondary, £14 to £16 10s.

Shrewsbury, Tuesday.—Pigs of all kinds a brisk and better trade. Cows with calves a good trade. All other stock fair, with good demand. Quotations :—Beef, 6d to 7½d ; mutton, 6½d to 8½d ; and veal, 7d to 8½d per lb. Porket pigs, 9s to 10s 6d ; and bacons, 8s 6d to 9s 6d per score. Cows, with calves, up to £21 15s. Number offered :—669 cattle, 46 cows with calves, 1,153 sheep and lambs, 84 calves, 69 fat, 94 porket, and 349 store pigs.

Spalding, Tuesday.—A fair trade for beef, which realised 7s 6d per stone ; cows, 7s. Stores sold slowly ; in-calvers and cows dear. In the sheep market there was a fair show, and trade about the same as last week. Lincoln sheep, 7d to 7½d per lb ; half-breds, 8d per lb. Ewes sold slowly.

Stockton, Wednesday.—There were on offer 260 cattle, 2 calves, 627 sheep, and 275 pigs. Best cattle was only on small show, and trade was somewhat slow, at 7s 6d to 8s ; rougher kinds, 6s to 7s per stone ; young sheep, 8d ; ewes, 6d ; tups, 4½d to 5d per lb.

Taunton, Saturday.—Fairly good attendance, medium supply, and a moderate trade.

Thame, Tuesday.—There was a large supply of stock at market with the exception of mutton, which was a short lot. The weather was very unfavourable, and trade was slow. Several of the beasts which were sent back required more feeding, but the best quality beef, which was scarce, sold readily. Mr. Bond's sale comprised 113 beasts, 100 sheep, 107 fat and weaning calves, and 221 fat and store pigs. Fat bullocks made £14 to £18 12s 6d ; fat heifers, £13 to £19 2s 6d ; wether sheep, 44s to 64s 6d ; ewes, 36s to 47s ; tegs, 30s to 44s 6d ; fat calves, £3 to £4 14s ; cow calves, 23s to 61s ; bull calves, 18s to 45s ; fat pigs, 10s per score.

Wakefield, Wednesday.—Rather better supply of beef, but business was of a slow character, at prices ranging from 5d per pound for rough sorts to fully 6½d for choice animals. The trade in sheep was of a dragging nature, dealers holding out for last week's rates. Small sheep 8½d per pound ; ewes, 5d to 6d ; strong, 7d to 8d. Numbers—Beasts, 1,646 ; sheep, 3,648.

Wolverhampton, Wednesday.—Beasts a good supply, trade slow ; sheep, fair supply, moderate trade ; calves, a small supply, good demand ; no supply of milking cows. Beef, 5d to 7d per lb ; mutton, 6d to 8½d per lb ; veal, 6½d to 8d per lb ; bacon pigs, 9s 2d to 9s 3d per score ; porkets, 9s 6d to 10s 6d per score ; sows, 7s per score.

Worcester, Saturday.—Moderate supply of fat cattle and sheep, but trade ruled quiet at about previous prices. Calves scarce and dearer. Large supply of pigs, and good demand at fully late rates. Beef, best, 6d to 7d ; inferior, 5d to 6d ; wether mutton, 8d ; ewes, 6d to 7d ; and veal, 7d to 8½d per lb. Pigs, 9s to 10s per score.

Worksop, Wednesday.—Average market, and good prices maintained. Best beef, 8s to 8s 3d per stone ; secondary, 6s 6d to 7s 6d ; best wether mutton, 8d to 9d per lb ; ewe and other sorts, 4d to 6d.

York, Thursday.—Fat beef, 7s 6d to 7s 9d per st. ; mutton, 7d to 8½d per lb. There was an average show of all classes of sheep for the time of the year. Trade was very bad all round, especially for South-country lambs. North-country ewes, 36s to 44s ; North-country shearlings, 38s to 44s ; North-country lambs, 26s to 33s ; South-country lambs, 27s to 32s ; Cheviot ewes, to 22s ; twice-crossed lambs, 26s to 32s ; twice-crossed shearlings, 42s to 48s ; Masham shearlings, 36s to 44s each. The show of both English and Irish store cattle was one of the largest there has been for some years. There were a good many buyers present, but owing to the quantity of stock on offer and the high prices asked, trade ruled very slow indeed. The demand was chiefly for two-year-old beasts, which made £10 to £12 10s ; best three-year-old bullocks, to £16 each. There were several South-country buyers present, who were mainly in search of Shorthorn stirks, which made £6 to £9. Smaller show of both calving and milch cows, for the best of which there was a good demand, to £23 10s ; ordinary run, £15 to £18.

FOREIGN.

Deptford, Wednesday.—Beast entries totalled 923, none being shown on Wednesday last, and comprised shipments from the United States. Trade very slow character, and prices irregular and easier at 4s 1d to 4s 5d per 8lb to sink the offal.

Yorkhill, Tuesday.—A sale of Canadian and United States cattle was held in the afternoon, when there were 390 cattle landed by the Carthaginian (s), from Philadelphia, and 117 by the Pomeranian (s), from Montreal. There was a fair attendance of buyers, both city and distant. The cattle consisted principally of bullocks, but there were also a number of bulls and stags included in the different shipments. Bullocks, as regards quality, were scarcely up to the usual standard. Stags and bulls were about the average, and were presented in good condition. The dead-weight quotations were as follow :—Best bullocks, medium weights, 58s per cwt ; secondary and heavier, 56s ; rough cattle, 54s ; stags, 52s to 54s ; bulls, 46s to 50s, according to quality and finish.

FEEDING STUFFS.

Mark Lane, Monday.—Linseed Cakes: The trade continues inactive and with a very limited demand, values are weak. Russians offer rather more freely and at a slight reduction since last Monday. Americans are in better supply, and there are sellers of good brands at 2s 6d per ton under last week's price. English remain unchanged. Cotton Cakes : Shipments have been on a more liberal scale than is usual at this time, and with a fair quantity in second-hands, quotations are with difficulty maintained. Decorticated are not obtainable on spot, but offer for arrival at slightly easier terms, with meal at same price. Maize germ meal : Arrived parcels of American are in more request, and prices have firmed up again fully 2s 6d per ton, while English is without change. Rice meal : Rangoon in warehouse is still firmly held, while shippers' price for November-December despatch is unchanged.

—PINNOCK BROS., Mark Lane

London, Thursday.—Linseed.—Demand having materially declined, and shipments having rather increased, the market has turned flat and prices are lower. Calcutta London spot and near, 61s ; October-November, and November-December, 61s sellers. April-June, 49s 6d sellers. Hull nothing doing. Calcutta, April-June, 50s 6d. Azov, Black Sea, October-November, 58s 3d sellers. La Plata December-January, 53s. January-February, 52s. To the Continent Bombay is quoted March-May, 52s 3d. Calcutta, March-April, 51s 6d. ; April-June, new crop, 50s. La Plata, December-January, 53s ; January-February, 52s. Linseed cakes firm. London made, £8 10s to £8 12s 6d. Russian, £8 2s 6d to £8 7s 6d ex dock. American Westerns at £8. Cotton cakes steady. London made, £5 2s 6d to £5 5s ; Egyptian, £4 18s 9d to £5. Rapeseed is quiet, with a downward tendency. Cottonseed very quiet at easier quotations. Near at hand London £6 17s 6d sellers, first half November, £6 15s ; November-January, £6 13s 9d. Hull spot, £6 18s 9d ; October, £6 13s 9d ; November-January, £6 12s 6d. Cargoes, November, £6 15s ; December, £6 15s.——THE PRODUCE BROKERS COMPANY, LIMITED.

Hull, Tuesday.—The weather has been unsettled all the week. Wheat.—The arrivals are 25,162 qrs from Bahia Blanca, 1,175 qrs Buenos Ayres, 2,000 qrs Boston, 600 qrs Danzig, 15,000 qrs Eupatoria, 1,923 qrs Gastrouilli, 525 qrs Konigsberg, 1,741 qrs Kyrenia, 5,147 qrs Larnaca, 9,577 qrs New York, 1,076 qrs Odessa, 2,600 qrs Petersburg, 1,003 qrs Paphos, 19,151 qrs Rosario, 3,628 qrs Sulina, 8,743 qrs Villa Constitution ; total, 98,891 qrs. The trade shows no signs of improvement, and in some cases prices are 3d to 6d per qr lower. Spring corn —Barley : For foreign malting the general demand is still without animation, and prices for some sorts, especially for Smyrna and Danubians, are lower than they were. For feeding, the demand has lately gone from foreign to English, the last crop having produced a plentiful supply of common quality. Oats have met a poor demand, but prices are no lower. The local crop is offering freely. Beans are a trifle lower with a moderate demand. Flat maize is in better supply and lower to sell. Small round corn maintains full value. Large round hangs fire. The market to-day is fairly supplied with home-grown wheat, which can only be sold at 6d to 1s per qr decline on the prices of last Tuesday. Foreign 6d per qr lower, but rather steadier during the week. Common barleys are difficult to sell at 6d to 1s per qr reduction in price ; best samples met a fair sale at late rates. Oats without change in value. Beans dull, with slightly downward tendency. Maize in fair supply, and with a limited demand prices are 3d per qr lower on the week. Linseed.—The arrivals are 45 qrs from Catania, 25 qrs Harlingen, 249 qrs Konigsberg, 65 qrs Libau, 3,046 qrs New York, 1,910 qrs Petersburg, 1,250 qrs Riga ; total, 6 590 qrs. Throughout the week the market has been steady, but at the same time somewhat inactive ; values are practically unaltered and are about as follows. Calcutta to London, Sept.-Oct., and Oct.-Nov., 62s 9d ; nothing offering for present loading to Hull, but April-June is obtainable at 51s 6d. Black Sea, parcels afloat offer at 58s 9d, whilst for shipment there is but little on the market. Petersburg, old October offers at 57s, sellers scarce. Riga and Libau do not offer, shippers being engaged with the fulfilment of their contracts ; the value is nominally 56s. American Duluth 58s 9d, Sept.-Nov. nearest. River Plate, 54s ; Dec.-Jan., 53s 6d first half February, 53s all the month. Cottonseed.—The demand has been very slow on spot, and value receded to £7, whereat a little business reported to-day. Passage, £6 17s 9d to £6 15s, which latter accepted per steamer a few days afloat, also for sales made thereat October bill of lading. Nov.-Jan. and Feb.-March changed hands at £6 11s 3d to £6 12s 6d, but sellers not asking £6 13s 9d. Oils.—Export for the week ending Oct. 23rd, 1900.—Linseed oil : 2 Belgium, 12 Germany, 13 Norway ; total, 27 tons. Cotton oil : 30 Belgium, 95 France, 66 Germany, 11 Holland, 2 Norway, 10 Sweden ; total, 214. The market is quiet all round. Linseed oil : 32s 6d spot, 32s Nov.-Dec., 31s Jan.-April. Cotton oil : 19s 10½d spot, 19s 9d Nov.-April. Crude, 18s 6d spot, 18s 6d Nov.-April. Rape oil : Black Sea naked, 28s 6d spot, 1st quality naked, 29s 6d spot.—KEIGHLEY MAXSTED AND CO.

WATERLOO ROUND FEEDING CAKES, £6 17s 6d PER TON ; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £9 10s 0d PER TON ; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £9 7s. 6d. PER TON ; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £5 17s 6d PER TON. ALL F.O.R. HULL.

MOLASSINE, packed in bags, of 1½cwt. each. Price per cwt. 7s. 6d. Price per ton, £6 15s., on rail at works, Silvertown, Essex.

WOOL.

London, Friday.—Wool, English, per pocket of 240lb :—Fleeces, Southdown hoggs, £8 to £11 10s ; half-bred hoggs, £7 to £8 10s ; ditto wethers, £6 10s to £8 ; Kent fleeces, £6 to £7 ; Southdown ewes and wethers, £8 to £11 10s ; Leicester ditto, £6 to £7. Colonial, per lb :—Victorian, fleece, superior, 1s 4d to 1s 5d ; scoured, good, 1s 5d to 1s 5½d ; scoured, average, 1s 3d to 1s 4d ; greasy average to fair, 9½d to 10½d ; New South Wales, scoured, average, 1s 0½d to 1s 1½d ; greasy average, 7d to 8d ; South Australian, greasy, average, 5½d to 6½d ; New Zealand, scoured, average, 1s 2d to 1s 3d ; greasy, average, 7½d to 8d ; Cape, scoured, superior, 1s 3½d to 1s 4½d ; fleece, average, 6½d to 7½d ; greasy, average, 5d to 5½d ; Natal, scoured, 1s to 1s 1d ; greasy, average, 5½d to 6d ; crossbreds, greasy, Victorian, good to superior, 9d to 10d ; New Zealand, fine, 8½d to 9½d ; ditto, medium, 6¾d to 7½d ; ditto, coarse, 5½d to 6½d.

London, Saturday.—The fifth series of London sales of colonial wool, which commenced on the 9th ult., closed to-day. The net total available amounted to 368,000 bales, of which 235,000 bales have been sold, 159,000 bales for home consumption, 71,000 bales to the Continent, and 5,000 bales to America, leaving 133,000 bales to be carried forward to next series. The series opened with a decline of about 15 per cent. on Australian merino wools, and on the level thus established good parcels, especially good greasy wools, sold very steadily, but inferior and faulty descriptions lost further ground, ruling towards the middle of the series 15 to 20 per cent. below July. This was particularly the case with medium and inferior scoured, which were heavy of sale at the full decline. The withdrawal of a large quantity of the available supply strengthened the market during the last week. Prices improved about 5 per cent., not perhaps invariably but in a great many instances, for both grease and scoured, especially the better classes. Among crossbred the finer sorts fell, like merino wools, about 10 to 15 per cent., but the lower sorts were in good demand at barely 5 per cent. decline. In the early part of the series especially not a few parcels commanded July prices, but lately the inquiry has slackened, and they must now be quoted 5 per cent. below July. Cape wools of all classes participated in the decline to the full extent. The sales were very well attended, but the Continental competition was weak, and two-thirds of the quantity sold was taken by the home trade. There was nevertheless general good bidding. The tone during the concluding days was distinctly strong, and the sales close very firmly, with prices for most descriptions at their best point. The first series of next year is to commence on Tuesday, January 15. What quantity will be available it is at present impossible to say with any degree of accuracy. It can, however, scarcely be less than 300,000 bales, including the held-over wool, and may be more.—HELMUTH SCHWARTZE AND CO.

Bradford, Thursday.—There is a better feeling in the wool market to-day, though it is based upon little beyond a firmer determination of holders to stand out against further reduction of values of fine sorts. The coarser sorts still tend downwards. Quotations both for wool and mohair are unchanged. The yarn trade is without improvement, and matters are very quiet indeed in the piece trade.

Canterbury Saturday Prices remain [illegible], and there is not a great deal of business doing. [illegible] are quoted at 6d, and lambs' wool from 4d to 5½. Drapers are in rather better demand at from 8d to 9d per [illegible].

Leicester, Saturday. In the local wool market during the past week the turnover has been [illegible] especially so for merinos and cross breds. Values remain [illegible] prices the production is fairly maintained. In the [illegible] it is difficult to obtain contracts. The demand for yarns would be now good, but there is less doing in knittings and worsteds.

HAY AND STRAW.

Whitechapel. Saturday. Good [illegible] 70s to [illegible], inferior [illegible] 75s to 80s ; [illegible] 70s to 75s ; good [illegible] 70s to 75s ; inferior [illegible] 60s to 65s ; and [illegible] 70s to 75s per load.

Cumberland Saturday. Best [illegible] 70s to 75s ; good [illegible] 65s to 70s ; inferior [illegible] 60s to 65s ; best mixture, 80s to 90s ; straw, 24s to 34s per load.

Bristol. Tuesday. Choice hay [illegible] 70s to 75s ; straw, 24s to 28s.

FOREIGN HAY AND STRAW.

London. Saturday. The [illegible] continue [illegible] little or nothing can be shipped from the [illegible] Shippers continue to ask recent prices, while [illegible] to buy. We quote : Choice [illegible] 85s ; Dutch 1st cut clover, 80s ; French and Dutch 2nd cut clover 72s 6d, good Dutch hay, 72s 6d [illegible] hay, 65s ; large bale French wheat straw, 46s 6d ; small bale French wheat straw, 43s ; small bale French oat straw, 43s. All these prices are per ton delivered [illegible]—FULLER AND PRENTIS, 9 and 10, Great East Street, E.C.

MANURES.

Liverpool. Friday.—There is a quiet market [illegible] at sale of the recently imported [illegible] £8 10s per ton, according to quality, and other [illegible] likewise able, excepting basic slag, which is in [illegible] request at the quotations, and will be more so [illegible] the season advances. Feeding stuffs are slow of sale, and this to a large extent can be ascribed to the mild, open weather, yet notwithstanding the quiet trade much firmness is evinced in the market, and linseed cakes have slightly further improved. To-day's values are as follows :—Nitrate of soda, best qualities, [illegible] per cwt. ; common, in bags, £8 7s 6d to £8 10s per ton. Egyptian beans, in bags, £4 7s 6d to £4 10s per ton ; kainit, prime 23 per cent., in bags, £2 7s 6d to £2 10s per ton ; linseed cake, American thin oblong, prime, in bags, £7 18s 9d to £8 2s 6d per ton ; linseed cake, English prime, in bags, £8 15s to £9 2s 6d per ton ; linseed cake, foreign, round, soft, and oily, in bags, £8 15s per ton ; cottonseed cake, N.A., decorticated, prime, fairly soft, in bags, £6 17s 6d to £7 2s 6d per ton ; cottonseed cake, English, decorticated, prime, in bags, £7 7s 6d to £7 12s 6d per ton ; cottonseed cake, English, undecorticated, prime, in bulk, £5 5s to £5 10s per ton ; cottonseed cake, crushed, 20 to 25 per cent. oil, prime, in bags, £7 7s 6d per ton ; maize germ meal, English, prime, in bags, £5 7s 6d to £5 10s per ton ; rice meal, Rangoon, as imported, in bags, £4 17s 6d to £4 17s 6d per ton ; Indian meal, coarse to fine grading, prime, in bulk, 11s 9d per 240lb ; linseed, fine feed grades, in bags, £9 5s per quarter, 416lb ; N.V. compressed, [illegible] feed, in bags, per cwt ; D.N.S. Brand superphosphate of lime, guaranteed, 25 to 27 sol., in bags, per ton ; D.N.S. Brand superphosphate of lime, guaranteed, 30 to 31 sol., in bags, per ton ; D.N.S. Brand superphosphate of lime, guaranteed, 35 to 36 sol., in bags, per ton, nominal ; basic slag, prime quality, guaranteed, 30 to 35 per cent. phos., in bags, £1 11s to £1 12s 6d per ton ; basic slag, prime quality, guaranteed, 35 to 40 per cent. phos., in bags, £1 13s 6d to £1 14s 6d per ton ; basic slag, finest quality, guaranteed, 38 to 45 per cent. phos., in bags, £1 16s to £1 17s 6d per ton, at the producing depots.—H. JONES LANGAR AND CO.

THE BALTIC.

The old Baltic has now been wound up, and each holder of a £100 share has received a cheque for £720. The confidence of the late Baron Schröder in the enterprise has therefore been extremely well justified. The buildings in St. Mary Axe are the enterprise of a new company.

There was nothing doing on Monday after 1 p.m. owing to the C.I.V. demonstration. Trade on Tuesday, Wednesday, and Thursday was fairly firm, but the week closed without much strength. The following sales of cargoes may be recorded :—Wheat : New Zealand, 28s. 3d., arrived ; No. 1 Californian, due, 30s. 9d. ; on passage, 30s. 6d. ; Walla Walla, nearly due, 29s. 6d. ; and a cargo for prompt shipment has been placed at the same price. As the latter will be nearly four months before it is delivered a remarkable steadiness is indicated in opinion as to value. Other sales for future shipment are :—Bulgarian 28s. prompt, Azoff 29s. 6d. prompt, Hard Duluth 32s. 9d., December Manitoba 31s. 9d., November 32s., December No. 1 Northern 31s. 6d., November and December. Maize : American 20s., arrived, 19s. 6d. November shipment, 18s. 9d. December, and February 17s. 6d., Argentine 21s. ; just shipped, Morocco 23s., November shipment, and Galatz 19s. 9d., May shipment. Oats : New black Irish, Cork to London direct, 16s., Canadian 14s. 6d., November shipment, and black Libau same price also for November shipment. Other sales include Taganrog barley at 18s. 9d., Salda beans at 20s. 6d., Canadian peas at 28s., Smyrna dari at 27s., Turkish canaryseed at 32s., and Russian Bucharest at 26s. 6d. ; all at per qr.

The arrivals of grain and seed laden vessels at ports-of-call for the week were 5 wheat (1 Lyttleton, 2 Portland Or., 1 San Francisco, 1 Waratoo, 1 Beans Mazagan ; total 6.

The sailings of grain and seed-laden vessels from ports-of-call for the week were :—14 wheat (1 Barrow in Furness, 1 Birkenhead, 1 Bristol, 2 Cardiff, 1 Cork, 1 Dublin, 1 Hull, 1 North Shields, 2 Tyne Dock), 1 barley (Hull) ; total 15.

LIVE STOCK.

OUR ILLUSTRATIONS.

The Longhorn bull Wootton Wonder is the property of and was bred by Mr. H. Jasper Selwyn, Kenilworth. It was born on January 30th, 1897, its sire being Pretender 2nd, and its dam Pink, by Baddesley, and at the Royal Show at York this year it won the first prize for Longhorn bulls calved in 1896 or 1897.

The Hackney stallion McKinley 6475, sire Garton Duke of Connaught 3009, dam Lady Willerby 2239, by Rondo 1340, was bred by Mr. A. Craggy, North Newbald, Brough, York, and is the property of Mr. Harry Livesey, Rotherfield, Sussex. The latter gentleman exhibited McKinley at the last London show of the Hackney Horse Society, and won the first prize in the class for stallions four years old and upwards, the special prize of £25 and silver medal for the best stallion in the older classes, and also the champion cup, value £30, for the best stallion in the show.

STOCK AND SHOW NOTES

By Herdsman.

The Council of the National Sheep Breeders' Association will meet on Tuesday, November 6th, at the Salisbury Hotel, Fleet Street, at 3 p.m. Annexed is the agenda:—(1) Read minutes. (2) To consider replies *re* resolutions referred to affiliated societies *re* colouring show sheep, and to decide upon reply to the Councils of the Royal Agricultural Society and the Smithfield Club with regard to the resolutions on colouring show sheep, which were referred to the affiliated societies for consideration at the meeting of February 27th last. (3) To consider reply of Board of Agriculture *re* sheep scab resolution passed at last council meeting. (4) To consider report of Executive Committee, if any. (5) To instruct secretary *re* carrying out of resolution passed at York Conference: "That a conference of home, colonial, and foreign sheep breeders be called annually, to meet during the annual show week of the Royal Agricultural Society." (6) To receive communications. (7) To fix time, date, and place of next council meeting. (8) Any other urgent or important business.

In the first week of October two very successful Shorthorn sales took place in the United States, particulars of which have now come to hand. The first was on October 4th at Des Moines, Ia., the animals belonging to Mr. Martin Flynn, and the second on the following day at Newton, Ia., the animals then offered being the property of Mr. E. S. Donabey. A female made the top price at each sale, the highest figure being £208, which was paid for Mr. Donabey's two-year-old imported heifer roan Bess, by Star of Morning. £120 was the highest price Mr. Flynn got, and this sum he obtained twice, viz., for a five-year-old cow named Duchess of Walnut Hill, by Rowley's Kirklevington, and for another five-year-old named Aberdeen Butterfly 10th by Highland Chief. A three-year-old heifer by Highland Chief fetched £100. Mr. Donnabey secured £149 for Crest of Bluffview, a two-year-old heifer by Prince Ramsden, and £122 for a three-year-old, Miss Ramsden 16th, by Prince President 2nd, and this was given for Mr. Flynn's Cumberland Chief, by Highland Chief. Mr. Flynn's average was forty-four females, £49; twelve bulls, £46; Mr. Donabey's fifty-two females making £49 each, and seven bulls £20.

At a recent meeting of the Council of the Polled Cattle Society it was agreed to offer for competition in 1901 six gold medals, being one each to the Highland and Agricultural Society, Royal Northern Agricultural Society, Royal Agricultural Society of England, Yorkshire Agricultural Society, Royal Dublin Society, and North-East Agricultural Association, Belfast, to be awarded to the best breeding animal of the Aberdeen-Angus breed in the showyard.

Messrs. John Thornton and Co. have, during the past week, issued No. 129 of "Thornton's Circular," which contains particulars of Shorthorn transactions from April 1st to June 30th, 1900. This is naturally the most important number of the year, containing as it does the Shorthorn awards at the three big shows, viz., the Royal, Bath and West, and Royal Counties; whilst among the sales dealt with are those of the Prince of Wales, Earl of Feversham, Mr. J. T. Hobbs, Mr. C. A. Scott-Murray, Mr. J. E. Jones-Charnock, and the late Mr. W. T. Talbot-Crosbie

Breeders of Shropshire sheep will be interested to know that at the recent public sales, held in various parts of Great Britain and Ireland, no fewer than nine rams have, says Messrs. Mansell and Co., realised 100gs. and upwards, and have made the splendid average of £130 10s.; whilst several others have made between 40gs. and 90gs., and that several ewes have realised between 20gs. and 30gs. each.

North America, as usual, has largely helped the general run of prices, but Australasian breeders have done the most to enhance values, and have been spirited bidders at several of the sales, givin in one case 240gs. for a ram, and in others 140gs., 120gs., and 90gs. The Australian demand has been greatly fostered by the wonderful results obtained by the Shropshire ram on cross-bred Merino ewes to produce fat lambs for export. Mr. G. S. Kempe, a well-known Australian authority, says Shropshire cross lambs are now to be seen in every farmer's paddock, and that the breed has secured a very strong foothold in Australia. These facts should encourage home breeders in their efforts to maintain and improve the valuable qualities of the breed.

Mr. H. J. Selwyn's Longhorn Bull "Wootton Wonder." First Prize at the Royal Show at York, 1900.

On Saturday, November 3rd, the s.s. Umgeni, of the Natal Line, sailed from London with a number of South Devon pedigree bulls, cows, and calves for South Africa. The cattle are going to Major Duncan McKenzie, of Natal, and were selected by Messrs. W. Weddel and Co., of London, from the herds of the following breeders, viz., J. Sparrow Wroth, of Coombe, one bull, Ripley; two cows, Snowball and Myrtle III.; and four newly-born calves; J. W. Meathrel, of Coulston, two bulls, Carlo and Richmond; John Wakeham, of Lambside Farm, Newton Ferrers, one bull, Morning Star; and Joshua Wakeham, of Ley, Diptford, one bull, Joubert. This is the second lot of South Devon cattle that has been sent to Major Duncan McKenzie in the last twelve months.

In order to avoid as much as possible clashing with the Peterborough Agricultural Society the Lincolnshire Society have altered the date of their next year's show at Brigg to Thursday, Friday, and Saturday, July 11th, 12th, and 13th.

The Suffolk Fat Cattle Club will hold their annual Ipswich Christmas show of fat stock and farm produce on Monday and Tuesday, December 17th and 18th. The executive, endeavouring to bring this show more to the front, have issued a good prize list, and are now soliciting subscriptions to offer valuable challenge cups for beasts, sheep, and barley, which they expect will bring the value of prizes to upwards of £500. The ladies' department will this year be removed to the adjoining rink, and the large drill hall will be occupied by the cattle and stand holders, in addition to the buildings usually devoted to live stock, and it is thereby hoped to increase the importance of the fat stock department. The entries close on the 14th inst., and post entries at double fees on the 26th inst. Prize lists and forms for stand holders can be had on application to the secretary, Mr. Robert Bond, Old Bank House, Ipswich.

Transactions in Store Stock.

[*From the Irish Department of Agriculture and Technical Instruction.*]

There was a large fair at Drogheda, co. Louth, on Monday, composed chiefly of good polled bullocks and young cattle, for which the demand was fair, and nearly all were sold. A good demand was also experienced for springers. Prices:—Calves, first class, £5 10s. to £6 10s.; second class, £4 17s. 6d. to £5 5s. Yearlings, first class, £8 10s. to £10; second class, £7 5s. to £7 15s. Two-year-olds, first class, £12 to £13 10s.; second class, £10 5s. to £11 10s. Three-year-olds, first class, £14 to £16 10s.; second class, £12 15s. to £13 15s. Springers, first class, £16 5s. to £18 10s.; second class, £12 15s. to £15.

There was a large fair at Collooney, co. Sligo, on Wednesday, at which demand was slow and prices in favour of sellers. Quotations:—Calves, first class, £5 10s. to £6; second class, £4 to £5. Yearlings, first class, £8 10s. to £10; second class, £6 5s. to £7 10s. Two-year-olds, first class, £11 to £13 8s. 3d.; second class, £9 to £10 15s. Three-year-olds, second class, £12 15s. to £13 15s. Springers, first class, to £18; second class, £13 10s. to £15 5s.

The fair at Westport, co. Mayo, held on Thursday was a large one, consisting of middle-class cattle, and a large number of which remained unsold. Prices:—Calves, second class, £4 10s. Yearlings, second class, £6 to £7; third class, £3 2s. 6d. to £4. Two-year-olds, second class, £8 to £9 15s.; third class, £5 10s. to £7. Three-year-olds, second class, £10 12s. 6d. to £12 3s.; third class, £7 to £9. Springers, second class, £13 to £14 5s.; third class, £8 10s. to £10 5s. There was a very small supply of sheep. Two-years old and over, third class, made from 15s. to £1.

At the fair held at Nenagh, co. Tipperary, on Thursday a very good demand at high prices prevailed for the cattle, which sold as follows:—Calves, second class, £4 10s. to £5; third class, £4 5s. Yearlings, first class, £9 8s. 9d. to £10 10s.; second class, £7 to £9 7s. 6d.; third class, £6 15s. Two-year-olds, second class, £10 to £11 15s. Three-year-olds, first class, £15 15s.; second class, £15 5s. Springers, second class, £12 to £14. There was only a small supply of sheep, and the demand fair. Lambs, first class, realised from £1 8s. to £1 11s.; second class, £1 2s. to £1 8s.; and over twelve months and under twenty-four, first class, £2 2s. 6d.

Failing to Report Sheep Scab.—At the Thornaby Police Court on Monday, Thomas Atkinson, farmer and sheep dealer, of Kirklevington, was charged with having failed to report an outbreak of sheep scab, and also with exposing an animal so affected for sale at Yarm Fair. Mr. C. J. Archer, who defended, said his client acted without knowledge of the existence of the disease, but the Bench thought he had not exercised sufficient diligence, and ordered him to pay the costs, £2 10s.

Scotch Pedigree Cattle Sales During the Year.

The Scotch season for sales of Shorthorn and Aberdeen-Angus cattle is now over, and, as usual, the *Banffshire Journal* has prepared some interesting figures dealing with the trade throughout the year. Of the two breeds there have been sold in Scotland this year 2,083 head, as against 2,189 last year, a decrease on the year of 106 head. There were fewer Shorthorns sold by 191 head, and more Aberdeen-Angus by 95, and the fact that the decrease in numbers takes place in the case of the breed that has the highest financial average explains the circumstance that all over the average of pure-bred cattle in Scotland has not maintained its figure of last year. Taking both breeds together, the average of the 2,083 head sold is £27 0s 9d., which is less than the general average of last year by a sum no less than £3, plus 4d., the difference representing to breeders a total depreciation of £6,250. Both breeds share in the decrease, and in view of circumstances affecting demand some may be surprised to learn, as the writer in a measure was, that the Shorthorns contributed to it, the average in their case being less than that of last year by £1 12s. 10d. The Aberdeen-Angus breed is subject to fluctuations in value. There are of it not a few herds which are kept as the "useful stock" of the farm—that is, to provide good beef stots for the London markets, a few of the best of the males and younger females being put to sales—a circumstance that might be expected of a native breed of the country, and when the average is not assisted by sales of stock of important herds, the gross on the year is apt to exhibit a balance on the debtor side when compared with that of the previous twelve months. Thus we find this year that the average of Aberdeen-Angus cattle in Scotland, amounting for 1,168 head to £23 5s. 11d., is less than that of last year by £3 8s. 10d. In 1899 the average of Aberdeen-Angus was unusually high—£27 4s. 9d., which was greater than the average of the previous year by £4 13s. 11d. The average of Polled cattle last year was the largest of any year since 1884, so that the decrease this year cannot, under any circumstances, be called violent.

Shorthorn Sales.

Last year Scottish Shorthorn breeders enjoyed the most prosperous season in their experience, and although, as has been seen, the average as compared with last year is somewhat less, it should be recalled that last year's average was greater than that of the previous year by a sum of no less than £6 18s., so that although the average has decreased by £1 12s. 10d., it is still 5gs. better than it was two years ago. On the other hand, seldom has a year been experienced in which very high prices have been so common. The experience culminated at the recent Collynie and Uppermill sale, when for calves Mr. Duthie got such prices as 200gs., 270gs., 300gs., 350gs., and 355gs., and Mr. Marr 190gs. and 230gs., while the average of the former, all for calves, was £150 and of the latter £126. These figures touch the high water mark of values. Mr. Duthie's figure of £372 15s. is the highest of the year. This is no new position for Mr. Duthie to occupy. Last year he had the highest figure in another calf which brought £320 5s.; two years ago his neighbour, Mr. Marr, got £306 10s. for a calf; and in each of the five previous years the honour lay with Mr. Duthie, whose highest figures, going back were for each year:—£210, £315, £246 15s., £115 10s., and £16 5s. The second highest figure of the year was £252, got by Mr. Graham, Redgorton, at a Perth sale, and twice the sum of £241 10s. was paid for animals belonging respectively to Mr. Marr and Lord Lovat. The success of the Beaufort herd has been, as usual, great, Lord Lovat selling three bulls at Inverness at an average of £126, and a like number at Perth at an average of £159 5s.

Aberdeen-Angus.

The drop in values is somewhat greater in the case of the Aberdeen-Angus breed, easily accounted for by local circumstances. As in the case of its rival, however, it has shown a buoyancy that confirms all experience that at the top of the tree excellent profits may be made. As it is, the average this year of £23 15s. 11d. is, with the exception of last year and 1897, the best since 1891. The highest price of the year is £376, which was given at the Perth sale by Mr. Ferguson, Kinochtry, for one of the young bulls from Ballindalloch. This we believe is the highest price paid for a bull at any joint sale. Last year the highest price paid for a member of the breed was £199 10s., given also for a Ballindalloch calf. Angus, both two and three years ago, furnished the highest-priced animals of their respective years, and both belonged to the old Spott family of Jipseys, Lord Strathmore two years ago getting £215 5s. for Jimie, and three years ago Mr. Whyte, Spott, £252 for Jipsey Baron. Four years ago Bion brought £315. At the Aberdeen joint sale this spring the Countess of Seafield gave £141 15s. for an Aberlour bull. The Ballindalloch herd also furnishes the leading averages—£91 9s. for each of eleven at Perth, and £49 14s. for each of six at Inverness. At Perth, the Earl of Strathmore sold ten at an average of £64 3s., and Mr. M'Laren, Auchnaguie, five at an average of £57 15s. Mr. Findlay, of Aberlour, made the leading average at Aberdeen £41 for each of nine.

There were ninety-three Aberdeen-Angus cows sold as against 112, and the highest price was £100 16s., got by Mr. Cran, Morlich, against £112 7s., realised at last year's sale at Castlecraig. Mr. Littlejohn, Wellhouse, got the second highest price—£78 15s., and Mr. Walker, Portlethen, the third—£63.

Sale of Shorthorns and Aberdeen-Angus at Aberdeen.

The annual autumn sale of Shorthorn and Aberdeen-Angus cattle, held at the Agricultural Hall, Aberdeen, took place on the 25th ult. There was an entry of 117 animals, but there being a few absentees, the total number forward was about 100. The attendance of buyers was large, and throughout the sale there were spirited competitions for animals up to a certain size, and showing some quality. Several very good drafts of Shorthorn bulls were put into the ring, and in this section the principal averages were: Mr. Durno, Westerton (2), £24 13s. 6d.; Mr. G. Shepherd, Shethen (8) £23 7s. 3d.; Mr. Manson, Kilblean (2), £21; Mr. Reid, Fechil, Ellon (3), £21; Mr. Morrison, Phingask (5), £20 17s. 10d.; Mr. Black, Barthol Chapel (5), £40 5s.; Mr. Green, Collywell (3), £17 3s.; Mr. Crombie, Woodend (4), £22 8s. 10d. There was a keen demand for females, and the highest price—27gs.—was obtained by Mr. Durno for a two-year-old heifer, Rosie 16th. The averages in the Shorthorn sections were as follows: Thirty-six bulls, £22 14s. 8d.; three cows, £30 19s. 6d.; three two-year-old heifers, £25 4s. [illegible] £23 10s. for forty-two head, or a total of £967.

Exposers of Aberdeen-Angus cattle experienced equally good trade. The first of the bulls to enter the ring made the record price of the breed at the sale, namely, 172s. This was paid for Lord Roberts, by Harold of Cuden, the property of Mr. Fettes, Corskie, the purchase being Mr. Leith Hay. The chief averages for bull calves were as follows: Mr. Mackessack, Balnagie (4), £15 17s. 7d.; Mr. Anderson, Nether Aquharnie (2), £24 5s.; Mr. Wattie, Milton Cromlet (3), £21 10s. 6d.; Mr. Fraser, Hill of Skilmafilly (2), £18 12s. 9d.; Mr. Robertson, Aquorsk (2), £19 8s 6d.; Mr. Brebner, Corncalterach (2), £15 9s. 9d. The average for twenty-three Polled bulls was £21 9s. 7d.; for eight cows, £21 5s. 3d.; for one two-year-old heifer, £42 1s.; for seven yearling heifers, £15; for nine kept calves, £12 19s.; making a gross average of £19 3s. for forty-six head, or a total of £919 15s. 6d.

Sale of Red Polls at Ipswich.

Messrs. Robert Bond and Sons' fourteenth annual sale of pedigree red poll cattle at the Drill Hall at Ipswich took place on Tuesday, when twenty cow heifers, and bulls were catalogued. Buyers attended from Staffordshire, Kent, Wiltshire, Hertfordshire, Essex, and Norfolk, and a good sale resulted. Mr. Fred Smith, of Woodbridge, awarded the prizes. The first and second prizes for heifers were won by Mrs. Morrison, Fonthill; the first prize for bulls by the Executors of Mr. P. K. Blofield, and the second prize by Mr. H. W. Packard. The following were the prices realised:—

COWS.

The property of Mr. Alfred Mansell, Preston Wynne:		
Stockton Rose 2nd, c Sept., 1894	Mr. Read	7
Miss Harriet, 2nd bull calf, c July, 1893	Lord Radnor	5
Newbourn Nelly V., 2nd bull calf, c Nov., 1898	Lord Radnor	5
Fonthill Nelly, 2nd bull calf, c Feb., 1896	Mr. J. L. Quested	4
Sheen, 2nd bull calf	Mr. G. Hewson	4
Cissie Wainght, c May, 1894	Mr. S. H. Allen	37
Dancing Jenny, c Oct., 1896	Mr. H. Lee	23
Busy Bee, 2nd bull calf, c Dec., 1899	Mr. S. H. Allen	7
Perdition, c Aug., 1895	Mr. J. L. Quested	25
Miss Marlton, c Dec., 1892	Mr. J. L. Quested	15
Perversity, c April, 1897	Mr. Dawson	15
Sunny VII., c March, 1894	Mr. Nunn	34
Cherry, c Feb., 1891	Mr. E. J. Quested	26
Mabel, c Jan., 1894	Lord Radnor	17
Glossie, c Jan., 1896	Lord Radnor	27

HEIFERS.

The property of Mrs. Alfred Mansell:		
Ruthless II., c Sept., 1898	Mr. R. P. Cooper	27
Butter Dish II., c Feb., 1899	Mr. S. H. Allen	20
Countess, c Oct., 1898	Lord Radnor	26

Bull Show and Sale at Carlisle.

Messrs. Harrison held a special sale of pure Shorthorn and Galloway bulls at their Carlisle Mart on Thursday. There were 250 forward, many being good pedigreed animals, and they went to purchasers from all parts. A number of prizes were offered, and they were awarded as follows:—Pedigree bulls—1, Sir W. Thorburn, M.P., Innerleithen, sold for 46gs.; 2, Messrs. Workman, Pettend Green; 3, Mr. Barnes, Aikbank, 26gs. Non-pedigree bulls—1, Mr. Blake, Lamonby Hall, 40gs.; 2, Mr. Teasdale, Milestone Moor, 35gs.; 3, Messrs. Wood, Thursby, 27gs. White bulls, calved in 1899, made to £19 5s. Galloway bulls, calved in 1899—1, Messrs. Mitchinson, Cumrook, 184gs.; 2, Mr. Henderson, The Green, 14gs.; 3, Mr. Dobson, Geltsdale, 13gs. A special sale of store cattle was also held, and 800 head were sold at good prices.

Mansell's Store Stock Sale at Shrewsbury.

On the 25th ult. Messrs. Alfred Mansell and Co. held their October sale. In consequence of the restrictions owing to the outbreak of foot and mouth disease in the County of Stafford and other districts, which prevented the removal of animals into the large feeding areas, the company was not so large as usual, and therefore prices were easier. Nearly 1,[illegible] cattle passed through the sale ring, and about 400 sheep changed hands.

ALL farm live stock should be given "MOLASSINE." It is an excellent food and condiment combined. See advertisement on back page of this issue.—[ADVT.]

The prices were as follows:—Shorthorn bullocks, £14 10s., £13 12s. 6d., £13 10s., £13, £12, 15s., £12, £11 12s. 6d.; Shorthorn heifers, £13 5s., £13, £12 17s. 6d., £12 10s., £11 10s.; Hereford bullocks, £15 7s. 6d., £14 15s., £13 10s., £13, £11 10s.; Hereford heifers £11 15s., £10 17s. 6d., £10 12s. 6d.; Hereford cows, £15 5s., £14 15s., £13 12s. 6d., £12 10s.; Hereford yearlings, £11 5s., £11 12s. 6d., £11 5s., £10 12s. 6d., £10 5s., £10, £9 17s. 6d., £9 12s. 6d.; Hereford and Shorthorn crossbred bullocks, £15 5s., £14 17s. 6d., £14 5s., £14; Black Polled bullocks, £15 5s., £14 15s., £14 5s. £14, £13 10s., £13 5s., £12 15s., £12 12s. 6d.; Black Polled heifers £13 5s., £12 17s. 6d., £12, £11 15s., £11 5s.; Welsh Blue Greys, £10 5s., £10 10s., £9 10s., £8 10s.; Kerry heifers, £9 2s. 6d., £8 17s. 6d., £8 10s.; crossbred bullocks, £13, £12 17s. 6d., £12 10s., £11 15s.

The rougher lots of cattle sold as low as 25s. to 27s. per cwt., but good sorts in all cases sold well. Polled bullocks making from 32s. to 33s. 6d. per cwt., Hereford barrens up to 32s. 6d. per cwt., and a lot of crossbred (Hereford and Shorthorn) bullocks weighing 8cwt. realised £14 17s. 6d., or 37s. 2d. per cwt.

The next sale to be held by this firm will take place on Friday, November 16th, for which a large entry has been received, and by which time all regulations and restrictions appertaining to the outbreak of foot and mouth disease will, it is hoped, be removed.

HORSES.

Sale of Harness Horses and Hunters at Newcastle.

Messrs. R. Donkin and Son's usual autumn sale of harness horses and hunters previous to the October Horse Fair took place at Newcastle on the 26th ult., when the catalogue comprised an entry of forty animals belonging to north-country gentlemen, a number rather less than usual. There was a good company present, and keen competition took place for the best class of horses. Although no very high prices were realised, yet the general average was a good one. The following were some of the principal prices obtained:—Brown cob gelding, six and a-half years, 15.1 h.h., 21gs.; black gelding, seven years, 16.1 h.h., 60gs.; bay mare, three and a-half years, 15.3 h.h., 26gs.; bay gelding seven years, 16 h.h., 34gs.; brown gelding, six years, 15 h.h., 27gs.; dark brown gelding, rising four years, 16.1 h.h., 50gs.; chestnut gelding, four years, 15.2 h.h., 50gs.; bay mare, six years, 15.1 h.h., 25gs.; brown gelding, six years 15.3 h.h., 22gs.; black mare, six years, 15.2 h.h., 30gs.; grey gelding, five years, 15 h.h., 25gs. Other cobs and ponies realised from 12gs. to 20gs.

Horse Sale at Glasgow.

On Tuesday afternoon Mr. Joseph Vine conducted a sale of horses within his horse bazaar, opposite Buchanan Street Station, Port Dundas Road, Glasgow. There were 120 animals catalogued, consisting principally of carriage and harness horses. There were also a number suitable for van and cart purposes, and also a few cobs and ponies. Carriage horses experienced the best demand and sold well. Cobs and ponies had a fair selling trade. Carriage horses of the best class realised up to 50gs.; secondary, 20gs. to 30gs.; inferior, 6gs. to 14gs.; best cart or draught horses, to 46gs.; secondary and inferior, 6gs. to 20gs.; cobs, 5gs. to 24gs.; vanners, to 30gs. and down to 5gs.; ponies, 4gs. to 18gs.

Show and Sale at Carlisle.

Hetherington's Auction Company held their monthly horse sale at Carlisle on Thursday, when about 136 animals were catalogued, including a consignment of Shetland ponies. The prize winners and the prices realised were:—Two-year-old cart geldings—1, Mr. J. R. Beattie, Baurch, 42gs.; 2, Mr. W. Wannop, Carlatton, 35gs. Two-year-old cart fillies—1, Mr. J. Lowther, Laithes, Kirkbride, 38gs.; 2, Mr. Lloyd, Boustead Hill, 36gs.; 3, Mr. J. Robinson, Newlands, 30½gs. Foals, to 18gs. Cart horse or mare—1, Mr. Robinson, Newlands; 2, 3, and commended, Mr. W. Rush, Carlisle. The second prize horse sold for 50gs. Saddle or harness—1, Mr. Lightfoot, Great Orton; 2 and 3, Mr. W. Rush. Cobs—1, Mr. T. Thistlethwaite, Penrith; 2, Mr. Parkin-Moore, Whitehall; 3, Lord Lonsdale, Lowther Castle; 4, Mr. R. Doods, Desoglin. Shetland ponies made up to 17gs.

Mr. Samuel Rowlands, a leading agriculturist, of the north of England, and a member of the Council of the Royal Agricultural Society, died at his residence, Newton Morrell, near Darlington, on the 24th ult., aged sixty-three.

Ely Fair.—There was a fair supply of stock at this fair on the 25th ult., which met with a moderate sale; buds and steers realised from £6 to £9; stores, £10 to £16. Milch cows sold well at from £15 to £20. The horses were a very mixed lot, reaching up to £25 for useful animals.

SHEEP.

Warminster Fair.

There was a good supply of sheep at Warminster Sheep Fair, held on the 26th ult., the number penned being about 9,000, which is about 1,000 more than last year. Quality was a marked feature in most of the lots, and in this respect there was an improvement in the class of stock shown at some late sales. Business grew brisk as the sales proceeded, and the prices secured for most of the lots were well up to the average. Mr. J. T. Woolley, of Salisbury, sold wether lambs at 46s. 6d., 41s. 6d., 40s. 6d., 39s. 6d. (twice), 34s., 33s. 6d., 32s. 6d., 31s., 28s. 6d., 28s., 26s., and 22s. 6d.; mixed lambs at 35s. 6d. (twice), 34s. (twice), 33s., 31s. 6d., 29s., 28s. 6d. (twice), 28s., 22s., and 21s.; chilver lambs at 36s. 6d., 31s. 6d., 29s. (twice) and 27s. 6d. Mr. F. R. Ravenhill, of Warminster, sold wether lambs at 46s., 33s., and other prices, and mixed lambs at 33s., 27s., etc.

Glasgow and Leith Wool Sales.

There is nothing noteworthy to report in the Scotch wool market for the past month. The Leith sales on the 4th and 5th attracted a moderate number of buyers, but there was not much spirit in the competition, except for half-breds, which were scarce and wanted. Very little was done in Cheviots, and Blackfaced was neglected. A similar report holds good of the Glasgow sales on the 17th, where there was a limited attendance. In Whitefaced wools the buying was almost entirely confined to cross and half-breds of second-rate description, and at low prices. In Blackfaced there was scarcely anything done publicly, but there was some private buying afterwards, understood to be partly for export. As the month closes there is more buying in this class, both for home and foreign consumption, and prices are firm.

	Washed.		Unwashed.	
	s. d.	s. d.	s. d.	s. d.

Policeman Killed by Bad Meat.—George Gibbons, of the Cheshire Constabulary, stationed at Liscard, has died through eating diseased meat supplied to him when long special duty at Altrincham Election. At the inquest the butcher who supplied the meat admitted that a portion returned to him by the caterer was tainted and green, but stated that when slaughtered the beast was in splendid condition. The jury found a verdict of "Death from peritonitis through eating putrid meat improperly cooked and cooled."

SHOWS.

Bromyard Horse Show.

The twelfth annual show of the Bromyard Horse Show Society took place in the Meeting House Meadow, Bromyard, Herefordshire, last week. The entries were in excess of those in the previous year by seven, and the competition was very keen in several classes. The quality of the exhibits was particularly good, especially in the Shire colts, yearlings, and two-year-old classes, a sucking filly being sold for £36 at the termination of the show.

In the class for the best cart sucker colt there were twelve entries, the first prize being awarded to a grand colt sired by Dunsmore Achilles 9222; the second prize was taken by a stylish colt by Dore Baronet; third prize by another colt by Dunsmore Achilles; and the fourth by a very taking colt by Northern Cream. In the filly suckers the first prize was given to a compact filly by Bledlow Hero; the second prize fell to a filly which should have taken precedence to the before mentioned, having all the attributes required in a Shire-bred animal, her bone being good and hair silky and abundant; she was afterwards sold for £36; the third and fourth prize fillies were also of great promise. The entries in the nag classes were, as usual, poor, and several persons thought it would be advisable to amalgamate some of these classes and devote the prize money to other classes of heavy horses. The prize list was as follows:—

Cart colt: 1, Mr. S. N. Weaver, Sandlin Leigh, Malvern; 2, Messrs. Dutton and Sons, Burton Court, Cattonon-Teme; 3, Mr. R. Betteridge, The Hill, Cradley; 4, Mr. S. Jones; r, Mr. J. Colley, Little Cwarne; hc, Mr. W. T. Ockey, The Town, Castle Froome; c, Mr. W. Orgee, Hopton, Bromyard.

Cart filly: 1, Captain E. Heygate, Buckland, Leominster; 2, Mr. C. Bannister; 3, Mr. Samuel Drew, Wallcroft House, Bromyard; 4, Mr. S. Drew; r, Mr. Buckle.

Nag colt: 1, Mr. W. Pudge, Frogend, Bishop's Frome; 2, Mr. John Beamand, New House, Pemcombe; 3, Mr. F. W. G. Greswolde-Williams, Bredenbury Court.

Nag filly: 1, Mr. T. W. Heywood, Broad Heath, Tenbury; 2, Mr. James F. Parker, Little Froome, Bromyard; 3, Mr. Morris, Netherwood; r, Mr. T. W. Depper, Sinton End, Acton Beauchamp.

Yearling cart colt gelding, or filly: 1, Mr. T. L. Walker; 2, Mr. J. Dorrell, The Venn, Bromyard; 3, Mr. W. T. Barneby, Saltmarshe Castle; r, Mr. W. T. Barneby; hc, Mr. Samuel Drew; c, Captain E. Heygate.

Yearling nag colt gelding or filly: 1, Mr. F. W. G. Greswolde Williams; 2, Mr. F. W. Greswolde Williams; 3, Mr. E. Pannters, Bridgend, Much Cwarne; r, Mr. William Aitkins, The Farm, Bromyard.

Two-year-old cart gelding or filly: 1, Mr. W. T. Barneby; 2, Mr. W. P. Pope, Brockamin; 3, Messrs. Dalton Bros.; r, Mr. E. Caddick.

Three-year-old cart gelding or filly: 1, Mr. W. P. Pope; 2, Mr. T. Lawson Walker; 3, Messrs. Dalton and Sons; r, Mr. John Pitt.

Cart mare (with foal or served during the season 1900, certificate of such service; to be produced at the time of entry): 1, Mr. W. P. Pope; 2, Mr. Baldwin, Underley; 3, Mr. R. Betteridge; r, Mr. W. T. Ockey; hc, Mr. J. Bedford, Woodcrofts.

Special prizes of £1 for the first, and 10s. for the second, for foals by Mr. C. Aylett's horse Neptune: 1, Mr. John Colley; 2, Mr. Pantall; r, Mr. Buckle.

Nantwich Cheese and Butter Show

The Cheshire Dairy Farmers' Association's annual two-day show at Nantwich took place on Wednesday and Thursday, and was, on the whole, quite up to and in some cases above the average. The pitch of cheese was a record one, namely, 50 tons, whilst at the cheese fair held on the second day there was a total pitch of 115 tons. Another very satisfactory feature was the increase in the entries, which numbered 179, against 157 last year. The increase was chiefly in the open class, in which makers of coloured and uncoloured cheese competed. In the butter classes there was also a satisfactory improvement, last year's entry being increased from 34 to 44. Although some little criticism was offered by the judges on the condition of one or two dairies, which were slightly lacking in flavour and colour, the examinations passed on the exhibits generally were flattering to the exhibitors and to Nantwich, which, from its close association with the centre of the cheese making industry of Cheshire, has a considerable reputation to sustain.

In the first class, which was for twelve coloured cheese, the judges noted a lack of colouring in some of the cheese, but in other respects the cheese were a good one. The premier prize was awarded to Mr. N. Dale, or Tarporley, for a capital dairy. Mr. P. Dutton, of Hoofield, was placed second, and Mr. T. Shaw, of Hatton Heath, who won the gold medal at the Chester Show, third. In class 2, in which there were twenty-eight entries, there was some deficiency of flavour in one or two cheese, a defect which was fatal to the chance of the dairy. Mr. W. Lee, of Tattenhall, carried off the principal prize, the second and third places being filled by Mr. R. Beech, of Crewe, and Mr. H. Rutter, of Handley. In the class for six cheese there was a lack of flavour and colour in several cheese, but the judges were very enthusiastic in their praises of the quality which marked the winning dairies. Mr. T. Greenway, of Tarporley, was first with a splendid lot of cheese, which were readily selected by the judges for the premier prize. Mr. J. Williams, of Sound, Nantwich, secured second position, and the third prize went to Mr. J. Perry, of Norbury. There was a very fine display in Class 4. In an entry of twenty-six tubs were declared by eighteen exhibitors, and the judges had a hard task

in placing the winners, the reserve dairy being only slightly inferior to the premier dairy in point of merit. Mrs. Peacock, of Hargrave, a prominent and successful exhibitor, filled the place of honour with a magnificent dairy of cheese, and was awarded a special prize of £3 3s., given by Messrs. Stretch and Harlock for the best uncoloured lot of cheese in the show, the minor prizes being won by Mr. J. Jones, of Dodleston, Mr. W. H. Hobson, Malpas, and Mr. James Hulme, Ellesmere, all of whom were represented by excellent dairies. In the open class there were no fewer than seventy-two entries, representing nearly all well-known makers of Cheshire cheese, and the quality was typical of the high standard usually achieved. This class provided the winner of the Champion Cup, Mr. J. Dutton, of Swanley Hall, Nantwich, whose name is generally associated with high honours, being the fortunate exhibitor. Mr. Dutton's cheese were perfect in flavour and texture, and he well deserved the position conferred upon him. There was a very good display of butter, the cottagers as usual taking a prominent position. The principal winners were Mr. P. Reade, of Swanley, who has quite a record of successes; Mrs. France, another successful exhibitor; and in the cottagers' class Mr. R. Reade, of Faddiley, and Mr. T. Henshall, of Swanley.

Prize List.

CHEESE.

Twelve coloured Cheshire cheese, irrespective of weight, made, owned, and exhibited by any farmer whose occupation exceeds 150 acres, resident within twelve miles of Nantwich, or any member of the Association: 1, Mr. N. Dale, Brassey Green, Tarporley; 2, Mr. P. Dutton, Hoofield Hall, Huxley; 3, Mr. T. Shaw, Hatton Heath; 4, Mr. W. Moore, Checkley; 5, Mr. C. E. Parton, Haughton Hall Farm, Tarporley; r, Mr. W. Dutton, Brindley Hall, Nantwich; vhc, Mr. E. Charlesworth, Stoke Hall, Nantwich; Mr. T Brassington, Dairy Farm, Austerson; Mr. J. Jackson, Chorley Oak Farm, Handley; Mr. W. G. Moss, Randilow Farm, Betley; Mr. S. Dutton, Burleydam; Mr. J. Houlbrooke, Peckforton Hall, Tarporley; Mr. T. Dutton, Ash House, Brindley; hc, Mr. R. Cooper, Ridley Hill, Tarporley; Mr. G. Lea, Oscroft, Tarvin; c, Mr. G. Perry, Parkside Farm, Cholmondeley; Mr. H. R. Dutton, Spurstow Lower Farm, Tarporley.

Twelve Cheshire cheese, irrespective of weight, made, owned, and exhibited by any farmer whose occupation is over 80 and does not exceed 150 acres, resident within twelve miles of Nantwich, or any member of the Association: 1, Mr. W. Lee, Woodlake, Tattenhall; 2, Mr. R. Booth, Fields Farm, Crewe; 3, Mr. H. Rutter, Aldersey; 4, Mr. J. Hough, Shocklach; 5, Mr. E. Fitton, Eaton; r, Mr. H. Hobson, Hatherton; vhc, Mr. T. Vaughan, Ravensmoor; Mrs W. Dutton, Brereton Park, Hargrave; Mr. R. Davies, Round House, Edge; Mr. C. J. Gouldbourne, Brick Wall, Audlem; hc, Mr W. H. Hobson, Wood Farm, Malpas; Mr T Tew, Coole Pilate, Nantwich; Mr. R. Ankers, Ridley; c, Mr. H. E. Cooper, Bickley; Mrs. Johnson, Wood Farm, Wirswall; Mr. A. Lea, Hankelow Farm, Nantwich; Mr. J. Sandbach, Woore.

Six cheese, any weight, made, owned, and exhibited by any farmer, whose occupation does not exceed 80 acres, resident within twelve miles of Nantwich, or open to any member of the Association: 1, Mr. T. Greenway, Burton; 2, Mr. J. Williams, Hollin Green; 3, Mr. J. Perry, Holtridge; 4, Mr. J. Parry, Oscroft; r, Mr. J. Taylor, Lees Farm, Malpas; vhc, Mr. P. Bostock, Green Farm, Chorley; Mr. S. A. Bonell, Coos Farm, Audlem; hc, Mr. A. Charlesworth, Church Minshull; Mr. F. Arden, Daisy Bank, Tattenhall; Mr. R. Johnson, Tarvin Sands; c, Mr. J. Boughey, Hurleston; Mr. J. Jackson, Bank Farm, Isycoed; Mr. H. Reade, Gradeley Green; Mr. G. Dickenson, Hurleston.

Ten uncoloured Cheshire cheese, not less than 25lb. each, made, owned, and exhibited by any farmer resident within twelve miles of Nantwich, or any member of the Association: 1, Mrs. Peacock, Huxley Hall, Hargrave; 2, Mr. J. Jones, New Farm, Dodleston, Chester; 3, Mr. W. H. Hobson, Wood Farm, Broughton; 4, Mr. J. Holme, Kenwick Lodge, Ellesmere; r, Mr. W. G. Moss, Randilow Farm, Betley; vhc, Mr. W. Evans, Gatesheath Farm, Tattenhall; Mr. T. Charlesworth, Baddington; Mr. E. Langley, Ridley, Tarporley; Mr. H. Hobson, Hatherton, Nantwich; Mr. W. R. Huntbach, Dodd's Green, Aston; hc, Mr. J. Rigby, Ebnal Farm, Malpas; Mr. J. Jackson, Chowley, Handley; Mr. C. F. Holson, Weston Hall, Eccleshall; Mr. M. Ninis, The Grange, Leighton, Crewe; Mr. W. Trelfa, Weaver Wood, Winsford; c, Mr. James Blake, Calveley Hall, Handley; Mr. W. Bate, Ashhouse Farm, Darnhall; Mr. J. Dutton, Bridgmere, Nantwich; Mr. T. Bourne, Goldsmith House, Whitchurch.

Four coloured or uncoloured cheese, of any make, not less than 25lb. each, made, owned, and exhibited by any farmer resident within the United Kingdom: 1 and champion cup, Mr. J. Dutton, Swanley Hall; 2, Mr. L. Jackson, Broughton Lodge, Malpas; 3, Mr. J. Trickett, Calveley Green Farm; 4, Mr. T. H. Simcock, Moat Farm, Alpraham; r, Mr. J. Jones, New Farm, Dodleston; vhc, Mr. N. Turner, Blakenhall, Nantwich; Mr. R. Bourne, Bickerton, Malpas; Mr. B. Dutton, Baddiley Farm, Nantwich; Mr. C. E. Parton, Haughton Hall Farm; Mr. S Holland, Woodhey Hall, Nantwich; Mr. J. Hulme, Kenwick Lodge, Ellesmere; Mr. Huntbach, Moor Hall, Aston; hc, Mr. J Smith, Radnor Green Farm, Spurstow; Mr. W. Moore, Checkley, Nantwich; Mr. E. S. Lea, Bridgemere, Nantwich; Mr. J. A. Jackson, Bolesworth; Mr. O. Hesketh, Cholmondeston; Mr. J. Noden, Woodside, Wettenhall; Mr. T. Brassington, Austerton, Nantwich; Mr. R. Cooper, Ridley Hill, Tarporley; Mr. J. Lloyd, Dodleston, Chester; Mr. W. H. Astles, Swanlow Farm, Darnhall; Mr. J. Royle, The Leasons, Westfelton; c, Mr. F. Benson, Aldersey, Handley; Mrs. E. Fitton, Eaton, Tarporley; Mr. J. A. Johnson, Calveley Farm, Tarporley; Mr. C. Birchall, Cross Bank, Barbridge; Mr. J. Houlbrooke, Peckforton; Mr. G. Dutton, Peckforton; Mr. W. Carter, Bowsey Wood Madeley; Mr. A. S. Lea, Hankelow Farm, Nantwich, Mr. W. Allwood, Bank House, Hurleston; Mr. M Ninis, The Grange, Leighton, Crewe; Mr. S. Lea, Kinsal, Oswestry; Mr. J. Sandbach, Woore, Newcastle, Staffs.

BUTTER.

Six half pounds of butter, slightly salted, exhibitors to be makers of their exhibits, and resident within the county, or any member of the Association: 1, Mr. P. Reade, Swanley; 2, Mrs. France, Bunbury; 3, Mr. R. Johnson, Tarvin Sands; 4, Mrs. J Okell, Great Barrow; r, Miss F. Stokes, Tilston Heath; vhc, Miss Jackson, Tarporley; Mrs. Burrows, Ravensmoor; Mr. J. Hough, Calveley; hc, Mr. J. Boughey, Hurleston; c, Mr. E. S. Lea, Bridgmere.

Cottagers' Class.—For the best four half pounds of butter, made and exhibited by any agricultural labourer, resident within the county, or any member of the Association, and not having more than two cows in milk: 1, Mr. R. Reade, Faddiley; 2, Mr. T. Henshall, Swanley; 3, Mrs. Pugh, Norbury Common, Whitchurch; 4, Mrs. M. Boughey, Worleston; r, Mrs. T. Woodhall, Burland; vhc, Mrs. J. Ravenscroft, Tilston Heath; Mrs. H. Cooper, Acton; hc, Mrs. Barnes, Alpraham; c, Mrs. J. Weaver, Broomhall.

The Cheese Fair.

The report issued by Mr. R. Challinor, secretary of the Association, with respect to the cheese fair, which took place on Thursday, shows that there was a pitch of 115 tons, of which 50 tons represented the weight of cheese in the show. The demand for the show cheese was not so keen as at previous shows. Buyers were present from all well-known centres of the trade, and the dairies were picked up in due time. The champion and first prize dairies made from 80s. to 100s.; second and third prize-winning dairies from 70s. to 80s.; and dairies which were honourably mentioned prices down to 65s. The large pitch in the fair affected the demand somewhat, but as the fair progressed a better tone prevailed, the best lots making 60s. to 67s., and medium down to 50s. Of the cheese pitched a good proportion was apparently in an over-ripe condition. The quotations in the fair were similar to those at the corresponding fair last year.

"Mark Lane Express" Diary.

Nov.
6 Meeting of the Council of the Central and Associated Chambers of Agriculture.
7 and 8 Sale of Horses, at Cheshire Repository, Crewe.
8. Sale of Mr. J. H. Shore's entire herd of Jerseys, at Whatley House, Frome, Somerset.
15 and 16 Sale of Horses, at Crewe House Repository.
16. Sale of Store Stock, at Shrewsbury Smithfield.
22, 23, and 24. Norfolk and Norwich Christmas Show Association, at Agricultural Hall, Norwich.
26 and 27. Tonbridge Fat Stock and Poultry Show.
27 and 28. Lord Tredegar's Agricultural and Poultry Show, at Newport, Mon.
27 and 28 Whitchurch Dairy Farmers' Association's Show, at Whitchurch, Salop.
28. Sale of the entire stud of Hackneys and young Harness Horses belonging to Sir Oswald Mosley, at Rolleston Hall, Burton-on-Trent.
29 and 30. Chippenham Agricultural Association's Show, at Chippenham, Wilts.
30. Sale of Shire Mares, Fillies, and Geldings, at Peterborough Repository.

Death of a Noted Scotch Agriculturist.—There has recently passed away Mr. Robert Anderson, of Lochdhu, a well-known agriculturist, of Nairnshire. His career as a successful agriculturist is interesting. Brought up upon his father's farm of Cooperhill, Darnaway, Robert Anderson became a corn merchant and agricultural judge in the earlier part of the century. His first considerable venture in farming was his becoming tenant of Meikle Kildrummie, in Nairnshire, on an improving lease. He brought under cultivation about 380 acres of waste land, and his improvements on the farm were the astonishment of the country. His enterprise paid him, however, and through his indomitable energy in business he was able to purchase the property of Lochdhu, near Nairn, and to add to it various adjacent lands, such as Grieshop, Broadley, and Nairn Moss, making a nice, compact estate. For considerably over half a century he had been the leading agricultural authority in Nairnshire, and, indeed, throughout the North of Scotland, where he was regarded very much as the father of modern improvements in farming. He gave considerable attention to the breeding of stock at one time, and, along with his brother-in-law, the late Mr. John Stewart, of Ensay, was a frequent exhibitor at the Highland Society and other shows of Highland cattle. His many services to his agricultural friends were recognised by them presenting him on one occasion with a handsome piece of silver plate and 600 sovereigns, and on another occasion with a life-sized portait of himself. During the past few years he had withdrawn from all active business through the infirmities of old age.

Bampton Pony Fair.—This historic fair was held on the 24th ult., and was one of the most successful of recent years. The number of ponies driven in exceeded those of last year, the attendance of buyers was larger, prices were better; in fact, all round the fair showed a great improvement. Unfortunately—and as usual—the weather was unfavourable, but the streets were thronged the whole of the day. There was a brisk demand for all classes of animals, especially mare suckers; but there were few on offer. Biddings generally were very spirited. About 600 or 700 animals were on offer. It was evident that people are beginning to find out the true type of Exmoor pony, for there was a better sale for these than for the larger cross-bred animals. The auctioneers reported their prices as under:—Messrs. Blackford and Son: Suckers, from £3 12s. 6d. to £5 10s.; breeding mares, £12 10s. to £18; cart colts, £11 to £12 10s.; cart horses, £7 2s. 6d to £25. Mr. Daniel Evans: Suckers, from £3 to £7; yearlings, £8 to £9; breeding mares, £8 to £12. Messrs. T. E. Ayre and Co.: Suckers, from £2 10s. to £6 10s.; yearlings, £9 9s. to £16 16s.; breeding mares, 10gs. to 27½gs; cart colts, 21gs. to 29½gs.; cart horses, 25gs. to 59gs. Messrs. Sanders and Sons: Suckers, from £2 2s. 6d. to £6 5s.; yearlings, £5 7s. 6d. to £10 5s.; breeding mares, £5 5s. to £9 7s. 6d. Messrs. Phillips and Sons: Suckers up to £4 10s.; cart colts, from 7gs. to 10gs.; cart horses, from 16gs. to 25gs. Mr. R. Staddon held a successful sale of horses, cobs, and ponies outside the old turnpike house. Good prices were realised, suckers fetching from 30s. to £5; ponies, £5 to £10.

SOCIETIES.

Bath and West and Southern Counties Society.

A Council meeting of the above named Society was held at Bristol on Tuesday, when, on the motion of Captain Best, the Marquis of Bath was voted to the chair.

Elections.

The following new members were elected:—
Ackland, W. Corbet, Dene, Portishead.
Ettle, J., F.R.H.S., , Malvern View, Stanley Grove Road, West Kensington, W.
Jakeman, Edward, Bridgwater, Somersetshire.
Lewis, D., Stoke-under-Ham, Somerset.
Norton, R., Priory Villa, Wells, Somerset.
Sayce, T. Bate, Dene, Bradford, Yorks.
Stride, C. S. S., Newton Park, Bath.

Special Communications.

Communications sent by direction of Her Most Gracious Majesty the Queen, His Royal Highness the Prince of Wales, K.G., and His Royal Highness the Duke of York, K.G., in acknowledgment of resolutions of regret and condolence with respect to the death of H.R.H. the Duke of Saxe-Coburg and Gotha were read.

The Chairman referred to the sad news which had just reached the country of the death of Princess Christian Victor, and which had added an additional bereavement upon the Queen and Royal Family. It was a further instance of how all classes, from the very highest to the lowest, had been affected by the sorrows resulting from the war. He begged to move that a resolution be drawn up and forwarded to Her Majesty expressive of the Council's deep regret, and respectfully tendering its condolence. This was seconded by Lord Heytesbury, and carried.

Council Vacancies.

The Secretary having reported the deaths of Colonel C. W. H. Helyar and Sir A. W. Neeld, Bart., members of Council for the Central Division, Sir C. T. D. Acland moved, Mr. Foxcroft seconded, and it was unanimously resolved, that the sympathy of the Council in their bereavement be conveyed by resolution to the families of the deceased gentlemen.

Finance.

Mr. Collins, as chairman of the Finance Committee, brought up the audited quarterly statement of accounts, and also report, the concluding portion of which was as follows:—"The committee suggest that the Society should mark its sense of the honour conferred upon it by H.R.H. the Duke of York in accepting the presidency by making a determined effort to materially increase the roll of membership during His Royal Highness's term of office. To this end the committee recommend that a special appeal be made to every member of the Society to endeavour to secure at least one additional candidate for election at the January Council. New members are urgently needed to fill the gaps created by death and other causes, and a substantial accession of support would very fittingly commemorate the honour in question, and at the same time testify to the Society's appreciation of it."

The adoption of the report and accounts was moved by Mr. Collins, seconded by Mr. Martin, and carried.

Stock Prizes.

Colonel Best, as chairman of the Stock Prize Sheet Committee, brought up the prize sheet proposed for the Croydon meeting in 1901, and the report thereon. The report alluded to the loss which the committee had sustained by the death of two of its members in the following terms: "The committee regret that since they last presented a report to the Council a vacancy has been created in the chairmanship of the committee by the death of Sir J. F. Lennard, whose long and valuable services will be held in grateful remembrance by this committee especially, with whose proceedings he so particularly identified himself. In his place the committee have elected Colonel Best as chairman. The committee have also sustained a further loss by the untimely death of another of their number, viz., Colonel Helyar, a gallant soldier, who died in the service of his Queen and country in South Africa. He interested himself in the work of the committee, not only by placing his practical knowledge and experience at their disposal, but also by a liberal contribution to the prize list at the Society's last exhibition."

The report recommended, among other matters that the Society should give additional prizes for Army remounts, Red Polled and Aberdeen Angus cattle, Kent or Romney Marsh sheep, Large Black pigs, and farmyard poultry.

Jumping Prizes to Attract Visitors.

The report stated that the following communication had been received from the hon. sec. of the Croydon Local Committee:—

"At a meeting of my committee a resolution was unanimously passed expressing [illegible] highly desirable in the interests of the show next year at Croydon that classes should be provided for jumping, and I was instructed to notify this to your Society. It was felt by the committee that Croydon is unlike many places where the show is held, and [illegible] an additional attraction would [illegible]

attraction to draw the local population into the show. I was further instructed to notify you that my committee are prepared to grant the sum of 100gs. towards your prize list, to be allocated as follows:—50gs. for prizes for the jumping classes, and 50gs. for (1) classes for pairs of carriage horses belonging to private owners, (2) the best tradesmen's turnouts, and (3) trotters."

The report recommended that the wishes of the local committee be acted upon, and that the amount in question be accepted and allocated accordingly.

Colonel Best stated that he would move the reception but not the adoption of the report, as he entirely disagreed with the recommendation to accept jumping prizes. Mr. Sillifant seconded the reception of the report.

Mr. Alexander moved: "That it is necessary, on financial grounds, to take steps to render the Society's shows more attractive to the general public, and to this end that a pecuniary grant—the amount to be fixed by the Council—be made for prizes for jumping and trotting to be competed for at the 1901 meeting at Croydon, and that the report of the Stock Prize Sheet Committee be adopted with this addition." This was seconded by Mr. C. Phillips, and after considerable discussion was carried by a large majority.

A sum of 100gs. was then voted for the purpose named in the resolution, the exact allocation of the amount being left with the Stock Prize Sheet Committee, with power to act.

Dairy.

Sir C. T. D. Acland, as chairman of the Dairy Committee, presented a report from the committee recommending certain changes in butter-making competitions with a view to the special encouragement of competitors who had not previously won prizes at the Society's meetings. The report also recommended that experiments be made in the working dairy at the Croydon meeting with a view to ascertaining the difference as to churnability in cream derived from milk taken from animals of the Shorthorn, Sussex, Jersey, and Guernsey breeds; such cream to be tested in both a sweet and a ripe state.

Mr. Mathews suggested that to these breeds the Red Polled should be added, and this was agreed to.

Mr. Lloyd Baker expressed his willingness to offer prizes for Gloucester cheese, and the offer was accepted with thanks.

The adoption of the report with these additions was then moved by Sir C. T. D. Acland, seconded by Mr. Strachey, M.P., and agreed to.

Implement Regulations.

Captain Best, as chairman of the Implement Regulations Committee, presented the report of the committee, which recommended certain minor alterations in the regulations affecting implements and machinery and that a certain firm of exhibitors, who had furnished no explanation for a gross breach of the regulations, be debarred from exhibiting at any of the Society's future shows.

On the motion of Captain Best, seconded by Colonel Naper, the report was adopted.

Contracts.

Captain Best, on behalf of the Contracts Committee, reported that the committee recommended that the supply of show yard refreshments to the general public be thrown open to public tender, and that purveyors should have the option of tendering for the supply of either the whole of the refreshments or for those only in any one or more of the different pavilions. On the motion of Captain Best, seconded by the Rev. F. F. Buckingham, the report was adopted.

Arts.

Sir C. T. D. Acland, on behalf of the Arts Committee, reported that the committee had appointed Colonel Wyatt Edgell as their chairman, in place of the late Right Hon. Sir. T. D. Acland, and this was approved.

Agricultural Education.

In the absence of the chairman of the Agricultural Education Committee (Sir R. H. Paget), the secretary submitted the committee's report, which stated that the committee had been in communication with the Board of Agriculture with reference to a renewal of the research work in dairying hitherto carried on by the Society and the Board conjointly. A scheme having for its object the investigation of the origin and cause of flavour in dairy products had been drawn up, but the Board had at present been unable to see its way to make a sufficient grant for the purpose. The committee further reported that the Cheese School carried on at Batcombe, under an arrangement with the Somerset County Council, had been working satisfactorily. It had been well attended by students, thirty-six having received courses of instruction since the opening on April 1st last. The cheese had realised satisfactory prices, the April make having been sold at 63s., the May make at 64s., and the June make at 68s. per cwt. of 112lb. The Farriery School was continuing its travels and the classes had been well attended.

On the motion of Lord Heytesbury, seconded by Mr. G. Gibbons, the report was adopted.

Experiments.

Sir C. T. D. Acland, as chairman of the Experiments Committee, reported that the experiments upon pastures were still proceeding, and that a detailed report thereon would be drawn up for publication at the end of the present season. The Committee regretted that the experiments upon "teart" land had, up to the present, yielded no result, the beasts placed upon the land having failed to scour. They further reported that experiments relating to the influence of manures upon the production of mutton were being carried on in conjunction with the Board of Agriculture.

On the motion of Sir C. T. D. Acland, seconded by Mr. W. Ashcroft, the report was adopted.

1902 Exhibition.

Captain Best, as chairman of the Special Committee, reported that an invitation had been received from Plymouth to hold the Society's 1902 meeting in that town. The Committee had visited Plymouth for the inspection of sites, and had been most cordially and hospitably received by the Mayor. The Committee, on behalf of the Council, had accepted the invitation, subject to the provision of a suitable site. There had been some difficulty with respect to a site, but it was now in a fair way of being overcome. The Society had not held its show at Plymouth since 1873, when a very successful meeting took place there. He moved the adoption of the report, which was seconded by Mr. Napier, and unanimously agreed to.

Captain Best stated that the Committee had been given to understand that there was every prospect of the Devon County Agricultural Association co-operating with the Society, and he begged further to move that communications be opened up with the Association to this end. This was seconded by Mr. Napier, and agreed to.

Royal Cornwall.

The Council of the Royal Cornwall Agricultural Association met at Truro on Wednesday, under the presidency of Sir Lewis Molesworth, M.P. The following were appointed a committee to prepare the prize list for the Bodmin exhibition next year: Messrs. J. C. Williams, W. James (Shorthorns); F. W. Rowe (South Devons and Herefords); R. Paynter (Jerseys and Guernseys); T. Rich (sheep); Colonel Byng (horses); and Mr. J. Bastard (pigs).

Mr. J. C. Daubuz opened a discussion with reference to the use of a fund originally intended for a memorial to the late Rev. Dr. F. Rodd. He explained that the fund, instead of being expended on the erection of a useless monument or an obelisk, was intended to be devoted to the interests of agriculture, and especially for the encouragement of improvements in implements, or some other branch, which would be of benefit to the county. For many years, he believed, the money was applied to the improvement of implements, until, apparently, it was thought that that improvement had pretty well come to an end. (Laughter.) Of late the income derived from the fund had been devoted to the pig section, which did not seem altogether satisfactory. It was now thought that a new constitution should be drawn up, and the proceeds of the fund applied to possibly a county agricultural scholarship, or anything else that would meet with the approval of the agriculturists of Cornwall generally.

The secretary (Mr. H. Tresawna) said there once existed a feeling that the money was, in a great measure, thrown away on implements, and the Council (who had always had the management of the fund) transferred it to the pigs—a course which he considered to be wrong. The late Dr. Rodd having been a noted Devon breeder, his (the secretary's) opinion was that the fund should be allotted to Devons instead of to pigs. The value of the fund per year was £25 10s.

Mr. Brenton asked, apart from the Rodd fund, whether the Royal Cornwall Association had done a great deal for farmers in the matter of implements. In his experience no county had made such rapid strides in the implement world as Cornwall; therefore, he thought, even if there were no £25—which he contended to be the implement department's own—that for the benefit of the rising generation and the county they ought still to award prizes in some form for implements. Outside the Association the feeling in regard to this matter was very strong. It was a pity that the Association should have dropped the award of prizes for implements.

Mr. J. C. Williams inquired what Mr. Brenton's experience was elsewhere. Mr. Brenton replied that twelve or fourteen other societies offered prizes for implements. Cornwall possessed a good name for inventions, which should be encouraged by this Association.

Colonel Tremayne: I agree with Mr. Brenton that the money ought to go back to the implements; if not, it should be given to something agreed on by the general meeting. The Chairman: I am in favour of that myself. I think if notice were given it might be discussed again. It was mentioned that Mr. Daubuz would give the requisite notice for the next meeting.

Colonel Byng referred to the letter read recently at the Technical Instruction Committee of the county to the effect that the expenditure of the Technical Education Fund as prizes for manual dexterity at agricultural demonstrations apart from [illegible] class instruction, or when such instruction is given only on the day of the competition, would not be a legitimate application of the funds under the Technical Instruction Acts, and pointed out that last year a certain grant was promised towards the Association's horse-shoeing demonstration. The secretary should put himself in communication with the Technical Instruction Committee with a view to seeing they got that sum. He would also give notice that at the next meting of the Council for the revision of the prize list he would move for the revison of the prizes for the shoeing competition so as to give more encouragement to the young smiths throughout the county. (Applause.)

The Annual Meeting.

Sir Lewis Molesworth, M.P., again presided at the annual meeting, at which Mr. Tresawna read the report. It set forth that the Council was glad to be able to state that the subscriptions and general popularity of the Association had been well maintained during the year. The show at Truro was an extremely good one, both as regards number and quality of the live stock, and also of the implements and machinery. The attendance on the first day exceeded that of any previous year, the number paying for admission being 6,433; but the weather on the second day was exceedingly wet, and materially affected the attendance of the public. Notwithstanding, the total attendance of the two days was 14,550—only a little below the average. For the first time the Association undertook the responsibility of the dairy exhibition. A committee was appointed by the Council in December, it being generally felt that so important an industry should receive every encouragement and support from the county association. The president, Mr. Tremayne, took occasion at the annual meeting to allude to this matter, and express a hope that the County Council, recognising its importance, would establish a Dairy School, as had been done in other counties. The Society's accounts for the past year had been examined, and showed the following result:—Receipts, £2,118 14s. 5d.; expenditure, £2,300 11s.; leaving a balance against the Society of £181 16s. 7d. The balance against the Society in 1899 was £222 12s. 5d., showing a gain on the year of £40 15s. 10d.

Mr. Lord remarked that one item in the report should be in reality charged to last year's accounts—£37 contributed to Launceston Show. That would leave a profit on the Truro Show of about £90. (Applause.)

The Chairman said he considered the report, as far as he understood the working of the Association, as very satisfactory—(Hear, hear)—because, according to the explanation of his friend, Mr. Lord, the Truro Show gave a profit of between £80 and £90. It was the more satisfactory considering the awful weather which prevailed on the second day of the show. Remembering the record made on the first day, it would probably have been a record show altogether but for the wet weather on the second day. He could only hope that as the show next year was to be at Bodmin, whose people had been particularly kind to him lately—(laughter)—good luck would attend it, and that Bodmin would have the honour of breaking the record.

The report was adopted.

The Hon. John Boscawen said the dairy exhibition this year had been taken in hand by the Association, and the whole thing was managed with admirable consideration by Mr. J. F. Crewes. As chairman of the committee, he considered it a charming tent throughout. (Applause.) He was sure it gave every satisfaction to the committee, and he hoped it did the same to the general public. Mr. Tremayne was very keen about the dairy department. The committee had considerable trouble in getting the things together, but they got them in working order eventually, and to Mr. Crewes was largely due the excellent management which resulted in success. He hoped the Council would be good enough to continue that department henceforth. (Applause.)

Colonel Tremayne asked if the committee was appointed by the Council or not. It was stated that the Council appointed a portion—those who were its members—but that the outsiders were appointed by the representative members of the Council. Colonel Tremayne was glad to hear it, for they selected right good men. (Applause.) Mr. T. Rich asked after what Colonel Byng had said in Council, was it likely to have a greater loss on the dairy department in the future than in the past? Were the Technical Instruction Committee likely to cut off the grant hitherto given? That seemed to be the tendency of the letter referred to. If it was to cost the extra money of the grant hitherto given, he thought the Council could hardly go in for it.

Mr. Crewes asked if it was a fact that the expenses this year were excessive? Did they exceed those of the previous year? Had the Society suffered by taking the matter into its own hands, giving a grant, paying the costs, and receiving a grant from the Technical Instruction Committee?

Mr. Tresawna said the loss to the society was about £37, the same as the previous year under the old arrangement. The receipts were £17 15s. 7d. from the dairy, and £65 from the County Council. The expenses £121 2s. 6d. This included cost of tents, and no allowance was made for the sale of wood used in the building.

Colonel Tremayne thought they were entitled to some allowance for that.

Mr. W. C. Wickett said, taking all things into consideration, the dairy exhibition showed very little

loss, and considering its importance, he proposed it be carried on as before.

Mr. Gwennap Moore seconded. He could hardly fancy an association of that kind not associating itself with the dairy interest of the county. (Applause.)

In reply to questions, the Hon. John Boscawen said he had the report of the judge (Mr. McCreath), which the secretary should read if they chose. It was decided that it be printed and circulated with the annual report.

It was decided that a hearty vote of thanks be accorded Mr. and the Hon. Mrs. Tremayne for the special prizes and the interest they had taken in the society.

Sir Colman Rashleigh, Mr. Geo. Pomery, veterinary surgeon, Newlyn East, and Mr. A. Lanyon, Redruth, were proposed as new members, and the proceedings closed with a hearty vote of thanks to Sir Lewis Molesworth for presiding.

Devon.

The Council of the Devon County Agricultural Association met at Exeter on the 26th ult., the chair being taken by Mr. D. R. Scratton. A letter was received from Mr. J. W. Hussey, secretary of the Exeter Fat Stock Show, asking whether it was the intention of the Society to offer prizes for barley at the Show on December 14th. It was pointed out that last year the Society gave a prize of £5 to supple-

Mr. H. Livesey's Hackney Stallion "McKinley," Champion at the Hackney Horse Society's Show, 1900.

ment one given by Messrs. Vosper, of Plymouth, and that this year no such offer had been forthcoming, and it was decided to reply that the Society could not afford to contribute anything in the direction suggested. Mr. G. Were, of Yealmpton, Plymouth, and Messrs. Blackford and Sons, auctioneers, of Southmolton, were admitted new members of the Society.

Mr. Ford produced the estimated financial result of the annual exhibition held at Barnstaple. The income showed £500 by annual subscriptions, £200 contribution from Barnstaple, £909 7s. admission to the show-yard and grand stand, £53 10s. copyright of the stock and implement catalogue, £15 17s. 10d. privilege of supplying refreshments, £287 14s. 9d. fees from implement exhibitors, etc., £216 17s. 6d. entrance fee stock, £20 interest on £750 deposited in the Exeter Bank, £5 5s. from Mr. J. Smyth-Osbourne (Sheriff of the county), £10 10s. Mr. J. G. Hamling (Mayor of Barnstaple), £10 10s. Barnstaple Local Committee, £31 11s. 3d. sale of hurdles, etc.—£2,402 15s. 6d. On the expenditure side the biggest items were £50 for attendance of band, £842 18s. 9d. for enclosing and fitting the show-yard, £75 advertising accounts, £100 stewards' and judges' expenses, £150, including working expenses of the show, the total being £1,704 13s. 4d. The cost of the technical instruction competitions was £256 2s. 6d., less £150 grant from the County Council. The prizes amounted to £923 1s., the grand total being £2,733 16s. 10d. The financial statement was received on the motion of Mr. Ford, seconded by Mr. Ingston. It was mentioned that the adverse balance at the previous show at Barnstaple was £196.

Mr. Michelmore said they could not continue to go on like that. They had £750 deposit at the bank, and were bringing forward an adverse balance of £208 from last year, when they did not hold a show, and now they were adding £331 to that adverse balance. That left them £210 out of the £750 to trade upon. The cost of technical instruction was a large item. It had cost them £106 this year over what they had received, and he thought they should receive a larger amount from the County Council. They ought to keep their expenditure nearer the amount allowed them by the County Council. Their subscriptions were also gradually dwindling. He moved the appointment of a committee to investigate the different items of expenditure.

Mr. H. Drew seconded, and said when they went into any district they ought for that year to absorb the local society, which should join them. They could give prizes to be confined to the district. The resolution was carried, and Messrs. Michelmore, Drew, Leveys, Kingwell, and Hallett were appointed the committee.

It was resolved that £500 be withdrawn from the bank and put to the current account.

Shropshire Chamber.

The ordinary monthy meeting of the Council of the Shropshire Chamber of Agriculture, with the representatives from the affiliated societies, was held at the offices, College-hill, Shrewsbury, on the 27th ult. Mr. G. J. Dumville Lees presided. A letter was read from the Central Chamber of Agriculture, acknowledging the resolutions passed last May, and forwarded with reference to the Shropshire Chamber's request that in view of the approach of the general election a programme of necessary agricultural legislation should be drawn up, and enclosing a copy of a statement, which was afterwards issued.

A letter was also read from the Cheshire Chamber of Agriculture, urging that railway and canal companies should be compelled to strengthen their bridges passing under the public highways, so as to make them safe for agricultural locomotive traffic.

The central circular was read, which stated that at the next Council meeting in London the subjects for discussion would be the report of the Royal Commission on local taxation and agricultural insurance.

In reply to the Chairman, Mr. Mansell stated that he had received a letter from Mr. Godfrey (the secretary) to say that the final report of the Commission had not yet been issued.

The statement of legislation required in the agricultural interest, as prepared by the Central Chamber, was discussed, after which it was resolved that the Central Chamber be requested to consider the following proposals at the earliest opportunity:—(1) That in the interests of both producers and consumers all retail vendors of imported fed meat should be registered, and prominent notice of the fact displayed in every shop held by each person registered: (2) That the use of substitutes by brewers be limited to 20 per cent. · (3) To advocate the system of uniform weights and measures.

On the motion of Mr. R. Wall, it was unanimously carried that Mr. F. Horne be deputed to attend the Council meeting of the Central Chamber on the 6th of November.

Mr. Jasper More suggested that the various agricultural societies in the county affiliated with the Shropshire Chamber be asked to send in a list of meetings proposed to be held in the coming year, so that everyone would be cognisant of the various meetings.

Mr. Langford spoke at some length on the compulsory dipping of sheep, and said that he did not think that it should be indiscriminately enforced. Dipping should be enforced by the authorities only on suspected farms. Inspectors ought to have full power to make surprise visits, and should they discover any owner having sheep scab in his flock, he should be fined so much on every head, and if he did not effect a cure in a reasonable time the fine should be doubled. By these means he thought they would very soon eradicate sheep scab.

Mr. Jasper More called attention to the fact that there were only three or four farmers from Shropshire who exhibited barley at the recent Brewers' Exhibition in London, and said he thought that Chamber, with the help of its affiliated societies, might, to advantage, offer prizes at the next exhibition for Shropshire barley.

After a discussion the question was raised as to whether the prizes could not be given by private donations Mr. More promised to do what he could in the matter, and to mention it to the other Shropshire M.P.'s.

Stockton Chamber.

At a meeting of the Stockton Chamber of Agriculture held on Thursday, the chairman (Mr. T. B. Bainbridge) reported that the Council of the Chamber had discussed the advisability of approaching the Durham County Council with a view to having established in the county an experimental farm. The South Durham and North Yorkshire Farmers' Protection Society had promised to give them assistance in inducing the County Council to adopt the scheme, and the Council of the Chamber recommended that the Darlington Chamber of Agriculture, the Durham County Agricultural Society, and the Northumberland Farmers' Club be asked to help them in their object. On the motion of the chairman, seconded by Councillor T. S. Walker (Thornaby), and supported by Mr. J. Spence (West Hartlepool), the recommendation was adopted.

The following awards were reported in connection with the recent competitions promoted by the Chamber:—Oats growing: 1, J. Struthers, Stainsby; 2, G. Garbutt, Ingleby Barwick; 3, T. Atkinson, Yarm. Barley growing: 1, J. Bradley, Hart; 2, T. Atkinson, Yarm; 3, J. R. Robinson, Acklam. Mangolds: 1, T. Buckle, Yarm; 2, J. Furness, West Hartlepool; 3, J. Spence, Hartlepool. Root crops: 1, W. Robinson, Marton; 2, T. Buckle, Yarm; 3, J. Furness, West Hartlepool; 4, C. Craven, West Hartlepool; 5, W. J. Humphrey, Acklam.

North Cotswold.

A meeting of the North Cotswold Farmers' Association was held at the Town Hall, Chipping Campden, on Wednesday evening, Mr. Ulric Stanley presiding. There was some discussion as to the suggested alteration of the boundaries of the counties of Gloucestershire and Worcestershire for cattle disease regulation purposes. The committee had drafted a petition on the matter, which had been presented to the Gloucestershire County Council by Mr. Freeman Mitford, and approved. The proposal was to transfer portions of Worcestershire to Gloucestershire for these purposes, and it was hoped that the Worcestershire Council would approve of the suggestion.

Several farmers spoke of the great inconvenience caused by the mixed condition of the counties in some places. Mr. S. Stanley said Mr. J. Timms, of Dorn, spent a whole day in taking his sheep from one part of his farm to the other simply because part of his farm was in Worcestershire and part in Gloucestershire.

The Association supported a resolution in favour of compensation for loss by fires caused by railway engines. Mr. J. H. Rimell said he very nearly lost twenty-six acres of corn owing to a passing engine.

Mr. W. G. Berry, appointed by the Agent-General for Western Australia, gave an illustrated lecture on the agricultural outlook in that country. He spoke very highly of the country and of the good prospects for farmers there.

Southdown Sheep.

A meeting of the Council of the Southdown Sheep Society was held at the Society's offices, 12, Hanover-square, W., on the 25th ult. Lord Northbourne (President) in the chair.

A letter was received from Mr. C. R. W. Adeane, accepting the position of President-elect. He is the President for the year 1901-2.

The following new members were elected: The Earl of Ashburnham, Ashburnham Place, Battle; Mr. Thomas Brandreth, Park Gate, Bexley; Mr. Maurice Buckle, Acton Hill, Sudbury; Mr. A. Miller Hallett, Goddington, Chesterfield; Colonel

Tyssen Holroyd, Donyland Lodge, Colchester; Mr. James Joicey, Poulton Priory, Fairford; Mr. Spencer Austen Leigh, Frog Firle, Berwick; and Sir James Sawyer, Haseley Hall, Warwick.

The following resolution was, on the motion of Mr. Newton Clayton, unanimously adopted: "That the fee for the registration of a ram bred in an unrecorded or unregistered flock shall be £1, and the fee for the entry of such a ram in the list of sires shall be 2s. 6d."

It was unanimously resolved, on the motion of Mr. Clayton, that the following instructions be issued in respect of trade-marking:—(a) Sheep bought from unrecorded or unregistered flocks must not be trade-marked, and must be entered in the non-trade-marked section of the book; (b) sheep bought from non-trade marked flocks may be trade-marked and entered in the trade-marked section, but care must be taken to have them tattooed with the flock number of the actual breeder. If such sheep are not trade-marked by the official tattooer, they must be entered in the non-trade-marked section.

It was further resolved, on the motion of Mr. Clayton, "That if the animal return in connection with a flock be not sent in for two years running, the flock shall cease to be a recorded or registered flock."

The Council decided to offer prizes for Southdowns at country shows in 1901 as follows:— Champion prize of £10 10s. for the best Southdown ram at the Royal Agricultural Show at Cardiff; champion prize of £10 10s. for the best Southdown ram or ram lamb at the Sussex County Show; champion gold medal, value £10 10s., for the best Southdown ram or ram lamb, and a silver medal for the best pen of Southdown ewes or ewe lambs at the Bath and West Show at Croydon; silver medal for the best male Southdown and silver medal for the best pen of female Southdowns, at the East Kent, Essex, Gloucestershire, Norfolk, Oxfordshire, Royal Counties, Suffolk, Sussex, and Tunbridge Wells Shows.

On the nomination of Lord Northbourne, seconded by Mr. Allan Cooper, the name of Mr. D. D. Crawford, of Nonnington, Dover, was added to the official list of Southdown judges.

The report of the proceedings of the International Conference of Sheep Breeders at York was submitted to the meeting, but after discussion it was decided to remit the matter to a small Committee for consideration and report to the Council in due course.

The question having been raised as to the propriety of cancelling the flock number in the event of a flock being dispersed, the Council felt that their resolution on the subject passed 28th July, 1898, should be adhered to, viz.:—"That the flock numbers be understood to belong to the flock and not to the owner; if a flock is dispersed, notice of its dispersal shall be given in the next volume of the flock book, a dispersal to mean an unreserved sale of the entire flock."

A hearty vote of thanks was accorded to Lord Northbourne for presiding over the meeting, and the Council then adjourned until February.

Cleveland Chamber.

The Cleveland Chamber of Agriculture's annual meeting was held on Tuesday. Mr. J. W. Clarke, who presided, in proposing the adoption of the report and balance-sheet, which were taken as read, said the question of agricultural labour was a serious matter. The increase of wages that had to be paid to agricultural labourers must tend to lessen the profits of the poor farmer. No doubt as the iron and coal trades began to go back, as they assuredly would, labour would be more plentiful, and many of those agricultural labourers who went to the mines and ironworks would return to the land, glad to take reasonable wages.

Mr. Turton (Kildale Hall), in seconding the proposition, said he hoped the time would come again when boys would go as agricultural labourers to learn the business, and eventually become farmers. He had known several such men become good farmers in Yorkshire and the Midlands. The motion was carried unanimously.

Mr. J. W. Clarke was re-elected president of the Chamber, and Mr. C. Middleton deputy to the Central Chamber, and the other officers were reappointed.

A resolution was passed in favour of the continuance of the Agricultural Rating Act, pending the report of the Royal Commission on Local Taxation.

Chippenham.

A meeting of the members of the Chippenham Agricultural Association was held at the Town Hall, Chippenham, on the 26th ult., Mr. G. W. Kington being voted to the chair. The secretary (Mr. E. Burbidge) read letters from Sir Audley Neeld thanking the committee of the association for their letter of condolence, and stating that it was a pride and pleasure to his brother, Sir A. W. Neeld, to have been the president of the association. His untimely death had elicited many marks of respect, and even of affection; but they valued none more than the resolution from a body of people engaged in the same interests as himself, and of whom he had often heard him speak in words of great esteem.

Mr. F. M. Awdry, in proposing the election of Sir Audley Neeld as president of the association, said that they owed a very great debt of gratitude to the family of Neeld, for the uncle of the late Sir Algernon established the association, and he was followed in the presidential chair by Sir John Neeld and his son, whose death they all mourned.

The resolution was seconded by Mr. Ferris, supported by the chairman, and carried unanimously.

Evercreech and Mid-Somerset.

The annual meeting and dinner of the Evercreech and Mid-Somerset Agricultural Society took place at Shepton Mallet on the 25th ult. Colonel Clerk (the chairman of the committee) presided at the annual meeting, when the statement of acounts was presented and passed, the chairman remarking that the show just over had proved a record one, there being a balance of over £100 in hand. The receipts for the year amounted to £888, and after all expenses had been met there was a balance in the treasurer's hands of £151. The accounts were adopted, and a vote of thanks was passed to the auditors, Messrs. T. C. Manning and W. Ozzard.

The annual dinner was afterwards held in the George Hotel Assembly Rooms, Mr. R. Norton (Mayor of Wells) presiding. After the loyal toasts had been proposed, that of "The Army, Navy, and Reserve Forces" was given by Mr. Hooper, and responded to by Colonel Clerk and Captain Campbell. The latter, who has just been invalided home from South Africa, paid a warm tribute to the services rendered by the Imperial Yeomanry.

Mr. H. Hobhouse, M.P., in responding to the toast of "The House of Commons," dealt at length with agricultural matters, and the service rendered to agriculture by such societies as theirs. Lord Hylton acknowledged the toast of "The House of Lords." His lordship subsequently gave the toast of "The Evercreech and Mid-Somerset Agricultural Society," and alluded to the depreciation that had taken place in land within the last twenty years. "The memory of the President" was next drunk in solemn silence, Mr. R. Norton, of Shepton Mallet, having just died during his year of office. Other toasts followed.

Gloucestershire Chamber.

A meeting of the Gloucestershire Chamber of Agricultshire (the first of the winter sesion) was held at the Wellington Hotel, Gloucester, on the 27th ult. Mr. J. H. Jones (president) occupied the chair.

Several subjects were proposed for future discussion, including Section 1 of the Fertilisers and Feeding Stuffs Act, with reference to the certificate to be delivered on the sale of artificial manures; the law of trespass; injuries to farm stock by uncontrolled dogs; the Agricultural Holdings Act, and the Workmen's Compensation Act.

On the motion of the Chairman, seconded by Mr. Baker, it was resolved that the thanks of the Chamber should be tendered to the Corporation for commencing with such energy a fruit market for Gloucester, and they begged to suggest that official returns of the business transacted should be published, as was the case in fruit and other markets elsewhere.

A resolution was also passed that in the opinion of the Chamber the statement of legislation required in the agricultural interest,, prepared by the Business and Parliamentary Committees of the Central Chamber of Agriculture, fairly embodied those subjects attention to which should be pressed upon Parliament.

On the subject of agricultural insurance, sent down for consideration by the Central Chamber of Agriculture, the Chairman said that the insurance offices had arranged between themselves to put up the insurance on ricks, and other dead farming stock, in consequence of the great number of fires that had taken place, from 5s. to 7s. 6d., but they had reduced the rate on live stock from 5s. to 3s. On the motion of the Chairman, seconded by Mr. Lane, it was resolved that the Central Chamber of Agriculture be requested to consider the subject of agricultural insurance, and to bring pressure to bear on the fire insurance offices to reduce the present rate on dead farming stock to the old level, or as near thereto as possible.

Lancashire.

A Council meeting of the Royal Lancashire Agricultural Society was held at Preston on Monday, and was presided over by the Right Hon. the Earl of Derby.

The Secretary reported that the whole of the retiring members of the Council had been re-elected. There had been no new members proposed, and therefore there would be no contests at the forthcoming annual meeting. It was announced that Mr. Millar had given up the local prizes for Shorthorns at the Rochdale show, and it was decided that they be given to the exhibitor next in order of merit. The next business was the consideration of the resignation of the secretary, Mr. James Birch.

The Earl of Derby expressed regret at the decision of Mr. Birch to sever himself from the secretariat of the Society. He had been very closely associated with Mr. Birch in the work of that Society, and he could say that his (Mr. Birch's) knowledge and advice had always been at the service of the Society, and it was in a great measure due to his untiring exertions that it had become the great local Society it now was. He expressed their cordial thanks to him on his retirement, and their good wishes to him in his future career, and also the hope that Mr. Birch would not abandon them, but give them the advantage of that knowledge and business ability which he had displayed during his tenure of office. (Applause.)

Mr. J. W. Fair, with infinite regret, moved the formal motion that Mr. Birch's resignation be accepted, and this was seconded by Mr. Mercer (Widnes), and carried.

On the motion of Mr. J. T. Wood, it was decided to form a sub-committee of twelve members of the Council to consider the appointment of Mr. Birch's successor.

The report of the Council, to be presented to the annual meeting on November 26th, was submitted and approved. It again congratulated the members upon the Society's financial prosperity, as well as upon the success of its general operations. There was a balance on the year's working from £700 to £800, the general balance in favour of the Society now standing at £5,600. The Council had had under consideration the question of the diminished competition for the prizes for best cultivated farms, and approved certain recommendations of the special committee appointed to inquire into the matter. These were to the effect that the prizes for best cultivated farms be withheld until 1902, and be then offered triennially, with a view to the Society being enabled to substantially increase the value of the prizes. The Council regretted the death of Sir William Cunliffe Brooks, Bart., M.P., vice-president, and Mr. James Tunstall, who for upwards of twenty years was a member of the Council. During the past year forty-three members had been elected, and fifty-six removed through death and other causes. The total number of members at present was 975. The Council had decided to ask Mr. G. C. Hall, who for forty-five years had been a member of the Council, to accept an honorary vice-president life membership of the Society, together with an illuminated address, as a slight token of acknowledgment.

The report of the Parliamentary Committee for the year ending October, 1900, was adopted. The committee had considered the important question of tuberculosis in cattle, and probable legislation. All private Bills before the Houses of Parliament were being watched with a view to action if thought necessary.

A vote of thanks to Lord Derby for presiding concluded the proceedings.

Bedfordshire Chamber.

The secretary of the Bedfordshire Chamber of Agriculture and Farmers' Club has forwarded us a list of the subjects the Society will discuss during the session of 1900-1901, which commenced on Saturday, when Mr. James Crough, chairman of the Bedfordshire County Rate Basis Committee, introduced the subject of "Poor Rates: Past and Present." The future arrangements are as follows:—

Saturday, December 8th, at 4 p.m., at Bedford, "Bacon Curing," with lantern illustrations; introducer, Mr. Loudon M. Douglas, A.I.M.E., author of "Receipt Book for Bacon Curers" and "The Manual of the Pork Trade."

Saturday, February 2nd, 1901, at 4 p.m., at Bedford, "Pure Beer and Brewing Materials"; introducer, Mr. H. Stopes, chairman of the barley judges at the Brewers' Exhibition, etc.

Saturday, March 2nd, 1901, at 4 p.m., at Bedford, "Agricultural Legislation"; introducer, Mr. E. H. Godfrey, secretary of the Central Chamber of Agriculture.

Saturday, March 30th, 1901, at 4 p.m., at Bedford, "The Quality of Milk from Various Breeds of Cattle"; introducer, Mr. Ernest Mathews, president of the English Jersey Cattle Society, etc.

Saturday, April 27th, 1901, at 4 p.m., at Bedford, "Farm Machinery"; introducer, Mr. F. S. Courtney, M.Inst.C.E., M.Inst.M.E., consulting engineer to the Royal Agricultural Society of England.

Monday, May 27th, 1901, at 2.30 p.m., at Luton, "Waste in Agriculture"; introducer, Mr. Robert Long, Upper Stondon, Bedfordshire.

Darlington Chamber.

On Monday the members of the Darlington Chamber of Agriculture met at Darlington, the chair being taken by Mr. C. E. Hunter.

The Secretary (Mr. R. C. Pearce) read a resolution from the Stockton Chamber suggesting that the Durham County Council should be urged to establish an experimental farm in Durham. Mr. Pearce said that the Clerk of the County Council (Mr. Robson) had written to the effect that it was deemed preferable if an experimental farm were established to have it in connection with dairying rather than on the general system carried out at Cockle Park.

Mr. Parlour said the starting of such a farm was largely a matter of finance. It entailed the expenditure of a lot of money. Cockle Park Farm would be better if there were more funds available. He rather favoured the suggestion that if money were forthcoming it might be spent at the experimental farm now in existence rather than by inaugurating another which would be cramped for funds. If an experimental dairy farm were established for Durham and were run in connection with Cockle Park it might be beneficial.

Mr. Gibson, of Croft, said he did not think that

the large amount of money already spent in improving the dairies of the county had been very successful. He favoured the idea of a general experimental farm.

Mr. Wilkin said that much of the dairy teaching had made them too clever, for they now made soft cheese from old milk which they formerly could not do, and it was palmed on to customers for the new milk kind.

The chairman said that unless funds were forthcoming to carry out experimental farming it might be better to expend more money on the Northumberland farm. With regard to dairy farming, experiments properly conducted might be very valuable in a county like theirs, where there was so much dairy land. He moved that the matter be referred to the Business Committee. Mr. Forster seconded, and the resolution was carried.

Mr. J. W. Humphrey, of Acklam, read a paper on the visit to Cockle Park Farm, which he said he was sorry to find drew so few farmers. There would have been many more at a fox-hunting meet. (Laughter.) He thought the farm was in a very suitable district for an experimental farm, but his opinion was that most experimental farms were not carried on as they should be, by having analyses of the soils made beforehand, and he was not aware that this was done at Cockle Farm. Next the land should be more properly drained, or it could not respond to the manures. He did not see anything striking about the use of manures at Cockle Park. A farmer who had tried experiments on his own farm with artificial manures would not learn much more in the matter at Cockle Farm. There were results from basic slag used on land laid down from twenty to thirty years which they might expect to find, but on land laid down for a lessened period it was not so favourable. It proved that the best quality was the best to use. Then he did not believe in the experiments with farmyard manure and artificial manures at the same time in growing turnips. He further did not believe in all the testimonials published as coming from practical men regarding the value of artificial manures. Too much nitrogen had been used for the swede crops, as shown by the grossness of the tops. The experiments made with finger and toe in turnips, in his opinion, were not a success. He held that the more effectual way to get rid of finger and toe was to sow mangolds every other year. He thought, too, there was too much nitrogen in the growing of the turnips.

Teviotdale Farmers' Club.

The first meeting for the season of the Teviotdale Farmers' Club was held at Hawick on Thursday afternoon. The president, Mr. John C. Scott, of Synton, occupied the chair, and there was a good attendance of members. After dinner the average price of stock in the district was struck as follows, the prices of last year, and those of Hawick Auction Mart (Messrs. Andrew Oliver and Son), being given for comparison:—

	CLUB.				MART.

WOOL (CLUB).	1900.	1899.
	s. d.	s. d.
White Cheviot wool, per stone of 24lb	14 0	13 6
Half-bred ewe wool, ,, ,, ...	14 0	12 9
Half-bred hogg wool, ,, ,, ...	15 9	14 6

The following Whitsunday valuations were also intimated:—Tinnis, Cheviot ewes and lambs, 45s.; Cheviot ewe hoggs, 30s.; Cappleglll, 54s. and 35s. respectively; Townfoot, Closeburn, 50s. and 34s.; Hartsgarth, 52s. 6d. and 32s. 6d.; Mossebble, 51s. 6d. and 32s.; Middleholms, 46s. and 28s.—average, 49s. 10d. and 31s. 11d.

The President, in the course of some remarks, referred to the various subjects which engaged the attention of the club at last season's meetings, and having referred to the destruction of the rooks, said it must be a matter for future consideration whether their destruction should be gone on with on the same scale. Continuing, he said that with regard to the weather, though they had about three and a half months of frost and snow and a late spring, stock came out well both on arable and pastoral farms, lambs being a full average crop. The summer and autumn were a succession of heavy rains, which interfered seriously with farming operations, and caused considerable damage to both the hay and corn crops; and, he was told, the yield of grain would be fully one-third below the average. The wet season was in a measure favourable to the green crops, and their promising appearance caused a good demand for live stock, at prices very considerably above those of last year. Wool was still at a very low figure, 14s. 6d. In 1859, the year the club was formed, it was 35s. 3d., and in 1864 it was 55s.; and he feared they could not look for much improvement in the near future, as foreign wools were most in demand.

With regard to legislation affecting agriculture, he could only endorse the remark made by their late president on the same occasion last year, viz., that it did not get the attention from Government that it was entitled to. The Food and Drugs Act of last year no doubt provided certain precautionary measures against the importation of insufficiently marked foreign produce, but in his opinion very much more stringent measures should be taken to guard against the sale of foreign produce as our own. It was satisfactory to note that the outbreaks of swine fever had steadily diminished from 6,305 in 1895, necessitating the slaughter of nearly 70,000 swine, to 2,322 in 1899, and the Board of Agriculture were to be congratulated on the result; but in dealing with all contagious diseases he thought there was still room for improvement in the administration of the Act.

Hampshire Down Sheep Breeders.

The Council of the Hampshire Down Sheep-Breeders' Association met at the Westminster Palace Hotel, London, on Monday, the President (Mr. H. N. Carlisle), chairman, and thirteen members, with the secretary (Mr. J. E. Rawlence), being present.

After the reading of the minutes and letters of apology for absence from five members of the Council, the following twenty-seven new members were elected:—Messrs. A. Apperley, Rodborough Court, Stroud, Glos.; J. Brown, Clapton, Hungerford, Berks; F. Carey, Stratford-sub-Castle, Salisbury; H. W. Cobb, Berwick St. James, Salisbury; S. Crees, All Cannings, Devizes, Wilts; S. E. Flower, Upper Woodford, Salisbury; L. Folliott, Standlynch, Salisbury; the Right Hon. Lord Hylton, Ammerdown Park, Radstock, Soms.; Messrs. C. F. P. McNeill, Carlton Curlieu, Leicester; G. W. Palmer, Marlston House, Newbury, Berks; O. E. Philippi, Crawley Court, Winchester; E. Pickford, Upper Woodford, Salisbury; W. Pullin, Parsonage Farm, Warminster, Wilts; W. F. Thorn, Great Durnford, Salisbury; J. J. K. Waters, Gomeldon, Salisbury; J. D. Willis, Bapton Manor, Codford, Wilts; F. E. Arnold, Fyfield, Salisbury; W. Lawrence, Normanton, Salisbury; G. Long, Ogbourne, Marlborough; the Earl of Radnor, Longford Castle; Messrs. J. Rowden, Hannington, Hants; M. C. Dodds, Thrapston, Northampton; F. Rigden, Salisbury; Lady Arundel of Wardour, Wardour Castle; Messrs. J. W. Garton, Clarendon Park, Salisbury; J. Maidment and Son, Twyford, Hants; and I. Welch, Ickleton Abbey, Great Chesterfield, Cambs.

Mr. J. H. Dibben was selected for the post of President-elect for 1901.

The annual meeting was fixed for Wednesday, December 12th, at the Agricultural Hall, Islington.

Messrs. H. Lambert, W. Newton, and J. Flower were reappointed delegates to the National Sheep-Breeders' Association, the former to act as Vice-President.

The reports of the Editing and Finance Committees were presented and adopted, and also that of export certificates issued during the year.

It was decided to continue the shepherds' prize competition exactly under the same conditions as last year, and with the same schedule of prizes.

The list of judges was duly revised, ordered to be printed, and sent to the secretaries of the various agricultural societies.

The resolutions regarding the export of pedigree sheep passed at the York conference of foreign and home breeders were fully considered, and the secretary directed to write the National Sheep-Breeders' Association assenting to the general principle of the said resolutions, so far as the present system of registration of Hampshire Downs will permit.

This terminated the business of the meeting.

Scottish Chamber.

A meeting of directors of the Scottish Chamber of Agriculture will be held within No. 5, St. Andrew Square, Edinburgh, on Wednesday next, November 7th, at 10.30 a.m.

The items on the agenda are as follows:—

I.—Letter from Secretary, Board of Agriculture, *re* directors' resolutions.

II.—Arrangements for annual meeting, election of office-bearers, etc.

III.—Arrears of subscriptions.

Scottish Fat Stock Club.

A meeting of the Council of the Scottish National Fat Stock Club was held at 5, St. Andrew Square, Edinburgh, on the afternoon of the 24th ult., Mr. A. L. Drysdale, Dalmeny, in the chair, when the final arrangements were made for the forthcoming annual show in the Waverley Market on 29th and 30th November. Stewards and attendant members were appointed. One life member and four ordinary members were admitted, and it was mentioned by the secretary, Mr. James Wylie, that the membership of the club was now upwards of 700. It was agreed that on the first day of the show the admission should be 2s. 6d. from eight o'clock to two o'clock, and 1s. from that hour till the close of the show for the day; and that on the second day the admission should be 1s. from nine o'clock to five o'clock, and 6d. thereafter. The council resolved to fix the salary of the secretary at 100 guineas per annum, an increase of 30 guineas as compared with last year.

Bristol Property Protection Society.

At a Council meeting of the above Society, held at Bristol, on Thursday, under the presidency of Mr. A. Deedes, C.C., the agenda of the business to come before the Council meeting of the Central Chamber of Agriculture and its seventy federated societies on the 6th inst. (one item being the insurance of farm produce, etc.) was considered, and a resolution was passed that in the opinion of the Council measures should be taken by the central Council to formulate a practical scheme for the insurance of farm stock, produce, etc., belonging to all members of the federated societies. The sub-committee's report on the advisability of more systematic action with the central organisation was considered, and it was decided to authorise the secretary to call Council meetings more frequently when considered necessary to effect this purpose. It was also decided to invite the agricultural societies of the western district that are not federated with the Central Chamber to co-operate with the Society in the consideration of the various important agricultural questions that come before the central Council.

Nine new members were elected, amongst whom was the Duke of Beaufort. The financial year having ended on the 13th ultimo, the draft annual report of the Council was considered and settled, and it was arranged to hold the eighth annual general meeting on the 6th December. The secretary reported that twenty-four special letters, warning offenders, or requesting apology, etc., had been sent out since the Council meeting held in September to October 13th, making 305 for the year, and a total of 1,552 since the formation of the Society in 1892; and that two prosecutions had taken place during the same period, making a total of 48 (against 89 defendants) for the year, and a total of 308 (against 639 defendants) since 1892.

An Agricultural Society for Mansfield.

The marked success of the visit of the Notts Agricultural Society to Mansfield last year has inspired some of the townspeople with the idea of forming an agricultural society and show in the district on the lines of the Newark, Chesterfield, Ilkeston, and other societies in the neighbourhood. The Mayor (Mr. W. J. Chadburn) was approached on the matter, and the outcome was a meeting held in the Mayor's Parlour on Monday afternoon, and attended by a large number of farmers and tradesmen of the district.

The Mayor, who presided, said it had been suggested to him by a number of farmers and townspeople that Mansfield seemed to be the only large town in the district which had not an agricultural society of its own, and considering the very great success they made of the Notts Agricultural Society's show there the year previous, they thought they might be able to support an agricultural society in Mansfield. (Hear, hear.) He believed it had been practically decided that the Notts shows were to be held in the county town, but if at any future time the senior society liked to again visit Mansfield he had no doubt they would be able to amalgamate, for one year, in one big show. (Hear, hear.)

Following some discussion, the Mayor formally proposed that an agricultural society for Mansfield should be formed, and a small committee elected to carry out the preliminary arrangements.

The resolution, which was seconded by Mr. Stubbins, was carried unanimously.

Mr. W. F. Sanders proposed that a small committee should be formed, and that a council should be elected at a general meeting of members to be held at a later date. Mr. W. F. Jolly seconded, and the motion was passed.

Mr. G. Cox was appointed secretary *pro tem.*, and the following gentlemen were elected as the preliminary committee:—The Mayor (Mr. W. J. Chadburn), Messrs. Rowe, Lamb, Bonnet, Towrsey, Roberts, T. Newton, R. L. Jones, T. Taylor, G. Blythe, W. F. Sanders, and W. F. Jolly.

Other resolutions confirming the scope of the Society to a radius of twelve miles, and fixing the minimum subscription at 10s., were also approved.

A cordial vote of thanks to the chairman brought the proceedings to a close.

Suffolk Sheep Flock Competitions.

The final stage in these competitons has now been reached, the awards of the judges (Mr. Henry Lingwood and Mr. George Pettit) being as follows:—

The Bristol Champion Challenge Cup and the Society's Gold Medal.—Mr. Herbert E. Smith, Walton Grange; reserve and silver medal, Mr. Thomas Keeble, Bentley Hall.

The Pretymen Challenge Cup best ewe lambs and the Society's Silver Medal.—Mr. Herbert E. Smith, Walton Grange; reserve and v.h.c., Major E. W. Baird, Exning; v.h.c., Messrs. Stanford

Bros., Beaumont Hall; h.c., Mr. R. Holmes White, Boulge Hall.

The handsome gold cup, value 50gs., offered for the best flock of the breed, and the challenge cup offered for the best ewe lambs, will, therefore, be held by Mr. Herbert Smith for the ensuing twelve months. This is a double honour, which reflects the greatest credit upon the owner and the shepherd of the Walton Grange flock, the competition this year being a very strong one, both in respect to the number and the quality of the flocks entered.

West Riding Chamber of Agriculture.

At a meeting of the West Riding Chamber of Agriculture, held at Wakefield on Friday, Mr. George Rhodes, of Nostell, presiding, a discussion took place on the Compensation Act, and farmers were urged to insure their labourers. The members of the chamber were also strongly advised to send their sons as students to the East and West Riding County Council's experimental farm at Garforth.

Several complaints were made as to the great difficulty of obtaining agricultural labourers. The chairman said it had been suggested that they should endeavour to get farm labourers from Ireland, but whilst Irish farm labourers were willing to come over to England in summer, the declined to do so in winter, and English farmers wanted labourers for all the year round. Mr. Spurr said respectable cottagers would not provide lodgings in winter for Irishmen, who could lodge anywhere in summer time, but not in winter. The chairman said that not one quarter of the number of Irish labourers came over to England now who used to come. It was decided to ask the Central Chamber of Agriculture to discuss the question at their next meeting.

Some Remarks on Manures.

The annual report of Mr. A. Sibson, F.C.S., consulting and analytical chemist, of 23, St. Mary Axe, was published last week, and below we give some extracts from it: —

Since I last reported, says Mr. Sibson, it cannot be said that there is much general improvement in the condition of British agriculture, as prices are still on the whole unremunerative, while the increasing imports of foreign and colonial produce, especially in the case of meat lately, must tend to increase the difficulties of making a living from the land, except under especially favourable circumstances. Bearing these facts in mind, together with the relatively high price of manures and feeding stuffs, even greater care than formerly is necessary in their selection and use; indeed, no economy in connection with them that is consistent with efficiency should be neglected.

In the preparation of fertilisers by the chemical manure manufacturer raw phosphates, of course, constitute one of the chief materials required, on the supplies and cost of which the price of all dissolved manures to the farmer mainly depends, while the production of effective fertilisers for the object in view is largely due to a judicious choice and blending of these and other substances on the part of manufacturers. With reference to feeding stuffs, although the various oil cakes which still predominate are secondary products obtained in the crushing of seed for oil, there is at present a large business in the direct preparation of compound cakes and meals, some of which offer distinct advantages to farmers.

Of the more recent raw phosphates, concerning which a few words may be said, the Land Pebble Phosphate is worthy of notice, as, although at present chiefly used on the Continent, it well deserves careful trial in this country. The percentage of phosphate of lime varies from 68 to 75, and the combined oxide of iron and alumina amount to 3 to 3½, which is not excessive, and the material possesses no other qualities to which any exception could be taken. Tennessee Phosphate has recently been largely employed, and yields a high percentage of phosphate of lime, but has rather much oxide of iron and alumina. Another material termed Gafsa Phosphate has been met with, and if forthcoming in quantity promises well.

Oxide of iron and alumina, as is well known, occur more or less in nearly all raw phosphates, and have the effect of causing the soluble phosphate to "go back"—that is to say, yield a lower percentage after a time than when freshly made, and so give rise to questions of quality. This action proceeds mainly during the heating of the mass when freshly prepared, and disputes regarding composition may be materially lessened by allowing the superphosphate to remain as long as possible in bulk before taking final samples upon which to base contracts. It should be mentioned that phosphate which has thus gone back and known as reduced, precipitated, soluble in citrate, or reverted phosphate, while quite distinct from soluble phosphate, and, of course, excluded in any contract when the latter is specified, is yet possessed of considerable agricultural value, differing materially in this respect from the undissolved mineral phosphate referred to below. The percentage of reverted phosphate in a manure can be estimated if desired. The numerous larger known raw phosphates do not require any special comment on this occasion, as their several merits and demerits are now well understood by most manufacturers of chemical manures.

It need hardly be repeated that in all cases where raw mineral phosphates are treated with acid to make superphosphates and similar dissolved manures, the object should be to render as large a percentage as possible soluble, yet although this might seem to be the alphabet of the business, I am often surprised to meet with so many samples in which this rudimentary principle appears to be quite overlooked—as much as half or more of the phosphate of lime sometimes being left in its original state, probably with the mistaken idea of economising acid, but the phosphate so left is for all practical purposes wasted. On the other hand, the majority of makers have well mastered the art of rendering the phosphoric acid present available to the utmost practicable limits.

Should a superphosphate so prepared prove of higher quality than is required for direct sale, it can be reduced to any desired standard by the addition of other materials, but in doing so special care should be taken to ensure even and uniform admixture, or the resulting product will test unequally; chemists are frequently blamed for giving incorrect results in such cases, when in reality the fault is due to this cause. Such difficulties are especially likely to occur with reference to mixed special manures in which several ingredients are intermingled in the dry state, because it is assumed as certain proportions of these are added together in the aggregate therefore every part of the bulk will answer by analysis to the calculated quality; but this by no means follows, particularly when a small quantity of some concentrated material is mixed with much larger proportions of inferior substances. There can be no question that this point is one requiring more attention than is commonly deemed necessary—and the same is true of sampling; elaborate precautions being found requisite, and therefore adopted, in drawing samples from valuable cargoes. In explanation of the foregoing facts, it may be remembered that a large bulk of several components is never all mixed together, but only the successive small portions of it operated upon at one time.

With regard to the use of such special compound manures, many farmers now prepare the mixtures themselves, buying the components separately, but it may be questioned whether they get any advantage by so doing, as, apart from having to purchase the constituents in small quantities, and therefore on less favourable terms, they lose what should be one of the chief benefits of buying of manufacturers, viz., a more perfect intermixture of ingredients than is attainable by amateur methods, which must be as thorough as possible, so that when applied to a crop every plant shall receive its fair share of every kind of nutriment.

The basis of fertilisers of this class is usually superphosphate of various grades or bone manure, together with sulphate of ammonia and sometimes potash, but the latter is seldom necessary when heavy dressings of farmyard manure are used; when, however, specially required, as for potatoes, it is most economically bought separately as kainit, which also furnishes salts of magnesia and soda. Nitrate of soda is sometimes used in such mixtures, but apart from its undesirable property of becoming damp I should prefer sulphate of ammonia, particularly for potato manures.

A large number of samples of basic slag have been analysed, the quality yielding about 32 to 35 per cent. phosphate of lime being most popular. Many of higher grade and some lower are in the market, and it is the buyer's place to judge which affords him best value, assuming, of course, the requirement of fine grinding is equally well fulfilled in all, this being a highly essential point in connection with the manure, and the 80 per cent. minimum generally accepted is liberal to the seller, as figures considerably over this are frequently forthcoming, and practically such samples are worth more per unit of phosphate. The coarser portion of basic slag includes in greater or less proportion particles of iron and steel, which not only are at best useless in the soil, but also constitute a source of difficulty in obtaining accordant results in analysis, for it is impossible to properly reduce them by grinding, while their exclusion would obviously give a fictitious improvement in quality.

Bone meal is still largely used, and answers well in certain districts, some admirable samples containing an unusual proportion of animal matter, and showing from 5½ to 6 per cent. of ammonia and about 40 per cent. of phosphate of lime, have been met with. The material was very finely ground, and would have an excellent effect either alone or in conjunction with mineral superphosphate. I have also had various meat guanos brought under my notice having about 6 to 8 per cent. of ammonia and 20 to 30 phosphate of lime; they are well suited to numerous agricultural and horticultural purposes, and merit a more extended use, either alone or in combination with other appropriate sources of plant food. Fish guano is still employed with highly favourable results. Peruvian guano is, of course, unsurpassed as a general manure, but the lower grades have now only about 3 per cent. ammonia and some 60 of phosphate.

The numerous compound feeding cakes and meals now on the market, and in whose production a large business is done, offer many advantages to the farmer of which he is wise to avail himself, but when purchasing them even greater discrimination is called for than in the case of linseed, cotton, or similar cakes.

It is difficult to judge of the soundness of these mixed or compound foods, and more often than is desirable materials enter into their composition which could not be sold separately, but whose deficiencies are disguised by grinding and the use of strong flavouring principles, hence very cheap or doubtful preparations of the kind should be regarded with suspicion, as serious injury to stock sometimes results from their use. When this happens redress is by no means easily obtained, as the mischief may arise from acute indigestion or other derangement promoted by a fermentative condition or incipient decomposition in some ingredient without any definite evidence of the presence of deleterious matter.

There is no reason why the farmer should not himself prepare his mixed foods if so disposed, but as in the case of manures obvious advantages are secured in procuring the several components in large quantities, and the use of special plant for mixing, particularly for pressing cakes, which for some purposes are distinctly preferable to meals, consequently in most cases it is wiser to buy of firms of repute, many of whom now supply foods of the kind affording good value for money.

The chief difficulty encountered in preparing compound feeding materials is obtaining a sufficient percentage of albuminoids and oil, 18 to 20 of the former and 8 to 10 of the latter being about the usual standard. In order to raise these items decorticated cotton cake and linseed meal are frequently resorted to, but all farinaceous foods are low in these primary constituents. Carob or locust beans form a valuable ingredient on account of their attractive flavour, but they also are very poor in oil and nitrogen; a judicious use of flavouring materials undoubtedly conduces to favourable results; many foods are, however, certainly overloaded with condiments.

Very many linseed cakes have been analysed of all grades of quality. Some of the foreign cakes are much better cleaned than formerly, and come within the limits of pure cakes. A certain number of makers now supply cakes containing a definite percentage of oil, a point I have always advocated, and in all transactions a guarantee of oil should be obtained as well as of purity, since it is by no means uncommon to find pure cakes that yield not more than 7 or 8 per cent. of oil. It should not be forgotten that linseed cake is a very concentrated food, and is used to best advantage in conjunction with farinaceous meal. Decorticated cotton cake is a still more concentrated food, and the complaints sometimes made against it often arise from this fact. Ordinary cotton cake varies more in physical character than in composition, especially with reference to the coarse or fine grinding of the cotton seeds, the husks of which have a very woody character. Latterly some excellent substitutes for this material for sheep feeding are obtainable.

The Agricultural Holdings Amendment Act, 1900.*

Acts of Parliaments directing compensation to be paid by one party to another are necessary to provide for contingencies which were unexpected when the contract was entered into—to help the weak against the strong, or to enable a quitting tenant to receive cash as an equivalent for that which it is impossible to actually carry away.

In the earlier days of agriculture, before cake was used, and before roots were grown, a tenant left very little which could not actually be removed. The great advance in agriculture, some fifty years ago, led to "high farming," and gradually tenants began to find that they were leaving for their successors an asset, in the shape of unexhausted interest, which should be realisable.

Many years of agitation went by before the Agricultural Holdings Act, 1875, was passed—a permissive Act only—and one very little used. Many landlords had for years given what were really small Agricultural Holdings Acts in their leases and agreements, and there is no doubt that the 1875 Act was the indirect cause of extending this practice in the same way as the Allotments Act, 1887, caused much land to be voluntarily let in allotments without the aid of its compulsory clauses.

It is curious to note that as the good times previous to 1875 were the cause of the introduction of the 1875 Act, so the bad times just previous to 1883 were the cause of the 1883 Act, and perhaps the similar times since that period are responsible for the more exact Act of 1900. When times were good, farmers were only too anxious to get land on any terms, but now that receipts are smaller and payments larger, every penny must be considered, and tenants are in a position to demand that not a shilling of realisable assets shall be left behind without payment.

Of the four classes of agriculturists—landlords, outgoing tenants, ingoing tenants, and labourers—the first and last may be dismissed as not wishing for an Agricultural Holdings Act. The former can make himself secure by agreement or lease (the terms of which must vary in direct proportion to the demand for land), while the agricultural labourer is not affected one way or other. Of the two remaining classes, outgoing tenants exist in thousands, but incoming tenants only for a few hours or days in the lives of individuals. Whilst a man is seeking to hire a farm he is an ingoing tenant, but directly

* Paper read at a meeting of the Farmers' Club, to-day, Monday, November 5th, by Mr. Trustram Eve, F.S.I.

he has once signed the agreement the terms of his entry and also of his leaving are settled, and he becomes for all intents and purposes an outgoing tenant.

It would appear, therefore, that with proper organisation and combination the numerous class of outgoing tenants could obtain all just demands with ease. The landlord opposes the piling up of the tenant's valuation on quitting, as it reduces the number of possible applicants for the farm, but in practice, when times are good, it is found that the ingoing tenant pays the exact amount of the valuation which the outgoing tenant is entitled to receive from the landlord, and while this is so any increase in the statutory compensation falls on the shoulders of the ingoing tenant who possesses no possible organisation for resistance and only indirectly on the landlord.

The incoming tenant is a neglected indivdual, and is often swamped by men who only wish to obtain a big valuation on retiring from their farms to farm no more.

Scope of the Acts 1883 and 1900.

It will, unfortunately, be necessary for those whose practice includes the management of land or the valuation of tenant right to study carefully the 1900 Act, and the unrepealed portions of the 1883 Act.

Ever since 1883 it has been the boast of many valuers that they do not know anything about the Agricultural Holdings Act, followed by the remark that they are very glad to say they have seldom used it and hope that they may never do so again. To those gentlemen it is feared that the Agricultural Holdings Act, 1900, will be very irksome, as by its terms hardly a single tenant right valuation will take place outside its provisions and those of the 1883 Act which are incorporated with it.

The 1883 Act could only be brought into operation by the tenant serving an actual document with all solemnity on the landlord two months before the end of the tenancy, which document has come to be thought a kind of wrongful declaration of war. This is abolished by the new Act, which operates at once on the tenant informing the landlord some time *before the end of the tenancy* that he intends to claim its provisions.

When one comes to consider that consumption of home-grown corn, sainfoin, and lucerne roots, temporary pastures, etc., are in the future to be improvements, it will be seen that there will be few farms where one or other of them will not be found, and consequently the aid of the new Act invoked. In addition to this, the fact that when once this claim is made it enables either party to demand that arbitration shall, under the terms of the new Act, be extended to any further claim made by either side in connection with the holding, will make it much more necessary that this new Act should be studied and learnt by all concerned.

The Act applies to the same holdings which were affected by the 1883 Act. An interesting point arises out of Section 54 of the old Act, which says that "nothing in this Act shall apply. . . . to any holding let to the tenant during his continuance in *any office, appointment, or employment* held under the landlord." This would appear to affect those agents or bailiffs who sometimes occupy a farm on the estate they manage, and these must protect themselves in any agreement which may be drawn up.

The Two Acts Compared.

To thoroughly grasp the meaning of the two Acts, it is necessary in the first place to turn to the third schedule of the new Act (on page 11), so as to note how much of the 1883 Act is repealed Everyone must agree that it is sufficiently hard to understand *one* Act of Parliament, but when one has not only to learn the new Act, but also to remember parts of an old one, and, further, which parts remain and which are repealed, the required effort becomes greater. We are told that to have included the sixty-four clauses of the old Act with the new Bill would have taken up too much time in Parliament, but, however that may be, the result is unsatisfactory, and must be so until the Government choose to give us a Consolidation Act. I am sure we must all express our gratitude to our secrtary, Mr. Druce, for being the first to draft a Consolidation Act. This will be found in connection with the lucid exposition of the Act Mr. Druce has written in the June number of the Royal Agricultural Society's Journal (1900).

Shortly, the following is the result of the Third Schedule of the new Act (Repealing Schedule):

(1) The whole of the procedure clauses are struck out of the 1883 Act, and those in the new Act have to be learnt in their place.

(2) The 57th Section of the old Act, which has been before the Courts on more than one occasion, is repealed, and perhaps Section 1, Sub-section 5 of the new Act, may be said to take its place.

(3) The whole of the First Schedule is cut out and reprinted in the new Act, with certain additions, such as "Home-grown corn," "Temporary pasture," and the inclusion of "Corn, etc., eaten by horses other than those regularly employed on the holding."

There are 54 sections in the old Act—19 are repealed, and four are partly repealed—leaving 45 sections which still require to be consulted in addition to the 14 sections of the new Act and 30 new rules.

Procedure.

As in the 1883 Act, nothing outside the 26 numbered improvements in the First Schedule can be claimed for under the provisions of the Act, and only then at the determination of the tenancy. One often hears partly informed persons say, "I can get such and such a thing under the Agricultural Holdings Act"; "I am content to farm under the Act"; "Should not the tenant have left more fallow under the Act"; and so on. It cannot be too often stated that it is the *tenant only* who can bring both the old and new Acts into operation. The landlord is perfectly powerless to do so. And when the Act is at work its scope is strictly limited to the matter contained in the Schedule, and does not extend to extraneous improvements not specifically mentioned.

First Schedule.

Part I.—Nos. 1 to 16 are improvements for which *written* consent is necessary, *previous* to the execution. If the consent is not forthcoming at the end of the tenancy, no claim under these heads can be substantiated.

Perhaps the two more important of these improvements for which tenants should be careful to obtain previous consent, are:—

(3) Laying down of permanent pasture.

(11) Planting of orchards or fruit bushes.

Nos. (1) (6) (7) (8) (9) (10) and (12) are also important.

Part II.—This consists of a single item—drainage—compensation for which cannot be obtained unless *notice* under Section 4 of the 1883 Act has been given at least two months *before the work is begun.*

Part III.—This is the most important of the three parts, containing as it does nine improvements which any tenant can claim for without either consent or notice. Nos. (18) to (22) are practically the same in both Acts being "Chalking," "Clay burning," "Claying," "Liming," and "Marling."

The remaining four improvements are:—

(23) Application to land of purchased artificial or other purchased manure.

(24) Consumption on the holding by cattle, sheep, pigs, or by horses other than those regularly employed on the holding, of corn, cake, or other feeding stuff not produced on the holding.

(25) Consumption on the holding by cattle, sheep, or pigs, or by horses other than those regularly employed on the holding, of corn proved by satisfactory evidence to have been produced and consumed on the holding.

(26) Laying down temporary pasture with clover, grass, lucerne, sainfoin, or other seeds, sown more than two years prior to the determination of the tenancy.

The new Act comes into force on January 1st, 1901, and will apply to any tenancies ending after that date.

The whole gist of the Act lies in Sections 1 and 2, containing thirteen sub-sections.

The following would appear to be the procedure if a tenant wishes to claim for any improvement mentioned in the First Schedule:—

First.—Carefully examine the tenancy agreement (if any) to ascertain if there is therein a covenant on the part of the landlord to pay on quitting for all or any of the improvements mentioned in the First Schedule of the Act.

Second.—Ascertain if there is an arbitration clause in the agreement, and if so, is it limited to certain things or does it refer generally to all questions which may arise under the agreement.

If the agreement is found to fully cover all possible claims under the First Schedule and an arbitration clause is also found, the proceedings will be wholly under the agreement and not under the 1883 and 1900 Acts (see Section 1, Sub-section 5).

We may assume that such an agreement could hardly be found which gave compensation for each of "home-grown corn," "temporary pasture," "sainfoin or lucerne roots" "chalking" etc., and if *one* of these improvements has been made and the agreement is silent as to compensation for it, recourse *must* be made to the Act. It will thus be seen that unless an agreement is a sort of complete 1900 Agricultural Holdings Act in itself the tenant *must* rely on the Act to get the balance. A high authority remarked during the progress of the Bill: "We want tenants to get as much as they can under their agreements and then go on to the Act where the agreement fails."

Assuming a case where the agreement is silent as to compensation and there *is* an arbitration clause, the proceedings under the Act would be in accordance with the terms of the arbitration clause in the agreement (see Section 2, Sub-section 1).

If there is *no* arbitration clause the proceedings would come under the terms of the Act of 1900, or rather the rules at the end of the Act.

Should no agreement exist the proceedings must, of course, be wholly under the Act.

In the old Act it was necessary under Section 7 to give two months' previous *written* notice "stating as reasonably as may be the particulars and amount of the intended claim." If this date was once passed, and notice was not served, the tenant lost his right to compensation. All this is swept away, and in its place the framers of the Bill said that the claim should be made within three months after the determination of the tenancy. This raised a storm of objections from every side, and the Bill was amended to read as follows:—(Section 2, Sub-section 2) "Any claim by a tenant for compensation under this Act . . . *shall not be made after the determination of the tenancy.*"

It is important to notice that if notice is sent by the tenant to the landlord as to the claim under the Act *before the last day of the tenancy* his right to compensation under the Act is gone.

There will be much discussion as to what constitutes the making of this all-important claim. Some will go on the old lines of sending a complete claim to the landlord. Some will simply write and say they intend to claim—some will do so correctly, and it is difficult to imagine that any of these will be wrong.

I have carefully searched the new Act (and what is left of the old one), and can nowhere find any words which compel the claim to be in writing or even that the total amount of a claim should be stated. The words of Section 2, Sub-section 1, are: "If a tenant *claims to be entitled* to compensation . . . the difference shall be settled by arbitration," and Sub-section 2 states: "*Any claim by a tenant* . . . shall not be made, etc.," while Rule 4, of the Second Schedule, says: "Every appointment, notice, revocation, and consent under this part of these rules must be in writing"; but nothing is said as to the *claim* being in writing. It would appear to be sufficient for the tenant before the end of the tenancy to write to his landlord: "I intend to claim under the Agricultural Holdings Acts, 1883 and 1900, on quitting my farm."

This can be done at any time—when a tenant has just entered a holding, for instance, to take an absurd case, so long as it is served before the end of the tenancy.

Whether one valuer can inform another valuer with safety, that his client will claim under the Act is doubtful, and it seems more advisable that the tenant should do as stated above. We shall all be obliged to our secretary if he would give us his opinion on this important point.

This simple letter has the effect of setting in motion a somewhat large machine which can have the following effects:—

(1) Create an arbitration under agreement or custom for every question arising out of the quitting of the holding (see Section 2, Sub-section 3), when no arbitration clause previously existed.

(2) Bring into force the rules of arbitration (Second Schedule) of the 1900 Act (with the compulsory single arbitrator, and no right of appeal after the award is made), operating on not only items in First Schedule, but also the whole tenant right valuation, breaches of covenant, etc.

It must be some time before those connected with valuations will realise the great changes this Act will make in tenant right valuations. Landlords and tenants are, however, still left free to say whether the actual arbitration rules in the 1900 Act shall apply *even to claims under the Act,* and I strongly advise, in the interest of landlords and tenants alike, that where an agreement exists, the arbitration clause, if present, should be strengthened, and where absent, a new clause should be agreed upon, something like the following:—

"We hereby agree that all disputes and claims arising out of this agreement or otherwise shall be settled by a reference under the terms of the Arbitration Act, 1889."

This would appear to be sufficiently strong, for Section 2, Sub-section 8, says: *Subject to any provision contained in any agreement between landlord and tenant,* the Arbitration Act, 1889, shall *not* apply to any arbitration to which this Act applies.

The claim having once been made, it is possible to bring claims under the Act, agreement, or custom, under one reference, with one award (instead of two as under the 1883 Act), on either party giving "written notice to the other party . . . requiring that arbitration shall extend to . . . the further claim." (See Section 2, Sub-section 3.) This is an improvement on the old Act, but it must be remembered that the mere fact of a tenant claiming, for, say, "sainfoin roots" under the Act, automatically creates an arbitration clause for all matters arising out of the quitting of the holding, which in some cases may or may not be desirable.

Single Arbitrators.

The first step is the appointment of arbitrators, and if the arbitration is under the rules of the 1900 Act something like the following may happen. The tenant writes to the landlord and says Mr. Jones will act for him. Landlord may say Mr. Smith will act for him, and in due course they meet and either make their award or refer their differences to an umpire. This is in accordance with the present practice and not objected to by anyone.

But suppose the landlord chooses to say that he will not have the arbitration conducted by two arbitrators, he has power under Rule 1 to insist upon the machinery of a single arbitrator, and in default of agreement between him and the tenant can write to the Board of Agriculture and request that a single arbitrator shall be appointed to hear the case.

The position may be reversed, as either landlord or tenant have the right to insist on a single arbitrator.

This is startlingly new in the law of arbitration, and meets with no favour in England, whatever Scotland may wish. Of course, the result will be in nine cases out of ten exactly opposite to the intention of the Legislature which was to cheapen procedure. How can a tenant farmer prepare and sustain his own claim under the Act and also the arbitration in connection with his hay, straw, manures, tillages,

breaches of covenant, etc., etc., and present it in the best way before this strange single arbitrator selected by the Board of Agriculture? He will naturally still ask his own valuer to prepare and conduct his case in the usual way. The landlord will act similarly on his side, and two arbitrators and a single arbitrator (really an umpire) will at once enter on the arbitration when in the great majority of cases the two arbitrators would have agreed on an award without the aid or expense of the "third man."

As has been previously stated, this compulsory single arbitrator can be avoided, if it is agreed that the Arbitration Act, 1889, shall apply in preference to the machinery of the Agricultural Holdings Acts.

Points in Connection with Claim and Procedure.

Running through the 1900 Act the following might be considered as worthy of discussion:—

Section 1, Sub-section 4 (selling off hay, straw, etc.). This section is very important to those who under agreement or custom have a right of *free* sale for all or part of crops such as hay, straw, roots, green crops, etc. In the 1883 Act the meaning of Section 6 (b) was not explicit, but the new section makes it quite clear that where a tenant has a right of free sale, that right cannot be watered down by a reduction of his claim under the Act as an equivalent for selling the hay, etc. I quote the new sub-section as being important, but the words in italics seem somewhat difficult of comprehension. The House of Lords is, I believe, responsible for them.

Section 1, Sub-section 4. In the ascertainment of the amount of the compensation payable to a tenant in respect of manures as defined by this Act, there shall be taken into account the value of the manure required by the contract of tenancy, or by custom to be returned to the holding in respect of any crops sold off, or removed from the holding within the last two years of the tenancy, or other less time for which the tenancy has endured, *not exceeding the value of the manure which would have been produced by the consumption on the holding of the crops so sold off or removed.*

Section 1, Sub-section 5. (Agreement, Custom, and the Act.) This is an important clause, and will form the subject of much argument. It runs:—

"Nothing in this section shall prejudice the right of a tenant to claim any compensation to which he may be entitled under custom, agreement, or otherwise, *in lieu of* any compensation provided by this section."

What do the words "in lieu of" mean? It would have been clearer if it said "in lieu of and *in addition to* any compensation."

An important point arises on this sub-section (Section 1, Sub-section 5) if read in connection with Section 5 of the 1883 Act (2nd para.), which is the well-known clause permitting "fair and reasonable substituted compensation." To take an instance which occurs frequently. An agreement provides that on quitting the tenant shall be paid half the amount of the last year's cake bill. Can he get this amount under his agreement, and make a further claim under the Act for corn consumed, or is the cake considered to be "fair and substituted compensation" for both the cake and corn mentioned in No. 23 of the First Schedule of the 1883 Act? In other words, is No. 23 divisible or indivisible? Does it form one improvement or two or more? The point was tried in the County Court, and the judge decided that it was indivisible. (See *Land Agents' Record*, October 14th, 28th, and November 4th, 1899.) It is doubtful if this decision is right, for suppose the agreement secured compensation for corn or, to take an extreme case, say mangolds, is the tenant to be precluded from claiming for cake because he is paid under his agreement for corn or mangolds? This point is more important under the 1900 Act than it was under the old one, for the consumption of home-grown corn is now to be considered an improvement, and there will be few changes of tenancies where some of it will not be claimed for. Can the tenant who receives half the cake bill under the agreement, claim for home-grown corn under the Act, in face of the decision of the County Court judge and this sub-section? (Section 1, Sub-section 5, 1900 Act.)

Section 2, Sub-section 2 (last half of). It will be noticed that the tenant who retains part of the holding after he has given up the greater portion can defer making his claim until just before he quits the last portion, and under Sub-section 4 of the same section the arbitrators may make a separate award if they think fit.

Section 2, Sub-section 3. This requires careful reading, and must be read in connection with Section 6 (c) and Section 7 of the 1883 Act, as the necessity for formal counter claims by landlords, and the time limit of 14 days after the determination of the tenancy are both now abolished. I presume that nothing but the Statute of Limitations bars the length of time in which a landlord can under the new Act make a counter claim, unless the tenant under this sub-section "requires that arbitration shall extend to the determination of the further claim. . ."

It must not be forgotten that if either side wish to use this sub-section, notice in writing must be given not later than seven days *after* the appointment of the arbitrator or arbitrators (presumably meaning the last appointed of them). It will be noticed the words are not after "notice of appointment," but after "the appointment" itself. If one party appoints an arbitrator and he does not give *notice* of the appointment to the other side until after seven days have expired, he can make this sub-section quite inoperative. This is peculiar!

Section 2, Sub-section 6. *Appeal.* It will not be possible to appeal against an award when once delivered if the reference has been under the terms of the Agricultural Holdings Acts 1883-1900. This is somewhat startling, and may have grave results when it is borne in mind that the whole of the tenant right valuation, including the construction of clauses in the agreement, can be brought into this arbitration. True, there is an attempt at a right of appeal, but as it can only be used *before* the award is closed, it will not be the slightest use, especially if a tenant is supposed to be conducting his own case before a single arbitrator. The sub-section enacts that the arbitrator *may* state a case on any question of law. If on the application of either side he refuses to state a case, either party may (under Rule 9 of the Second Schedule) ask the County Court Judge to compel him to do so. If the judge agrees, the matter must come before him again in the form of a case, which seems cumbersome. This absence of right of appeal in this Act is another reason for preference being given to the Arbitration Act, 1889, in arbitrations under the 1900 Act. Under the new Act an award may be known to be wrong on a point of law, and yet if either party was not aware the arbitrator was relying on the particular point and neglected to ask him to state a case upon it, the injustice must remain through a want of power to appeal. It is assumed that an arbitrator cannot state a case *after* the award is published.

Section 7 says: "The compensation in respect of an improvement made before this Act comes into operation shall be such (if any) as could have been claimed if this Act had not been passed, but shall be ascertained in the manner provided by this Act."

The result of this is that the procedure clauses of the 1883 Act cease to operate on January 1st, 1901, and the new schedules in the 1900 Act come into force on the same day.

Home-grown corn used after January 1st, 1901, can be claimed for, and it must be borne in mind that under No. 26 of the First Schedule the improvement by the consumption of it cannot be substantiated unless it is "proved by satisfactory evidence to have been produced and consumed on the holding."

This Section (7) affects No. 27 of the First Schedule, which runs:—"Laying down temporary pasture with clover, grass, lucerne, sainfoin, or other seeds sown more than two years prior to the determination of the tenancy." From reading this with Section 7 it will be seen that any seeds sown either in the spring or autumn of 1900 or before that year can *never be* claimed for, while those sown in 1901 will only be the subject of compensation after two years, which would be 1903. I think tenants will grumble that this improvement was not made retrospective. The remedy would appear to be in the tenant's own hands, for the winter before he leaves he can ask his landlord if he will compensate him for any temporary pasture, etc., he has laid down, and if it is refused he can plough it up and have a crop on the land. It will also be noticed that any seeds sown *less* than two years before the end of the tenancy cannot be claimed for at any time. One would have thought that if the Legislature in its wisdom wished to form a sort of national agreement on the question of temporay pastures and lucerne and sainfoin roots, that those which have only been mown for *one* season should be compensated for as well as those which have been mown *twice or more.* Tenants must be prophetic enough not to sow sainfoin or lucerne seed some months before they eventually decide to give notice to quit—a difficult position to occupy!

While on the subject of temporary pasture, there is rather a pitfall in connection with it that it would be well to consider. Tenants in due time will naturally think that they will be paid for *any* piece of temporary pasture they may leave. This is true, but on the other hand the covenants in the lease as to cropping or the custom of the country will not be over-ruled by this No. 26 improvement, and consequently the temporary pasture claimed for must not form part of the fallow shift or of that in course for wheat, or the tenants will have to pay for the breach of covenant even if they are paid under the Act for temporary pasture. In practice it may be said that as far as money value is concerned the one will balance the other.

Rules as to Arbitration.

There are one or two points in these rules to which allusion has not been made in the former part of this paper.

Part I., No. 2.—"If a person appointed arbitrator dies, or is incapable of acting or for seven days after notice from either party requiring him to act, fails to act, a new arbitrator *may* be appointed, as if no arbitrator had been appointed."

"The arbitrator *may*" (not must or shall), seems to be somewhat weak, and will lead to difficulties.

No. 5.—The Board of Agriculture will now have power to extend the time for making awards whether the time has expired or not. This is a great improvement, as under the old Act, if a mistake of this kind was made, the proceedings had to begin *de novo.*

No. 7.—*Evidence.*—It will be seen on reading this rule that only the "parties to the arbitration and claimants" can be *compulsorily* examined in an arbitration under the 1900 Act. Under the Arbitration Act, 1889, a subpœna can be served on any one necessary as a witness, as, for instance, the man who has bought hay and straw wrongly sold off a holding; and this is yet one more reason for adopting the procedure of the Arbitration Act in preference to the Agricultural Holdings Act, 1900.

No. 10.—"The arbitrator shall, on the application of either party, specify the amount awarded in respect of any particular improvement. . . ."

This is the result of a compromise in the House of Commons. It is curious to note that this was almost the only question which really disturbed members during the passage of the Bill through the House, and the Government, fearing defeat, agreed to this compromise.

On general grounds it would appear that if it is possible to appeal against an award, it is useful to have particulars, but if no appeal is possible, it only further angers the aggrieved party to know how the amount (to which he objects) is made up.

Nos. 14 and 15.—*Costs.*—The costs of, and incidental to, an arbitration are at the discretion of the arbitrator or umpire as in the old Act, but it is well known that through weakness on the part of many umpires, or from fear of offending one of the arbitrators, costs are not always fairly awarded. No. 15 now gives precise directions. "The arbitrator shall, in awarding costs, take into consideration the reasonableness or unreasonableness of the claim of either party, either in respect of amount or otherwise, and any unreasonable demand for particulars or refusal to supply particulars, and generally all the circumstances of the case, and may disallow the costs of any witness whom he considers to have been called unnecessarily, and any other costs which he considers to have been incurred unnecessarily."

The usual course which arbitrators take is to award "that each party shall *pay his own costs and half* the arbitrator's or umpire's fees," notwithstanding that perhaps one side has been practically successful in not only sustaining a just claim but in refuting an unjust one. This is the chief cause with lawyers of the unpopularity of arbitration.

The last half of No. 14 is similar to Section 20 of the 1883 Act . . . "and the costs shall be subject to taxation by the Registrar of the County Court on the application of either party, but that taxation shall be subject to review by the Judge of the County Court."

Valuers will not like this, as the costs of the ordinary tenant right valuation can now be reviewed, and from *their* point of view this is another reason for preferring the Arbitration Act, 1889, which does not contain a taxation clause. If an umpire writes: "My award can be taken up on payment of ten guineas," and that sum is thought too much by the Registrar or Judge, the unfortunate umpire will probably have to disgorge the excess.

Our secretary has told us in the Royal Journal that the Board of Agriculture will issue a form of award very shortly, and we hope they will see their way to consult the Surveyors' Institution before doing so, that we may have a short and commonsense document to work on.

I must apologise for the length of my paper, although several matters which crosed my mind have not been touched upon. I feel that to many of my audience it has been a very dry dissertation, and I know it would have pleased some if attention had been drawn in forcible language to the sins of omission on the part of the framers of the original Bill, but I thought *that* was quite outside the province of a paper on an Act of Parliament, although necessary in the case of a Bill. I feel that it has been presumption on the part of so young a member of the club to attempt to expound theories to my elders, and I shall listen to the discussion with interest, and learn much from it.

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

18,359.—J. Boardman, of Bank Street, Manchester, for an invention for "Improvements in apparatus for raising potatoes."

18,404.—J. R. Cocks, of Bayston Hill, Shropshire, for an invention for "An improved machine for dropping and covering potatoes by horse-power."

18,473.—A. E. Whiting, of Buckingham Street, Strand, London, for an invention for "Improvements in leg rope attachments for securing cows for milking or the like."

18,588.—W. D. Brown, of Glasgow, for an invention for "Improvements in self-binding reaping machines."

18,672. W. Glover, of Liverpool Road, Skelmersdale, Lancashire, for an invention for "Glover's improved one-horse potato digger."

Patents Sealed.

13,693.—M. A. R. Neaverson and R. Neaverson, both of Peakirk, near Peterborough, for an invention for "Improvements relating to hay racks, etc."

13,751.—E. D. Smith, of Ashburton, Devonshire, for an invention for "Seed and plant protectors."

THE

HOTEL CLERK

AND

DR TIBBLES' Vi-Cocoa

"The Effect of Vi-Cocoa was Wonderful."

Mr. W. YEOMANS, The Highland Railway Company's Station Hotel, Inverness: "I feel I ought to express my praise for your wonderful beverage, Dr. Tibbles' Vi-Cocoa. I am an Hotel Clerk, and work from early morning until 1 and 2 the next day. After trying nearly everything to drink, including beer, wine, and spirits, I tried Vi-Cocoa, and the effect was wonderful. I never feel sleepy at midnight now, and recommend it to all visitors travelling to London. I used once to feel as if I should collapse, but it is different after using your Vi-Cocoa."

MOLASSINE

FOOD FOR HORSES, CATTLE, SHEEP, PIGS, etc.

Replacing an equal quantity of Fodder.

A STAPLE FOOD AND CONDIMENT COMBINED. **Patented in all the principal Countries in the World.**

ANNUAL CONSUMPTION, 1,200,000 CWT.

Manufactured by Messrs. Henry Tate & Sons, Sugar Refineries, London and Liverpool, exclusively for the Molassine Company, Ltd. Introduced into the Imperial and Royal Stables of GERMANY and RUSSIA. It is adopted throughout THE GERMAN ARMY, and during the few months it has been on the Market in the United Kingdom it has met with a **most favourable reception**, which is evidenced by the **many Repeat Orders** we are daily receiving, and assurances of its **permanent adoption.**

MOLASSINE contains **36** to **40** per cent. of **Sugar**, and is a combination of **Sugar, Treacle**, or Syrup with Vegetable **substances.** It is guaranteed to consist exclusively of natural organic materials.

RESULTS OF FEEDING WITH MOLASSINE.

IT STIMULATES APPETITE, IMPROVES DIGESTION. GRIPE AND DIARRHŒA COMPLETELY DISAPPEAR.

HORSES. From 2 to 4 lbs. per day.

CATTLE. 8 lbs. per day.

SHEEP. 1½ lbs. per day.

PIGS. Per 100 lbs. of their own weight, from 1 lb. to 1½ lbs.

MILCH COWS. 5 lbs. per day.

After a few weeks' feeding are in the **best condition,** and show **strength, highest working power,** and a **smooth** and **glossy coat.**

Thrive quickly, and especially in the last period of fattening, take willingly to their food, and thus **become weeks sooner ready for the market. The meat is of best quality.**

Eat Molassine greedily. The disagreeable smell of the Pig-Stye disappears, the **animals are in the best health.**

After 8 to 10 days' feeding give more milk, richer in cream.

MOLASSINE replaces an Equal Quantity of FODDER.

MOLASSINE packed in bags of 1½ cwt. each.

On rails, Sugar Works of Messrs. HENRY TATE and SONS, SILVERTOWN, ESSEX.

Price per ton, £6 15s. **Price per cwt. £0 7s. 6d.**

For buyers of regular weekly or monthly supplies we shall be pleased to quote special prices.

WINTER STOCKS SHOULD BE ORDERED WITHOUT DELAY.

For samples and prices apply to The MOLASSINE COMPANY, Ltd., 36, Mark Lane, London, E.C.

First Class Representatives and Distributors throughout the United Kingdom wanted.

AUCTION SALES.

ROTHERHITHE, within about three-quarters of a mile of the Tower Bridge, near the entrance to the proposed new Rotherhithe and Ratcliff Tunnel and the Surrey Commercial Docks.—Very extensive Freehold Riverside Premises and Steam Flour Mills, fitted with valuable modern plant and machinery on the roller system, with granaries, warehouses, engine and boiler houses, dwelling-houses, yards, stabling, etc., now and for many years past in the occupation of Messrs. J. B. and T. H. Perks, and for sale, in its entirety, with possession on completion of the purchase. The property possesses the important frontage to the Thames of about 96ft. 6in., with wharfage and lay-by for barges, frontages of about 98ft. 9in. on the north side, and 104ft. on the south side of Rotherhithe-street, also a long side frontage to Gilham's-court, the total ground area being about 18,000 square feet, exclusive of the site of the old mill stream, which extends to Paradise Street in the rear, and has an area of about 7,400ft. super. The property, from its considerable river frontage, situation, and extent, would be equally suitable for wharfingers, timber merchants, large manufacturing premises, electric engineering works, or other purposes.

MESSRS. DEBENHAM, TEWSON, FARMER, and BRIDGEWATER will SELL, at the Mart, on Tuesday, November 27, at 2, in one lot, with possession, the exceedingly important FREEHOLD PROPERTY known as Rotherhithe Mill, and 9, 11, and 13, Rotherhithe-street, together with the whole of the valuable fixed plant and machinery. The premises comprise on the north side of Rotherhithe-street and abutting upon the River Thames a range of three two-storey granaries, all communicating, and dwelling-house adjoining; on the south side of Rotherhithe-street an open courtyard, with double entrance gates, extensive mill-house of five floors, with all necessary rolling and other machinery, gearing and accessories, engine and boiler houses, with 25-horse power beam engine and two horizontal boilers, tall chimney shaft, mill stones, yards, stabling for thirteen horses, coach-houses, large van shed, harness room, man's rooms, and loft, a dwelling-house, No. 26, Gilham's-court, piece of vacant ground adjoining, also the old mill stream and water course from the River Thames. The mill premises communicate with the waterside granaries by an iron bridge over Rotherhithe-street.

Particulars of Messrs. HARRIES, WILKINSON, and RAIKES, Solicitors, 38, Nicholas-lane, Lombard-street; and of the Auctioneers, 80, Cheapside.

ALDERMASTON MILL, BERKS.—Valuable Freehold Property, situate about a mile from Aldermaston Station on the Great Western Railway, half a mile from the village of Aldermaston, and about 9½ miles from Reading and Newbury.

MESSRS. DEBENHAM, TEWSON, FARMER and BRIDGEWATER will SELL, at the Mart, on Tuesday, December 4, at 2 o'clock, a capital FREEHOLD WATER CORN MILL, with about 12 acres of land, situate on the River Kennett, comprising a brick and slated mill-house of five storeys, fitted with modern roller plant, machinery, fittings, and tackle, and two pairs of stones, with the necessary water power for driving the same, mill dam and two sets of sluices, wheat and flour stores, spacious miller's house, pair of capital cottages with gardens, and one other formerly used as a toll-house; nag stable for four, coachhouse, cart-horse stable for six and cart shed, cattle sheds, cowhouse, piggeries, rick and chaff houses, workshop, etc. There are also flower and vegetable gardens, productive orchard, and several enclosures of rich meadow and pasture land skirted by the River Kennett, which affords excellent fishing. The whole embraces an area of about 17a. 2r. 11p., and is for sale with possession.—Particulars of Messrs. SURR, GRIBBLE, and OLIVER, 12, Abchurch-lane, E.C.; and of the Auctioneers, 80, Cheapside, E.C.

AUCTION SALES.

IPSWICH.

SPECIAL SALE OF PEDIGREE RED-POLLED CATTLE.

TUESDAY, NOVEMBER 20TH,
AT 2 P.M.

ROBERT BOND and SONS have been instructed by Mr. ALFRED J. SMITH, of Rendlesham, to SELL by AUCTION, in the DRILL HALL, IPSWICH,

61 HEAD of PEDIGREE RED POLL CATTLE, comprising:—
19 HEIFERS with their FIRST CALVES.
6 COWS and their FIVE CALVES.
3 YOUNG HEIFERS.
6 YOUNG BULLS.

The Rendlesham and Eyke Herds of Pedigree Red Polls have been established upwards of thirty years, during which time Mr. Smith's first consideration has been milk. Among the above will be found eight prize winners at the London Dairy, Royal, and County Shows this year. The whole consignment (especially the 19 heifers and their calves, which are all exceptionally good) is worthy of notice by those who desire to possess the best of this grand breed.

Catalogues, containing pedigrees and full particulars of yearly milk records, may be obtained of Mr. SMITH, and of the AUCTIONEERS, Old Bank House, Ipswich.

THIS WEEK! THIS WEEK!

WREXHAM HORSE REPOSITORY.

MESSRS. JONES AND SON will SELL by AUCTION, on THURSDAY and FRIDAY, NOVEMBER 15th and 16th,

300 HORSES.

THURSDAY.—HEAVY HORSES.
FRIDAY.—LIGHT HORSES and CARRIAGES.
Catalogues ready. A grand lot entered.
Offices: Wrexham and Llangollen.

On FRIDAY NEXT, NOVEMBER 16th
(12 o'clock).

MANSELL'S SHREWSBURY
STORE STOCK SALE
(on Live Weight Basis),
IN THE SHREWSBURY SMITHFIELD.

950 CATTLE (all breeds and ages), including a good selection of well-bred POLLED ANGUS CROSSES, SHORTHORNS, HEREFORDS, WELSH, and CROSSBREEDS.

300 SHEEP.—SHROPSHIRES, CLUNS, and CROSSBREEDS.

All cattle weighed before entering the sale ring, and every assistance given to buyers.

Commissions faithfully executed.

Full particulars from ALFRED MANSELL AND CO., Live Stock Auctioneers and Agents, Shrewsbury.

REGISTER OF BRITISH LIVE STOCK BREEDERS.

HORSES.

HACKNEYS.

MOORE, HENRY, Burn Butts, Cranswick, Hull. — Pedigree Stud of HACKNEYS, including many prize-winners; yearlings, two years, and others.—Can be seen on application to Henry Moore.

HACKNEYS. — JOHN N. ANTHONY, Sedgeford, near Lynn, Norfolk, breeder of Pedigree Hackneys. On hand, Colts and Fillies by most of the leading sires.

LLOYD, WALTER, Heaselands, Hayward's Heath, Sussex.—Small but select Stud of PEDIGREE HACKNEYS, Mares, Fillies, and Colts of best blood, including stock by Champion Ganymede, Agility, Winnal Fireaway, Model II., and other noted Stallions, at moderate prices. Appointments to view the stud (which is ½ miles from Hayward's Heath Station, L.B. and S.C. Railway), on application to the owner, as above.

CLEVELANDS

F. WILSON-HORSFALL, Potto Grange, Potto Station, Northallerton, Breeder of CLEVELAND BAY HORSES. Winner of more prizes than any man in England with Cleveland Bays for many years at the Royal, Great Yorkshire, and other important shows. Also first prize and gold medal at the Paris Exhibition, 1900. Thoroughbreds and Shorthorns are also bred on these farms. Mr. Wilson-Horsfall, Potto Grange, Northallerton, has sold to Mr. Mellish, Cape Town, South Africa, the well-known Cleveland Bay Stallion Broomgrove Pride 1364. This horse is considered to be one of the best of his breed, and combines the action of a hackney with the limbs and quality of a Cleveland, and has been used at stud at Potto Grange for the last two years.

SHIRES.

MUNTZ, P. ALBERT, M.P., Dunsmore, Rugby. — SHIRE-BRED STALLIONS, COLTS, MARES, and FILLIES. About a hundred of all ages. Prize-winners London and other leading shows. Also high-class Shropshire SHEEP, winners first prize at Royal Agricultural, 1886, second in 1887, and first in 1888.—Apply, THOMAS EWART, Dunsmore Farm, Rugby.

CONCHAR, JOHN, Wylde Green, Birmingham.—Breeder of SHIRES and HACKNEYS. Some gold Colts and Fillies for Sale. Five minutes from Station.

TAUNTON, H. PERCY, Redlynch, near Salisbury, Wiltshire. Shire-bred STALLIONS MARES, FILLIES, and GELDINGS of the most fashionable breeding always for sale at moderate prices. The animals are kept entirely out of doors and in natural condition.

PONIES.

THE LARGEST STUD of SELECTED WELSH PONIES IN WALES.—Dinarth Hall Pony Stud Farm, Colwyn Bay, North Wales. Over 120 Ponies now on hand, including forty Brood Mares of the pure Welsh type, and several high-class Ponies, great goers, with style and action. 150 prizes won in 1898 and 1899. Ponies purchased from this Stud have won first prizes at Manchester, Birmingham, and Maidstone Royal Shows; also first and medal Crystal Palace, 1899. Sale in 1899 included two Entire Ponies purchased by the Government for Cyprus, several to America and France. Stud Horse JULIUS CÆSAR II. 5666, sire of first prize two-year-old pony filly, the first of his produce exhibited, London Hackney Show, 1900.

MILLER, W. S., Forest Lodge, Brecon, S. Wales, extensive Breeder and Exporter of the best class of WELSH MOUNTAIN PONIES and COBS. References and particulars on application.

MONTEFIORE, Rev. D. B., Mursley, Winslow, Bucks.—Prize PONIES always FOR SALE. Arab Polo Pony Stallion "Mootrub" (32), winner of a championship, silver medals, and many prizes. Particulars on application.

CATTLE.

SHORTHORNS.

DALMENY PARK SHORTHORN HERD, the property of the Earl of Rosebery, K.G. Bulls and Heifers of the choicest breeding always for sale at moderate prices.—Apply, MANAGER Home Farm, Dalmeny Park, Edinburgh.

LANGFORD HOUSE ESTATE HERD of pure and highly-bred SHORTHORN CATTLE, the property of Mr. Sidney Hill, J.P. All bred from the best and leading herds in the Kingdom. Sires now in service: Wiltshire Victor, 71,883 (roan), by Count Victor, 66,877. Puck, 73,333 (roan), by Alto, 68,147. Count Valiant, 74,307 (roan), by Count Arthur, 70,194. PUBLICATIONS.

THE NEW ZEALAND FARMER. Bee and Poultry Journal. An illustrated monthly publication, containing practical and scientific information on Farming, Stock Breeding, Cattle, Horses, Sheep, Dairying, Fruit Growing, etc. The only paper entirely devoted to Farming matters and circulating throughout the Colony. Price 1s.; by post 1s. 2d. Proprietors, The Brett Printing and Publishing Co., Ltd., Auckland. London Manager, R. B. BRETT, 2 and 3, Imperial Buildings, Ludgate Circus, London, E.C.

THE JOURNAL OF THE BOARD OF AGRICULTURE. Issued by the authority of Her Majesty's Board of Agriculture, and printed and published by Laughton and Co., 1, Essex Street, Strand. Published each quarter day. Price 1s. Yearly subscription, 5s. (post free). This publication contains information as to the position of agriculture at home and abroad, Crop Prospects in Foreign Countries, and further particulars obtained from Foreign and Colonial Reports, Diplomatic and Consular Dispatches, and other sources of intelligence accessible to the Department; together with Notes on Dairying, Fruit Farming, Poultry Rearing, and other rural industries. Short descriptions of Noxious Insects and Fungi, with appropriate remedies; statements of the Quantities and Values of Agricultural Produce Imported and Exported; and records of the Current Prices of Grain, Meat, Dairy Products, Fruit and Vegetables are given in each number. The original and highly valuable information contained in each commands for the Journal an unique position and circulation throughout the World amongst those interested in Agriculture and its kindred branches. The Statistical matter being of much service for frequent reference renders the Journal in constant demand by Members of both Houses of Parliament, Landowners and others interested in the welfare and progress of Agriculture. LAUGHTON and CO., 1, Essex Street, Strand, London.

LONDON & NORTH WESTERN RAILWAY.

POULTRY AND PIGEON SHOW,
TO BE HELD AT
BINGLEY HALL, BIRMINGHAM,
DECEMBER 1ST, 3RD, 4TH, 5TH, AND 6TH, 1900.

NATIONAL DOG SHOW,
TO BE HELD AT THE
CURZON EXHIBITION HALL, BIRMINGHAM.
DECEMBER 3RD, 4TH, 5TH, AND 6TH, 1900.

For the convenience of Exhibitors at the above Shows, the London and North Western Railway Company have made arrangements for Through Vans for the conveyance of Poultry and Pigeons, to be run to Birmingham (New Street Station), on Friday, November 30th, and for the conveyance of Dogs on Saturday, December 1st, by the trains leaving—

Carlisle	at	8.30 a.m.
Liverpool (Lime Street)	,,	12. 0 noon.
Manchester (London Road)	,,	12. 0 ,,
Holyhead	,,	8. 0 a.m.
Shrewsbury	,,	2.40 p.m.
Northampton	,,	10.29 a.m.
London (Euston Station)	,,	8.45 ,, and 2.45 p.m.

These will be in addition to the Vans running regularly on the Through Trains to Birmingham.

Through Vans for the conveyance of Dogs to Birmingham on Sunday, December 2nd, will also be attached to the Trains leaving—

Liverpool (Lime Street)	at	4.30 p.m.
Manchester (London Road)	,,	4.25 ,,
London (Euston)	,,	4.45 ,,

Consignments from the Branch Lines, and from Nottingham, Peterboro', Oxford, Cambridge, etc., will be placed in these Vans at the various Junctions, thus ensuring direct transit to the Shows.

Arrangements will also be made for the return of the Traffic in Through Vans direct from Birmingham at the close of the Shows, and Exhibitors wishing to avail themselves of these facilities are requested to order their consignments "Per London and North-Western Railway."

The Company's representatives will be at the Shows to answer enquiries with regard to the arrangements for the return journey. All information can be obtained from MR. ROBERT TURNBULL, Superintendent of the Line, Euston Station, London; or from the Company's District Superintendent, MR. A. ENTWISTLE, New Street Station, Birmingham.

FRED. HARRISON, General Manager.
Euston Station, London, N.W.
October, 1900.

HALL'S SANITARY WASHABLE DISTEMPER

(PATENTED)

A NEW SANITARY WATER PAINT,

HAS GREAT ADVANTAGES,
SOME OF WHICH ARE AS FOLLOWS:—

It sets hard, Kills Vermin, and Disinfects.

It is washable in 3 weeks, does not scale, can be Painted or Varnished, and will Stand Inside or Outside.

It is made in Dark Rich Shades as well as in Light Tints, contains no Lead, and does not Turn Black.

It only requires the addition of Water to make it ready for use, so that anybody can apply it.

It is Cheaper, Cleaner, Healthier, and more Artistic than Wall Paper.

It makes an excellent Shading for Greenhouses, the inside quality lasting about 9 months, the outside quality several years

Sole Manufacturers of "Aperfectol Paints," the best Paints manufactured, and "Rustikol," for preserving woodwork.

SILCOCK'S CALF REARING. CALF MEAL

To rear Calves economically and profitably use SILCOCK'S SOLUBLE CALF MEAL. Thousands of Calves are reared on it annually; it is a true milk substitute, is very easily digested, dissolves at once in water, gives least trouble in preparing, does not scour, is very economical in use, as one pint makes one gallon of thick gruel, and it fits early for cake feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter-milk, and whey the figures stand at 12½, 9, and 6 per cent. respectively. With the minimum of cost and trouble SILCOCK'S CALF MEAL gives the maximum results. Use SILCOCK'S SOLUBLE CALF MEAL, feed regularly, in right quantity and at correct temperature and you will have little trouble in rearing paying calves.

Price, 12/6 *per cwt., carriage paid. 5 cwt. lots,* 12/-.

BIBBY'S

"CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the "Cream Equivalent" fed Calves as having been fed on New Milk.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

SOLE MANUFACTURERS:—
J. BIBBY & SONS,
Exchange Chambers, Liverpool.

HAVE YOU TRIED THE "VESTA" Milk Meal for CALVES?

Read what others say:

Mr. GEORGE BROWN, of Eastham, Cheshire, a noted Feeder and Rearer of Calves, says:—"Your Calf Meal is undoubtedly the best I have ever used. Having reared some hundreds I think I can speak with some authority."

Mr. THOS. LEDSON, of Bromboro', writes:—"Your Calf Meal is excellent. My Calves have always done well on it."

Mark Lane Express Agricultural Journal.

The Only English Journal devoted exclusively to Agriculture.

MONDAY, NOVEMBER 12, 1900.

Correspondents are requested to address all communications for the Editorial Department to THE EDITOR, "Mark Lane Express," 1, Essex Street, Strand, London, W.C.

Advertisements, Subscriptions, and business communications should be addressed to THE PUBLISHER, "MARK LANE EXPRESS," 1, Essex Street, Strand, London, W.C.

The receipts on account of revenue from the 1st of April, 1900, when there was a balance of £3,517,047, to the 3rd of November were £60,783,201, as against £59,533,025 in the corresponding period of the preceding financial year, which commenced with a balance of £8,919,173. The net expenditure was £107,142,700, as against £66,298,654 to the corresponding date of the previous year. The Treasury balances on November 3rd, 1900, amounted to £1,519,347, and at the corresponding date of 1899 to £2,824,264.

A PRACTICAL PAPER.

On the evening of Monday last, Mr. Eve, F.S.I., read a paper before a meeting of the Farmers' Club upon the Agricultural Holdings Act of this year, which comes into force on the first day of next year. The paper (which was printed nearly in entirety in our last issue) must be described as eminently practical throughout, for, while it avoided technical points and legal hair-splitting, it called attention to the more important changes which the new measure will effect, and also added a considerable amount of practical and valuable advice. The first point of importance to which the papers alluded was naturally the great difference between the new Act and the old one as to the notice of claim for compensation. Under the statute of 1883 the tenant could have no claim for his improvements unless he served upon his landlord a notice which must contain particulars at least two months before the expiration of the tenancy. This has often been a hardship as well as a difficulty, and has probably caused as much friction between landlord and tenant as any other provision of the Act. The new measure, however, requires a far more simple procedure, for it allows the tenant to make good his claim if he informs his landlord at any time before the determination of the tenancy that he intends to make a claim under the provisions of the Act. Under the first schedule of the new measure it is necessary that the tenant should obtain written consent from the landlord to the execution of certain improvements before their commencement. In the opinion of Mr. Eve the most important of these are the laying down of permanent pasture and the planting of orchards or fruit bushes. Among other comparatively minor matters to which attention was called we find the consumption of home-grown corn, the making of temporary pastures with clover, grass, lucerne, sainfoin, or other such seeds which have been sown for more than two years. The question of drainage was also referred to, and it was pointed out that notice must be given to the landlord at least two months before such improvements were commenced. After mentioning these matters, which Mr. Eve considered the most important, we must turn to the advice which that gentleman gave.

It is suggested that the first care of a tenant who wishes to make a claim should be to consider his agreement if there should be one. It is important to ascertain if such contains a covenant on the part of the landlord to pay for any of the improvements contained in the first schedule, as

that may have a very considerable effect upon the procedure which may become most suitable under the circumstances of the case, for now there are more methods than formerly. The next point is to see if the agreement contains an arbitration clause, and if so, whether it is general to all matters which may arise under the agreement, or whether it is of only limited application. If both these points can be answered fully in the affirmative, the arbitration will be under the agreement, and the Acts of 1883 and 1900 will have nothing to do with the matter. Mr. Eve seems to be strongly of the opinion that it will be to the advantage of both landlord and tenant that matters should be settled under the Arbitration Act of 1889 rather than under either of the special Acts referring to the matter. He goes so far as to contend that all agricultural agreements should contain a clause binding both parties to settle their differences by a reference under the Arbitration Act. The chief ground upon which this is based is that either the landlord or tenant has a right to insist upon the matter being referred to the decision of a single arbitrator, which Mr. Eve considers will bring disappointing results. In this we do not quite follow the arguments stated. It is suggested that, although the Legislature designed this with a view to saving expense, still it will cause the tenant farmer to have much more trouble in formulating the various heads of his claim and in conducting his own case. Consequently he will naturally still ask his own valuer to prepare the particulars, and also conduct his case as before, and that the landlord will act in a similar way. We fail to see the logic of this, for the new procedure seems likely to be simple and effective in smaller cases, and does not appear to be likely to be more expensive in more complicated cases. Our experience has invariably been that arbitrators become advocates, and that they are so regarded by the umpire who has to decide between them. If that is so, had they not better be such in name as well as in fact? Mr. Eve had some important and well-merited criticisms upon the appeal clauses, but we have not space to deal with them at present. If Mr. Eve could see his way to turn his paper into a pamphlet, a very few additions ought to make it valuable to all parties.

THE PRESIDENCY OF THE BOARD OF AGRICULTURE.

Up to the time of going to press no announcement has been officially made of the appointment of a successor to the Right Hon. Walter Long as President of the Board of Agriculture. The *Standard* says it "understands" that it has been offered to Mr. R. W. Hanbury, lately Financial Secretary to the Treasury. More generally. it is thought that Lord Londonderry will go from the Post Office to the Board of Agriculture.

SAMPLES.

By a Man of Mark Lane.

Mr. Loudon M. Douglas, A.I.M.E., author of the "Recipe Book for Bacon-Curers" and the "Manual of the Pork Trade," etc., etc., has agreed to give a lecture on bacon-curing before the Bedfordshire Chamber of Agriculture and Farmers' Club, on Saturday, December 8th, at 4 p.m. A number of lantern illustrations, which have been collected by the lecturer from various places in Europe, will be for the first time exhibited on this occasion. It is also expected that a number of bacon curing friends will contribute specimens of their finest produce. As a number of the lecturer's friends have inquired as to how they can obtain admission to the lecture, they might kindly note that all applications for admission should be addressed to Mr. H. Tristram Eve, 2, St. Paul's Square, Bedford.

It has been intimated to me that the quarterly meeting of the Yorkshire Union of Agricultural Clubs and Chambers of Agriculture will be held at the Agricultural Club House, Pavement, York, on Thursday next, the 15th inst., at 2.30 p.m. An address on "Agricultural Co-operation" will be given by Mr. W. Domville Rowland, of the British Agricultural Organisation Society, to be followed by a discussion thereon.

In the current number of the *Windsor Magazine* there is an interesting article on "The World's Wheat Supply," written by Mr. R. S. Baker, who remarks that "Great Britain eats her entire wheat crop in about thirteen weeks, and then she must be supplied immediately with the products of Minnesota, or Central Russia, or India, or else she must suffer. If the United Kingdom could be completely blockaded, say, by the ships of allied Europe, her population would probably be totally extinguished by starvation within three months." The machinery of production and distribution is instructively explained.

Should the season's promise be fulfilled, the coming Australian wheat harvest will (says the *Melbourne Argus*) be the largest ever recorded. The aggregate production of the extended wheat areas of South Australia, New South Wales, and Victoria of the fast approaching harvest is bound to furnish a large surplus and to supply a great deal of employment to ships to carry it to over-sea destinations.

Confirmatory news has been received this week that the Argentine wheat crop has been seriously damaged, and estimates place the crop as not likely to be more than two-thirds that of last year, viz., about 8,000,000 quarters, against 12,000,000 quarters last season. Whether or not the damage is so extensive as calculated has yet to be seen, but it is evident that Argentina in the coming season will secure a much smaller crop than last season. The damage to wheat is specially to be regretted, as the country during the past few months has suffered severely from the extensive floods which have greatly injured property, the flocks, and last season's maize crop. On the other hand, it is said that the linseed crop will be exceptionally large, and if so it will to some extent make up for the damage done to wheat. Of the growing maize it is too early yet to form an opinion, as it is not sufficiently forward to suffer irretrievably, and therefore damage might be done, and yet the crop eventually turn out large.

I have had within the last few days some talk with a man of distinction in Canadian life. Our conversation referred finally to the influence of the British agriculturist in the redempton of the Yukon and Klondyke district. Heaven forfend that I should be any influence in inducing young and stalwart farmers to leave their home-land. However, the fact must be stated that British rural strength and self-reliance is achieving much out there. To their growing invasion of the district he attributes in part its growing popularity. Here is an evidence of its development, which this Canadian, however, rather immediately attributed to the result of the United States and Canadian elections. On Friday a well-known firm of London solicitors made an offer to purchase a hundred thousand pounds' worth of stock in the White Pass and Yukon Railway—the great means of communication with the Klondyke—at par. The offer was peremptorily refused through Messrs. Dollman and Pritchard, the agents. I am not, I repeat, advancing an argument to induce young British farmers to renounce the family homestead. I simply state the fact.

I have received from the Statistical Department of the Government of India two leaflets, being the first general memorandums on the rice crop of the season 1900 in Bengal, Madras, and Lower Burma, and of the indigo crop for the present season. The area sown with rice was smaller than the average in Bengal, but somewhat larger in Madras, and in Burma it was about 16 per cent. in excess of the average. In Bengal, on the whole, the rainfall of the season was not quite adequate, nor was it well distributed. But the autumn crop was not materially affected. The area sown, 7,646,500 acres, is but slightly smaller than the average, the reduction being ascribed to the sowing of some rice land with jute under the encouragement of higher prices for jute. The area sown with winter rice is estimated at 28,883,300 acres, against 31,344,700 acres in 1899, the decrease being due to the scanty and badly distributed rainfall in the early part of the season, and also to the break in the rains at the time of transplantation in August. The floods following the abnormally heavy rain in the region round Calcutta in September has also injured the prospects of the winter rice crop there. On the whole, the season has not been altogether favourable for this crop.

According to the estimates made by the district officers, the yield of winter rice for the province, as a whole, will amount to 87 per cent. of a normal crop, compared with 90 per cent. finally estimated last year. The director estimates the yield at 88 per cent. of the normal, because, though the recent heavy rains have been beneficial to this crop in most parts of the province, the abnormal fall in the Burdwan and Presidency divisions will no doubt cause partial injury to it there, and the weather in August was unseasonable. An estimate of 88 per cent. corresponds to what was formerly known as a fourteen-anna crop.

In Burma the estimated area in the fourteen principal rice-growing districts is 6,221,184 acres, a small increase on the 6,050,648 acres cultivated last year. Floods were caused by heavy rain in some parts, but the small rise of the Irrawaddy allowed of the cultivation of lands flooded last year. Prospects are promising, and an average crop is expected. In Madras the season was generally favourable, and the area sown is well in excess of the average. The crop is reported to be everywhere in good condition, and from that portion which has been, or is being, harvested a normal yield has been obtained. Altogether the prospects are very promising.

The yield of the indigo crop in all the provinces is reported to be or to have been much better than last year, which was a bad one for those engaged in the production of the dye. The discouragement of the low prices for Bengal indigo which were current last year, even though the marketable quantity was comparatively small, seems to have affected the area sown in Lower Bengal and even in Bihar; but in the other indigo-producing provinces the area sown is larger than last year, though materially smaller than the average.

In Bengal the season was, on the whole, unfavourable, the rain in April and May being scanty and insufficient for the sowing, germination, and early growth of the crop, while the heavy rain that followed seriously affected prospects. The light fall in August was, however, favourable to the *khunti* crop in North Bihar. The area sown last year was estimated at 441,600 acres; this year it is estimated at 355,800 acres only. It is probable that this estimate is excessive, the provincial authorities being of opinion that some officers in Eastern Bengal have not fully appreciated how greatly the area has been reduced in their districts. Prices have fallen heavily, as a result of the competition of artificial indigo, and it is stated that the fall has so severely affected the industry in Eastern Bengal that many factories there have recently been closed, while even in North Bihar the operations on many estates have been materially contracted.

When the first forecast was issued on the 12th July last the prospects of the crop were good. The character of the monsoon, however, had not then declared itself. During July and the first half of August the rainfall was generally deficient, and to some extent growth was retarded. Later falls were beneficial, and a good yield was expected, but heavy rain in the Doab towards the end of the season is reported to have reduced the produce. The condition of the crop is now estimated at from 62 to 87 per cent. of a normal crop. The estimated yield, which amounts to 47,293 factory maunds, is 75 per cent. better than that of last year, but it is 12 per cent. smaller than the quinquennial and 7 per cent. smaller than the decennial average. The yield in the Doab is 39,142 maunds, and in Benares 8,151 maunds.

In the Panjab the area sown in the reporting districts is estimated at 103,000 acres, being about 6 per cent. in excess of the area finally estimated last year. The increase is ascribed to the fact that the canals worked well in Multan and Muzaffargarh. The crop in the ground promises well, and an average yield on the whole is expected. In Madras the area reported to have been sown, 157,000 acres, is slightly greater than last year, but it is only about two-thirds of the average of previous years. In some places the rainfall of July stimulated, while in other places it was unfavourable for sowing; but the principal causes restricting the area are stated to be the high prices of food-grains and the fall in the

price of the dye. With useful rain the prospects of the crop were favourable at the date of report.

Three leaflets have also come to hand from the North-Western Provinces and Oudh Department of Land Records and Agriculture, and they are the second forecasts of the cotton, til, and sugar cane crops of 1900. As regards the cotton crop it is stated that during the first three weeks of August rainfall was generally scanty, but in the last week of the month excellent rain was received all over the provinces, and the prospects of the crop were considerably improved. At the beginning of September rainfall in the most western districts was heavy, and interfered considerably with weeding operations, which are elsewhere reported to have been properly carried out. Some damage has also occurred in the Gorakhpur and Benares divisions from the excessive rain and high east winds which marked the close of the monsoon. Otherwise the cotton crop is flourishing; pods have begun to appear in the case of early-sown cotton, and they are reported in good condition. Clear weather is now wanted to secure a normal crop. The condition at the end of September was as follows (100 representing a normal crop):—Meerut, Benares, and Gorakhpur, 75; Agra and Fyzabad, 80; Rohilkhand, Allahabad, and Lucknow, 90.

During September, as in the month of August, rainfall was slightly above the normal, and well distributed in Bundelkhand districts, where ordinarily four-fifths of the total area under til is grown. In most of the remaining districts the distribution of rain was uneven, the falls being generally scanty in August, whereby the growth of the crop was in places retarded, and heavy in September. High east winds, which accompanied the rain in the last week of September, are reported to have injured the flowers in parts of Bundelkhand and elsewhere. The crop is, nevertheless, generally reported to be promising, and if nothing unforeseen occurs a full normal yield may be expected. Owing to good rain in Bundelkhand at sowing time, and the excellent produce of the previous year's crop, the total area under til is estimated at 6 per cent. more than the normal area. Taking 100 to denote a normal crop, the average condition of the crop in the first week of October was as under:—Meerut, Agra, Rohilkhand, and Gorakhpur, 80; Allahabad, Benares, and Lucknow, 95; Fyzabad, 75.

In the first forecast on the sugar-cane crop, issued about the middle of August, it was remarked that the monsoon rains had till then been unusually capricious. During the last week of that month, as also in September, excellent rain was, however, received throughout the provinces, the rainfall of the latter month having exceeded the normal in all plains districts except Bijnor and Rai Bareli, where the defect from the normal was not great. The downpours, which visited the eastern portion of the provinces in the fourth week of September, were unusually heavy, and were accompanied by high east winds, which in a few places are reported to have laid the sugar-cane crop; in low-lands floods also caused some damage. Speaking generally, the rain greatly benefited the crop, which is reported to be healthy, and promises a full normal outturn. In only two districts—Bijnor and Shahjehanpur—is the crop estimated at 75 per cent. of the normal. In those districts the estimate is almost certainly too low. In Fatehpur, Jaunpur, and Rai Bareli the outturn is given at 81 per cent. Eight districts report a normal yield, while in the remaining districts of the province the crop is estimated at 87 or 94 per cent. of the normal.

Mr. Leonard Allen has started in business as a corn factor at 36, Mark Lane, E.C.

Mr. Macmaster, of the old Corn Exchange, has taken Mr. A. T. Frankish into partnership. The address of the firm, "Macmaster and Frankish," will be 15, Seething Lane, E.C.

The Cereals Club held on the 6th inst. a very successful gathering at the Trocadero, Mr. A. W. Brandon in the chair.

I am glad to note the revival of the London Corn Market Chrysanthemum Show, which used to be, and is now once again, a pleasant feature of November in Mark Lane.

Mr. Titley, C.I.V., has returned to business at Mark Lane. Mr. R. S. Craig, another Mark Lane man, recently "at the front," is on his way home. A third representative of the corn trade has obtained a commission, and leaves the City for permanent Army service. Mr. Bernard Moeller will be missed at Mark Lane, but his patriotism will be honoured.

AGRICULTURAL POLITICS.

By a Lobbyist.

I am compelled by the exigencies of the printing-office to pen my reflections before the formal announcement has been given to the world as to who will succeed to the Board of Agriculture—a post, by the way, to which Mr. Long could have returned had he desired. My nominee is Lord Londonderry. The quidnuncs have been casting affectionate eyes on Mr. Hanbury for the position; but the genesis of this lies in the fact that Mr. Hanbury is known to be in the running for Cabinet rank. That Mr. Hanbury is an able man is undeniable—he was, indeed, one of the ablest men in the last Ministry, a politician who in mental grasp, stability of thought, and Parliamentary appreciation had few rivals.

But he is essentially an urban politician; he is the great commercial man brought to politics; he is of the town towny; he has no more sympathy with the necessities of agriculture than would have any one of the great merchant princes selected in an *ad captandum* fashion from the millionaire-dom of Manchester. That he might accommodate himself to the new position is, no doubt, true; that he would soon possess the necessary knowledge is certain; that he would also lend the position Parliamentary distinction is also assured. But we do not want as Minister of Agriculture a man to whom we have to teach the ethics and necessities of agriculture.

Lord Londonderry, on the other hand, is an agriculturist, and, what is more, an agriculturist who knows by personal experience the economic difficulties which have beset the farmers with such growing significance in recent years. True, he is an agriculturist of the greater-landlord rather than of the tenant-farming class; but the day has not come yet for inviting a tenant-farmer to conduct the agricultural department of the State.

Moreover, he is possessed by few prejudices, and has a decidedly independent mind. He would not be led by the nose along the path of convention just because it would be safe to travel it. Then, he has the reforming instinct—not the instinct that impels to eternal destruction, but the instinct which only destroys when it has something better to rear in its place and prefers to improve rather than destroy. The wisdom of his reforming zeal has already been revealed, notwithstanding his brief tenure of the position, at the Post Office. Lord Londonderry would be an exceedingly good appointment. We should have at least a practical man, with exceptional personal qualifications, and with sufficient strength of mind not to allow of the interest being made the victim of Cabinet neglect.

The appointment of Mr. Walter Long to the Local Government Board has given satisfaction to all the sane men in politics. Of course, the hate-possessed Radical, who will see no good in any act of Lord Salisbury's appointments, denounces it as he has denounced every other promotion; but with the fulminations of these storm-tossed politicians we may contrast the chivalrous confession of the *Daily News* that Mr. Long has revealed excellent qualities as an administrator, and that he has placed the country under a debt of undeniable gratitude in stamping out hydrophobia. He has a cool method, a lucidity of expression, a clear unaffectedness of expression which will stand him in excellent stead when he comes to deal with the great problem still confronting the Local Government Board, the housing of the working classes.

This is a problem which, when it receives definite legislative attention, will be largely a matter for the Grand Committee. Mr. Long has shown his capacity of steering a Bill through the narrow passage guarded with such pertinacity by the Charybdis of party vexation and the Scylla of garrulous self-conceit. When the Agricultural Holdings Act Amendment Bill passed through that Committee the members unanimously thanked him—even that turgid Boanerges, Mr. Henry Broadhurst, joining in the hymn of praise—for the courteous ability he had revealed as governor and chairman. Mr. Long is admirably equipped for his present post, both by nature and experience.

Mr. Long was trained in an excellent local government school. In the old quarter sessions days Wiltshire had magistrates who brought to the question of local government wide knowledge, a keen acumen, and admirable debating capacity. I doubt whether in the later seventies any county governing body revealed the same administrative ability of the Wiltshire quarter sessions. The names of men, not merely of local but of national moment, will be recalled among those who took part in the county business. There was the late Marquis of Bath; there was that remarkably gifted man, Sir Charles Hobhouse; there was Lord Edmond Fitzmaurice, who has the science of county government at his fingers' end; there was the present Lord Lansdowne; there was Mr. Sotheron Escourt; there was Mr. H. J. Swayne, a man who might have attained almost to any position on the bench had he stuck to law; and there was Lord Charles Bruce.

Mr. Walter Long was then a young man, but he exhibited so excellent an intuition and so natural an aptitude for the work that it was not long ere he took his place among these men possessed of almost an equal authority. This means much—it means, above all, that he must have given an arduous study to a question dull rather than fascinating, forbidding rather than attractive. Mr. Long can look back to his work in those quarter-sessional days with satisfaction. That work is the justification for his appointment now. There have been square men placed in round holes in the fashioning of this Ministry. Mr. Long has been placed in his right place.

Apparently Mr. Chaplin is to throw off the dignity of Cabinet rank. There seems, indeed, to be little doubt of it. Well, if this renunciation of Front Bench distinction be not at the right honourable gentleman's own request, the incident provides us with an evidence of party ungenerosity which leaves a taste as of the bitterness of Dead Sea fruit in the mouth. The puny whipsters of Radicalism have thought it generous and seeming to fly their barbed shafts of bitter wit at Mr. Chaplin's oratorical method. One of these men described it in the last Parliament as "full of sound and fury and signifying nothing." This only means that Mr. Chaplin belongs to the old rhetorical school of which Sir William Harcourt is the most distinguished member—the stately galleon school, rather than the spitting and snarling torpedo-boat school.

Let official Conservatism say what it will, Mr. Chaplin has placed the party under a debt of gratitude which cannot be renounced. He is one of the personal forces who have made the British farmers a sure and certain electoral appanage of the Tory party. As an administrator he has had few opportunities. The more lurid issues which have flashed across the political horizon have distracted popular attention from the legislative ambitions which may have possessed him. At all events, he has always been safe and reliant, and has never sought, at the dictates of a sordid ambition, to attract attention to himself—indulged in mere fantastic efforts of Quixotry. His withdrawal from Front Bench distinction will mean the ascendency of the new school. "The old world changeth, giving place to new." And the new is not generous. Only bustling, meddling, ambitious.

The Local Government Board is more or less a rural department—of course, not absolutely so. The displacement of Mr. T. W. Russell from the position of Secretary will, however, be no great loss to the English rural districts. Mr. Russell is an able man, but he never secured a really practical grasp of the problem of English local administration. His thoughts were of Ireland, and his ambitions centred in Ulster. His succession by a man like Mr. Grant Lawson, the Member for the Thirsk division, would be a gain.

Mr. Lawson has been known as one of the most intelligent of the agricultural members of the House of Commons. When he has risen the House has had the premonition that it was going to hear his case clearly and eagerly put, and the House has seldom been disappointed. He

is, in a word, one of the most practical-minded men on the Conservative benches, and his sympathy with agriculture is unquestioned. Turn to the debates on the Agricultural Holdings Act, and you will find a score of evidences of this. Should he succeed to the position Mr. T. W. Russell vacates, the agricultural element in the Ministry will be seriously strengthened.

The Right Hon. Walter Long.

Annexed are a few passing comments on the appointment of the Right Hon. Walter Long to the Presidency of the Local Government Board:—

These appointments [including Mr. Long's] will be received, on the whole, with approval. Mr. Long has shown not only business capacity, but the not too common strength of will to do what he conscientiously believed to be right during his tenure of office as Minister of Agriculture. It required some courage to disregard the unpopularity incurred by the muzzling order, but Mr. Long, when convinced that he was acting in the public interest, did not allow himself to be influenced by outside opinion. As President of the Local Government Board he will have a wide opening for the display of his proved good sense and powers of management.—*Standard.*

It is not difficult to be, as Mr. Long has hitherto been, a President of the Board of Agriculture. But this, at least, may be said of Mr. Long, that in the face of much unmerited abuse he expelled the terrible disease of hydrophobia from the country.—*Daily News.*

Mr. Walter Long, the new President of the Local Government Board, is one of the young men in Lord Salisbury's third administration, since his age is only forty-six. He is a progressive Conservative, who has done good service as President of the Board of Agriculture. In this office his name was closely associated with the well-known muzzling measures, which did not bring him popularity, but which did public good by stamping out hydrophobia. Another of his measures was the Act prohibiting the landing of store cattle in England. He is a man of fine figure and pleasing presence, an ardent sportsman, and greatly liked in the West Country from which he comes.—*Daily News.*

Mr. Henry Chaplin has resigned the control of the Local Government Board, and will be succeeded by Mr. Walter Long, who, during the late Parliament, was a most efficient Minister for Agriculture. Next to Mr. H. Chaplin, Mr. Walter Long is more entitled than any other member to pose as the "farmers' friend." His father sat for North Wilts for three years, and his grandfather for thirty. Describing, in the "Life of Lord George Bentinck," the memorable division which overthrew Sir Robert Peel, Mr. Disraeli speaks of "the pleasing presence of Walter Long," and it can be asserted, without risk of denial, that the "pleasing presence" of the grandfather has descended to the grandson. Though his father hailed from Wales, Mr. Long himself was born at Bath early in the fifties. Both at Harrow and Oxford he was fortunate enough to be included in the cricket elevens, and distinguished himself as a hard hitter. He is a good sportsman, riding straight to hounds, and invariably going well to the front in the House of Commons Point-to-Point Steeplechases. It was only in 1880 that he entered Parliament, as member for North Wilts. At the General Election of 1885 he was returned for the Devizes Division of the county, and became Secretary to the Local Government Board under Mr. Ritchie. In 1892 he was rejected by Wiltshire, but obtained refuge in the West Derby Division of Liverpool, and on the accession of the Unionists in 1895 he was chosen Minister for Agriculture, with a seat in the Cabinet. In that capacity he incurred the displeasure of dog-owners by the muzzling order. As one of the elect for Liverpool he aroused the wrath of Evangelist Churchmen by his attitude towards Ritualism, and on that account retreated to South Bristol. He commands the Wilts Yeomanry, which, as the premier regiment in that branch of the military service, has been selected to form part of the guard for the Duke of York, on the occasion of his visit to Australia. Mr. Long is married to one of the daughters of the Earl of Cork, and his eldest son was recently wounded whilst serving in South Africa with the Scots Greys.—*Daily Telegraph.*

Mr. Chaplin retires from the Presidency of the Local Government Board with an excellent record of useful work accomplished, and is succeeded in that post by Mr. Walter Long. The duties attached to it were shown by the long struggle with the anti-vaccinationists to be very arduous, but the Minister who, as head of the Board of Agriculture, showed so much strength of purpose in connection with the question of dog-muzzling may be trusted to prove himself fully equal to his new responsibilities.—*Manchester Courier.*

Mr. Walter Long does not get an increase of salary by his change of office, but it is virtual promotion, for his responsibilities will be greater, and if there should be any legislation affecting Old Age Pensions or Poor Law Reform his office will be one of the most important. We believe he will bring to his position firmness of mind and freshness of ideas, and that he will be a successful administrator.—*Western Daily Press.*

THE DAIRY.

The Carriage of Milk by Rail.

At Wednesday's meeting of the Royal Agricultural Society, it was stated that the Veterinary Committee had had under their consideration a suggestion made by Mr. L. H. Becher Shand at the last Anniversary General Meeting, which he had subsequently expanded in a letter, with reference to the possibility of milk becoming infected with the germs of tuberculosis during its transit by railway. Mr. Shand had asked whether "germs might not be carried into the milk churns through their ventilators, and that in many cases the germs found on arrival were not in the milk when it left the farm," and had suggested that the Society should undertake an investigation as to whether "milk which was pure when it left the farm did not get contaminated while in transit by rail." The reply which had been agreed to by the Committee, after consultation with the Society's veterinary advisers, was as follows:—

It is obvious that milk (even absolutely pure milk, and milk which has been effectually sterilised) is quite capable of being contaminated with tubercle bacilli or other infective organisms, unless means are adopted to keep it from contact with infective matter which may be conveyed to it at any time by the atmosphere and in other ways. The Society is fully alive to the dangers to the public health which may arise from the prevalent habit of expectoration by possibly consumptive persons on railway platforms, highways, and other public places, and has co-operated with other public bodies in endeavouring to arouse public attention to this matter. The possibility must not, however, be excluded, that sufficient care is not always taken on the farms where milk is produced to secure the most scrupulous cleanliness in the vessels containing the milk and in the returned empty milk churns, as well as in all the surroundings of the milk on the farm, and of the cows themselves.

The Committee are advised that the holes in the cone in the centre of the lid of a milk churn are essential to allow the escape of steam, vapour, or gases of any kind which may be disengaged from the milk during transit; but in the opinion of the Society's scientific advisers, these holes are scarcely worth consideration as a means of the possible contamination of the milk through the agency of the air.

A more likely source of contamination is to be found in the too common practice of sending milk by railway in churns with loose lids. Milk which may be splashed out round the lids during a journey, or whilst the churns are being moved about railway platforms, may wash away the dust and other impurities which accumulate on the surface of the lid, and may carry them back into the bulk of the milk in the churn; and, in this way, it is quite possible that tubercle bacilli might gain access to the milk in the churn through the medium of the dried expectorations of consumptive persons in railway stations, streets, or other public places.

This danger, however, may be guarded against by sending milk by railway in locked or sealed churns, the lids of which are tight. There appears to be still considerable misapprehension amongst farmers as to the willingness of railway companies to accept for transit over their lines milk churns thus locked or sealed, although it is a regular practice by farmers serving some of the leading milk-distributing companies in the Metropolis. The railway companies have undoubtedly favoured the system of sending churns with loose lids, on the ground that examination of the contents by the railway officials was thus facilitated; but the Dairy Committee of this Society, having had their attention drawn to the matter, passed on January 31st, 1899, a Resolution "That the present custom of sending milk in unsealed churns is unsatisfactory, inasmuch as it exposes the farmer to the risk of having his milk tampered with during transit."

Communications were opened with the railway companies, and an assurance was received that at a meeting held at the Railway Clearing House on May 10th, 1899, all the companies had agreed that they would not refuse to accept milk churns "sealed," provided the conditions under which the companies accept such cans were adhered to. These conditions are thus defined in a letter addressed on October 12th, 1899, by the Railway Companies' Association to the Assistant Secretary of the Railway Department of the Board of Trade:—

"Senders have for a long time been allowed to send milk in sealed cans; the companies accept the declaration of the senders as to the quantity conveyed, no extra charge being made; the only condition the companies require to be fulfilled is that the tare weight of the cans shall be stamped upon the outside of the can, so that in case of doubt the quantity of milk within the churn can be approximately ascertained by allowing 10½lb. for each gallon of milk declared. It does not appear to the companies that there is any difficulty in the senders protecting themselves against alleged loss of milk in transit by sealing, padlocking, or otherwise fastening their cans."

With regard to the investigation suggested by Mr. Shand as to whether "milk which was pure when it left the farm did not get contaminated while in transit by rail" (i.e., presumably that milk which has been ascertained before it leaves the farm to be perfectly free from the bacilli of tuberculosis, should be tested for bacilli on its arrival at a railway station in a milk churn, and again on its arrival at its place of destination) the Committee invite attention to the following paragraph in the leaflet on "Tuberculosis in Dairy Stock," issued by the Society in March, 1899:—

"In a small proportion of cases tubercle bacilli may be detected in milk by microscopic examination, and such milk is always highly dangerous. It ought to be clearly understood, however, that failure to detect the bacilli by microscopic examination of milk is not reliable evidence that such milk is free from the germs of tuberculosis."

There are no means, short of inoculation or feeding animals, of deciding that milk is absolutely free from tubercle bacilli, and, as above stated, the failure to detect the organisms by the aid of a microscope does not prove that they are not present.

Whilst, therefore, fully alive to the importance of tuberculosis in its relations to dairy stock (a matter on which their veterinary advisers have for some time been engaged in experiments and inquiries), the Committee cannot, for the reasons above stated, see their way to undertake the particular investigation suggested to them.

Eastern Counties Dairy Institute.

Annual Examination.

At a meeting of the committee of the Institute on Wednesday, at which the Marquis of Bristol presided, reports were received from the examiners. Mr. John Benson, of Buxton, the well-known dairy expert, who examined the students on the 17th and 18th of October in both the theory and practice of butter and cheese making, reported that, on the whole, he considered this examination to have been very satisfactory; the practical work was well performed all round. In practical butter-making, the work of all the candidates, except one, was particularly well done, and he had seldom had the pleasure of examining a smarter class of butter-makers. He recommended that an additional prize should be awarded in this section. In cheese-making also the candidates did very well. Respecting the written answers to the papers given, the candidates entering for both butter and cheese making certificates, on the whole, answered well and intelligently, though the same cannot be said of those entering for butter-making certificates only. A valuable and pleasing feature of this examination was the competition for the best kept notebook. These books were beautifully kept and accurate, and will be of great value as works of reference to the students in after life. He recommended the award of a fourth prize in this class. In conclusion, he expresed himself as being very well satisfied with the work of the various candidates. They had evidently been very well and carefully taught, and reflected credit on those concerned in the management of the school. He recommended that certificates for proficiency in the theory and practice of butter and cheese making should be awarded to the following in order of merit:

Miss Mabel E. Smith, Gippeswyk Hall, Ipswich.
Miss Emma Moore, Pearsenhall
Mr. J. E. Wilkinson, Harpisburgh.
Miss Margaret Cobbald, Eldo House, Rougham.
Miss Amy Moss, March.
Miss Mary C. Foreman, Thorney.
Mr. Joseph E. Smith, Gippeswyk Hall, Ipswich.

And for the practice of butter and cheese-making only—

Mrs. Matilda Stiff, Wetherden

For the theory and practice of butter-making—

Miss Hildred Hepher, Haddenham.

The following only passed in the practice of butter-making:—

Miss Mary Moss, March.
Mr. C. S. Eaton Evans, Ipswich.
Miss Mildred Lee, Wilpde.
Miss Ellen Ambrose, Cavendish.

The committee adopted Mr. Benson's report, considering it very satisfactory. Prizes were kindly offered by Sir Charles Dalrymple, M.P., Captain E. G. Pretyman, M.P., Mr. C. H. Berners, and several residents in Ipswich, and a free studentship was offered by the committee. The latter was awarded to Miss Mabel E. Smith, of Gippeswyk Hall, who obtained in the whole examination 310 marks out of a possible 380. The second prize was awarded to Miss Emma Moore, third to Mr. J. E. Wilkinson, and fourth to Miss Margaret Cobbald. Four prizes for students obtaining highest marks in butter-making were awarded to Miss Cobbald, Miss Smith, Miss Moss, and Miss Moore. Four prizes for best kept notebooks were awarded to Miss Foreman, Miss Emma Moore, Mr. J. E. Smith, and Miss Hepher, the Misses Mann, of Pearsenhall being commended. In the milking competition, Mr. J. E. Smith obtained first prize and Mrs. Stiff second.

Mr. Edward Brown, F.L.S., reported very favourably on the examination of the poultry students, and in accordance with his recommendation it was decided to award certificates to—

Miss Violet Browse, Stokeby-Clare
Miss Margaret Cobbald, Eldo House, Rougham
Miss Emma Clarke, Kenninghall
Miss Amy Moss, March.
Miss Hilda Pilgrim, Kenninghall.
Miss Edith Goldsbrid, Bressenham

who passed in both theory and practice.

Miss Mary Smith, Miss Alice Pepsby, Miss Ada Finch, and Miss Lily French passed in practical work only, and Miss Ada Segars in theory only.

BARLEY AND MALT.

By Hordeum.

Seed Corn.

The relation of seed used to its progeny is getting better understood because of the facts. Perhaps also a big factor is the increasing knowledge of the facts. Our young men are learning how to rightly understand cause and effect.

If one thing has been established more solidly than another in any careful study of how to grow the best of anything it ought to be that the first and most necessary step is to sow (or use) the best available stock.

Varieties of barley are confused, far too little understood, and frightfully intermixed, so far as men's ability to mix and confuse them is concerned. But Nature, after all, pays slight regard to men's doings. The progeny of mules rarely pay to cultivate. True stocks are needed to beget proper offspring, and the one thing above every other of the many useful lessons taught by the Brewers' Exhibition is the need to use good seed.

Good Seed

must be used to secure a good sample, yet strangely enough at first sight it is curious that the best possible seed does not always secure progeny equal to itself.

A splendid illustration was given this year in the many samples shown grown from last year's champion stock. Other samples, too, were there, the direct progeny of other champions and large prize-winners of former years. Unfortunately, the number was too small to attach much importance to the result. Still, it is significant that out of four samples there were two prize-takers, and the other two stood out prominently as exceedingly fine samples.

In looking through the list only fine stocks came anywhere near to this performance, although serious attention must be given to any variety of which a large number is represented, and the return is a high one. When 9 out of 17 or 7 from 13 stand against 3 in 5 or 2 in 4 there is not much to be said one way or the other, except that

Further Evidence is Necessary.

Thus far the lion's share of the credit for our advance in barley-growing is due to our seedsmen. But for them and their enlightened action the position of barley in Britain to-day would be very different from what we conceive it to be, and what it really is. Unhappily very few people realise what our barley industry truly means. We have not reached the stage when we can be indifferent to the amount of food we grow within our own borders. Beyond this there are benefits derivable from arable tillage over pasture or afforesting which seem sufficiently obvious to be understood by the meanest intelligence without further definition. "God speed the plough!" carries with it not merely the aspiration but the facts:—A well-manned Navy and an invincible Army. Our best soldiers and sailors are bred and raised on our farms. Citizen soldiers are good, but when it comes to real work the big supply of the best men comes from the land. The influence of barley on this supply is not so far-fetched as might appear to be the case to the unthinking. Had barley grown to be

Utterly Unprofitable

a much greater shrinkage of land under arable cultivation would have undoubtedly taken place. What this means is sufficiently shown by the condition of some parts of Essex.

Improvement in barley means (or should do) some benefit to the farmer, and in the near future we may hope to see more steady and rapid improvement than we yet know. The experiments carried out next year with the best seed corn sent this session to the Brewers' Show, through the kind and enlightened action of the Board of Agriculture, should be productive of much good.

As it stands, the following list of the varieties of seed entered, and the results secured, is a permanent testimony to the good done to this national industry prior to more directly official sanction being given.

Table V.

SEED SOWN.

Name.	No. of samples shown.	No. of prize winners.*	Percentage of prize winners.
Webb's Kinver Chevalier	50	21	42.0
Carter's Prolific & Goldthorpe	17	9	53.0
Chevalier	13	7	54.0
Webb's New Burton	10	2	20.0
Halletts	8	3	37.5
Jarman's Golden Chevalier	7	2	28.5

Gent's Premier	1	—	—
Vosper's Perfection	1	—	—
Scotch	1	—	—
	151	60	39·7

* The number of prize winners to prizes gained is as 60 to 125.

By Lupulin.

Home Notes.

The Borough.

A mishap prevented the publication of my notes last week, therefore my present report covers a fortnight, during which period a steady trade has been passing, although the extreme activity immediately preceding has hardly been maintained. Some important lots have been sold, but the general business is quieter, and any pressure on the part of sellers would probably be met by lower offers from the merchants. Fortunately, there does not appear any disposition to force sales, therefore the market still manifests a condition of healthy strength that should encourage growers to be solid in their protective position, which has generally marked their action during the present season. The bulk of the crop has by this time doubtless been transferred into the hands of merchants or consumers, though hitherto the operations of the latter have been somewhat limited, as they appear to be unwilling to yield to the force of the special circumstances created by the general shortage of this year's growth. There are, however, signs that they are beginning to appreciate the folly of further resistance, and movements are evident, and may soon be developed, which will produce important changes in current values, and will enable holders to secure much better prices than are now current.

The Course of Trade

during this season seems to suggest considerations which may affect the future of our industry in some degree. I think I can discern more clearly than before a tendency to buy hops rather for their intrinsic or brewing value as ascertained by analysis, or other exact examination, than for the past reputation of their place of origin. This means that brewers are being educated, and are thereby gaining a clearer insight into their requirements, and are seeking to ascertain for themselves, and without prejudice, whether they are buying such hops as are best likely to suit them. Should this tendency enlarge, as I think it will, it must work a practical revolution in the trade, the effects being first felt by growers, whose names might not in all cases then possess *per se* the recommendatory value which is now frequently attached to them.

The more or less elaborate printing which now adorns the surface of the pockets is a relic of the days when duty was levied upon English-grown as well as foreign hops, but with the abolition of the duty it is obvious that the retention of the obligation to mark the pockets with the name and parish of the grower has not so much *raison d'être*. Hops should be sold and bought solely on their merits, and each grower would then know that the price he obtained depended upon the actual quality of his sample, and that an imaginary line existing between two counties, or, as is sometimes the case, between two portions of the same farm, would no longer determine the comparative value of the produce. Home competition for the highest standard would necessarily result in an all-round advance of quality, and while on the one hand the brewing value of our hops would be improved, it would cause on the other the searching out of more effective and less costly methods of cultivation and curing, whereby the question of the lower price of the produce of other countries could be faced and dealt with. Such freedom of culture would assist the English hop farmers in their present struggle, and eventually promote the prosperity of one special branch of agriculture.

But perhaps this particular season is hardly one in which I should suggest reforms or even changes in the system on which our cultivation and our trade have hitherto been conducted. Most of us are optimists now the commercial horizon is fairly bright, and if we are not entirely satisfied with the present, we can at least look forward to the future with confidence. But, after all, we are not quite happy, and growers who are discontented with the prices now obtainable are a little disturbed in their minds when

Trade is Reported Quieter.

It is perfectly true that the point to which values have attained is short of the expectation which the shortage of the crop justified. For choice East Kents we cannot call the market value higher than £7, although I am aware that a few shillings more have been made for exceptional lots. Proportionately the currency for so-called lower grades is more satisfactory, as the demand with which the season opened was concentrated on low-priced parcels, and the continuance of inquiry in the same direction has pushed forward the value of such hops somewhat inordinately. It is only lately that attention has been given to the higher graded growths, and it is now their turn to advance, and assume the position to which their reputation seems to entitle them.

I note that one of our leading merchant firms, commenting upon the official returns of the 1900 crop, quotes

An Array of Figures

which show that the barrelage of English beer on which duty has been paid has increased in the past ten years by 5,167,413 barrels, and that the annual consumption of hops at 2lbs. per barrel cannot now be less than 700,000 cwt. The present crop being the shortest for ten years, and bearing in mind that foreign crops are smaller than last year, when imports were not up to the average, our receipts from other countries are not likely to be very large this season. It therefore "seems probable that the 1900 English crop and all available supplies from abroad will be about three-quarters of a year's consumption." It is consequently estimated that there is a deficiency on the year of over 150,000 cwt., which can only be met by stocks in the hands of brewers.

Imports and Exports.

Our imports for October were as follows:

	1900. Cwts.		1899. Cwts.
U.S. America	4,713	.....	5,408
Other countries	10,796	.....	18,348
Total	15,509	.....	23,756

By including the September imports with these figures I find that the total imports since the commencement of the hop year are 20,698 cwt., being 8,465 cwt. less than those in the first two hop year months of 1899.

Our exports of hops in October were 2,451 cwt. as against 2,747 cwt. in 1899. As usual, English hops largely predominate, being quite five-sixths of the whole. The total exports for two months were 3,787 cwt. this year, and 3,865 cwt. in 1899.

In this connection, it is interesting to glance at the exports of beer, which materially affect the consumption of our produce. A substantial increase appears in the shipments for September and October, 1900 (85,541 barrels), over those of the corresponding months of last year (76,734 barrels). The consumption of British beer in our colonies is increasing, and in other foreign countries it is either stationary or falling off.

**All official reports and notices of the National Association of English Hop Growers will be printed in the* MARK LANE EXPRESS, *which will also contain all current information likely to be of interest and benefit to the members of the society.*

To Hop Growers.—Users of WIRE WORK should buy the Best English Galvanised Steel Hop Strand, made by Richards Bros., Ltd., Warrington, Lancs. For prices, &c., apply to their London office, 86, Leadenhall-street, E.C.; or their Sole Agent for Kent and Sussex, Mr. Edward Ede, 3, Newstead-road, Lee, S.E.—[ADVT.]

Foreign Notes.

Nuremberg.

Although the trade is reported as being generally quieter, a steady business is passing, and about 4,000 bales have been disposed of in the week. Quotations have not undergone any change, as holders are not pressing sales, and the natural current of affairs is quite strong enough to maintain the recent position. There are those who predict that this condition will shortly cause a relapse in values, but I cannot trace any good reason why this should result. The export demand for the Continent and England is fairly active, and is not likely to diminish, and there is no doubt that local brewers must come forward as buyers, if not immediately, in the early part of next year, by which time their present stocks will be seriously reduced. In my opinion the tendency is rather in favour of further advances, and though we may possibly see a continuance of moderate business up to Christmas, there will be quite sufficient to uphold the market, and it is on the cards that an improved demand with higher rates may be experienced earlier than appears probable at the moment. In a few weeks the lowness of available stocks must become evident, while every week it is more difficult to find choice parcels. The outlook is, therefore, distinctly favourable to increased strength, and holders have no occasion to be nervous about it.

Present Quotations

may be taken approximately as follows: Marktwaare, 85s. to 90s.; Hollerdaus, sealed, 110s. to 120s., not sealed, 100s. to 110s.; Wurtembergs, 105s. to 115s.; Badens, 105s. to 115s.; sealed Spalts, 110s. to 125s.; Alsatians, 95s. to 105s., the figures given being the first cost values of the best qualities, lower grades in proportion thereto.

Burgundy.

The trade remains steady at recent quotations, and though the volume of business is small by reason of the diminution of supplies, the hops on hand are firmly held at 105 to 120 francs according to quality.

Munich.

The great breweries are not at present active buyers, and stocks of hops are rather on the increase in this market, but holders are full of confidence that their opportunity will not be long delayed; therefore they are very firm in maintaining their quotations.

Belgium.

The excitement of the past three weeks has somewhat subsided, but prices still remain at the same advanced level as when previously reported. Business continues to be done steadily in Alost eight marks at 100 francs, first cost in the country markets. Under similar conditions, Poperinghes are also selling at the same rates, and in some cases at a little more. There are not many hops now left in the hands of planters, it being estimated that not more than 15 per cent. are under their control.

America.

The news from the other side of the Atlantic is very encouraging to the trade. Business is getting to be fairly active at New York, dealers are very solid in their ideas of value, and brewers are beginning to yield to the force of circumstances which they can no longer control or resist. The strength of the market is well supported by the attitude of planters both in New York State and on the Pacific Coast. These are very firm in their demands, and will not give way to lower bids than 17 to 19 cents. The expectation of 20 cents has not yet been realised, but the present aspect of affairs warrants the prediction that it will shortly be heard of. In the meantime, the holdings in first hands are being largely diminished. It is stated that not more than about 15,000 bales are unsold on the Pacific side, and very few remain in New York State, quite 75 per cent. having been transferred to dealers. The control of the market, therefore, rests with them, and as they are working for exceptional profit in an exceptional season, they are not at all likely to allow the opportunity to slip. We may therefore expect to hear that quotations have advanced very soon.

Altogether there is no sign in the general position of any of the foreign hop markets of any weakness, strength being the prevailing feature, with a tendency to a continuance of firmness, and considerable probabilty of increased value as the season progresses.

(*For Hop Market Reports, see pages* 623, 625.)

Chester Cattle Fair.—At this fair on Thursday there was a plentiful supply of store and dairy cattle and a fair attendance of buyers. Milking stock sold fairly well, but for feeding cattle trade dragged considerably, owing principally to the high prices asked for suitable lots. Before the close of the market, however, a fair proportion changed hands, and the previous week's quotations seemed to be fairly well maintained. The prices were: Milch cows, £15 to £21; calvers, £13 to £19; barrens, £9 to £12; heifers, £8 to £15; bullocks, £10 to £12; and stirks, £5 to £8. There was a much smaller show of sheep, and trade was only nominal.

THE GARDEN.

Still it rains, and rains, and rains. Day after day the downpour continues, and though it clears up for a few hours occasionally, and the sun shines bright and warm, it soon clouds over, and down comes the rain again. The land is in such a sodden condition as to render it almost impossible to get on it at all; consequently outdoor work is practically at a standstill, both on the garden and farm, for the present.

Owing to the continued mildness of the weather cauliflowers still keep on growing and turning in, though unless protected in some way the constant rains injure the hearts almost as badly as sharp frost would do. Breaking down a few leaves over each head throws off a lot of the wet, certainly, but a better plan is to gather several of the larger leaves together and tie them towards the points, over the heart. This keeps it comparatively dry, and ensures its whiteness also, though where this is done it is rather difficult to tell exactly when each heart becomes fit for cutting. On the whole the best plan to secure a supply of this delicious vegetable for the next few weeks is to plant a number of the best examples, just beginning to "turn in," in a deep pit or roomy frame, where they can be covered with glazed sashes or the like, and yet receive plenty of air in mild weather. Failing glass, the new transparent waterproof paper forms a capital substitute, and is very useful for this and similar purposes. In this way cauliflowers may often be had right up to Christmas.

But already the earlier kinds of broccoli are becoming ready for use, so that any failure in the supply of cauliflowers is not a matter of so much consequence. For use during the autumn and up to Christmas, or thereabouts, the best broccoli are Veitch's Self Protecting and the Autumn Protecting (Sutton's). These will be followed by Snow's Winter White and the Penzance. Dancer's Pink Cape is another excellent autumn broccoli, but its colour renders it unpopular. If not already done, lose no time in putting all broccoli plants over with their heads to the north, in the manner described in a previous article.

A batch of French beans sown now in a warm house will begin bearing early in the New Year. At this season these beans succeed best in 6in. or 7in. pots, three or four plants in each; suitable varieties are Ne Plus Ultra and Osborn's Forcing.

Proceed with the planting of hardy fruit trees and bushes of all kinds as fast as possible before the cold weather sets in.

The Myrobalan, Myrobella, or cherry plum, is now well known as a hedge, or fence, plant, for which purpose it is admirably adapted. It is only occasionally that the fruit is seen on the plants in this country, but this is chiefly owing to the growth being restricted by clipping, etc. Where a plant here and there is allowed to make a vigorous and unrestricted growth for a few years fruit will usually be freely produced, especially in a fairly warm and sheltered situation.

This (the fruit) bears a great resemblance to that of a large heart cherry, and is produced on long stalks, usually in small clusters. It possesses a pleasant flavour, and is very useful for tarts, preserving, etc.

In addition to the French kinds of the Mirabelle plum, which include a yellow as well as the red variety, and one with purple foliage, several new varieties have been recently introduced from Japan. Among these may be mentioned the Satsuma (type); Masu, a fine, round fruit, of rich flavour; Botan, dark red, free and good; Pres. de Croncelles, large; and Burbank, with large fruit. These are all worth a trial, being very ornamental while in flower as well as in fruit.

On very heavy or damp soils such things as raspberries and black currants are much more likely to thrive than either gooseberries or the red or white currants, which prefer a lighter and drier staple. On land of this description such apples as the good old Blenheim Orange (though this is a somewhat "slow" variety, usually taking several years before bearing at all freely), the Forge (a well-known and excellent Sussex apple), Peasgood's Nonsuch, Lord Grosvenor, Stirling Castle, Echlinville, Northern Greening, and the fine old Winter Queening (or Duck's Bill), with Wellington, will also succeed better than most others. Plums of many kinds may also be grown well on heavy and cold soils, and some of the hardier pears also—on the quince stock, of course.

Cuttings of the shrubby calceolarias (yellow brown, etc.) may still be inserted in a cold frame or pit; it is a great mistake to get these to work too early, as they get too large by bedding out time. Cuttings of pentstemons got in now will also root freely, either in a cool frame or pit, in a greenhouse (cool), or even under a hand-light. This is a charming class of plants, and deserves more attention than it usually receives.

Finish planting hardy bulbs of all descriptions as soon as possible. It is by no means necessary to put nothing but such bulbs in a bed, which implies a bare appearance throughout the winter. A judicious use of small evergreen shrubs, with or without berries, wallflowers, and some of the hardy, spring-flowering subjects affords a charming effect, and obviates the barren appearance. In a warm greenhouse bouvardias are now in full bloom, and afford plenty of flowers for cutting.

FARM PROSPECTS.

Devon.

The land has been well soaked since October 25th, and breaks up well for wheat tilling, which is rather backward. Owing to the drought, the land could not be ploughed, and farmers went on with taking up their mangold earlier than usual. It is a very good crop generally, the next best crop being swedes, and the poorest common turnips, which were a comparative failure. Potatoes were a very good crop, and were taken up in dry condition. The grass lands were entirely burnt up during the latter part of the summer, and water supplies got very low; fortunately there has been a good rainfall lately, which has altered the appearance of the country. Apples are plentiful, and a large quantity of cider will be made in some districts. Stock is fairly healthy, and is doing well; sheep have been short of food, and lambs have had a bad season with the "husk"; there have been some heavy losses on some farms. Prices of corn are low, except for malting barley; yield of wheat not quite as good as was anticipated.—L. B. G. (November 8th).

Devonshire.

Have had a good deal of rain the last few weeks. Wheat sowing is getting backward, not much having been done. A good crop of mangolds has been got off in many places, and some are not yet finished, having been stopped by wet this week. There is grass left yet in many places, and stock all out of doors yet. Sheep folded on arable land have been forced to be taken off this week.—D. R. S. (November 9th).

Dorset.

We are experiencing unusually mild weather. Rain has certainly come upon us, and as far as cultivating goes may be sufficient, but unless we get five times as much there is no likelihood of any spring breaking, and the water question in this respect is a serious one for all. We have had considerable growth in pastures, as well as roots, and the look of the country generally is, from a glance, all one could wish; but the growth at this time of year is not of much value of itself. Cattle of best sorts, and milch cattle particularly, are keeping up in value (the outcome of a dry summer, when the dairy cows dry off). The beef trade I have noticed, as stated, to be improved, and also the mutton, but I fear sellers have not found this the case or literally true. Pigs and calves have sold fairly well, but not excessively high. Prices of corn, both barley and wheat, are much against the growing of it, and the yield is spoken of generally as being a bad one.—G. S. (November 7th).

East Ulster.

The weather has been remarkably wet, so that hope is almost drowned out of the farm prospects. I have seen considerable quantities of hay, within this month, still in small cocks in the meadows, surrounded by floods of water.

Cereals

When the oats were growing they looked well, and farmers generally were full of hope in reference to the corn harvest, but the reaping time passed, and still there appeared a satisfactory crop—plenty of straw, but in the barn a small bulk of seed, and the weight per bushel disappointing.

Potatoes.

The general report of the potato crop is a cry of failure, yet a few farmers have excellent crops. One told me he had sold ten tons per acre off a considerable number of acres, leaving small potatoes and refuse, showing the very large yield of about thirteen tons per acre. This is the result of good farming in suitable soil. The potatoes were planted early with good seed, well manured, properly cultivated, and sprayed well in good time. Besides, the land is thoroughly drained. On the other hand, large tracts of potatoes are yet in the fields undug, and the weather makes it impossible to gather in the crop.

Roots.

Swedes and other turnips are a good crop, but they are still in the fields and scarcely any of them yet carted home. Generally turnips in the North of Ireland may remain in the fields, and be brought in as required for use. It would be much wiser, however, to store them, as a severe, long-standing frost would cause heavy loss. Farmers complain of the want of labourers, and have therefore to risk the frost.

Fruit.

All kinds of fruit have been abundant this year, but the prices very low. Apples have been sold for one shilling per hundredweight, consequently many have been allowed to rot.

Flax, etc.

Farmers who have grown flax give a satisfactory report of it: the yield is good and prices so far good. Grass seeds have paid well. There was difficulty in saving the seed, but when got to the market in good condition, the prices were satisfactory. Very little winter ploughing yet attempted; ground soaked with wet.—E. U. (November 9th).

Glamorganshire.

The heavy rains of the last few days have been beneficial, and have enabled the ploughing of the leys to be continued under better conditions, and combined with the mild weather of the last two or three weeks has stimulated the growth of grass and roots much to the satisfaction of stockowners. A considerable quantity of wheat was drilled during the month of October, and much remains to be sown this month, but the sale price of wheat is so discouraging that growers feel indifferent whether it is sown or not. Mangolds have been cut and tumped nearly everywhere, and although swedes are likewise a satisfactory crop, it is a temptation to leave them growing during this mild weather. The lifting of potatoes has nearly concluded, and the suspected

Disease becomes more Apparent,

and the weight per acre is much below average in places. The threshings of grain so far have been disappointing in the yield, and more especially in the case of wheat. The young grass and clover seeds are looking well and promising.—C. S. (Nov. 9th).

Gloucestershire.

We are just having a most seasonable and much-needed downpour, as water is everywhere very scarce. The wheat about here is looking much better than the last season or two. Thrashing is very disappointing, particularly in barley. Oats are not a good quality, and the yield of wheat, I fear, will be bad. The root crop is good, however, and will be something better than last year. Stock have done fairly well, but taking farming all round, I am sorry to say I do not see any chance of profit again this year.—J. D. (November 9th).

Herefordshire and Worcestershire.

The season now drawing to a close has been pretty satisfactory on the whole. The last crop of season fruit now being gathered is plentiful, but small, therefore not worth much to market. The mangolds are now being stored, and are above the average; swedes and common turnips are generally a fine crop, and the sheep are now in the hurdles consuming them where the land will do for this, and the cattle that are to come out at Christmas or for winter feeding are being put in te stalls. They have not been doing much good the last month. Beef and mutton are not selling so well; probably the markets will harden now, generally is little flat for a month or six weeks after Michaelmas, though fresh bullocks have been selling satisfactorily to the breeders. Some Hereford yearlings have made up to £15 each, therefore beef must keep its price if these are to pay the feeder, though the best are often the cheapest, perhaps. Draft ewes made from 45s. to 50s., and lambs 35s. each, therefore the breeder will finish up, I think, better than the feeder, probably. There are

Very few Hops Left

in the hands of the growers in this part. What few did keep them are making a pound per cwt. more money than a month ago; some sold then at £3, now worth £5. Very little wheat grown; in fact, I have seen very few fields planted. This seems to have gone quite out of date in this part. The clover roots are left down two or three years, and then used for oats instead of wheat.—W. H. (Nov. 10th).

North-East Durham.

In the latter end of October this district was visited with one of the worst rain storms ever experienced in this part of the country. Close on 3½ inches of rain fell in 15 hours, and as it has rained more or less every day since, farming operations have been almost brought to a standstill. October throughout was a wet month; 6 feet less than the usual breadth of wheat has been put in. The taking up of the potato crop has been greatly interfered with. Sheep have, as usual in wet weather, done badly, and they are not now yielding such a good price as they were a short time ago. Fat cattle are scarce, and are likely to maintain their price. Grain of all kinds is low in price. Altogether the present prospects of the agriculturist in this district are not very bright.—R. B. (November 8th.)

Pembroke.

Violent storms of wind and rain. Store stock of all kinds are in good demand at fair prices. Potatoes are proving disappointing crop, the tubers being generally small. W. G. (November 8th).

Worcestershire.

After a fine and prosperous season we in the Pershore district have had one of the finest autumns ever known. Keep has been plentiful, and the grass is growing even to date. To show the mildness of the season I may say that I this morning cut a basket of mushrooms of fine and excellent quality, growing in the open on the slope of Bredon Hill. Mangolds have done well, and many growers have kept them in the ground longer than usual on account of the mild time. Swedes are also a good crop, the late-sown being quite equal to those planted earlier.

Feeding Prospects

for the coming winter are satisfactory. Store cattle and sheep are selling well, and are looking healthy and in good condition. The sowing of wheat and beans has been retarded for the past two or three weeks on account of rain, but a week's fine weather would put all things right again. The yield of last summer's crops are good, but the price of both wheat and barley is very low, and all feeding stuffs that the farmer has to buy are very dear. What is wanted is better prices, and less foreign competition. F. W. K. (Nov. 9th).

Foreign Prospects.

FRANCE.—Agricultural work being well advanced, farmers' attendance at market has increased, without, however, leading to much improvement in business, as millers are not prepared to pay the full terms asked for wheat, as the sale of flour is exasperatingly slow.

HOLLAND.—The weather lately has been fine, with night frosts in some places.

GERMANY.—Fine weather has permitted the steady movement of native grain, not too abundant, but still sufficient to meet requirements in Berlin, Hamburg, and other centres. A fair quantity of German wheat has been shipped to East Coast English ports. Our millers are pleased with the quality and moderate price.

HUNGARY.—Present meteorological conditions are propitious for the recently-sown fields and the prosecution of agricultural work.

ROUMANIA.—The early-sown wheat looks well, but it is not in a very forward condition. Farmers are still sowing the remainder of their wheatfields and busy ingathering maize, which is an abundant crop.

RUSSIA.—Weather recently has favoured the early-sown crops and encouraged the prosecution of the remainder of the seeding. Trade both in the interior and at the seaboard continues quiet. The preliminary returns issued by the Ministry of Agriculture indicate the total wheat yield as 40,479,000 quarters, and rye 96,892,000 quarters, in comparison with 49,063,000 quarters and 102,398,000 quarters respectively in previous year. This season's figures are open to correction and cannot be accepted as definite.

UNITED STATES.—The *Cincinnati Price Current* says the week has been favourable for the wheat crop and for the handling of products generally. There is no new element of an unfavourable character, and the marketings of grain are moderate.—*Dornbusch.*

THE WEATHER.

MONDAY (November 5th).—The weather continued thoroughly unsettled, and rain fell again over a large part of the country. A mild south-westerly wind was blowing, and the sky was for the most part densely overcast. The night temperatures were again high, and the thermometer at our western and southern stations in the morning was several degrees higher than on the preceding day. The weather was dull and gloomy in London, and rain fell at frequent intervals. The lowest temperature in the metropolis during Sunday night was forty-nine degrees, which is nine degrees above the average, and during the day the reading was fifty-seven degrees, which is four degrees warmer than usual.

TUESDAY (November 6th).—Unsettled weather continued to prevail over our islands, and rain again fell in many places. Rain was measured everywhere in the morning, as the result of the fall since the previous day, and the amounts were large at the western stations. Monday night was generally warm, and at most places in the south and west the temperature did not fall below 50deg. The barometer continued to fall in the eastern districts, but a rise had set in at our western stations, where the wind had become northerly, and the air was somewhat cooler. The day was dull in London, and the temperature rose to 57deg.

WEDNESDAY (November 7th).—Varying amounts of rain were measured in the morning in different parts of the kingdom. The weather was still generally rainy and unsettled, and even where the barometer was rising, and the wind had become north-westerly, the sky for the most part remained densely overcast. Strong westerly winds and gales were blowing on our west and south coasts, and the sea was generally rough. Rain fell heavily in London during Tuesday night, and the weather during the day was again very dull and cloudy, while the temperature, which was lower than of late, was in fair agreement with the average, the thermometer registering 52deg.

THURSDAY (November 8th).—There was a considerable improvement in the weather over England, and the sun shone brightly in many places for several hours. Rain, however, fell again in the northern and western portions of the kingdom, and a gale, accompanied by a rough sea, was reported on our north-west coasts. Wednesday night was cold in many parts of the country, but there was a fairly brisk rise of temperature during the day. Rain fell in London during the greater part of Wednesday night, but the day was very fine, and the thermometer in the shade rose to fifty-five degrees.

FRIDAY (November 9th).—The weather was fine in many parts of England, but the conditions were far from settled, and rain fell in Scotland and Ireland. Rain was measured in the morning [illegible] of the fall since the previous day, over [illegible] kingdom, and the amounts were large in the North. The temperature changes were very [illegible] the thermometer in the morning being lower than [illegible] day in the Northern and Western [illegible] but the readings were several degrees higher in the South and East. Westerly winds were blowing over the whole country, and there were gales on [illegible] exposed places on our North West coasts. The day was mostly fine in London, and the thermometer registered fifty-seven degrees.

SATURDAY AND SUNDAY (November 10th and 11th).—Fine weather prevailed in most parts of England on both days, but the conditions remained unsettled and rainy in Scotland and Ireland. Very heavy rain fell at Jersey during Saturday night, the amount measured in a few hours exceeding an inch. Thunder and lightning occurred at Stornoway. The weather had become very much colder than of late in nearly all parts of the kingdom, and, with the north-west winds and rising barometer, the sky had cleared over England. There was rather a sharp frost in the south-eastern districts and in the Midland counties during Saturday night, the thermometer in the screen falling several degrees below the freezing point. In London the ground was thickly coated with hoar frost on Sunday morning, and the thermometer on the grass registered 10deg. below the freezing point, while in the screen the first frost of this winter occurred.

AGRICULTURAL LAW.

Successful Claim Against a Railway Company.

The Pontefract West Riding magistrates (Mr. W. F. Tempest presiding), on the 3rd inst., heard a claim brought by Mr. Abraham McCloy, farmer, South Elmsall, against the Hull and Barnsley Railway Company for compensation for land taken from him in the course of their recent extension, and loss of tenant right, crops, etc. Mr. Shepherd appeared for the claimant, and Mr. Blundell for the company.

Mr. Shepherd explained that the company had cut through the best portion of the client's farm. One field was separated with practically no access, while to reach two others he had to make a long detour, materially increasing the expenses of his farming operations. Mr. J. W. Bentley, auctioneer and valuer, estimated the damage done, extra cost of farming, etc., at £67 17s. 9d. Mr. Dawson, valuer, Doncaster, assessed the compensation due at £73 18s. 9d. Both these witnesses declared that loss of crops could not be included in tenant right.

Mr. Blundell, for the company, said the real point in issue was whether loss of crops was or was not included in the term tenant right, and he put in a letter from the claimant agreeing to accept £17 10s. for tenant right, etc. He contended that loss of crops was included in that amount. Mr. R. H. Thorpe, land agent, Hull, said he had made a survey of the land, and he fixed the amount of compensation due at £33 19s. 3d.

The Chairman said the Bench was bound by the custom in the West Riding district, and there it was not to include loss of crops in tenant right. The Bench awarded claimant £59, including £6 15s. costs, and £2 damage to the shooting.

Leaving Hedge Trimmings on the Highway.

At the Grantham County Court on Tuesday, Judge W. W. Wood delivered judgment in a case of importance to farmers. Sophia Henson, farmer, of Gelston, claimed £7 from Jos. Toulson, a farmer, for the loss of a heifer, which died from the effects of eating yew leaves which the defendant, after cutting a yew hedge, allowed to remain on the road side.

His Honour held that the case did not depend upon negligence, believing that neither plaintiff's daughter, who was in charge of the beast, nor the defendant were aware of the danger of yew to cattle, but that it depended upon the fact of the deposit of yew trimmings being a nuisance. There was no doubt that to put anything on the highway that was a danger to persons, cattle, or other animals lawfully using the highway was a public nuisance, and it was quite immaterial whether the person who put it there knew or did not know that it was dangerous. The defendant had no right to use the highway at all for his private purposes, he had no right to put trimmings on the highway. He had no doubt it was a nuisance, and as plaintiff had suffered from that nuisance her action was maintainable, and he gave judgment for £7.

Messrs. Donaldson and Co. report that the supply of red clover and of cowgrass this year has [illegible] decidedly below the average. Alsyke and [illegible] also are expected to rise in value. We believe that there will be like [illegible] with respect to [illegible] minor crops as meadow fescue and [illegible] grasses.

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt: We continue to make a few sales of new; old neglected. Barley: Grinding unchanged; malting firm. Wheat dull. Oats rather dearer on the week. Maize steady. Flour about 3d per sack cheaper.—NIXON, GOWER, AND CO.

Mark Lane, Wednesday.—The attendance of buyers was very limited throughout the day. Although the demand for home-grown wheat is still scanty both here and on the country exchanges, farmers are resolute, and quotations are much the same; but what little takes place goes mainly as before to the latter, in view of more lucrative offers. Samples of heavy weight engross most attention. Fine white 32s, and red 31s 64lb. delivered up. Foreign unaltered. The London Millers' Association made no alteration at this afternoon's meeting, quotations remaining at the recent decline established. Grinding barley steady. Maize maintained. American mixed, 23s ex quay, and ex ship just due, held for 21s. Round corn, Odessa, 26s 3d ex quay. The market for beans and peas was again featureless.

Mark Lane, Friday.—Home-grown wheat is in anything but large supply, and farmers are satisfied at the present ruling rates; more, however, at the country markets than London. Fine white 32s, and red of similar sample 31s per qr 64lb, delivered. Foreign descriptions nominal. Consumers of flour still buy only in retail quantities, and granaries are well supplied. The London Millers' Association made no alteration at this afternoon's meeting. Grinding barley remains very steady, and anything but plentiful. Oats unaltered. Maize maintained, being scarce. American mixed, 23s ex quay, and ex ship, just due, held for 21s. Odessa 26s 3d ex quay. The market for beans and peas was again devoid of incident.

COUNTRY.

Ashford, Tuesday.—Wheat quiet and cheaper on the week, nothing being sold at more than 30s a quarter. Whites and reds were practically at the same figure. Maize was firm, and flat varieties now cost country buyers over 24s per quarter, while round sorts ran from 27s to 28s. Malting barley met with little demand, and 33s was quite the top price. Other corn unchanged.

Aylesbury, Saturday.—Excellent attendance and good quantity of grain on offer. Trade dull, at last week's prices.

Banbury, Thursday.—Wheat (white) (old), 29s to 31s per qr; wheat (red) (new), 26s to 28s 6d per qr; beans (new), 28s to 30s per qr; beans (old), 33s to 34s per qr; oats (new), 16s to 18s per qr; oats (old) (black), 21s to 22s per qr. Wheat and other grain at about last week's quotations, but demand rather better.

Boston, Wednesday.—There was a small supply of wheat, which made 26s to 26s 6d per qr. Barley was sparingly shown, and sellers held firmly for late rates. Oats 17s to 17s 6d. Beans, peas, and other articles remained as last week, trade being slow.

Braintree, Wednesday.—Best red wheat made from 28s to 29s 6d per qr. Barley was offered in large quantities; the better qualities maintained previous prices, but the lower qualities slightly declined.

Cambridge, Saturday.—During the week, although trade has not been brisk, farmers have succeeded in making last week's prices, the supplies being small. At this market to-day there was a limited supply of wheat, which met with a dull trade, but dry parcels realised quite as much money. Wheat, red, 28s to 31s; and white up to 31s per 504lb. Barley quite as dear. Beans 6d dearer.

Canterbury, Saturday.—Wheat a trifle firmer. Best barleys steady. Oats maintain values. Ruling prices:—White wheat, 30s to 32s 6d; red ditto, 29s to 32s; malting barley, 28s to 35s; grinding, ditto, 21s to 24s; white oats, 18s to 21s; ditto black, 15s to 20s; peas, 29s to 31s; tick beans, 30s to 32s; mazagans, 27s to 29s; flat maize, 22s to 24s; round ditto, 27s to 28s per qr; winter tares, 6s per bushel.

Carlisle, Saturday.—Small supply of oats to-day, brisk demand at fully 6d qr advance. New, 17s 6d to 18s 6d; old, 23s 6d to 26s. No wheats or barley sold.—THOMAS ROBINSON.

Chester, Saturday. — There was a small attendance. English wheat showed no alteration in value, and good samples were rare. There was a fair demand for English oats, old samples being scarcer. Quotations:—Wheat, white and red, 4s to 4s 2d per 75lb; grinding barley, 3s to 3s6d per 64lb; beans, new, 4s 8d to 4s 10d; old, 5s 6d per 80lb; oats, new, 2s 2d to 2s 5d; old, 3s 2d to 3s 7d per 46lb; Indian corn, 11s to 11s 6d per 240lb

Colchester, Saturday.—Wheat, very small supply, prices about 6d per qr better than last week. Fair supply of barley, prices fully as good as last week.—FRANCIS AND CO.

Dorchester, Saturday.—Good attendance at the Corn Exchange, but owing to the damp weather samples did not come to hand in such good condition, and buyers were holding back. Prices all round were in buyers' favour.

Glasgow, Wednesday.—There was a small attendance at our Corn Exchange to-day. Wheat and flour firm, but quiet. Indian corn scarce on spot, and held for 4½d per boll advance on the week. Grinding beans steady. Canadian pease quiet at the turn easier. Foreign oats quiet; home quiet, but steady. Oatmeal dull. Barley quiet. Bran and thirds quiet, and unchanged—GIBSON AND CLARK,

Glasgow, Wednesday.—Wheat and flour firm, but quiet. Indian corn scarce on the spot and held for 4½d per boll advance on the week. Grinding beans steady. Canadian peas quiet, and the turn easier. Foreign oats quiet; home quiet, but steady. Barley quiet. Oatmeal dull.

Hereford, Wednesday.—Moderate attendance. English wheats slow, trade at drooping prices. English barleys quite a drug; business being passable only at very low prices. Oats quietly steady. Beans in rather better demand. No change in maize or vetches. Wholesale prices: Wheat, white, 3s 4d to 3s 6d; red, 3s 3d to 3s 5d; barley, 2s 9d to 3s 9d; oats, 2s to 3s; maize, 2s 8d to 3s 2d; vetches, winter, 4s to 6s, and spring, 3s 6d to 5s.

Ipswich, Tuesday.—Wheat in fair supply; trade steady at last week's rates. Red, 28s to 29s 6d; white, 30s 6d. Good supply of barley. Fine samples in request at fully late rates. Oats quiet. Maize firm and the shade dearer. Beans and peas steady.

Leeds, Tuesday.—Lighter shipments. The decreased quantity on passage and steadier American advices all tend to impart greater firmness to the wheat trade. Millers show rather more disposition to operate, all the more because imports to meet spot values are impossible, and on the business doing to-day last week's rates are generally exceeded by 3d to 6d per qr. Barley favours buyers, except for finest qualities. Feeding stuffs unchanged.—DUNNS AND CO.

Leeds, Friday.—With a lowering tendency in American wheats, the advanced prices of Tuesday are barely maintained, with a slow demand. Maize is the turn easier. Barley, beans, peas, oats, and flour met with little inquiry, an l prices remain unchanged.

Leicester, Saturday.—Good average attendance of buyers and dealers, fair supplies of home-grown wheats in variable condition. Fine samples steady. Inferior dull trade. Prices, 27s to 31s per 36 st nes. Barley quiet trade. Oats firm.

Lincoln, Friday.—Fair supply of English wheat, with a steady trade at about last week's prices. Reds, 27s to 28s; whites, 28s to 29s. Foreign wheats dull. Good show of barley, and trade slow; prices, 26s to 32s. Oats, beans, peas, and maize all as last week.

Liverpool, Friday.—Wheat firm with a fair business at Tuesday's full prices. Flour steady with a small consumptive demand at late rates for foreign. The Liverpool Millers' Association make no change in the minimum prices of bakers'. Maize has a fair trade, and is steadily held at ¼d below last Tuesday. European almost exhausted and firmly held at quotations, Plate also getting into smaller compass with a fair trade at quotations. Barley dull and neglected for malting, at 3d to 5s lower. Feeding also has a slow trade at unchanged prices. Beans are dull and lower with little or nothing doing, foreign sorts showing a decline of 3d to 9d from Tuesday. Peas quiet at ¼d per cental decline. Oats firm but quiet at quotations for English. Foreign sorts have a moderate trade with less offering at unchanged prices. Oatmeal only a moderate inquiry, prices being unchanged from last market day. Oilcake firm with a fairly good demand at about late rates.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday. — We had a very uninteresting market to-day, the weather so remarkably mild and damp producing anything but cheerfulness; the wheat trade, however, about "held its own," and prices of last week must be recorded as our report. Barley of best quality moves off fairly well at previous value. Oats display no change. Maize for best known and flat slightly dearer. Beans and peas are scarce, and bring rather higher figure than of late. Winter tares have receded to 5s per bushel, much to the disgust of holders of them. There is no alteration to quote in rye, brank, hemp, sergo, or millet.

Manchester, Thursday.—English wheat is steady, with a quiet trade passing, prices occasionally raised 3d per quarter; foreign say 1d per cental dearer, but the tendency to-day is rather easier. Flour remains slow of sale at unaltered rates. Indian corn moves quietly at previous rates. No change of moment is noticeable in oats, peas, beans, or barley, as compared with last Thursday.

Newark, Wednesday.—Wheat a firm trade, at full prices. Barley: Some enquiry for best qualities; inferior samples very unsaleable. Oats and beans a firm trade at previous prices.

Newcastle-on-Tyne, Saturday.—Wheat firmly held; American maize 6d per quarter lower to sell on the week. Barley neglected, 1s per quarter lower. Oats quiet at late rates. Beans and peas favouring buyers. Flour no change.—JOSEPH POLLARD AND CO.

Newcastle-on-Tyne, Saturday.—Market moderately attended, and trade limited. Wheat closed unsteady, sellers and buyers being apart. Flour very slow, and inclined to consumers. Malting barley disappointing generally. Oats and other feeding stuffs in favour of purchasers. Weather more clear.—GEO. W. WATSON AND CO.

Newport, Wednesday.—Wheat firm and dearer on the week. Maize dearer. Barley firm. Oats and beans unchanged; fines 24s., offals dearer.

Northampton, Saturday.—Thinly attended market, supply and demand limited and inactive. Wheat and barley very dull; the latter in good supply and very irregular in price. White wheat, 30s to 31s; red, old wheat, 29s to 30s; red, new wheat, 27s to 29s; barley, malting, 24s to 30s; barley, grinding, 20s to 23s; oats, 17s to 22s; oats, old, 23s to 24s; beans, 30s to 35s; peas, 26s to 36s; flour, 22s to 26s.

Norwich, Saturday.—Only a small supply of wheat on offer to-day, with a poor demand at last week's prices. Much less barley showing than last week, at former rates. The weather is now fine and bright with night frosts. Wheat, red, 29s to 29s 6d per qr, weight 63lbs. per bushel imperial. Corn Inspector's return for the week ending 5th November, 1900:—Wheat, 1,875-4, 27s 4d; barley, 14,421-4, 26s 4d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat, fair supply, good demand at last week's prices. Barley, better sorts in good demand at slightly increased prices, common sorts neglected. Oats and beans, no change.—R. HUBBLE.

Oxford, Saturday.—Wheat dull trade at about last week's prices. Barley fair supply of medium quality; good demand for best samples, others quiet at last week's value.

Peterborough, Saturday.—The supply of wheat keeps small on our local markets, and trade to-day was steady at last week's prices. No change in barley, a fair demand for good qualities. Oats the turn in sellers' favour.—THOMAS HILL AND SON.

Plymouth, Thursday.—There was an average attendance at our Corn Exchange to-day, an average business being done; prices for wheat are 6d dearer, and barley, maize, and oats are at full prices of last week.—ORLANDO DAVIS AND CO.

Reading, Saturday.—At to-day's market we had a full attendance, and business was decidedly better. There was a good supply of wheat, for which trade ruled firm at last week's rates. The inquiry for wheat was brighter, and with a plentiful supply prices were fully maintained. Other sorts of corn sold well at recent currencies.

Ripon, Thursday.—A small show of farmers' wheat. Barley in good supply at a trifle less money. A small attendance. Wheat, English, new, 27s to 29s; ditto old, 31s; ditto foreign, 30s 6d to 34s 6d; barley, malting, 24s to 28s; ditto, grinding, 21s to 23s; oats, old, 25s to 26s; ditto new, 17s to 19s; maize, round, 24s to 27s; ditto flat, 23s 6d per qr; beans, old, 1s per stone.

Romford, Wednesday.—Wheat 6d a quarter dearer for best qualities. Only a small supply. Red wheat made 28s to 29s 6d, and white wheat, 29s to 31s 6d; winter beans made 30s per 19 stone.

Sheffield, Tuesday.—There was a fairly good attendance, and a better demand for both English and foreign wheat. A slow trade was done in Indian corn at former prices. Malting barley is per qr dearer. Quotations:—Wheat, white, 32s to 33s; red, 31s to 32s; new, 30s to 31s per 504lb; oats, old white, 26s; ditto, new white, 17s 6d to 19s; ditto old black, 22s; ditto new black, 16s to 17s per 336lb; peas, grinding, 32s to 34s; ditto blue, 53s to 70s per 504lb; beans, Egyptian, 33s; ditto, English (new), 31s 6d to 32s per 532lb; barley, grinding, 23s 6d to 24s 6d; ditto malting, 27s to 35s per 448lb; Indian corn, small old, 29s to 30s; ditto American mixed, 23s 6d to 24s per 480lb.

Spalding, Tuesday.—At the Corn Exchange to-day there was a fair supply of wheat, and late rates were generally maintained. Good samples of barley were in demand, but other sorts neglected. Oats were slow at previous prices. Beans made rather more money. Pease were about the same. Maize easier.

Stockton, Wednesday.—There was only a small show of local wheats, which sold at 28s per qr. In foreign wheat trade keeps very quiet, with only a moderate demand from millers, and prices show no change from last week. Maize and oats are firmer at last week's prices. Malting barley a small show, and of moderate quality, making about 25s per qr.

Sunderland, Saturday.—Little grain on offer. Wheat quiet, without much change in value. Spring corn unaltered. Arrivals coastwise:—Wheat, 125 qrs; barley, 748; foreign wheat, 813.—E. AND F. RICHARDSON.

Taunton, Saturday.—Small supply of wheat, with a firm trade at last week's prices. Grinding barley and maize very slow. Malting barley in smaller supply, with a better tone in the trade.

Wakefield, Friday.—Wheat has followed a hardening tendency this week, spot values recovering 3d to 6d per qr. from late rates, and the demand shows signs of revival. High foreign limits for shipment, however, prevent a more active business. Malting barley very slow. Maize, beans, and oats unchanged.—DUNNS AND CO.

Wakefield, Friday.—The business doing in wheats on to-day's market is not large, and both English and foreign are quoted at 3d to 6d per qr advance on last week's prices. We have a large supply of Yorkshire barley, and buying is altogether confined to the finer qualities. No alteration in feeding stuffs.—MICHAEL SANDERSON AND SON, LIMITED.

Winchester, Saturday.—A very short supply of wheat on our market to-day, which commanded a firm trade at fully last week's prices. Good inquiry for best barleys, medium qualities difficult to quit. Oats and maize steady at late rates. More doing in flour at 24s to 25s.—FEAR, COLEBROOK, AND CO., LD.

Wisbech, Saturday.—Less wheat offering. Trade favours sellers. Red, 28s 6d; white, 29s; old up to 30s. Oats, 6d dearer to buy, 17s to 19s. Barley dull at late rates. — JAMES FLETCHER.

Wolverhampton, Wednesday.—There was a fair attendance, but the trade was dull in all departments. The following were the quotations:—English wheat, new, 12s to 12s 6d; ditto old, 13s per 216lb; oats, old, 15s to 16s; ditto new, 11s to 11s 6d; beans, old, 14s 6d to 15s 6d; ditto new, 12s 6d to 13s 6d per 196lb; maize, 24s to 24s 6d per 480lb.

Worcester, Saturday.—Business quiet. English wheat sold slowly at about last week's prices, but foreign showed a hardening tendency. Maize rather easier. Other feeding stuffs unaltered. Wheat, white, 28s to 29s; red, 26s to 27s.

Worksop, Wednesday.—Very good attendance. There was a large show of grain, best samples of barley being scarce and dear, and inferior qualities almost unsaleable. The slight reduction in the price of wheat last week has not improved. Wheat, old white, 31s to 32s; old red, 30s to 31s; new white, 28s to 29s; new red, 27s to 28s; best malting barley, 30s 6d to 32s 6d; secondary, 28s to 29s; grinding, 23s to 25s; old white oats, 25s to 27s; old black, 24s to 25s; new white, 18s to 20s; new black ditto, 17s to 18s; flat maize, 24s to 25s; round ditto, 28s to 29s per qr.

FOREIGN.

The Antwerp wheat market has been supported by a regular consumptive demand, and prices have been maintained at their former level. The French country markets have been rather thinly attended, but farmers consider themselves masters of the situation, and they express their confident belief that when the milling trade has exhausted its present stocks it will be compelled to concede some advance. The early-sown wheats present a promising appearance, thanks to seasonable rains. The area of country devoted to wheat in France this year is considered to be at least equal to that similarly sown in 1899. A moderate business has been passing in hard Algerian and Tunisian wheat at Marseilles. Flour for consumption has shown little change in the French capital. Disposable wheat has remained without any variation at Konigsberg and Dantzig. The Odessa wheat market has been inactive, and business has ruled generally quiet. The exports of wheat from Russia to Great Britain in the first ten months of this year were 3,391,809cwt, as compared with 2,278,200cwt in the corresponding period of 1899, and 5,762,200cwt in the corresponding period of 1898. Flour was exported from France to Great Britain in October to the extent of 80,100cwt, as compared with 64,790cwt in October, 1899, and 44,160cwt in October, 1898. The aggregate exports of flour from France to Great Britain in the first ten months of this year were 626,840cwt, as compared with 528,320cwt in the corresponding period of 1899. and 339,110cwt in the corresponding period of 1898. The quantity of wheat now *en route* for the Continent is returned at 1,065,000qr, as compared with 1,140,000qr at the corresponding date of 1899. The total of 1,140,000qr is made up as follows:—France, 20,000qr; Belgium, 280,000qr; Holland, 275,000qr; Germany and the North, 135,000qr; and Italy, Spain, etc., 255,000qr.

POULTRY AND PROVISIONS.

Smithfield, Saturday. — A very good demand was experienced this morning for the fair supplies offered. Quotations:—Fowls: Yorkshire, 2s 3d to 2s 9d; Essex, 2s 6d to 3s; Welsh, 1s 8d to 2s; Surrey, 3s to 3s 6d; Sussex, 2s 9d to 3s 3d; Irish, 1s 6d to 1s 10d; Boston, 2s to 2s 6d; turkeys (cocks), 6s to 10s; hen, 4s 6d to 5s 6d; country ducks, 2s 6d to 3s; Bordeaux pigeons, 10d to 1s; feathered, 7d to 9d; wild rabbits, 6d to 8d; tame, 1s to 1s 3d each; Australian, 7s 6d to 9s per dozen; pheasants, 3s 6d to 4s; young partridges, 3s to 3s 6d; old, 2s.; young grouse, 4s 3d to 5s; old, 3s per brace; hares, 3s to 3s 3d; leverets, 1s 9d to 2s 3d; wild duck, 1s 6d; pintail, 1s 3d; widgeon, 1s; teal, 81 to 10d; woodcock, 2s 6d to 3s; snipe, 6d to 10d; golden plover, 7d to 10d; and black, 5d each.

Glasgow, Wednesday.—The market is well stocked with cheese, but there is little or no inquiry. However, to parties showing anything like a desire to purchase sellers are willing to make concessions. This is usually a quiet time. The trade hope that business will improve by the end of the month. Cheddars and Dunlops, 54s to 66s per cwt. September-made Canadians are of good quality, but they meet a slow sale.

Liverpool, Saturday.—Bacon: The market has ruled fairly steady, with moderate consumptive demand, and although some increase in shipments is expected, the stock on hand is only light. We quote, to-day, choice Cumberland cut, 20lb to 22lb average, 48s to 51s; 26lb to 30lb, 46s to 48s 6d; 32lb to 38lb, 42s to 47s; long middles, rib-in, 18lb to 22lb, 5os to 54s; clear bellies, 14lb to 16lb, 54s to 56s; 18lb to 20lb, 53s to 54s 6d; Staffordshire cut (lean on), 35lb to 40lb; and Birmingham cut, 33lb to 38lb, 45s to 48s; clear Staffords (lean off), 40lb to 44lb, and Yorkshire cut, 40lb to 45lb, 43s 6d to 45s; singed Wiltshire, Canadian, 45lb to 55lb, 50s to 54s; American, 40lb to 50lb, 42s to 47s; short clear backs, 12lb to 16lb, 42s 6d to 44s; 16lb to 20lb, 41s 6d to 42s 6d; fat backs (export), 37s to 38s 6d; long clear middles, 35lb to 40lb, 41s to 45s; 40lb to 45lb, 43s 6d to 44s 6d; short clear middles, 45lb to 50lb, 40s to 40s 6d; short middles, (rib in), 18lb to 23lb, 46s to 48s; shoulders, square cut, 12lb to 14lb, 35s to 39s; 14lb to 16lb, 34s to 38s; New York cut, 11lb to 13lb, 30s 6d to 34s per cwt. Hams move steadily into consumption, especially light weights, which are somewhat scarce. We quote choice long cut, 8lb to 12lb, 46s to 51s; 14lb to 16lb, 44s 6d to 49s; short cut and A.C., 10lb to 12lb, 45s to 51s; 12lb to 14lb 44s to 50s; 14lb to 16lb, 43s to 47s per cwt. Lard is only a slow sale at slightly lower prices. We quote pails and kegs, 37s 9d to 39s; prime Western (in tierces), 37s 6d to 37s 9d per cwt. Beef quiet and easier. We quote extra India mess 68s 9d to 72s 6d; Plate and Packet, 63s to 66s 3d per 304lb. Pork dull, at about unaltered rates. We quote finest prime mess, 65s to 72s 6d per 240lb. Cheese.—There is no improvement in the demand, and market must be reported dull and easier. We quote finest Canadian, coloured, late makes, 54s to 54s 6d; white, 53s 6d to 54s; finest States coloured, 53s to 54s; white, 52s 6d to 53s 6d; summer cheese ripe flavour, are freely offered from 48s to 52s; but lower grades, leaf mould and skins are dull nominally quoted 30s to 35s per cwt. Butter is a slow sale, and prices are easier all round. Mild, open weather, with plentiful rains has an adverse effect on the market. We quote, fancy Canadian creamery, in boxes, 100s to 104s; second quality, difficult to sell, 90s to 95s; finest States (nominal) 90s to 95s, finest ladles and imitation creamery 75s to 80s, finest Danish 108s to 114s; Australian, 102s to 105s; Irish creamery, 104s to 105s, Cork firsts, 88s; seconds, 84s; 1 to 1½ cwt. – HODGSON BROTHERS.

Newport, Wednesday. Average supply, good demand. Quotations:—Caerphillies, 56s to 60s; fancy dairies, 62s to 64s; truckles, 56s to 60s; doubles, 48s to 52s; Cheddars, 56s.

BUTTER.

Tuesday.—Bedale: 1s 6d to 1s 7d per roll of 24oz. Gainsborough: 1s 3d to 1s 6d per lb. Settle: 1s to 1s 1d per lb. Sheffield: 1s 3d to 1s 4d per lb. Spalding: 1s 1d to 1s 2d per lb. Stone: 1s 2d to 1s 3d per lb.

Wednesday.—Barnsley: 1s 3d to 1s 4d per lb. Boston: 1s 1d to 1s 3d per lb. Colne: 1s 2d per lb. Goole: 1s 2d per lb. Hereford: 1s 2d to 1s 4d per lb. Keighley: 1s 3d per lb. Kirbymooraside: 11d to 1s per lb. Knaresborough: (wholesale), 1s 6d to 1s 8d; ditto (retail), 1s 7d to 1s 9d per roll of 24oz. Louth: 1s 1d to 1s 2d per lb. Market Drayton: 1s 1d to 1s 2d per lb. Market Weighton: 1s 1d per lb. Masham: 1s 4d to 1s 5d per roll of 24oz. Northallerton: 1s 6d to 1s 7d per roll of 24oz. Stockton: 1s to 1s 3d per lb. Whitby: 1s per lb. Worksop: 1s 4d per lb.

Thursday.—Brigg: 1s 1d to 1s 2d per lb. Bristol (Canadian creamery): 106s to 107s per 112lb. Dairy butter, 92s to 94s. Driffield: 1s per lb. Kidderminster: 1s 2d per lb. Penistone: 1s 3d per lb. Ripon: 1s 6d to 1s 8d per single roll of 24oz. Scarborough: 1s 2d per lb. Wetherby: 1s 2d to 1s 4d per lb.

Friday.—Chester: 1s 2d per lb. Crewe: 1s 2d per lb. Derby: 1s 2d per lb. Easingwold: 1s 2d to 1s 3d per lb. Grimsby: Choicest Danish, 120s to 124s per 112lb, Dutch, 110s to 115s; Canadian, 100s to 110s. Helmsley: 11d to 1s per lb. Leeds: Danish, 116s to 124s per 112lb; Irish creameries, 102s to 106s; York lump, 15s to 16s per stone; ditto long rolls, 1½lb, 1s 0d to 1s 1d; fresh butter in 1lb prints, 1s 3d to 1s 4d per lb. Leyburn: 1s 8d to 1s 9d per roll of 24oz. Lincoln: 1s 2d per lb. Otley: 1s 6d to 1s 8d per roll of 24oz. Sandbach: Best makes, 1s 3d per lb. Stockport: 1s 3d per lb. Whitchurch: Best, 1s 1d to 1s 2d per lb.

EGGS.

Tuesday.—Bedale: 7 for 1s. Gainsborough: 8 for 1s. Settle: 8 or 9 for 1s. Sheffield: 8 or 9 for 1s. Spalding: 8 for 1s. Stone: 7 or 8 for 1s.

Wednesday.—Barnsley: 6 or 7 for 1s. Boston: 6 or 7 for 1s. Colne: 2s 8d per lb. Goole: 8 for 1s. Keighley: 6 for 1s. Kirbymooraside: 8 or 9 for 1s. Knaresborough: 7 or 8 for 1s. Louth (wholesale): 11 for 1s. Market Drayton: 7 or 9 for 1s. Market Weighton: 9 or 10 for 1s. Masham: 8 or 9 for 1s. Northallerton: 6 or 7 for 1s. Stockton: 6 for 1s. Whitby: 7 or 8 for 1s. Worksop: 3s per score.

Thursday.—Brigg: 8 or 9 for 1s. Driffield: 11 for 1s. Kidderminster: 7 for 1s. Penistone: 8 for 1s. Ripon: 7 for 1s. Scarborough: 8 for 1s. Wetherby: 6 or 7 for 1s.

Friday.—Crewe: 6 and 7 for 1s. Derby: 6 for 1s. Easingwold: 7 or 8 for 1s. Grimsby: Austrian, 6s 6d to 7s 8d per 120; Russian, 6s 3d to 8s; Canadian, 6s 5d to 8s; Swedish, 11s 6d to 12s per 120. Helmsley: 8 or 9 for 1s. Leeds: Yorkshire, 16s 6d to 17s per 120; Irish, 13s to 14s; Danish, 9s to 11s; Austrian blues, 7s 6d to 8s 6d; ditto reds, 6s 3d to 6s 9d. Leyburn: 8 for 1s. Lincoln: 8 or 9 for 1s. Nantwich: 6 or 7 for 1s. Otley: 6 or 7 for 1s. Runcorn: 5 or 6 for 1s. Stockport: 5 or 6 for 1s. Whitchurch: 7 and 8 for 1s.

COLONIAL DAIRY PRODUCE.

London, Friday. — Butter. — The effect of depressing climatic conditions and the action of buyers supplying their wants from butter in cold store rather than from the open market, has resulted in a fall in prices of Australian and New Zealand butter of about 2s per cwt, and 108s to 110s are now the prices for "choicest" new season's butter of both classes, while "finest" makes 98s to 102s. The values of last season's cold stored butter are about 6s to 8s per cwt below above quotations. There is a considerable quantity of cold stored Canadian, Russian, and other kinds on the market, and until these goods pass into consumption we shall not have brisk markets. The home make still continues large for the time of year, and small country towns are taking little imported butter. The Copenhagen official quotation has this week been lowered by three kroner, and now stands at 102 kroner against 100 kroner last year. There is a very great shortage just now of really "choicest" Danish, owing to the change of fodder of the cows. In the northern markets prices fell 3s to 4s per cwt this week, but "choicest" Danish still brings 118s to 120s. Cheese.—There has been a very slow demand for Canadian, and prices are a bit easier, especially for "summery" goods, which may be had for 48s to 50s. The first half of August make brings 52s to 53s, while late August's fetch 54s to 55s. There is not many September's offering, but the values of these are 56s to 58s.—W. WEDDEL AND CO.

HOPS.

Canterbury, Saturday.—A fair amount of business has been done during the week, but the demand is not quite so keen, and for copper hops a shilling or two less money has occasionally been accepted. East Kents continue to be quoted up to seven guineas, and Mid Weralds and Sussex to six guineas per cwt.

Worcester, Saturday.—Growers have practically cleared out their new hops, and those at market to-day were mostly offering yearlings. A good demand prevails for all classes, and both new and yearling descriptions sell readily when offered at recent rates. During the week 120 pockets of new and 93 pockets of yearlings have been weighed at the public scales.

Worcester, Saturday.—A fair trade continues to be done in hops on this market, where growers are inclined to accept reasonable prices for the unsold portions of their growths, but in some instances they decline to sell, believing they will see higher prices. The demand for yearlings still continues, and several lots have changed hands at an advance on late rates. 118 pockets have passed the public scales to-day, and 311 during the week, making a total of 15,588 pockets weighed up to the present.—PIERCY AND CO.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The rainfall of the past week has been fair without being excessive, and farmers have prosecuted their labours of ploughing and drilling with due diligence. The lifting and storing of roots is put off, for the very high temperature for the time of year has led to hopes that they would go on growing and increasing in bulk for another fortnight. Situated as we all are on a small island, where weather changes of the most radical description may reach us at six hours' notice, we cannot regard this policy as very wise. At this late date in the year severe frost may be upon us at any moment, and then the losses on roots still in the soil would indeed be heavy. Wheat threshings have fallen off, the close air and prevailing dampness having been opposed to all labours of the flail. Some old wheat is still reaching the country markets, but very little of it gets to London, which has recently been showing meanness in its price bids, with the result that county centres, such as Maidstone, Guildford, Chelmsford, Ipswich, and Norwich, have been attracting the choicer samples. The price of good old wheat is about 31s. per 504lb. red, and 32s. for white, and there are a few 512lb. samples offering, for which an extra 1s. per qr. is cheerfully paid in the country.

Seed wheat has been in fair request at most of the big country exchanges, a sign that wheat sowings are still in active progress. The dearer pedigree sorts do not get the sales we should like to see, but three to four guineas per qr., the price asked, is prohibitive to most farmers. The agricultural societies which provide their subscribers with the services of pedigree bulls and stallions for their cows and mares might well consider their cereal-growing subscribers also and provide the latter with pedigree seed corn at the price of the ordinary good market sample. Three sorts of good wheat being a good deal bought just now for seed are "White Fluff," "Golden Drop," and "White Herefordshire." The famous "Squarehead" and "Red Chaff" types fully hold their own.

Reports to hand from Argentina are fairly unanimous in stating that the wheat crop to be reaped next month will not equal that of last season, despite the increased area under cultivation. On the other hand, the linseed crop will probably be very fair, and 2,000,000qrs. of that oilseed may be available for exportation. The growing crops in Australia promise no bumper yields, but a fair average should be obtained in all states save Queensland.

The prices now making on our markets for twelve leading staples per ton show that Persian barley and Russian oats are the best bargain for feeding, so far as quantity for a given sum goes :—

	Per ton. s.	d.
Good red English wheat	140	0
Persian barley	102	0
English rye	120	0
Russian rye	114	3
Light Russian oats	103	0
Heavy Scotch oats	145	0
Best maple peas	188	0
Ordinary dun peas	140	0
Egyptian beans	135	0
Egyptian cottonseed	140	0
American feeding flour	115	0
Good household flour	200	0

The finer types of feeding stuffs seem to centre in a price of about £7 per ton, which commands not only heavy oats, dun peas, Saida beans, Egyptian cottonseed, and, we may add, decorticated American cottonseed, good home-grown wheat, but also nominally as "chicken wheat," a good deal of sound and good stuff is being fed to live-stock and birds.

The quantity of wheat now on passage to the United Kingdom is made up as follows :—

	Qrs.
From Russia	105,000
„ America	315,000
„ California	855,000
„ Australasia	230,000
„ Argentina	250,000
„ Other Countries	15,000
Total Nov. 10, 1900	1,770,000
„ „ 1899	1,515,000
„ „ 1898	1,167,000
„ „ 1897	1,945,000

Of flour 412,000 sacks are on passage against 360,000 sacks a year ago, and 450,000 sacks two years since. Supplies of spring corn on passage are as follows :—

	Maize. Qrs.	Barley. Qrs.	Beans. Qrs.
1900	670,000	535,000	14,000
1899	1,100,000	590,000	16,000
1898	665,000	620,000	17,000
1897	[illegible]	[illegible]	[illegible]
1896	1,120,000	910,000	17,000

The American visible supply of wheat at depots both Pacific and Atlantic is thus cabled :—

	Qrs.
Nov. 10, 1900	10,600,000
„ 1899	11,035,000
„ 1898	1,695,000

The stocks of wheat in Russian ports on Nov. 1 were 1,700,000 qrs. against 1,500,000 qrs. a year previously.

The supplies of wheat at the markets continue to exceed current requirements, so that stocks are increasing in the warehouses. Last week's figures are as follows :—

	Qrs.
Foreign wheat	407,000
„ flour	169,000
Total	576,000
English wheat	122,000
Supplies : Total	698,000
Wants : „	567,000
Surplus	131,000
Stocks, November 1	2,877,000
„ „ 8	3,008,000

The sales of English wheat for October are thus estimated :—

	Qrs.
October, 1900	707,000
„ 1899	797,000

Estimates under this heading always vary, as every authority differs from every other in the precise allowance to be made for the 304 markets (out of the 500) which send no returns. But there is no doubt that the sales have been 10 to 15 per cent. smaller this season than they were last year.

Nett imports of breadstuffs for October are officially returned as follows :—

	Qrs.
October, 1900	2,310,770
„ 1899	1,987,800

This excess has told against trade, and stocks are substantially increased on the month at all the leading ports.

In the flour trade activity of late has been mainly directed to by-products such as fine middlings, good bran, and wheat germ meal. Of fifteen leading patents and types offered at Mark Lane the following grading is practicable, the divisions being into high-class, good medium, and feeding :—

AMERICAN FLOUR.

First Grade. 24s. to 26s.	Second Grade. 20s. to 22s.	Third Grade. 14s. to 16s.
Golden Lily.	Iron Duke.	Phœnix.
Washburn's.	White Blossom.	Violet.
Star.	Nicollet.	Polo.
Gold Medal.	Manhattan.	—
Briggs's.	Good Hue.	—
Pillsbury's.	—	—
Morrison's.	—	—

There is a satisfactory choice among the really fine types, but buyers have not been at all eager to improve the occasion. November is dull enough as a market period without a strike of lightermen to choke off purchasers through the inability of importers to promise a reasonably prompt delivery. A meeting was held at Mark Lane on Thursday to consider the situation, and it was resolved by an overwhelming majority to promote a Bill in Parliament. The present arrangements include a host of needless technicalities and restrictions, and unless a change is made the trade of London as a port is bound to suffer very seriously.

The demand for maize, feeding barley, and for light oats has been fair, but not brisk.

The maize trade is in a peculiar position. Everybody knows that by March next this cereal will be obtainable at a florin or so under present prices, but in the meanwhile there is a falling off of 430,000 qrs. in the supply on passage as compared with November 10, last year, and it is an exceedingly moot point whether between the end of November and the end of January, a period of two winter months, the holders of 1899 maize will not be able to obtain a rise in prices. They could probably clear their winter stocks before November was out if they would "split the difference" between old and new crop prices, and accept 1s. off the terms now quoted. But as they mostly hope to get more money instead of less and to have time to clear before new crop arrivals tumble in, the situation becomes interesting.

The imports of spring corn included 167,000 qrs. of barley, 70,000 qrs. of oats, 53,000 qrs. of linseed, and 218,000 qrs. of maize. The very small supply of oats has to a certain extent helped that trade, but its effect has been a good deal reduced by the large stores of Russian and American existing in the leading granaries.

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

The milder and wet weather was against business to-day in all staples. Foreign wheat was a fairly active trade, with 30s. to 31s. made for Petersburg, 29s. to 30s. hard Taganrog, and 31s. to 32s. for American Red Winter, but English sorts were in less satisfactory condition, and moved off slowly in consequence. Holders would not accept less money than formerly. Malt was a fair trade at 40s. for best English and Californian, 30s. to 32s. for black English, and 34s. to 34s. 6d. for crystallised. New English oats fetched 20s. for fine winter and 19s. for Tartary, but the demand was strongest for old oats, which made 21s. to 23s. per 336lb. for winter and 20s. to 21s. for Tartary. Maize was a good retail trade at fully previous quotations, and sometimes 3d. more money was paid. The trade in malting barley was dull, but feeding sorts rather favoured sellers. Beans declined 1s. both for winter and pigeon types of English, but Königsberg were 1s. dearer, and New Zealand sold well at 31s. to 35s. per quarter. Syrian dari at 25s. to 26s., and Canadian buckwheat at 28s. to 29s. had attention.

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

THE MARKET CLOSED DULL UNDER WEATHER INFLUENCES.

THE FLOUR TRADE.

MARK LANE, Nov. 12th.

The flour sales were not bad considering the open weather. Households and No. 1 were in fair request at 24s. to 24s. 6d., and the price of Whites was firm. No. 2 Households declined 6d. per sack, being rather pressed on sale at 22s. Country flour was also the turn in buyers' favour, but holders did not press sales. Kansas Bakers' flour was freely offered at 18s. to 20s. per sack, but without reducing the selling value of good patent flour from the same district. Very fine Canadian flour made as much as 25s. 6d. per sack, but Australian was lower on the week with 22s. to 23s. accepted for Patent, and 19s. to 20s. for Ordinary. American ranged from 24s. to 26s. for the finer patents. Wheat whole meal declined about 2s. 6d. per ton, but germ meal was dearer to buy. Fine middlings were often held for 5s. advance. Maize meal declined 2s. 6d. to 3s. 9d. per ton, but cones and flour from Indian corn were steady. Bean and pea meal fell 10s. per ton in some instances. Rice meal at 90s. to 95s. was not much altered.

LONDON TERM MARKET.

This market is held twice a day, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made :—

WHEAT.—		Nov.		Dec.	March
		s.	d.	s. d.	s. d.
Nov. 5	11 a.m.	6	7 ..	6 7 ..	6 10
	4 p.m.	6	6 ..	6 7 ..	6 10

	4 p.m.	6	7 ..	6 8 ..	7 0
Nov. 9	11 a.m.	6	7 ..	6 8 ..	7 0
	4 p.m.	6	7 ..	6 8 ..	7 0
Nov. 10	11 a.m.	6	8 ..	6 9 ..	6 11
To-day	11 a.m.	6	8 ..	6 9 ..	6 11

Maize, new crop for February delivery, was offered at 3s. 11d. per cental.

The deposit required from members of the Term Market has been fixed at £50 *minimum* and 1s. per quarter margin on any purchases above 1,000 quarters.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

The Term Market (while the "Baltic" is rebuilding) is temporarily situated at the Great Eastern Hotel, No. 190, Bishopsgate Street, ground floor.

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough High-street, London, S.E., report: The market during the past week has been steady, several important growths have changed hands, but the general trade must be quoted quiet. Prices remain firm.

GRAIN AND FLOUR FACTORS' REPORTS.

Flour: There has been a firm tone in the trade to day, and a fair business has been done at the full prices of this day week.—T. S. MEDILL, Mark Lane.

The trade for milling offals remains unchanged from last Monday. There is some difficulty in getting stuff worked, in consequence of the strike of the lightermen.—RICHARD DOGGETT, Mark Lane.

There is still an absence of business in our markets. Nothing is wanted for present sowing, while prices of seeds for spring use are too high a level to tempt much buying at present. We have no change to quote in any article. Canaryseed is talked higher, but speculators are shy of this article. Blue peas and haricots are very quiet.—JOHN PICARD AND CO., Mark Lane.

Wheat moderate arrivals, trade firmer, and prices fully supported. Flour unchanged. Maize 3d. per qr. dearer. Barley and oats fully as dear.—COVENTRY, Mark Lane.

Wheat finds an improved demand to-day, and prices can be written 3d to 6d higher on the week. Flour unchanged, fair trade. Oats slow and unaltered. Maize 3d up. Barley unchanged, quiet.—W. P. WOOD AND CO., Mark Lane.

Offals: Bran further declined about 2s. 6d. per ton with the continued mild weather, temperature reaching 60 deg. in shade. With colder weather now supervening better demand anticipated. Pollard in small demand, and unchanged.—GREENHILL BROTHERS, Belfast, November 10.

Flour.—The market is fairly firm, but buyers do not purchase at all freely, evidently believing an advance is impossible. Grain.—Indian corn being scarce on spot is selling well at 3d. per boll advance. Peas are plentiful and 3d. cheaper. Beans quiet. Oats steady and unchanged. Barley dull and in buyers' favour. Mill stuffs.—Bran and thirds rather quiet.—MCKINNON and MCDONALD, Glasgow, November 10.

Wheat firm with a fair business at full prices. Flour steady with a small consumptive demand at late rates for foreign. The Liverpool Millers' Association make no change in the minimum price of bakers. Maize has a fair trade, and is steadily held at ½d. per cental below last Tuesday. European almost exhausted and firmly held at quotations. Plate also getting into smaller compass with a fair trade at quotations. Barley dull and neglected for malting, at 3d. to 1s. per qr lower. Feeding also has a slow trade at unchanged prices. Beans are dull and lower, with little or nothing doing, foreign sorts showing a decline of 3d. to 9d. per qr from Tuesday. Peas quiet at ½d. per cental decline. Oats firm, but quiet at quotations for English. Foreign sorts have a moderate trade with less offering at unchanged prices. Oatmeal only a moderate inquiry, prices being unchanged from last market day. Oilcake firm with a fairly good demand at about late rates.—ROSS T. SMYTH, Liverpool, November 10.

THE BALTIC, MONDAY, 1 p.m.

STATE OF TRADE.

There is no disposition to accept less money for wheat cargoes, either for near or future delivery. Maize is firm for round, dull for flat. Oats are tending higher for anything to arrive in December. Beans are quiet. Oilseeds favour buyers.

BUSINESS DONE.

WHEAT.—Walla Walla, 29s 6d, arrived; Californian, 30s 0d, due; Oregon, 30s 0d, due; Australian, 31s 3d, Feb. shipment new crop; Azoff, 31s on passage; No. 2 Hard winter, 29s 6d, just sailed; Manitoba 1899 crop, 32s 3d, prompt shipment; No. 1 Northern, 31s 9d, prompt shipment.

MAIZE.—American, 20s, prompt shipment; Bessarabian 22s 3d prompt shipment.

BARLEY.—Californian, 26s 9d, on passage; Azoff, 19s, on passage.

OATS.—Canadian, 14s 0d, on passage; White Lebau 13s 3d, prompt shipment.

BEANS.—Saida, 29s 6d, prompt shipment.

PEAS.—Morocco, 28s 6d, prompt shipment.

LINSEED.—Calcutta, 48s, April shipment, new crop; Azoff, 57s, on passage; Argentine, 50s, January shipment; Petersburg, 55s, arrived.

COTTONSEED.—Egyptian, £6 17s 6d, arrived; Egyptian, £6 16s 3d, prompt shipment.

PROVISIONS.

London, Monday.—The arrivals from Ireland last week were 3,371 bales bacon, and from foreign ports 5,187 bales bacon. There was a marked improvement in the demand for bacon last week, and the market recovered some 2s. 3s. from the lowest current rates. Arrivals were well sold, and the market closed firm. Quotations on the open market were:—Irish, 54s. 56s. up to 58s.; Danish 52s. 54s. up to 58s.; Canadian, 48s to 54s. The butter market generally was very quiet, and all holders were anxious sellers. Danish, particularly slow, 116s, 118s; Canadian, 100s, 104s; Colonial, 100s, 108s. Lard, a firm market, Irish, 58s, 65s. American pails, 40s, 41s.

CATTLE.

Metropolitan Market, Islington.

Monday, Nov. [illegible]

	British	Total	[illegible]
Beasts	1,749	[illegible]	1,490
Sheep and lambs	5,899	5,899	[illegible]
Calves	10	[illegible]	[illegible]
Pigs	80	[illegible]	[illegible]
Milch cows	30	30	[illegible]

Quotations per 8lbs (sinking the offal).

ENGLISH.	Inferior.	Second.	First.
	s. d.	s. d.	s. d.
Beasts	2 10 —	4 2 —	4 10
Sheep	3 2 —	[illegible]	[illegible]
Lambs	5 2 ..	5 6 ..	6 0
Pigs	2 6 ..	4 0 ..	4 10

Milch cows, per head, £[illegible] to £[illegible]

British arrivals include as follows:—Scotland 6; Eastern Counties, 44; Midland, Home and Western Counties 1,484; Devon, 45; Ireland, 132.

We note to-day a short supply of beasts [illegible] quality, for which there was a ready sale, [illegible] from being well maintained; other qualities [illegible] to easier rates being former. On the other hand [illegible] ing cow fat bulls and rough cattle met a [illegible] sharp decline in value. Notes from the provinces [illegible]

The following are top quotations per 8lb. (sinking the offal):—

	To-day.	Nov. 13th, 1899.
Scotch	4s. 11d to 5s 0d ..	[illegible]
Devons	4s 8d to 4s 10d ..	[illegible]
Herefords	4s 8d to 4s 10d ..	4s 0d to 4s 8d
Norfolks	4s 8d to 4s 10d ..	[illegible]
Runts	4s 8d to 4s 9d ..	4s 6d to 4s 8d
Lincolns	4s 9d to 4s 6d ..	[illegible]
Irish	4s 2d to 4s 4d ..	4s 0d to 4s 2d
Fat cows	3s 6d to 3s 8d ..	[illegible]

To-day's supply, compared with Monday last [illegible] more, and consisted chiefly of Downs and halfbreds. Wethers sold steadily at last week's quotations. Ewes, being in good request and short in number, made 2d per 8lb. more money, and met with a freer sale. A few lambs were penned, and found buyers, but there was a lack of competition. The arrivals included 1,050 from the Eastern Counties, 230 Scotch, and 950 Irish.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class penned:—

	To-day.	Nov. 13th, 1899.
7½ to 8-stone Downs	5s 10d to 6s 0d ..	5s 8d to 5s 10d
9-stone ditto	5s 8d to 5s 10d ..	5s 6d to 5s 8d
10-stone half-breds	5s 4d to 5s 6d ..	5s 2d to 5s 4d
12-stone Lincolns	5s 0d to 5s 2d ..	4s 10d to 5s 0d
10-stone Irish	5s 0d to 5s 2d ..	5s 0d to 5s 2d
10 stone Down ewes	4s 2d to 4s 4d ..	4s 2d to 4s 4d
11-stone half-bred ditto	3s 8d to 3s 10d ..	— to —
5-stone Down lambs	5s 10d to 6s 0d ..	— to —

Calf trade nominal.

There was a full supply in the pig market, where trade was firm both in regard to tone and value. The best small pigs were quoted at 4s 10d per 8lb, sinking the offal.

London Central, Monday.—Heavy supplies, trade slow. Beef: Carcases, 3s 8d to 3s 10d; hindquarters, 4s 2d to 4s 6d; roastings, 5s to 5s 4d. Sheep: Ewes, 3s to 3s 2d; wethers, 4s to 4s 2d; hindquarters, ewe, 4s 4d to 4s 8d; wether, 5s 4d to 5s 8d. Pigs, large, 3s 4d to 3s 8d; small, 4s to 4s 4d.

St. Ives (Hunts), Monday.—Beasts, 862; sheep, 360; pigs, 366. Beef, 7s 3d to 8s 6d; mutton, 7s to 9s 11d; pork, 6s to 7s 3d; sows 5s to 6s. Fat and store cattle good trade. Fat sheep good. Stores fair. Fat and store pigs good trade. Milch cows fair, £14 to £22.

FOREIGN CATTLE.

Deptford, Monday.—Beasts, 1,383. To-day's supply, compared with Monday last, showed an increase of 1,074, and consisted of 1,082 from the United States and [illegible] Canada, for which was of a fairly firm and steady nature both in tone and value, a practical clearance being made, though [illegible] up rather slowly. The best States beasts on offer to dress from 720lb to 760lb made 4s 3d for 8lb, offal given in. Second quality 3s 10d at which rates the best Canadians were quoted; middling descriptions of the latter 3s 6d to 3s 7d. No sheep on the market. The following were the numbers on offer on the corresponding day last year, with the current top rates:—Beasts, 1,345, 4s 2d to 4s 4d per 8lbs, to dress from 656lb to 720lbs; no sheep on the market.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., write that clover-seed continues inactive, all considerable [illegible] ments and speculative inquiries being also wanting. Meanwhile, quotations all round in the absence of business are consequently unchanged. Seed rye and winter tares are also neglected, but full prices, owing to a good demand and diminishing supplies, are asked for rapeseed, whilst as regards both brown and white mustard seed the manufacturers have already bought up the greater part of this year's crop. Canaryseed is gradually improving in both value and demand. The small quantity of Spanish seed that was recently available has now been taken off the market. There is no change in hempseed. Blue peas and haricot beans command former prices. A few choice handpicked longpod beans are now obtainable at moderate rates.

FEEDING STUFFS.

London, Monday.—Linseed Cake: Demand very limited, but short supplies keep the market [illegible] Weak ward position. Decorticated [illegible] Cotton cake unchanged. Linseed [illegible] at hand. La Plata, which will probably not arrive until early March, has fallen 3s per qr.

English linseed cake	£8 12 6	to	£8 15 0	ex mill
American Western linseed cake	7 17 6	to	8 0 0	ex quay
Russian oil cake	7 17 6	to	8 5 0	ex quay

Calcutta linseed in bags, per 41 lbs	[illegible]		—	house

—ROBT. AND JOHN HEWETSON, [illegible]

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in the West.

Business is marked by unwonted activity both in regard to fat and store stock, but more especially the latter. Barreners make considerably enhanced rates, some very forward bullocks as much as £33 per pair, ranging down to £22 or £24 for good serviceable beasts. Dairy beasts have hardly kept pace with other things, though they, too, continue to market very satisfactorily at from £17 to £20 or £21 apiece. In-calvers are likewise making good prices. Store sheep, despite the fact of those now selling being the "refuse" of most farms, bring capital prices, either for wintering or for promptly converting into mutton. Ewes range from 31s. to 46s. each. Fat stock keeps very buovant, good beef even more so than mutton. The former commands 10s. 6d. to 11s. 6d. for decent quality bullocks, and the latter 7¼d. to 8½d., the trade towards the close of the week exhibiting a slightly weaker feeling, except for fat lambs, which made up to 44s. 6d. at Blandford Fair on Thursday. But both veal and pork more than compensate for this decline by their exceptional firmness.

Trade in Ireland.

At Thursday's Dublin market trade was very dull. For prime bullocks there was a brisk demand, and sales were more easily effected than last week, but heifers did not go so well, while for rough cattle there was a slight fall even on last week's prices. The grass season being over, and prospects of feeding stuffs high, makes many sell off their cattle rather than keep them on to feed. The Duke of Leinster had a fine lot of bullocks on the market, which brought top price, viz., £24 a head. Best beef was worth from 52s. 6d. to 56s., second class from 46s. to 50s., other descriptions from 40s. to 44s. per cwt. Prime veal scarce, and worth 7½d. per lb. At a meeting of the Irish Cattle Traders and Stockowners' Association a statement was made that the Dublin victuallers complained bitterly that they had the greatest

Difficulty in Getting Good Veal,

and they ascribe the dearth to the great mortality of recent years amongst Irish calves, owing, it was stated, to the system of feeding on separated milk. Top rates of last week had to be given for really tip-top mutton, and the best class of shipping hoggets moved freely enough, but for other descriptions of sheep business was very dull. Prime wether mutton worth from 6½d. to 6¾d. per lb.; ewe, 5d. to 6d.; and inferior sheep, 4½d. to 5d. The market of dairy cattle was a very small one, and really good cows were conspicuous by their absence. Prices were stiff, as there were plenty of buyers for anything of good quality. Prime springers were worth as much as from £22 to £24, and new milch cows from £18 to £21. In the pig department there was a large supply, which dealers took advantage of, and a reduction of from 2s. to 3s. per cwt. on last week's rates had to be made to effect sales. Best pigs, 40s. to 42s. per cwt.; inferior from 30s. to 36s. per cwt.

LONDON.

London Central, Wednesday.—Fair supplies, but trade slow. Pork, however, ruled firm and dearer. Arrivals of beef included 50 tons Scotch, 650 Liverpool sides, 1,500 hindquarters, and 750 forequarters American refrigerated. Quotations:—Beef, Scotch, short sides, 4s 4d to 4s 8d; long, 4s 2d to 4s 4d; English, 4s to 4s 2d; American, Deptford killed, 3s 8d to 3s 10d; Liverpool, 3s 8d to 3s 9d; American refrigerated hindquarters, 3s 6d to 3s 10d; forequarters, 2s 6d to 2s 9d. Mutton: Scotch, 4s 4d to 4s 8d; English wethers, 4s to 4s 4d; ewes, 3s 2d to 3s 6d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s 8d to 5s; Dutch, 4s to 4s 4d; and Irish, 4s per 8lb.

London Central, Friday.—Good supplies, but trade remained slow; best meat, however, ruled firm. Arrivals of beef included 85 tons Scotch, 380 Liverpool sides, 3,500 hindquarters, and 2,000 forequarters American refrigerated. Quotations: Beef, Scotch, short sides, 4s 4d to 4s 8d; long, 4s 2d to 4s 4d; English, 4s to 4s 2d; American, Deptford-killed, 3s 8d to 3s 10d; Liverpool, 3s 8d to 3s 9d; American refrigerated hindquarters (best), 3s 6d to 3s 10d; seconds, 3s 2d to 3s 6d; forequarters, 2s 7d to 2s 9d. Mutton: Scotch, 4s 4d to 4s 8d; English wethers, 4s 2d to 4s 6d; ewes, 3s 2d to 3s 6d; Canterbury, 2s 8d to 2s 10d; Wellington, 2s 6d to 2s 8d; Sydney and River Plate, 2s 5d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s 2d to 4s 6d; Dutch, 3s 8d to 4s; and Irish, 3s 6d to 3s 8d per 8lb.

Islington, Thursday.—Good supply of beasts, chiefly consisting of fat bulls and rough cattle. Trade quiet at about late rates. Small number of sheep met rather quiet sale at late rates as far as wethers were concerned, but ewes cleared early to a good demand at 2d per 8lb advance. 7½-stone to 8-stone Down wethers, 5s 8d to 5s 10d; 9-stone ditto, 5s 6d to 5s 8d; 10-stone, 5s 4d to 5s 6d; 10 stone Down ewes, 4s to 4s 2d; and 11-stone half-bred, 3s 8d to 3s 10d. Calf trade ruled quiet, and quotations nominal. Pigs in good supply favoured buyers. Neat small, 4s 4d to 4s 6d per 8lb, to sink. Total supplies, 180 beasts, 460 sheep, 20 calves, 230 pigs, and 5 milch cows.

COUNTRY.

Ashford, Tuesday.—Beef trade slow at last week's prices, best animals making 11s to 12s per score; and secondary beasts, 10s to 11s. Mutton, after a week's rise, receded to its old level, and small wethers did not go above 5s 2d per stone. Larger wethers made 4s to 4s 8d; and barrens, 3s 4d to 3s 8d. Veal fetched 5s 4d per stone. Pork was 6d per score cheaper on the week, roasters selling at 11s to 11s 6d per score.

Basingstoke, Wednesday.—At Raynbird and Sons sale-yard there was a large attendance of buyers to meet a supply of 33 fat beasts, 77 calves, 567 fat sheep and lambs, 351 pigs, and 59 head of store cattle, which realised the following prices:—Fat beasts, £14 5s to £24; fat calves, 80s to £5 2s 6d; small, 20s to 55s; fat wethers, 43s 6d to 55s 6d; fat ewes, 29s 6d to 36s 6d; fat lambs up to 27s; fat hogs, 68s to £5 5s; fat porkers, 42s to 60s; small, 30s to 41s; store pigs, 10s 6d to 20s; dairy cows, £9 to £21 5s. A moderate supply of fat beasts as regards numbers included some prime quality Devon steers, and useful Shorthorns and Galloways. The business done was chiefly at late rates. Prime Devon steers made up to £24; Shorthorn ditto, £19; heifers, £16 10s; cows, £14 10s; Galloway steers, £18 15s; ditto heifers, £14 10s; etc. A fair show of fat sheep and fat lambs were mostly cleared, best qualities maintaining late rates, but inferior lots and anything below the best were worse to sell and made less money. The damp, warm weather is adverse to the trade. Prime quality Hants Down wethers and young ewes made 43s 6d, 44s, 45s, 55s 6d, 46s 6d, 48s, 43s, 51s; ten-months-old ditto, 40s, 36s, 47s, 46s, 43s 6d, 50s, 47s 6d, 35s, 49s, 52s 33s 6d, 34s, 39s, 45s, 39s, 44s 6d; old ewes, 31s, 36s, 28s, 38s, 35s, 36s 6d, 29s 6d, 33s, 32s 6d. Exmoor ewes, 27s; rams, 47s, 36s, 41s; three-months-old sucking lambs, 25s, 26s, 22s. Exmoor lambs, 27s. Dairy cows and heifers of all descriptions met a most ready sale, the supply being inadequate to the demand. Store cattle were cleared with a trifle better enquiry. Fat calves with a small entry met a fair trade. The trade for fat hogs is not quite so good. Fat porkers are wanted, meeting a brisk trade throughout. Store pigs sold briskly at an advance on last week's quotations. Fat sows are meeting a better trade and selling readily. Ruling values:—Pure Devon and Scotch beasts, 7d to 7¼d; ditto Shorthorns, 6d to 6¾d; bulls, cows, and inferior beasts, 5d to 5½d per lb; best quality fat sheep, 8¼d to 8¾d; second ditto, 7d to 7¾d; old ewes, rams, and inferior sheep, 5½d to 6d; choice fat sucking lambs, 8d to 9d per lb; fat calves, 6¾d to 8¼d per lb; fat hogs up to 9s; porkers up to 11s per score.

Boston, Wednesday.—The market was quiet. There was a nice show of young stores, but in-calvers were not very numerous, and there was an upward tendency in price. Best beef, 7s 3d to 7s 6d; and cow beef, 6s 6d to 6s 9d per stone; strong stores, £13 to £15; second quality, £7 to £10; in-calvers £18 to £22; heifers, £16 to £18 10s; calves, 60s to 65s; wether mutton, 7½d to 8d; ewe mutton, 5d to 6d per lb. A good show of store lambs at 34s to 38s; strong shearling sheep, 48s to 50s.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs	2½ in. and under	8s 6d
Under 10 sc 10 lbs	Not exceeding 2½ in.	8s 0d
Under 11 sc 10 lbs	Not exceeding 2¾ in.	7s 3d
Under 12 sc	Not exceeding 3 in.	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND CO., Limited, Calne, Wilts.

Cambridge, Monday.—The stock exhibited for sale at this market and the prices obtained were as follows:—Beasts, 1,212; sheep, 728; pigs, 409; horses, 12. Beef, 7s to 7s 9d per stone; mutton, 4s to 5s 8d; pork, 6s to 6s 6d. A large show store beasts, and nearly all cleared. Fat beasts a large supply, prices not quite so good. Fat sheep a fair show, trade not so good. Stores, only a few lots to hand, all cleared. Fat pigs a larger show and prices not so good. Stores a fair trade. Hay, straw, and roots short supplies.

Canterbury, Saturday.—There was rather more stock offering, the supply consisting principally of bullocks. Ewes made from 31s to 33s per head, ewe tegs from 37s to 42s 6d, and rough working tegs from 30s to 33s. Bullocks sold slowly, owing to the high prices asked. Trade in them was done at £11 10s to £14 15s.

Carlisle, Saturday.—About 300 head of Irish store cattle were exhibited, the greater part being good heifers for wintering purposes, and the remainder excellent polled bullocks. The attendance was small, and trade quiet. Heifer stirks realised about £7 10s; small two-year-olds, £6 10s to £8 10s; best specimens, to £16 10s; polled bullocks, to £15 10s; young pigs a small show, prices to 24s.

Derby, Tuesday.—There was an average attendance. Beasts fairly plentiful, and demand moderately brisk. Mutton unaltered. Beef, 5½d to 6¼d; mutton, 7d to 8¼d per lb.

Dorchester, Saturday.—Milch beasts made a much faster trade than for some time back. Mutton and beef were in better request at dearer rates. Prices ruled as follows:—Best heifers and calves, £16 10s to £21; cows and calves, £14 10s to £17 5s; best fat heifers, £18 10s to £23; fat steers, £17 15s to £22 5s; fat cows, £19 to £21; fat bulls, £17 5s. Heifers and calves sold fully 30s dearer than a fortnight ago. Sheep.—Best down wethers sold from 43s to 46s; horn ewes, 38s; horn wethers, 3s.

Dublin, Thursday.—No alteration in the values of prime finished bullocks. Heifers rather neglected. Rough and inferior descriptions again met with a slow and irregular trade, and prices seem to show a weaker tendency. Sheep, owing to the large reduction in numbers, easier sold at last week's prices. Cattle (best), 30s to 32s 6d per cwt; other descriptions, 25s to 29s per cwt. Mutton, 5½d to 6¾d per lb; extreme, 7d per lb.—GANLY, SONS AND CO.

Dumfries, Wednesday.—Good supplies, with a numerous attendance of buyers. Strong demand, at late currencies. Crossbred bullocks, to £22; shorthorn bulls, to £22; crossbred cows, to £17; Highland bullocks, to £22; Galloway cows, to £13; Galloway heifers, to £13 15s; Cheviot ewes, to 30s; black-faced ewes, to 25s; lambs, to 30s each.

Edinburgh, Wednesday.—There were lighter supplies of store stock. Buyers were few. Polled bullocks sold to £14; shorthorn cows, to £26 10s; Ayrshires, to £17 15s; half-bred sheep, to 38s; Cheviots, to 34s; grey-faced, to 36s; half-bred lambs, to 25s.

Glasgow, Wednesday.—Cattle in larger supply, but sheep smaller. Trade quiet, as the weather is unfavourable; values nominally steady. Top Scotch cattle, 66s to 68s; secondary, 60s to 62s; top Irish, 58s to 60s per cwt. Top mutton, 8d to 8¾d; secondary, 7d to 7¾d per lb. Dead meat quiet; mutton easy; good meat steady; best States beef, 5¾d; home, 6d; Canadian, 5¾d to 5½d per lb.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 796, calves 57, sheep and lambs 917, pigs (fat and sows) 29, sucking pigs 45, pigs (stores, not more than ten) 269, pigs (stores, more than ten) 73, horses 8, colts 3.

Ipswich, Tuesday.—Messrs. Robert Bond and Sons report an average supply of fat cattle, which consisted mostly of yard-fed animals, for which there was a sharp trade, up to £25 5s. Calves were not numerous; the best for weaning made up to 57s. Fat sheep were in demand, without alteration in value. The trade for fat swine was excellent, heavy-weights being in request at more money. This being the annual autumn sale of Shorthorn bulls, about 40 animals were catalogued, including 30 from Cumberland, ranging from 10 to 17 months old, making from 20 to 25 guineas. Cows and heifers were in request, up to £30. A few lots of store cattle were offered; trade was slow and prices much the same. Numbers at sales and market:—Beasts 705, sheep 1,381, calves 31, swine 1,529, horses 41.

Leicester, Saturday.—Larger supplies of stock in good condition. Fair attendance, and trade steady at firm prices. Milch cows made £16 to £24 per head. Bullocks, £10 to £16 per head. Calves flat.

Lincoln, Friday.—Trade slow at about rates of last week. Milch beasts, £11 to £20; store bullocks, £11 to £16; two-year-olds, £10 to £13; and young stock, £7 to £9.

Newcastle, Tuesday.—Large supply of cattle, and slow heavy trade all round. Numbers:—Cattle, 2,122; sheep, 5,804; calves, 59; pigs, 1,167. Prices (sinking the offal):—Beef, 5s to 8s; pork, 5s to 9s 6d per stone; mutton, 5d to 8d; veal, 5d to 8½d per lb.

Newport, Wednesday.—Brisk trade. Quotations:—Best beef, 6¾d per lb; seconds, 6¼d to 6¾d; wether sheep, 7¾d to 8d; cows, 5¾d to 6d; ewes, 6d to 6¾d; lamb, 8d; veal, 7¼d; porker pigs, 10s 6d to 10s 9d per score.

Norwich, Saturday.—The supply of store beasts here to-day was large; the demand was somewhat inactive, but previous rates were about maintained. Fat beasts, which were in moderate supply, made 7s 6d to 8s and 8s 3d per 14lb. Store sheep were not very freely offered; a good business was passing at fully former terms, hoggetts making 30s to 42s; and keeping shearlings, 40s to 46s per head. Fat sheep were quoted at 8s 6d to 9s and 9s 6d per 14lb.

Preston, Wednesday.—There was a fair attendance, and full supplies of both cattle and sheep, the latter being in excess of the demand. Calves went off slowly. Prices were practically unchanged all round. Beef, heifers, and bullocks, 5¾d to 6¼d; cows and bulls, 5d to 5½d; mutton hoggs, 7½d; tups and ewes, 5½d to 6¾d; lambs, 7d to 7¾d; calves, 5½d to 6¼d.

Romford, Wednesday.—An average supply of fat beasts, and trade a little better. Best animals made 4s 4d to 4s 6d, and middlings 4s to 4s 2d per stone. Calves in short supply, and trade a little better, at 5s 2d to 5s 4d per stone. Sheep in average supply, and trade about the same. Best sheep made 5s 6d to 5s 8d, and second quality 5s to 5s 2d per stone. A few store beasts on offer, and demand slow. Pig trade about the same. Small porkers made 4s to 4s 2d, and large hogs 3s 8d to 4s per stone.

Saffron Walden, Tuesday.—Sheep were an average supply, and met with a slow demand, prices having a drooping tendency. Fat ewes made up to 41s 6d; shearling wethers, 57s; hoggets, 48s 6d. Beasts were in short supply, and sold well. Shorthorns made up to £21 15s; and small Devons, £18 15s. Fat calves made less money, ranging from £2 3s to £3 15s. Weanels made up to 45s. Pigs were in short supply, and prices were advanced. Hogs made up to 81s; porkers, 37s 6d; stores, 27s 6d; and fat sows, £6 5s.

Salford, Tuesday.—There was a larger supply of cattle in market. Prime quality met with a fair demand at late full prices, but all others were irregular in price and bad to sell. The supply of sheep was smaller. There was a moderate demand for choice light weights, but medium and inferior met with a slow sale, and prices tended downwards. About the same number of calves on offer, for which there was a slow demand, and prices were lower. Quotations—Cattle, 5d to 6¼d; sheep, 6d to 8¼d; calves, 5d to 7¼d per lb. At market—Cattle, 2,874; sheep, 6,238; calves, 112; pigs, 96.

Sheffield, Tuesday.—About an average show of milch beasts, but only a very slow trade. Best lots, £20 to £22; secondary, £18 to £20.

Shrewsbury, Tuesday.—Sheep and calves firm at late rates, with a brisk trade for cows with calves, fat cattle, and pigs of all sorts. Quotations:—Beef, 6d to 7¼d; mutton, 6¾d to 8d; and veal, 6d to 8d per lb. Porket pigs, 9s 6d to 10s 6d; and bacons, 8s 6d to 9s 6d per score. Cows, with calves, up to £20 15s. Number offered:—775 cattle, 42 cows, with calves, 1,052 sheep and lambs, 76 calves, 55 fat, 163 porket, and 339 store pigs. Small supplies of cows, with calves.

Spalding, Tuesday.—A small show of beef, and slow sale. Top price was 7s 6d per stone; cows, 7s. There was a large show of store beasts. Useful stores, £13 to £15; young stock, £7 to £10. Cows and in-calvers dear. In the sheep market the mutton trade was not so good. Ewe mutton sold badly. Best Lincolns and half-breds made satisfactory prices.

Stockton, Wednesday.—There were on offer 239 cattle, 326 sheep, and 322 pigs. A smaller supply of best cattle than last week, and customers were few and trade slow at 7s 6d to 8s per stone, rougher kinds 6s 6d to 7s; young sheep, 8d; ewes, 6d; tups, 5d per lb.

Taunton, Saturday.—Small supply, very good attendance, and medium trade.

Thame, Tuesday.—The short supply of stock had a better effect upon trade, which showed an improvement. Beef made higher prices, and fat pigs met with a good inquiry. Mr. Bond's sale comprised 70 fat beasts, 100 fat sheep, 97 fat and weaning calves, and 128 fat and store pigs. Fat bullocks made £18 to £21 15s; fat heifers, £14 to £21 10s; fat wethers, 44s to 52s; ewes, 30s to 42s 6d; fat calves, £3 to £4 16s; cow calves, 28s to 63s; bull calves, 17s to 49s; fat pigs, 10s per score. Stores dearer.

Wakefield, Wednesday.—With larger supply of beef trade was slower. Best qualities 6¼d per lb, and other sorts, 5d to 6d. There were less sheep penned, and the rates as last. Small sheep 8d to 8¼d; strong, 7d to 7¼d; ewes and tups, 5d to 6¼d. Numbers penned:—Fat beasts, 1,718; sheep, 3,136.

Wolverhampton, Wednesday.—Beasts and sheep a fair supply; slow trade. Calves a small show; fair demand. Beef, 5½d to 7d per lb; mutton 6d to 8¼d per lb; veal, 6¾d to 8d per lb. Bacon pigs, 8s 9d to 9s per score; porkets, 9s 6d to 10s per score; sows, 7s per score.

Worcester, Saturday.—Moderate supplies of fat cattle, and quiet trade at late rates. Good entry of sheep with fair trade. Calves short supply and good demand. Brisk trade for pigs. Beef, 6d to 7d; mutton, 7d to 8d; ewes, 6d; veal, 7d to 8d per lb; pigs, 9s to 10s per score.

Worksop, Wednesday.—Good show of stock, and fair attendance of buyers, with trade fairly brisk, and no appreciable alteration in the quotations from last week. Best beef, which sold readily, made 7s 9d to 8s 3d per stone; secondary, 7s to 7s 6d. Sheep were also in good demand. Best wether mutton, 7d to 8½d; ewes, 5d to 7d per lb.

FOREIGN.

Deptford, Wednesday.—900 beasts, consisting of shipments from the States. Trade very slow, at 3s 10d to 4s 1d, exceptionally, 4s 2d per 8lb to sink the offal.

WOOL.

London, Friday.—Wool, English, per pocket of 240lb.—Fleeces, Southdown hoggs, £8 to £11 10s; half-bred hoggs, £7 to £8 10s; ditto wethers, £6 10s to £8. Kent fleeces, £6 to £7; Southdown ewes and wethers, £8 to £11 10s; Leicester ditto, £6 to £7. Colonial, per lb:—Victorian, fleece, superior, 1s 4d to 1s 5d; scoured, good, 1s 5d to 1s 6d; scoured, average, 1s 1d to 1s 4½; greasy average to fair, 10d to 1s 0½d; New South Wales, scoured, average, 1s 1d to 1s 2d; greasy average, 7½d to 8¼d; South Australian, greasy, average, 6d to 6¾d; New Zealand, scoured average, 1s 2d to 1s 3d; greasy, average, 7½d to 8d; Cape, scoured, superior, 1s 3½d to 1s 4d, fleece, average, 6¾d to 7½; greasy, average, 5d to 5½d; Natal, scoured, 1s to 1s 1d; greasy, average, 5½d to 6¼d; crossbreds, greasy, Victorian, good to superior, 9d to 10d. New Zealand, fine, 8½d to 10d; ditto, medium, 6¾d to 7¾d; ditto, coarse, 5½d to 6¼d.

Bradford, Thursday.—The market has derived a stronger feeling by reason of the political settlement in America, but quotations are without change. Merinos are, perhaps, better held, and all other sorts meet ready at Monday's prices. Mohair quiet, but firm. The yarn trade continues quiet in both departments, and there is no change in the piece trade.

Canterbury, Saturday.—Trade is very dull, and prices nominally remain at 6d per lb for Kent fleeces. Lamb wool, 4d; half-breds, 5d; Downs, 5½d to 6¼d; and locks, 2½d per lb.

Leicester, Saturday.—There is a slight improvement in the local wool market, a great disposition to buy, but no improvement in prices. Spinners keep well employed, except for fine yarns.

FEEDING STUFFS.

London, Thursday.—Linseed.—Owing to the report in the *Times* that the amount available for export from La Plata this season is likely to amount to 400,000 tons, buyers have become frightened, and have retired for the present, consequently limits are reduced. Calcutta to London finds sellers in all positions up to December at 60s 6d, April-June, 48s. La Plata December-January, 51s 6d; January-February, 50s 6d. Hull nothing doing. Calcutta, April-June, 49s 6d. Azov, Black Sea, October-November, 57s 9d. La Plata, December-January, 51s 6d, January-February, 50s 6d. To the Continent Bombay is quoted February-March, 52s; March-May, 50s 6d. Calcutta, March-April, 50s 6d.; April-June, new crop, 49s. La Plata December-January, 51s 6d; January-February, 50s 6d. Linseed cakes firm. London made, £8 10s to £8 12s 6d. Russian, £8 2s 6d to £8 7s 6d ex dock. American Westerns at £8. Cotton cakes steady. London made £5 2s 6d to £5 5s; Egyptian, £4 18s 9d. Rapeseed is inactive and very dull. Brown Calcutta to London November-December, 45s nominally; April-June, 40s 6d. To the Continent we quote, yellow Guzerat March-May, 47s 3d; yellow Cawnpore March-May, 44s 9d. Brown Cawnpore November-December, 48s 6d; March-May, 41s; brown Calcutta, October-November, 46s; April-June, 42s. Ravison to Hull, prompt 33s. Cottonseed is firmer owing to Alexandrian prices advancing: at the close, however, prices are not quite at their best. Near at hand London £7, first half November, £7; November-January, £6 16s 3d. February-March, £6 17s 6d. Hull spot, £7; November-January, £6 16s 3d. Cargoes, November, £7; December, £7.—THE PRODUCE BROKERS COMPANY, LIMITED

Mark Lane, Monday.—Linseed Cakes: The trade during the past week has been slow, buyers being unwilling to operate at present prices, and with better supplies from both America and Russia values are weak. Russians and Americans offer on spot and for arrival at a slight reduction. English are unchanged, but do not find a ready sale. Cotton Cakes: There has been a liberal quantity of Egyptian on the market, and with only a retail enquiry quotations are not quite so firm, best brands being now offered at 1s 3d per ton under last week's price. English remain in small production and maintain their value. Decorticated do not offer on spot, but for November shipment there are sellers, with meal a trifle easier. Maize germ meal: Landed parcels are in good request, but 5s per ton less money has been accepted in forward position. English sell quietly and unchanged. Rice meal: Rangoon in warehouse is quite as dear, but some business is reported for November-December shipment at considerably under last week's prices.

—PINNOCK BROS., Mark Lane

Hull, Tuesday.—The wheat trade is steady to-day, and last week's prices are fully maintained for both home-grown and foreign. Malting barley meets a dull sale, and buyers have rather the advantage in price, particularly for common quality. Grinding in limited demand at late rates. Oats in fair request at fully last Tuesday's prices. Beans dull, and the turn cheaper. Flat maize rather in buyers' favour, and Odessa offers at less money to arrive. Linseed.—The arrivals are 495 qrs from Konigsberg, 26,449 qrs Novorossisk, 2,218 qrs New York, 5,716 qrs Petersburg, 2,505 qrs Riga, 7 qrs Rosario, 1,092 qrs Trieste; total, 38,482 qrs. A quiet tone prevailed throughout the week until quite towards the close, when there was a little rally. Plate prices ran up 6d per qr, with a fair trade put through at the advance. To-day's values are, first half January, 53s 6d; December-January, 52s 9d to 53s; January-February, 51s 6d to 51s 9d; February-March, 51s. Bombay, nothing doing for present loading, but some new crop, March-May, has been sold to the Continent at 51s 3d. Calcutta, nothing offering to Hull; old crop to London, October-November, is quoted 60s 6d to 60s 9d; new crop to London, 48s 9d; 50s paid to the Continent. Black Sea and Azov, 57s 6d to 57s 9d. Petersburg is named on the market at 55s 6d, but very little remains now for sale. Riga, 54s 6d to 55s. Cottonseed.—The market ruled quiet all last week, though without much change in forward values, but spot declined to £6 16s 3d, there being a little more steadiness, however, since yesterday, and to-day business done at £6 17s 6d. October B/L sold at £6 15s to £6 13s 9d, without sellers to-day under £6 16s 3d and after £6 12s 6d taken again, November-January and February-March, £6 13s 9d paid, £6 15s being wanted to-day. Linseed cakes: A quiet trade but prices are upheld by the light seed supplies. Cotton cakes were 5s cheaper. Fresh orders scarce, but deliveries on contracts good. Hemp.—Market very quiet, nothing doing.—KEIGHLEY MAXSTED AND CO.

WATERLOO ROUND FEEDING CAKES, £6 17s 6d PER TON; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £9 10s 0d PER TON; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £9 7s. 6d. PER TON; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £5 17s 6d PER TON. ALL F.O.R. HULL.

MOLASSINE, packed in bags, of 1½cwt. each. Price per cwt. 7s. 6d. Price per ton, £6 15s., on rail at works, Silvertown, Essex.

HAY AND STRAW.

Whitechapel, Saturday.—Good supplies. Best clover, 85s to 100s; inferior ditto, 70s to 90s; specially picked hay, 92s 6d; good ditto, 80s to 87s 6d; inferior ditto, 50s to 60s; mixture and sainfoin, 70s to 90s; and straw, 25s to 36s per load.

Leeds, Tuesday.—Business steady, with an improving tendency. Prices firm. Quotations: Meadow hay, 6½d to 7d; clover, 7d to 7½d; wheat straw, 5½d; oat straw, 5d; rye straw (retail), 7d per stone.

FOREIGN HAY AND STRAW.

London, Saturday. Trading this week, owing to the lightermen's strike ang general disorganisation in getting stuff shipped, has been very small, only a few parcels are to hand, and for these a very quiet demand has been found at easier price. We quote: Canadian timothy and clover mixture, 82s 6d to 85s; Dutch, 1st cut clover, 87s 6d; French and Dutch 2nd cut clover, 90s; good Dutch hay, 72s 6d to 75s; common Dutch hay, 65s; large bale French wheat straw, 40s 6d; small ditto ditto, 43s; small ditto oat straw, 43s. All thes prices are per ton delivered by barge alongside.—FULLER AND PRENTIS, 9 and 10, Great Tower Street, E.C.

FRUIT AND VEGETABLES.

Covent Garden, Saturday. Vegetables were in good supply, but trade ruled dull. Good supplies of fruit met a fair demand. Greenstuffs: Cabbages, 2s 6d to 3s 6d, sax 3s 6d to 5s; beetroots, 2s to 2s 6d per tally; cauliflowers, 1s to 1s 6d per dozen; spinach, 1s 6d to 2s per bushel; carrots, 1s 6d to 2s 6d; turnips, 2s to 3s; parsley, 1s to 1s 6d per dozen bunches; celery, 8d to 1s per dozen; lettuces, Valencia onions, 6s to 6s 6d per case. Potatoes, 70s to 100s per ton. Fruit: English grapes, 6d to 1s 6d per lb. Almeria, 10s to 16s per barrel; English apples, 4s to 7s per bushel. Nova Scotian 12s to 14s per barrel; English pears, 3s to 7s per bushel; peaches, 2s to 10s per dozen; Valencia melons, 6s to 7s per case; pine apples, 1s 6d to 4s each; bananas, 4s 6d to 5s per bunch; lemons, 3s to 14s per case; English tomatoes, 3s 6d to 4s per 12lb.

MANURES.

Liverpool, Saturday. Fertilisers as usual at this date are quiet, and this applies to all descriptions excepting basic slag, which, however, is in somewhat active request at the quotations; the earlier it is applied in the autumn, the more beneficial will be the results, as it is a slow acting phosphatic fertiliser. It is computed that the visible supply of nitrate of soda (stocks and afloat, for Europe on the 1st inst. was about 940,000 tons, and although the spot demand is practically nil the recent improved prices are maintained. The mild, open weather militates against the consumption of artificial feeding stuffs, and the trade as yet is very quiet, but will develop when colder weather sets in. Values remain firm, and in comparison with the prices of various descriptions, crushed cotton seed, palm nut cake would seem to be exceptionally good value for the money. Nitrate of soda, best quality, i.e., guaranteed 95 per cent., pure, in bags, £8 7s 6d to £8 10s per ton; East India bone meal, in bags, £4 10s per ton; kainit, prime 25 per cent., in bags, £2 7s 6d to £2 10s per ton; linseed cake, American thin oblong, prime, in bags, £7 10s 3d to £8 per ton; ditto, English, prime, in bulk, £8 17s 6d to £9 2s 6d per ton; ditto, foreign, round, prime, sell, and oily, in bags, £8 15s per ton; cottonseed cake, N.A., decorticated, prime, in bags, £7 per ton; ditto, English, ditto, prime, in bags, £7 10s to £7 12s 6d per ton; ditto, English, undecorticated, prime, in bulk, £5 2s 6d to £5 5s per ton; cottonseed (crushed), 20 to 25 per cent., oil, £7 7s 6d per ton; maize germ meal, English, prime, in bags, £5 7s 6d to £5 10s per ton; rice meal, Rangoon, as imported, in bags, £5 15s 3d to £6 1s 3d per ton; Indian meal, coarse to fine grinding, prime in bulk, 11s 3d to 11s 6d per 240lb; linseed, fine bold feeding, in bags, £3 5s per qr, 416lb; N.A. cloverseed, new red, fair to good, in bags, per cwt; D N S, brand, superphosphate of lime, guaranteed, 25 to 27 sol., in bags, per ton; ditto, ditto, 30 to 31 sol., in bags, per ton; ditto, ditto, 35 to 36 sol., in bags, per ton, nominal; basic slag, prime quality, guaranteed, 30 to 35 per cent. phos., in bags, £1 11s to £1 12s 6d per ton; ditto, ditto, 35 to 40 phos., in bags, £1 13s 6d to £1 14s 6d per ton; ditto, finest quality, guaranteed, 38 to 45 phos., in bags, £1 16s to £1 17s 6d per ton, at the producing depots.—H. JONES LANGAR AND CO.

Winsford (Cheshire), Saturday. Our current prices for salt at the works: Common white salt, 11s per ton; fine screened rock salt, 8s 6d per ton, for truck loads in bulk.—THE SALT UNION, LIMITED.

THE BALTIC.

An extremely quiet week has to be recorded, and the interruption to business on Friday by reason of the Lord Mayor's Show was not felt as it would have been in a period of speculative briskness. Wheat sales have included Walla Walla at 29s. 6d., Californian at 30s. 9d., Roumanian at 29s.; hard Taganrog at 28s. 6d., Argentine at 30s. 3d., No. 1 Northern at 31s. 3d., No. 2 red Winter at 30s. 3d., hard Winter at 29s. 3d., and North Russia at 29s. per qr. Maize cargoes are steady. A cargo of African sold at 22s. is an unusual feature. Roumanian, for spring shipment, is offered at 19s. 3d., and fine Galatz at 20s., but for prompt shipment 2s. over these prices is paid. American makes 20s. 9d. on passage, and 19s. 3d. for December shipment. Other cargo sales include Saida beans as 29s. 6d., Azoff barley at 19s., Russian rye at 23s. 9d., Petersburg oats at 13s. 6d., Canadian peas at 27s. 6d., and Argentine linseed at 51s. per qr.

The arrivals of grain and seed laden vessels at ports-of-call for the week were 3 wheat (1 Melbourne, 1 Port Augusta, 1 Portland (O.), 1 barley (San Francisco); total 4.

The sailings of grain and seed-laden vessels from ports-of-call for the week were:—5 wheat (1 Birkenhead, 2 Fleetwood, 1 Hamburg, 1 Manchester); total 5.

Since January 1, 1900, the total arrivals have been:—301 wheat, 14 wheat and barley, 1 wheat and pease, 7 flour, 12 maize, 1 maize and oats, 26 barley, 19 beans, 9 locust beans, 1 pease, 1 linseed, 5 canaryseed, 2 fenugreek seed, 5 valonea; total, 404.

Last year, during the same time the arrivals were:—254 wheat, 10 flour, 4 maize, 7 barley, 1 barley and beans, 1 rye, barley, and oats, 10 beans, 2 locust beans, 6 linseed, 6 canaryseed, and 7 valonea; total, 308.

Shorthorn Society.

Meetings of the committees and Council were held at the Society's Rooms, 12, Hanover Square, W., on Tuesday. Present: Mr Herbert Leeds in the chair. The minutes of the previous meeting were read and confirmed.

Editing Committee.

Lord Moreton reported that Volume XLVI., containing the pedigrees of 2,221 bulls and 4,359 cows with produce, which is the largest number of entries in any volume since Volume XXI., had been issued to the members.

The committee had examined and passed the list of pedigree exportation certificates issued by the secretary since the last meeting of the committee, viz., for South Africa, 3; South America, 159; Australia, 2; Canada, 172; Germany, 14; Japan, 1; United States of America, 31; Russia, 26; total, 408.

Several new pedigrees were examined by the committee, with certificates and other evidence in support of their correctness, and accepted for entry in the Herd Book.

The committee fixed Friday, February 1st, 1901, as the date by which entries for the next volume of the Herd Book should be sent in and passed the entry forms with the regulations of entry, the latter to include a regulation that all calves, other than dead or steered calves, must be named at the time of entry.

Lord Moreton also reported that in the recent case Regina *v.* Joseph Gowing the latter pleaded guilty and was fined £120. He thought it only right to mention that the investigation by this society, which led to this result, was commenced before any communication was received from either Mr. Allen or the Birmingham Exhibition Society.

This report was adopted.

General Purposes Committee.

Sir Nigel Kingscote reported that the accounts for the past three months had been examined by Messrs. Welton, Jones, and Co., and the committee, and were found to be correct. The receipts for the same period had been £235 5s. 1d., the balance of the society's current account at the bankers being £183 19s., and the committee recommended that cheques be drawn for various accounts amounting to £58 14s. 6d.

The committee had provisionally considered the prize scheme for 1901, and would submit the scheme for adoption at the next meeting.

This report was adopted.

A communication from Mr. John Downing with reference to the representation of Irish breeders on the Council was, on the motion of Mr. R. Stratton, seconded by Lord Brougham and Vaux, ordered to be laid on the table.

The next meeting of the Council was fixed for Tuesday, December 11th, at 4.30 p.m.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended November 3, 1900, together with the quantities imported in the corresponding week of the previous year:—

* Great Hundreds.
† Included with Other Fruit prior to 1900.
‡ Entered by the Bushel prior to 1900.
§ Included with Other Vegetables prior to 1900.

A fair number of male servants assembled at the Rotherham Hiring Fair on Monday, but hands willing to milk were scarce, and wages ruled higher. First hands and lads much obtained up to £25 a year, second men £17 to £21, and boys and youths £10 to £15. Grass asked high rates, and received £10 to £14.

LIVE STOCK.

OUR ILLUSTRATIONS.

The thoroughbred stallion Astrologer is a fifteen-year-old chestnut by Hermit—Stella, and is the property of Mr. William Pallin, of Athgarvan Stud, Curragh. Our photograph was taken at the Royal Dublin Society's Horse and Sheep Show, held in August, where Astrologer won a premium of £20 in the class for thoroughbred stallions, ten years and over, to get weight-carrying hunters, or high-class harness horses.

The Red Poll cow Bud II. 12089, sire Rosy Boy 4627, dam Bud 9170, by Albion 2982, is the property of Mr. J. E. Platt, Howbury Hall, near Bedford, her breeder being Mr. Garrett Taylor. At the last Dairy Show at the Agricultural Hall, Islington, Bud II. won the first inspection prize in the Red Poll cow class.

STOCK AND SHOW NOTES

By Herdsman.

An agitation is at present going on in Leeds for the building of an agricultural hall, to be called the Smithfield Hall, its advocates contending that there is a pressing need for something of the kind. It is not only the Smithfield Club who are interested in having such a structure for their annual show, though for them it is of great importance that the growth of their society should not be handicapped as it is under the existing arrangement. They are the proprietors of a vast quantity of timber, girders, and screws, which they erect and demolish from year to year on the Engineers' ground in Camp Road, paying a ground rental of £250 per annum. Their structure stands on its feet for eight months, and is then cleared away for the drill season. As a set-off against an annual outlay of between £500 and £600, the club are able to let it to various circuses and exhibitions, which provide a good source of revenue, there being no other structure so suitable for the purpose in the whole of Leeds.

It is not unfairly argued that the Corporation, by providing such a hall, would meet a public requirement. If fashioned after the style of the Islington prototype, it would be suitable for many kinds of exhibitions and public entertainments on a large scale, to say nothing of the political mass meetings and other occasions when the public assemble in their thousands. Present receipts from the letting of the hall are not inconsiderable, and it is pointed out that the Corporation would have increased opportunities, and reap more than enough to recoup themselves on the outlay.

Another suggestion is that the licence of the existing Corporation Hotel—now held by the Leeds Corporation—should be transferred to the new structure, and converted into an inside licence, refreshments being sold only when the hall is in use for exhibition purposes. It is believed that a horse, Hackney, and foal show would be started in Leeds if a central building could be found, and, among other suggestions, some attention may be paid to the idea of using it as a playground for children when otherwise not required. The City Corporation already possess full powers to undertake the work, but no plan has yet been accepted.

The question having arisen whether, in view of the Royal Counties' Show being held next summer at Weymouth, it was desirable to hold the customary annual exhibition of the Dorchester Agricultural Society as usual, the executive of the latter society, after giving the matter consideration, have resolved to abandon their 1901 show in favour of the Royal Counties' Society, and at the same time to contribute £70 to the Society's funds. £70 to the County Committee entrusted with carrying out the arrangement for the Society's reception, and £50 to be applied in local prizes for stock in various branches of the show. £300 is the sum the county has to guarantee, and the town of Weymouth has provided a most exceedingly suitable site, which they have equipped up to a cost of £200.

On Tuesday, the 30th October, Messrs. Alfred Mansell and Co., live stock exporters, of Shrewsbury, shipped per the s.s. Montford, from Liverpool to Quebec, twelve specially selected shearling ewes bred by Mr. W. Thomas and Messrs. Edwards Bros., and sired by such well-known rams as Shropshire President 7726, purchased at 200gs.; Adam Odstone 8247, bred by Mrs. Barrs, by Odstone Commander; Parish Accountant 9627, by the 70-guinea Parish Councillor; Manchester Royal 9571, winner Manchester R.A.S.E., bred by Mr. Bowen-Jones, purchased at 87gs.; Downton Emblem 7433, winner first R.A.S.E., bred by Mr. T. Fenn, sire Attractor 2nd 4338; Beam House Enterprise 8376, bred by Mr. T. S. Minton, by Montford Dado 7613; Lord Middleton 9560, bred by Mr. J. E. Farmer, by Montford Dreamer 7615. These ewes were all in-lamb to a ram bred by Mr. A. E. Mansell, by Fortification 9498, sire of Mr. Mansell's Royal Blood, first York R.A.S.E., and sold to go to Australia at 240gs. Accompanying these ewes was a well-grown shearling ram by Ulster Rose 9374, dam by Ercall Flagstaff 7474, and going back to the Crane-bred ram Calcot 317. This select shipment was consigned to the order of Mr. Greenshields.

Cattle and Acorns.

Mr. R. Lovelock, of Newbury, writing to the *Standard*, says:—If not too late, a warning as to the danger of letting stock, especially young cattle, roam about freely at this season on pastures where oak trees prevail, may not be out of place. The acorn crop is an abundant one, the fruit being rather blighty and undersized, yet it is capable of much mischief to stock, whilst giving an infinity of trouble and alarm to the unfortunate stock-owners occupying such acorn-infested fields.

Already I hear that Mr. Thomas Kimber, a well-known farmer and dealer at Newbury, has suffered from this cause, two valuable heifers being killed by the acorns, and several others remaining so unwell as to cause the gravest anxiety as to their pulling through. Mr. Kimber's disaster has occurred on his Shaw Dean holding—a farm most romantically situate, two miles north of Newbury, and with only a narrow valley intervening and separating it from Arlington Manor, the beautiful country seat of Sir Francis Jeune. Unfortunately for the occupier this season, the Shaw Dean pastures are studded with numerous picturesque old oaks, the fruit of which has now fallen abundantly, hence this loss.

It is evident cattle need very close watching where the above conditions prevail, or even removal for a while, until the acorns are in some way picked up.

Farm Fire near Lancaster. On Wednesday morning a fire occurred at a Dutch barn and shippon owned by Mr. Timothy Jackson, at Brook House, Skerton, near Lancaster. The Lancaster Fire Brigade, with steamer, was soon in attendance, but the buildings and their contents were destroyed before their arrival. The cattle in the building were got out safely. About 40 loads of hay were consumed. The damage is estimated at about £200, and is covered by insurance.

Tuberculin Experiments.

At the meeting of the Royal Agricultural Society held on Wednesday, it was announced that a report had been received from the Tuberculin Sub-Committee which was appointed on May 31st, 1899, to supervise the experiments then ordered to be carried out at the Royal Veterinary College in the direction of infecting healthy cattle of various ages with tuberculosis and then testing them, and an equal number of control animals, with tuberculin at various dates after infection, all the animals being subsequently killed and post-mortemed. Below we give a summary of the sub-Committee's Report which was signed by Lord Brougham and Vaux, Sir Nigel Kingscote, Sir George Brown, and Professor MacFadyean.

Touching the question of the reliability of tuberculin as a test for tuberculosis in cattle, the Sub-Committee believe that the results of their own and other experiments justify the following statements: (1) With few exceptions manifest tuberculous disease is discoverable at the post-mortem examination of animals in which there is a decided rise of temperature after the injection of tuberculin. (2) As a rule, no such lesions are to be found in those animals in which there is no decided rise of temperature after the injection of tuberculin; but the exceptions to this rule are more numerous than in the preceding case.

Practically speaking, the exceptions under each of these heads may be regarded as failures or errors in the test, but close examination of the circumstances suggests that some of the exceptions may be explained otherwise than by assuming an inconstancy of action on the part of tuberculin.

Mr. W. Pallin's Thoroughbred Stallion, "Astrologer." First Prize at the Royal Dublin Summer Show, 1900.

Tuberculin falls short of infallibility, inasmuch as there is in every case a period after infection during which it provokes no reaction, and some of the experiments described in the report indicate that this period may be longer than has hitherto been supposed.

Even when full account is taken of these possibilities of error, the Committee are of opinion that tuberculin is an agent of great value, far surpassing all other methods of diagnosis, and that, if properly employed, it is calculated to render immense service in dealing with tuberculosis.

Thirsk Hirings.—At the first of the Martinmas statutes, held on Monday, there was a better attendance than usual, and wages all round had an upward tendency. Head girls, independent of milking, obtained £18 to £20 for the twelve months, and second up to £16 10s. Managing foremen received up to £25, head plough boys up to £18, second hands up to £15 10s., and farm boys £12 to £14.

Middleham Moor Fair. The annual fair took place on Monday and Tuesday, and was well attended each day. On the first day a very large quantity of sheep were on show, but trade was slow, and prices may be considered a trifle down. Wensleydale tups made £4 to £10 each: Wensleydale tup lambs, 50s. to £5; Wensleydale ewes, 35s. to 50s.; half-bred ewes, 38s. and upwards; half-bred gimmers, 35s. to £2; twice-crossed lambs, up to 30s.; and Scotch ewes, 15s. and upwards. On the second day there was a good supply of cattle, and they sold as follows:—Bullock stirks, £8 to £9 10s.; gold heifers, £10 to £12; bulls, aged, £12 to £14; stirk bulls, £9 to £12; spring calvers, £12 to £15; Scotch heifers, £5 to £11.

Shorthorn Bull Sale at Ipswich.

Messrs. Robert Bond and Sons' fourteenth annual autumn sale of pure-bred Shorthorn bulls was held at Ipswich on Tuesday. The catalogue included thirty choice animals, from ten to seventeen months old, bred in Cumberland, the quality of which was remarkably good. The attendance of buyers was large, and satisfactory prices were obtained, ranging up to 25gs. for a compact roan, twelve months old, which was paid by Mr. W. F. Paul. The principal prices were as follows:—

		Gs.
Roan Shorthorn bull, 13 months	Mr. E. Deck	15½
Roan Shorthorn bull, 12 months	Mr. S. Flanders	16½
Roan Shorthorn bull, 12 months	Mr. W. F. Paul	25
Roan Shorthorn bull, 12 months	Mr. M. G. Blackburn	20
Roan Shorthorn bull, 12 months	Mr. Ager	15½
Roan Shorthorn bull, 12½ months	Mr. G. P. Watkins	22
Roan Shorthorn bull, 14 months	Mr. T. Lincoln	19½
Roan Shorthorn bull, 14 months	Mr. C. F. Mariner	24
Roan Shorthorn bull, 15 months	Mr. W. Keable	20
Roan Shorthorn bull, 15½ months	Mr. R. F. Woodcock	20
Roan Shorthorn bull, 15½ months	Mr. Edward Brooke	21
Roan Shorthorn bull, 15½ months	Mr. G. W. Fiske	20
Roan Shorthorn bull, 16 months	Mr. C. Lee	22
Roan Shorthorn bull, 1 months	Mr. G. F. Sherlock	21
Roan Shorthorn bull, 16 months	Mr. W. A. Irlam	23
Light roan Shorthorn bull, 17 months	Mr. H. W. Read	20½
Dark roan Shorthorn bull, 13 months	Mr. H. W. Taylor	17½
Dark roan Shorthorn bull, 15 months	Mr. H. J. Riches	21
Dark roan Shorthorn bull, 12 months	Mr. J. Wyles	16
Dark roan Shorthorn bull, 12 months	Mr. J. Willis	15
Dark roan Shorthorn bull, 11 months	Mr. R. F.	15
Dark roan Shorthorn bull, 11 months	Miss Fayers	15
Dark roan Shorthorn bull, 10 months	Mr W. Forrest	15

Sale of Mr. J. H. Shore's Jerseys

The entire herd of Jerseys belonging to Mr. J. H. Shore, of Whatley, Frome, was disposed of by auction by Messrs. John Thornton and Co. on Thursday. Mr. Shore is known far and wide for his Jerseys, and his decision to retire from breeding has been received with much regret. Reference to the pedigrees shows that many of the animals for years past have carried off most of the prizes at the Frome Show, and occasionally at the Bath and West of England meetings. The herd has, however, not been widely exhibited, but kept specially for practical dairy purposes, the object being to obtain a large supply of the richest milk and butter from cows of the finest quality and of the best strains of Jersey blood. The catalogue showed in all seventy-five entries as representing the Whatley herd, and Mrs. W. Shaw Herbert also included some half-dozen head from her collection. It will be thus seen that the sale was one of the largest of its kind ever held in the West of England, and its importance was shown by the attendance of all leading breeders of Jerseys or their agents.

At the luncheon preceding the sale the chair was taken by the president of the Jersey Society, Mr. Ernest Matthews, who, in the course of a few practical remarks in response to his health, said that, besides making a test of the dairy capabilities of Jerseys, he had also submitted to like test other dairy breeds even in greater numbers, the results of which would be ere long published. Without anticipating what was to appear in print, he might say that from these tests the Jerseys not only emerged head of the list, but left the other breeds far and away behind. The breed was in every way deserving the attention of farmers who relied upon their dairies, and the way in which Mr. Shore had brought up his herd, developing to the full their milk and hardening their constitution, should make purchases a good financial investment.

The sale was conducted by Mr. Jonas M. Webb, one of the members of the firm, Mr. John Thornton being just now out of England. The earlier lots were disposed of briskly, some of the old cows, of course, not reaching very high prices. Surville Bess fetched 20gs., and from this point for a considerable time values were well maintained. Earl Temple bought Lady Bertha and her calf at 31½gs., and two lots later his lordship secured Magic 2nd for 32gs. Golden Orange, a very pretty specimen, and the next offered, fell to Mr. W. Cooper for a like sum. The biddings were keen, and some applause was given the purchasers. Sunbeam was much fancied, and after something like a struggle she became the property of Colonel Shaw Hellier at 52gs., which was the highest price of the sale. Distinction, a heifer by Golden King, was also regarded with favour, and a contest ensued between Colonel Shaw Hellier and Mr. Miller Hallett, and the latter secured possession at 40gs. During the afternoon there was a tremendous fall of rain, but, thanks to the sale being conducted under a spacious tent, there was not much inconvenience experienced. The total amount realised for Mr. Shore's animals was 1,168gs., the sixty-three females fetching 1,065½gs., and the bulls 102½gs.

The following were the prices and purchasers:—

COWS AND HEIFERS.

Cattle and Sheep Sale at Langholm

Messrs. Harrison and Son held their closing sale for the season at Langholm Mart on Tuesday. There was a fair supply of both cattle and sheep. Quotations: Shorthorn heifers, £9 to £14; good cows, £9 to £13 17s. 6d.; polled bullock stirks, £9 12s. 6d. to £9 15s.; blue-grey stirks, £7 10s.; Cheviot ewes, 21s. 9d. to 36s.; Cheviot lambs, 13s. 3d. to 20s. 6d.; Cheviot sheep, 32s. to 39s.; cross sheep, 37s. to 37s. 9d.; cross ewes, 30s. 6d. to 37s.; black faced ewes, 22s. to 24s. 6d.

Transactions in Store Stock.

[*From the Irish Department of Agriculture and Technical Instruction.*]

The fair at Gort, co. Galway, on Wednesday, was a medium-sized one, composed chiefly of second class two-year-old cattle, for which there was a good demand, nearly all being sold. The supply of sheep was smaller than usual, and trade was good, and only a small portion left unsold. Prices: Calves, first class, £5 5s. to £5 10s.; second class, £3 10s. to £5; yearlings, first class, £8 7s. 6d. to £9 5s.; second class, £6 10s. to £6 5s.; third class, £5 to £6 second; two-year-olds, first class, £11 10s. to £13 5s.; second class, £8 10s. to £11 5s.; third class, £7 10s. to £7 17s. 6d.; springers, second class, £12 to £14; lambs, second class, 17s. to £1 5s.; third class, 13s. 6d. to 15s. 6d.; over twelve and under twenty-four months old, first class, £1 16s. to £2 2s.; second class, £1 8s. to £1 15s.; third class, £1 1s. to £1 5s.; two years old and upwards, first class, £1 18s. to £2 4s.; second class, £1 15s. to £1 17s. Young pigs eight to ten weeks old sold at from 15s. to 20s. each.

There was a large fair at Castlerea, co. Roscommon, on Wednesday. The demand was bad, and a large number of animals remained unsold. Good springers very dear. Prices:—Calves, first class, £5 to £6; second class, £4 to £4 17s. 6d.; yearlings, first class, £8 10s. to £10; second class, £6 5s. to £7 15s.; two-year-olds, first class, £11 15s. to £13 5s.; second class, £9 14s. to £11; springers, first class, £17 to £19, second class, £14 15s. to £16 10s.; lambs, second class, £1 5s. to £1 6s. 6d.; over twelve and under twenty-four months old, first class, £2 4s. 8d. to £2 13s.; second class, £1 12s. to £1 18s.

Belfast Fair took place on Wednesday, when there was an average supply of stock. The demand for young cattle was only moderate, but springers sold well, the supply not being up to the demand. Prices:—Calves, first class, £5 to £6 5s.; second class, £3 to £4 10s.; yearlings, first class, £8 10s. to £10; second class, £6 2s. 6d. to £7 15s.; third class, £4 10s. to £5 6s. 8d.; two-year-olds, first class, £11 10s. to £13; second class, £9 to £10; third class, £6 10s. to £7 10s.; springers, first class, £17 to £19 10s.; second class, £12 10s. to £14 12s. 6d.; third class, £9 5s. to £11; young pigs, eight to ten weeks old, sold at from 15s. to 21s. each.

FIRST-CLASS representatives and agents required throughout the United Kingdom for the sale of "MOLASSINE"—Write for particulars to the "MOLASSINE" CO., LTD., 36, Mark Lane, London, E.C.—[ADVT.]

HORSES.

Sale of Cart and Carriage Horses at Preston.

The quarterly sale of horses at the Preston Auction Mart, Cattle Market, took place on Tuesday, Mr. E. G. Hothersall being the auctioneer. It was the largest sale there has been since the mart was opened. The growth of demand for good, sound horses, whether for cart and wagon, or trap, carriage, or saddle, is continued, and the prices are about the same as they were three months ago. So great was the entry in both sections that Mr. Hothersall had to have erected over a length of the sheep pens a long marquee. This was filled with the overflow from the large depot, the extensive stables, and the boxes. Buyers and dealers were present from all parts of the country, the gathering including a few exporters to the United States and other countries. For anything really good the bidding was sharp, and there was no mistaking the buyers. There were many well bred horses in the yard, and some of the square, massive type, with action. The average for light horses was from £20 to £35, and some good ones went for £50, £60, and £70 apiece. Some West and East Lancashire breeders in the mart stated that buyers of horses were touring the farms and picking up the best, paying prices that were very satisfactory. Only on Monday a foal sold for £40, and mature horses are going well.

Horse Sale at Carlisle.

At Harrison's Auction Mart, on Thursday last, the special sale of the season of horses of all classes was held. There was a good display, and the attendance of buyers was large. The better class of two-year-old cart colts and fillies were in fair demand at good prices, but inferior sorts were hard to cash. Cart yearlings met a good demand, but foals were slow to sell. Details:—Seasoned cart horses: 1, Mr. Thwaytes, Woodhouse, Penrith, 62½gs. for a bay horse, five years old, sold to Mr. W. C. Miller, Carlisle; 2, The Penrith Urban District Council, 57gs., for a bay mare, rising five years old, to Mr. Angus, Newcastle-on-Tyne; 3, Mr. Halliday, Langwathby, withdrawn at 55gs.; others, from Mr. Parker, Hallrigg, Plumpton, 35gs., for a brown horse, eight years old, to Mr. H. Miller, Carlisle; from Messrs. Carr and Co., Carlisle, 34½gs., for a brown horse, to Mr. H. Miller; Mr. Beatti-Baurch, 33gs., for a brown mare, seven years old, to Mr. Rush, Carlisle; Mr. Hutchinson, Cranberry, 24½gs., for a brown mare, seven years old, to Mr. Carruthers, Rowanburn; Mr. Irving, Broomwell, 25gs., for a bay mare, four years old, to Mr. Armstrong, Cotehill. Two-year-old cart geldings or fillies: 1, Mr. Davidson, Blencogo, 38gs., for a bay colt, to Mr. Wilson, Crownstone; 2, Mr. Riddick, Crookdale Hall, Wigtown, 40gs.; for a bay colt, to Mr. Graham, Airdrie; others, from Mr. Kerr, Midtown, Caerlaverock, 33½gs., for a brown colt, to Mr. Rush, Carlisle; Mr. Davidson, Blencogo, 26gs., for a bay colt, to Mr. Rush; Mr. Callender, Clunnie, Dumfries, 3 gs., for a grey filly, to Mr. Rush; Mr. Wannop, Linstock Castle, 29½gs., for a bay colt, to Mr. Pearson, Close; Mr. Wilson, Kirkhampton, 25gs., to Mr. Tinning, Ellerbeck; Mr. Little, Bowness Hall, 28gs., for a brown filly, to Mr. Ridley, Hill Top; Mrs. Willis, Brocklebank, 27gs., to Mr. Simons, Hull.

Sale of Cart Horses at Glasgow.

On Thursday, Mr. Vine disposed of sixty-five powerful horses belonging to Messrs. Robert M'Alpine and Sons, railway contractors, Glasgow, at the Horse Bazaar, Port Dundas Road, Glasgow. There was a good attendance of buyers, and the sale was of a very satisfactory character, the demand for the horses being very brisk throughout. The ages of the animals ranged from six to ten years. Draught horses of the best class realised up to 65gs.; secondary and inferior, 20 to 35gs.; ponies, 8 to 18gs.

Sale of Cub Hunters at Leicester.

The annual cub-hunters' sale always attracts a goodly crowd at Messrs. Warner, Sheppard, and Wade's Repository, and amongst those present on Saturday were Lord Churchill, just appointed Deputy Master of the Royal Buckhounds, the Marquis of Cholmondeley, the Duchess of Newcastle, the Hon. Mrs. Cundy, Baron Max de Tuyll, Mr. and Mrs. Hedgworth Barclay, Lady Angela Forbes, Mr. and Mrs. Harry Bentley, Lady Hartopp, Mr. Leonard, and Lady Violet Brassey, and many others. Although prices did not rule high, yet a large number of horses changed hands, Baron Max de Tuyll selling every horse catalogued. Huffy made 130gs., and Schoolboy 115gs. Lady Margaret Loder's Porcelain made 180gs. Mr. Hedworth Barclay's Squeaker and Swiss Boy 150gs., Mr. Cecil Grenfell's Asfordby 200gs.; Valentia and Harborough made 105gs. and 100gs., and Mr. A. Jolland's Granuale 200gs.

ALL farm live stock should be given "MOLASSINE." It is an excellent food and condiment combined. See advertisement on back page of this issue.—[ADVT.]

SOCIETIES.

Royal Agricultural Society of England.

Big Loss on the York Show.

A monthly Council was held on Wednesday, November 7th, Earl Cawdor (President) in the chair.

The minutes of the last monthly meeting of the Council, held on August 1st, 1900, having been taken as read and approved,

The President said that he might report that he had forwarded through the proper channel the Society's address of condolence with Her Majesty the Queen in the bereavement sustained by the death of His Royal Highness the Duke of Saxe-Coburg and Gotha. Unhappily, the Royal Family had very recently sustained another severe loss by the death of Prince Christian Victor. He had another melancholy duty to perform before entering upon the regular business of the day, viz., to report formally from the chair the deaths during the recess of two of the most distinguished members of the Council. Sir John Lawes was a loss not only to the Society, but to the whole agricultural world. His great work at Rothamsted would live after him, and his name would go down to posterity as one of the most commanding agricultural figures of the nineteenth century. Mr. Samuel Rowlandson was known to many of those present before he joined the Council in 1889, as a man of sterling merit and high reputation as a practical farmer, and it would be difficult to find a man more energetic or more deplorable.

Finance.

Sir Nigel Kingscote (chairman) reported that the accounts for the three months ended October 31st, as certified by the Society's accountants, showed total receipts amounting to £13,915 0s. 7d., and expenditure to £15,470 15s. 2d. Accounts amounting in all to £1,900 19s. 1d. had been passed, and were recommended for payment. The quarterly statement of subscriptions, arrears, and property to September 30th, 1900, had been laid upon the table. The draft balance-sheet for the York Meeting, showing a loss of £3,467 10s. 11d., had been submitted by the secretary, and ordered to be laid before the auditors for their approval.

Financial Result of the York Meeting.

Sir Nigel Kingscote, in presenting this report, said that the Council would be as sorry to hear as he was to report that the Society's country meeting at York last June, on which so many hopes had been built, resulted in the very considerable loss of £3,468, which would have to be met out of the Society's general funds, already most seriously depleted by the heavy deficits on the two previous shows. As the total entries of live stock were over 100 more than in 1899 (horses numbering 696 as against 424), and 2,500 more feet of space were taken in the implement department, it might have been expected that the gross expenses of the erection and administration of a larger showyard would have involved a proportionately greater expense than in 1899, especially as timber was dearer this year. The total expenditure of the Society in connection with the York Show from first to last was only £400 more than at Maidstone in 1899; but the total figure was sufficiently serious, £21,550. As the exhibitors of live stock implements, etc., who, of course, derived the greatest immediate benefit from the shows, only contributed in entry fees £7,828, and the Local Committee £2,000, it followed that the Society was dependent for making both ends meet upon taking in the showyard from admission, tickets for stands, and the like, the sum of £11,722. So far from doing this, it only took £8,254, and therefore, had to suffer a loss of £3,468 out of its annual income from the £1 subscriptions of members which were the Society's only fixed source of revenue, and which had to bear all the expenditure of the many other departments of the Society's work. It would be apparent to the Council that the enormous risk on the shows which the Society now ran was not one which the Finance Committee could look upon with complacency. More and more demands were annually made upon the Society in connection with its shows, and more of the burden of these demands ought certainly to rest upon those who were chiefly benefited by them, viz., the exhibitors. As the Cardiff Meeting next year would be almost the last to be held under the present system, the Finance Committee did not desire, by any sudden action of their own, to imperil the success of that show; but they had never concealed their opinion that the risk for which the Society now made itself responsible in connection with the shows was too great. It would be unprofitable to discuss the probable causes of the disappointingly small attendance of the public at York, notwithstanding that there was a magnificent show of animals and implements, and that everything seemed to be in the Society's favour. It might be that agricultural shows were now overdone; that there were too many of them, and that they had ceased to attract the ordinary sight-seeing public as they once did. At all events, the Council would be wise not to base their calculations in the future upon receipts at the gates reaching the totals that they were once accustomed to, and on which he was afraid they had in the past too much relied.

Future of the Royal Journal.

The committee had had under their consideration the question of the future conduct of the Journal, and were of opinion that the time had now arrived when the question of abandoning the quarterly Journal and of substituting a yearly volume suitably bound should be seriously considered.

Sir John Thorold observed, with reference to the recommendation as to the issue of the Society's Journal in future in one bound annual volume, instead of in four quarterly numbers, that, in his opinion, the editor had laboured under very considerable difficulties in obtaining suitable articles for the Journal in view of the competition of the weekly agricultural Press, and more recently the competition of the Board of Agriculture, who published every quarter a Journal of their own similar to that of the Society. Matters of passing interest were dealt with in the weekly Press; and he thought that the present time would be a good opportunity to adopt the change of publishing one volume of the Journal annually, instead of issuing it in four quarterly parts.

Mr. Pell said that, as an old member of the Journal Committee, he wished to support the views advanced by Sir John Thorold, as he had for a long time been very strongly adverse to the publication of the Society's Journal in quarterly parts. With regard to the financial side of the question, there would be a very considerable saving if the Council adopted the Committee's recommendation of publishing the Journal in one annual volume.

Mr. Sutton observed that, as the member of the Journal Committee who had proposed in committee the resolution that the Society should discontinue its system of publishing its Journal in four quarterly parts, and in future issue it in the form of one volume annually, he should like to say that the only objection to the course recommended that presented itself to his mind was that the Society would not, perhaps, be quite so much in touch with its members in giving them a Journal only once in the year. Possibly, however, this point might to some extent be met if their secretary could so arrange with the agricultural Press that their proceedings should appear in a more extensive form than at present was the case. With regard to the financial side of the question of publishing the Journal in the form of one volume annually, there would be a very considerable saving if this plan were adopted.

Sir Nigel Kingscote said that extended reports of their proceedings were systematically issued immediately after each Council to the daily and agricultural papers, and he thought, on the whole, they had no reason to complain of the amount of publicity given in the Press to their reports and discussions.

Chemical and Woburn.

Mr. Stanyforth (chairman) reported that a letter had been received from the Duke of Bedford's agent stating that some land, at present let out in allotments, and adjoining the Experimental Farm at Woburn, would shortly be available for the purposes of the Society. Dr. Voelcker had been instructed to convey the thanks of the Society to Mr. Prothero for his letter, and to accept the offer of additional land so generously made by the Duke of Bedford.

Tracing Foot-and-Mouth Disease Outbreaks.

Earl Spencer said no one who knew anything about the diseases of animals, or was interested in the subject, but would have viewed with great satisfaction the enormous progress which had in the past been made in stamping out foot-and-mouth disease. But in this life we were subject to disappointments, and he confessed that it had been a great and bitter disappointment to him to learn of the recurrence in many parts of the country of this disease, which was a source of loss and injury to farmers and stock-owners. They had present amongst them that day Sir George Brown, who had had unrivalled experience in that matter, and he (Lord Spencer) would like to ask whether it had been possible to trace the origin of the outbreak. So far he had been unable to gather any information as to the origin of this disease in various parts of the country. The first outbreak was perhaps more easily accounted for, as it occurred near the sea coast; but as to the outbreaks in Yorkshire, Wales, and other parts of the country, he was at a loss to know what was the cause of them.

Sir Nigel Kingscote said he was so impressed with the singular fact that these outbreaks should have occurred in different parts of the country, far removed from one another, that he ventured, as Chairman of the Governors of the Royal Veterinary College, to seek an interview with Mr. Long, the President of the Board of Agriculture, on the subject. His object in doing this was not in the least to try and weaken the system adopted by the Board of Agriculture in stamping out this disease; but owing to the difficulty of tracing its origin, or of not tracing it at all, he had heard doubts expressed in several quarters as to whether it was really foot-and-mouth disease. In the case of an outbreak on a farm where the owner had pedigree stock, he suggested for consideration whether it would not be possible for strict isolation to be adopted, until it was proved by inoculation and diagnosis that the animals were actually suffering from foot-and-mouth disease.

Sir George Brown said it would be absurd for him to attempt to deny that the whole course of the outbreak had been erratic in the extreme. The sudden appearance of the malady at places remote from any known centre was entirely contrary to anything which they had hitherto known of the history of the disease. It was true that in former times, in certain cases, great difficulty had been experienced in tracing

the origin of an outbreak, and often no connection with a known centre of infection could be discovered; but in the present instance nearly all of the seventeen outbreaks had been surrounded in mystery. Notwithstanding this fact, however, the whole of the evidence critically examined left no escape from the conclusion that this was the genuine disease, seeing that clinically it had presented itself exactly as it had always done since it first appeared in this country in 1839. It was a curious fact that those who had had most experience in this malady, viz., some of the inspectors at the ports for foreign animals (men who had had extensive opportunities of seeing the disease in all its forms during half a century of its prevalence) had expressed themselves quite as much surprised as the owners of the animals at discovering that the disease was foot-and-mouth, and, indeed, were sure that it could not possibly be anything else. Although he was no longer actively engaged in these investigations, he still took the greatest possible interest in them, and he had been told that the most careful and strict inquiry had been made in every instance. He could not, however, help expressing regret that more publicity had not been given to the facts which had been ascertained, because they tended to prove that the common impression among owners of stock that the affection was unlike foot-and-mouth disease, as it did not spread even in the herds in which it had broken out, was erroneous. In several cases which had come under his notice the infection had extended rapidly. He was not certain of the absolute correctness of the figures, but to the best of his recollection in one herd of fifty animals, two or three of which were discovered to be affected, it was found that before slaughter could be completed twenty-seven of the cattle were suffering, and other similar cases had also been recorded. In reference to Sir Nigel Kingscote's suggestion that inoculation or isolation should be employed to test the infectivity of the disease, he could understand that it would not be favourably received by the Board. It would naturally be urged that the work of a sanitary department was to stop the disease, and not to find out whether it would spread if they gave it the opportunity. There could not be any doubt that the measures which had been adopted had been very complete, for it was not unreasonable to state that in no case had the infection spread beyond the centres of origin, owing to the circumstance that the animals were at once shut up, and killed as quickly as possible. With reference to the apprehension which was felt as to the serious losses which would arise if the disease broke out in a pedigree herd, he could not speak with any authority, but he might venture to say from his experience in the past that in such cases some plan would be devised to prevent the slaughter of a number of valuable cattle. It had been proved that the disease in this country, though it had caused an enormous amount of injury, was not fatal like cattle plague or pleuro-pneumonia. Taking all the facts as they stood, he should have felt quite unable, even if he had been asked, to advise the Board of Agriculture to do otherwise than they had done. He admitted that the whole thing was a puzzle, but although the disease had taken an unusual course, he had no doubt himself that it was foot-and-mouth disease, and that the Board of Agriculture, by acting as they had done at every centre of infection, were taking the best means to get the disease out of the country as quickly as possible.

Mr. Pell mentioned that a number of years ago, when the disease was prevalent in England, a case of foot-and-mouth was discovered in Warwickshire. Not very long after this case had been found, another case broke out thirty-five miles away, on some land of his own in Northamptonshire. He felt quite certain that the contagion must have come amongst his cattle at one time or another. He discovered that some Ordnance Survey officers were then engaged in a survey of England in his district, and that when their survey was very nearly completed, some slight error in their work was discovered, and he gathered that, to complete their work, the officials used upon his farm the same surface chain that had been employed by them in their duties on the farm in Warwickshire; and the fact remained that following upon the presence of the surveyors with that same chain again in Northamptonshire, after their visit to Warwickshire, foot-and-mouth disease was found.

Stock Prizes.

Mr. Sanday (chairman) reported that the committee had considered the draft prize-sheet for the Cardiff Meeting, together with a schedule of prizes prepared by the Local Committee, and had suggested certain modifications in the latter for the Local Committee's consideration.

The committee recommended the acceptance, with thanks, of the offer of the following champion prizes for competition at the Cardiff Meeting from breed societies:

(a) Hunters' Improvement Society: Gold medal, value £10 10s., for the best Hunter filly not exceeding three years old.

(b) Hackney Horse Society: Two gold medals for the best stallion and best mare or filly exhibited in the Hackney breeding classes.

(c) Shire Horse Society: Two gold medals for the best Shire stallion and for the best Shire mare or filly.

(d) Devon Cattle Breeders' Society: Two champion prizes of £10 10s. each, for the best male and the best female animal exhibited in the Devon classes.

(e) Polled Cattle Society: Gold medal for the best breeding Aberdeen-Angus animal exhibited.

(f) North Wales Black Cattle Society offers, through Local Committee, two five-guinea cups and two silver medals, for the best male and the best female exhibited in the Welsh cattle classes.

(g) Suffolk Sheep Society: Gold medal for the best two-shear or shearling Suffolk ram exhibited.

Mr. J. E. Platt's Red Poll Cow, "Bud II." First Prize at the Dairy Show, 1900.

(h) Southdown Sheep Society: Champion prize of £10 10s. for the best two-shear or shearling Southdown ram.

Mr. Sanday added that a letter had been received by him on Monday from the Hon. Cecil Parker (whose other engagements prevented his personal attendance at the Stock Prizes Committee or the Council) suggesting for consideration that there should be jumping competitions at the Cardiff Meeting in connection with the classes for hunters and ponies. This letter had been laid before the Stock Prizes Committee (at a period of their proceedings at which it was true there was not a very full attendance), and the committee were ready to give consideration to the details of the matter if the Council should approve the principle.

After some remarks by Mr. Crutchley, in opposition to the proposal,

Mr. Ryland said that as it would appear that formal notice was necessary before this question could be brought before the Council for discussion, he wished to give notice that at the December meeting he would move that the Society offer prizes, under proper restrictions, for jumping competitions at the Cardiff Meeting next year.

General, Cardiff.

Sir Walter Gilbey reported that the committee had discussed with the representatives of the Cardiff Local Committee the schedule of prizes for live stock, produce, etc., proposed to be offered by the Cardiff Local Committee, and had suggested various amendments thereto. The Local Committee had nominated Mr. Lewis, of Duke Street, Cardiff, as agent for the sale of season tickets; Mr. John Isaac, of Custom House Street, Cardiff, as agent for the sale of produce; and Messrs. Stephenson and Alexander, of Cardiff, as agents for the letting of lodgings.

Selection.

Sir John Thorold moved: "That the Duke of Bedford, now a Vice-President, be elected a Trustee of the Society." Mr. Stanyforth said it was his privilege, as chairman of the Chemical and Woburn Committee, to second this resolution.

The resolution having been unanimously adopted, it was moved by Sir John Thorold, seconded by Mr. Ashworth, and unanimously resolved, "That the Earl of Derby, K.G., be elected a Vice-President of the Society."

The vacancies on the Council, created by the appointment of the Earl of Derby as Vice-President and the death of Mr. Samuel Rowlandson, will be considered by the Committee of Selection at a future meeting.

Sir John Thorold, in formally moving, previous to notice,

That Bye-law 3, as to the number of honorary members of the Society, be amended by the omission from line 1 of the words "twenty-five," and the substitution therefor of the words "fifty, of whom not more than twenty-five may be British subjects,"

said that occasions sometimes offered themselves in which the Committee of Selection desired to confer the honorary membership of the Society upon distinguished persons, and they had been prevented from doing this at the right time, by the limitation enjoined by the present bye-laws. It would be a great convenience if the maximum were increased to fifty, and he therefore moved the resolution standing in his name.

This was seconded by Sir Nigel Kingscote and carried unanimously.

Education.

Lord Moreton (chairman) reported that, following the precedent of previous years, examinations for the National Diploma in Dairying had been held this year for English students at Reading College, and the British Dairy Institute, Reading, and for Scottish students at the Dairy School, Kilmarnock.

Notices as to Annual Grants.

Notice was given on behalf of the several committees of their intention to move at the next meeting of the Council for the following grants for 1901:—Chemical Committee, £200 for pot culture experiments; Veterinary Committee, £600, of which £500 to be allocated to the Royal Veterinary College; Education Committee, £400 for the examinations for the National Diploma in Agriculture and Dairying and for other purposes.

Miscellaneous.

Sir Nigel Kingscote mentioned that, though the Special Show Committee had no report to submit on that occasion, they made a certain amount of progress during the recess in examining and considering sites in the neighbourhood of London suitable and available for a permanent showyard for the Society, and hoped to be able to present a report next month.

The secretary announced that the Society had been awarded a Grand Prix at the Paris Exposition for its exhibit of specimens of cereals grown in England.

Various other matters having been dealt with, the Council adjourned until the Wednesday of the Smithfield Show week (December 12th).

Cheshire Chamber.

A meeting of the Cheshire Chamber of Agriculture was held at Crewe, on Monday afternoon, under the presidency of Colonel Cotton Jodrell.

The Secretary (Mr. C. B. Davies, C.C.) read some correspondence which had passed between the Chamber and the Cheshire County Council with respect to the erection of bridges for carrying vehicular traffic over the railways in several parts of the district where level crossings exist. The Clerk of the County Council wrote stating that that Council had passed a resolution which had been forwarded to the general manager of the London and North-Western Railway stating that while the County Council were of opinion that the railway company ought to erect bridges to carry vehicular traffic over the level crossings at Willaston Station, Newcastle-road crossing, Nantwich Railway Station, and the Nantwich crossing on the Whitchurch main road, they should, at any rate, provide foot bridge. Mr. T. R. Boote said the company had already erected a footbridge at Willaston Station, so that some good had been done.

A brief discussion took place upon the insurance of farm labourers. The secretary reported that the Council of the Chamber had appointed a subcommittee to draw up a statement on the subject for subsequent consideration by the Chamber.

Mr. C. B. Davies called attention to the restrictions upon the removal of pigs enforced by the Board of Agriculture. These restrictions, he said, had been a source of considerable financial loss and untold inconvenience to Cheshire farmers during the last few months. The feeding of pigs was a source of considerable profit to farmers, and anything that interfered with their free sale or free movement in a county like Cheshire was disastrous. Local auctions were now held near railway centres and these were of great convenience to butchers and farmers alike. But the closing of these auctions to pigs was a calamity. He thought that something might be done to prevent the spread of swine fever if the Board of Agriculture, who at present insisted upon the cleansing and disinfecting of owners' yards and railway attendants, were to apply the same conditions to the premises of pig dealers, who went up and down the country collecting pigs.

Mr. Holland expressed the opinion that the losses must be caused largely by the cheap feeding stuffs

that were bought and given to the pigs. He believed tuberculosis in cattle was caused in the same way. With regard to asking the Board of Agriculture for more restrictions, he thought there were too many already, and too much officialism. Experience had shown that restrictions were no good. He thought there should be freedom of sale for pigs.

Mr. W. J. Dutton (Nantwich) thought they ought to have freedom of sale for bacon pigs, for it was not in fat pigs that swine fever broke out. He thought some good might be done if the Board of Agriculture appointed a detective-inspector to attend markets to try and detect cases of illness in pigs offered for sale. He complained of the trouble farmers had in getting movement licences. Some had to go five or six miles for them. He suggested that such licence should be granted by the nearest police officer to one's farm.

Mr. T. Baxter (Warrington) said it was almost impossible for farmers to go on breeding pigs unless some of the restrictions were relaxed.

On the motion of Mr. C. B. Davies, seconded by Mr. W. McCracken (Lord Crewe's agent), the following resolutions were adopted: "That, in the opinion of this Chamber, the continued closing of auction yards to the sale of pigs is a source of serious loss to Cheshire farmers. That the existing powers of the Board of Agriculture have hitherto proved inadequate to stamp out swine fever, and in the opinion of this Chamber one important cause of this failure lies in the lack of power to enforce the inspection, the cleaning, and the disinfection of pig dealers' premises, such as at present exists in the case of sale yards, and railway wagons, and cattle docks. That the Board of Agriculture be memorialised to consider this suggestion with a view to seeking Parliamentary powers to enforce inspection and disinfection of such premises, and to still further facilitate such inspection and disinfection of premises, all pig dealers should be registered. The fat pigs for immediate slaughter be permitted to be moved to auction under licence, and that the breeding of pigs be made more effectual."

It was decided to invite associated chambers to support these resolutions.

Hackney Horse Society.

Meetings of the Council and committee were held at 12, Hanover Square on Tuesday and Wednesday last, Mr. Frederick Wrench in the chair.

The chairman said that he regretted to inform the Council of the death of their esteemed colleague, Mr. Edmondson, of Spring Field Hall, Knowle, who had for some years cordially given his best services to the Society. It was resolved to forward an expression of the Council's sympathy with Mrs. Edmondson, and at the same time not to fill the vacancy on the Council caused by Mr. Edmondson's death.

Classification at the London Show.

The chairman, on behalf of Sir Walter Gilbey, presented the Horse Show Committee report, which dealt fully with the proposed alterations in the classification of the next London show. The prize schedule in its main points is not altered, the most noteworthy change being the establishment of a cob section, in which will compete stallions and mares over 14 and not exceeding 15 hands. The pony section will accordingly comprise animals not over 14 hands, the cob section animals between 14 and 15, and the Hackney section animals over 15 hands. The attractive harness classes will be again renewed, there being one class for ponies, one for cobs, and two for Hackneys—viz., one for over 15 hands and not exceeding 15h. 2in., and the remaining class for horses over 15h. 2in. The special prizes and breeders' prizes will be offered as heretofore, and there will be the usual sale by auction. It was agreed that a preliminary issue of the prize list should be sent to members as speedily as possible.

Medals.

It was resolved to offer two champion gold medals at the Cardiff Royal Show and two at the Royal Horse Show at Brussels, viz., one for the best Hackney in hand, and one for the best Hackney in harness; also two gold medals at the Royal Dublin Society's Show on the same terms and conditions as last year. Other details concerning the arrangement of the show and improvements which have been suggested to the Council were discussed in the report, which was, on the motion of Baron Schroder, unanimously adopted.

Judges Selection Committee.

The Council appointed Mr. Buttle, Mr. Livesey, Mr. Fewson, and Mr. Alfred Rowell to supply the vacancies on the Judges Selection Committee.

Council Selection Committee.

Mr. Hickling, Mr. Anderton, Mr. Evans, and Capt. Yates were unanimously appointed to fill the vacancies on the Council Selection Committee.

Editing Committee.

Mr. Rowell (chairman) presented this report, which showed that the committee had carefully considered the entries for the new volume of the Stud Book, which would be published in the first week of February next. Of the new entries, forty-eight were accepted, six rejected, and three deferred for further information. Arrangements were made for printing, illustrations, publication of prefixes, etc. The following prefixes and affixes were granted to the various applicants:—

Prefixes.—B. H. Oxshott, Finstall, Inver.

Affixes.—Brunston, Barry, Berry Hill, Breeze Hill, Cadley, Conisbro', Darley, Druidstone, Edwalton, Ely, Findon, Fylde, Hedon, Londesborough, Nelson, Nork, Preston, Warfield, Watton, Wharfedale.

This report was unanimously adopted.

Finance.

Mr. Carnley proposed the adoption of this report relating to the Society's finances for the year. It showed a balance standing to the credit of the current account of £282 15s. 1d. Accounts were passed for payment amounting to £158 17s. 6d., and the action of the chairman in signing cheques for accounts becoming due since the last meeting, amounting to £458 18s. 5d., was endorsed. The report also mentioned that the Finance Committee had placed at the disposal of the Show Committee a sum of £1,045, to be allotted as prizes at the next London Show.

Next Meeting.

The next meeting was fixed for December 12th.

Worcester Chamber.

Mr. A. Dudley Clarke presided at the meeting of the Worcestershire Chamber of Agriculture held at Worcester on the 3rd inst. The price of agricultural implements was discussed, and it was stated that makers and vendors had agreed to discontinue the present discounts, thereby considerably increasing the prices. The combination affects Worcestershire, Herefordshire, Gloucestershire, and Monmouthshire, and the feeling of the meeting was that a co-operative movement should be started amongst farmers, and that if the combination of vendors and makers extended to a wider area the Royal Agricultural Society and the Central Chamber be requested to take the matter up. A general meeting of the members and others interested is to be called to discuss the matter.

Mr. B. G. Hall resigned his membership on the Council as he is going abroad, and a resolution recording appreciation of his valuable services to the Chamber was unanimously passed. The vacancy was filled by the election of Mr. E. B. Cotton, secretary of the Bromsgrove and Droitwich Farmers' Club.

A resolution was passed in favour of the extension of the Workmen's Compensation Act to all employments.

The Central Chamber urged experiments in feeding animals on sugar beet, but it was stated that no sugar beet was now grown in the county.

Shire Horse Society.

In the unavoidable absence of the President (Lord Middleton), Sir Walter Gilbey (past President) occupied the chair at the Council meeting, held in the Society's house, at 12, Hanover Square, W., on Tuesday.

Finance Committee.

Mr. P. Albert Muntz presented the report of the Finance Committee, showing a balance on the current account at the bank of £304 6s. 8d., with £750 on deposit. Accounts for payment £89 18s. 11d. had been passed. This report was adopted.

Editing Committee.

Mr. A. C. Duncombe (chairman) reported that applications had been received and approved for 135 prefixes and nine affixes.

They had dealt with several incomplete entries for Vol. 22, and the committee had arranged to meet on Wednesday, December 5th, to revise the Stud Book proofs. The reproductions of the portraits of the champion stallion and mare had been approved.

The committee recommended that the conditions of entry for Vol. 24 should remain the same as those for Vol. 23.

The chairman, in presenting this report, informed the Council that the forthcoming Stud Book would contain the record entry of any single volume of the Stud Book, as forms for the entry of 900 stallions and about 5,000 mares had been received.

Horse Show Committee.

Sir Walter Gilbey (chairman) presented a comparative statement of the gold and silver medals awarded during 1900, indicating that twenty-eight gold medals had been awarded at twenty-four shows, and 145 silver medals at 134 shows. He reminded the Council that their grants to the London and provincial cart horse parades had been increased during the past year, and the Horse Show Committee had offered twenty-seven medals and fourteen premiums of £1 at the last London Cart Horse Parade, and fifty-one silver medals and twenty premiums of £1 at nineteen provincial horse parades. The committee had dealt with various incomplete awards of the past season, and they recommended that the gold and silver medals at affiliated and other shows in 1901 should be offered under the same conditions as those of the present year. The schedule of prizes for the London show had been carefully considered, and the committee made several suggestions embodying an increase of £215, which, if adopted by the Council, would bring the total amount offered in cups and prizes up to £1,557. This increase comprised additional prizes in classes well supported by entries in previous shows, while in the majority of classes the committee recommended the addition of a prize of £5 to the breeder of the fourth-prize animal.

A new class for mares was also recommended, making this section of the schedule read:—

Mares, Five Years Old and Upwards.

(*a*) Under 16 hands.

(*b*) 16 hands, and under 16h. 2in.

(*c*) 16h. 2in. and upwards.

Further, the two gelding classes were increased by a third, so that they would read:—

Geldings, three years old.

Geldings, four years old.

Geldings, five years old and upwards.

Each class to have four prizes, with prizes for the breeders of the first and second prize geldings.

After some discussion the Council adopted the schedule of prizes as submitted by the Horse Show Committee.

Royal Show at Cardiff.

It was resolved, on the motion of the chairman, to offer two gold medals at the Cardiff meeting of the Royal Agricultural Society of England, for the best Shire stallion and the best Shire mare or filly exhibited.

The Council then adjourned till Tuesday in the Smithfield Show week, viz., December 11th.

The Farmers' Club.

The Farmers' Club's first meeting of the winter session took place at the Salisbury Hotel, Fleet-street, on Monday, and was numerously attended. Mr. J. R. Eve was in the chair. Mr. Trustram Eve, F.S.I., read a most practical and interesting paper on "The Agricultural Holdings Amendment Act 1900," a full report of which we gave in our last issue.

In the course of the discussion which followed Mr. B. St. John Ackers said it would be a rash thing for anyone to say what the Act really meant before the different points were submitted to a court of law. He hoped it would be given a fair trial.

Mr. Thomas Latham, who said the Act was one of the most miserable measures the late Government adopted, declared that no two farmers thought alike about the unfortunate Act, and they certainly could not find two farmers who were ready to praise it. A good many farmers kept nothing more than a labourers' book and a bank-book, but if they wished to work under the new Act they would have to begin book-keeping.

A hearty vote of thanks was accorded Mr. Eve for his paper.

East Sussex Farmers' Club.

The annual meeting of the East Sussex Farmers' Club was held at Lewes on Tuesday, the chair being occupied by Mr. F. W. Ingram.

The statement of accounts showed that the subscriptions amounted to £25 5s., and the expenditure £28 13s. 5d., leaving a deficit of £3 8s. 5d. The Chairman, referring to the accounts, commented on the fact that through some gentlemen leaving the neighbourhood the membership had dropped from 120 to 105, but he thought if they could add 15 more new members, the adverse balance would be wiped off. On the proposition of Mr. M. Sandford, seconded by Mr. Wallis, the accounts were adopted.

On Mr. W. Lintott being re-elected Secretary and Treasurer, the Chairman thought the club's thanks were due to Mr. Lintott for the work he had done in connection with the club. As they probably knew, what took place in that room did not represent Mr. Lintott's work; they were much dependent upon him for the lectures, and it was an open secret that if it was not for Mr. Lintott they would not have the pleasant evenings unless they could find an equally zealous Secretary to act on their behalf. Therefore the thanks of all were due to Mr. Lintott. (Applause.)

The election, by ballot, of officers was then proceeded with, Mr. F. W. Ingram being unanimously re-elected Chairman. In returning thanks, Mr. Ingram hoped the Club would have a successful season. The difficulty they had was that there were many members of the Club who knew a great deal about various subjects of interest to agriculturists, but who were prevented by modesty from coming forward to detail what they knew.

Mr. H. J. Powell was elected Vice-Chairman, and Messrs. M. Sandford, W. Killick, A. Wadman, J. Kenward, R. R. Verrall, J. M. Mowbray, F. G. Gorringe, and R. H. Powell the Committee. Mr. F. B. Dyer was re-elected Auditor.

The Chairman reported that at the next meeting an address would be delivered by Mr. Bacon on the Employers' Liability Act, particularly in its relation to farmers.

Kirby Stephen November Hirings. — At the hirings on Monday men-servants held out for the same wages that were paid for the summer term, and something approaching a deadlock occurred. Where engagements were entered into head men received £15 to £19 for the half-year; second-rate men, £12 to £14; and youths, £7 to £10. Experienced milkers obtained £10 to £15, and young girls £5 10s. to £7. At the Newcastle hirings on Monday there was a large attendance, and labour being in good demand high wages were given. Young women, experienced milkers, obtained £12 to £14; milk boys, £10; and young men, 16 and upwards, £13 to £19.

Proceedings of the Central and Associated Chambers of Agriculture.

Council Meeting.

A meeting of the Council of the Central and Associated Chambers of Agriculture was held on Tuesday, November 6th, 1900, at the rooms of the Society of Arts.

There were present: Mr. Victor C. W. Cavendish, M.P. (Chairman for 1900), in the Chair, Mr. J. Grant Lawson, M.P. (Vice-Chairman for 1900), and the following members:—

Representing the Central Chamber: Mr. B. St. John Ackers, Mr. J. F. Beddall, Mr. A. F. Jeffreys, M.P., Mr. F. J. Lloyd, Mr. H. Stopes, Mr. E. Strachey, M.P., and Mr. Ernest H. Godfrey (Secretary).

Representing Associated Chambers: Professor James Long (British Dairy Farmers' Association), Mr W. Weston (Bucks), Mr. C. P. Tebbutt (Cambridgeshire), Mr. W. W. Berry (Canterbury Farmers' Club), Mr. Joseph Beecroft (Chester Farmers' Club), Mr. J. T. Hobbs (Cirencester), Mr. C. Middleton (Cleveland), Colonel W. H. Wilson-Todd, M.P. (Darlington), Mr. T. Latham (Farmers' Club), Mr. E. Norton Mullins (Gillingham Farmers' Club), Mr. J. Stratton (Hampshire), Mr. Alexander Snodgrass (Hurstmonceux Farmers' Club), Mr. O. D. Johnson (Ixworth Farmers' Club), Mr. W. Frankish (Lincolnshire), Mr. H. Standfield (Milborne Farmers' Club), Mr. Henry Williams (Monmouthshire), Mr. E. T. Learner (Norfolk), Mr. T. A. Dickson (Northamptonshire), Mr. Ulric C. Stanley (North Cotswold Farmers' Association), Mr. W. Fitzherbert-Brockholes (North Lancashire Farmers' Association), Mr. J. Bowen-Jones, and Mr. Fred Horne (Shropshire), Mr. Herman Biddell (East Suffolk), Mr. S. Kidner (Taunton Farmers' Club), Mr. Charles Pratt (Warwickshire), and Mr. C. Harris Stratton (South Wilts).

Members of the Central Chamber: Mr. H. B. M. Buchanan, Mr. G. E. Francis, Dr. H. Gerlich, Mr. Laurence Hardy, M.P., Mr. H. Nowell Harvey, Colonel Victor Milward, M.P., and Mr. R. Henry Rew.

The minutes of the last ordinary meeting of the Council, held on May 29th, 1900, and of the Special Council Meeting, held on July 10th, 1900, were read and confirmed.

The late Mr. Samuel Rowlandson.

The CHAIRMAN said that before the meeting proceeded with the business on the agenda paper he had a very painful duty to perform. He was sure that in referring to the death, on the 24th of last month, of their valued and esteemed colleague, Mr. Rowlandson, he should be only falling in with the wishes of the Council, who knew the very great work which Mr. Rowlandson had done. He was not only a very active member of that Chamber, but, as a member of the Business Committee, he was intimately connected with the organisation and the administration of the Chamber. He was elected a member of the Central Chamber and of the Council in 1884, and in 1888 he was appointed on the Business Committee. He (the Chairman) was sure that all those members who, like himself, came from the north of England—and he believed that he might go further and say that nearly all agriculturists—were well acquainted with the very large and successful farming operations which Mr. Rowlandson had carried on, as well as with his valuable work in many public capacities. He took a most active part in the proceedings of the Chambers, and in the work of the various Committees. In particular he rendered services of great value to agriculture in connection with the Railway Rates Inquiry. The Council were represented at the funeral by Mr. R. C. Pearce, of the Darlington Chamber, and by Mr. Christopher Middleton, one of Mr. Rowlandson's colleagues on the Business Committee. He (the Chairman) was sure that it would not have been right of him to let the meeting proceed without an expression on behalf of the Council and of agriculturists generally of their very deep sympathy with Mr. Rowlandson's family and their sense of the very great loss which had been sustained. (Hear, hear.)

Mr. REW said that perhaps he might be allowed by the indulgence of the Council to add his small tribute of respect to the memory of Mr. Rowlandson. It was his privilege to be intimately associated with that gentleman during the whole of his (Mr. Rew's) Secretaryship of the Central Chamber, and he should like to take this opportunity of expressing the sense of the loss which he felt personally at Mr. Rowlandson's death. It would be unbecoming on his part to attempt any eulogy of Mr. Rowlandson's services to agriculture generally, or to the Chamber in particular, beyond those considerations which were already present to the minds of the members in attendance at that meeting; but he was sure that every one would agree that, although that Chamber had had the good fortune to enlist the services of many public-spirited men of great energy and ability, it had never had a man who had exhibited a sounder judgment, a more shrewd knowledge of affairs, or a greater interest in the success of agriculture than Mr. Rowlandson.

Admission of New Chamber.

The Market Gardeners, Nurserymen, and Farmers' Association, 32, King Street, Covent Garden, W.C., was admitted into association with the Central Chamber.

Election of New Members.

The following were elected Members of the Central Chamber:—

FITZHERBERT-BROCKHOLES, W., Claughton-on-Brock, Garstang, Lancashire.

GYÖRGY, Endre, 22, Laurence Pountney Lane, E.C.

LUMLEY, Theodore, 37, Conduit Street, W.

Finance.

On the motion of Mr. BOWEN-JONES (Treasurer), cheques were drawn to the amount of £118 11s. 10d. Mr. Bowen-Jones added that the balance at the Bankers' amounted to £256 16s. 2d., and that a sum of £2 13s. 11d. was in hand, making a total of £259 10s. 1d.

Communications.

The receipt of the following communications was reported:—

(1) Prime Minister, First Lord of the Treasury, and President of the Board of Agriculture, acknowledging receipt of (a) Report of Cattle Diseases Committee; (b) Resolution on the Registration and Inspection of Agricultural Boilers.

(2) Home Office and the Board of Trade, acknowledging receipt of Resolution on the Registration and Inspection of Agricultural Boilers.

(3) Prime Minister, First Lord of the Treasury, and the Board of Agriculture, acknowledging receipt of the Resolutions on the Agricultural Holdings Bill, as adopted by the Council at the Special Meeting of July 10th, 1900.

(4) Royal Lancashire Agricultural Society, transmitting (1) an advance proof of Professor Hele-Shaw's Report on the emission of Sparks by Railway Locomotives and on the use of Spark Arresters, and (2) a resolution on Standards for Butter and Milk.

(5) Berks and Oxon, Gloucestershire, Lincolnshire, Monmouthshire, Somersetshire, Warwickshire Chambers, and Howdenshire Agricultural Club: Resolutions on the Legislation required in the Agricultural Interest.

(6) Bucks, Berks and Oxon, Gloucestershire, Monmouthshire, Snaith and District, and Warwickshire Chambers: Resolutions on Agricultural Insurance.

(7) Resolutions from the Cleveland Chamber (Agricultural Rates Act); East Kent Chamber (Seed Testing Station); North Lancashire Farmers' Association (Damage by Sparks from Railway Engines, and Fixing of Milk Standards under Sale of Food and Drugs Act); Shropshire Chamber (Fraudulent Sale of Meat, Pure Beer Bill and Uniform Weights and Measures); Somersetshire Chamber (Definition of "Determination of Tenancy"); Worcestershire Chamber (Workmen's Compensation Act of 1900).

(8) Société Nationale d'Agriculture de France: Compte Rendu de la Séance de Réception, 4 Juillet, 1900.

(9) Bulletins de la Société des Agriculteurs de France.

(10) Norfolk Chamber: Annual Report, 1900, and Second Annual Report of Field Experiments of Cambridge University Agricultural Department.

Standards of Milk, Butter, etc.

The SECRETARY, at the request of Mr. FITZHERBERT-BROCKHOLES, read the following resolution sent up by the North Lancashire Farmers' Association:—

That the fixing of Standards of Milk, Butter, etc., by the Board of Agriculture under Section 4 of the Sale of Food and Drugs Act is a matter of great urgency, and that the Central Chamber of Agriculture be requested to do their utmost to press the Board to fix these Standards as speedily as possible.

Paris International Agricultural Congress.

The SECRETARY reported that Mr. Rouse Orlebar and himself were nominated by the Business Committee to attend the Paris International Agricultural Congress as official delegates from the Central Chamber of Agriculture. Major Le Roy Lewis was originally nominated as a delegate, but subsequently proceeded to South Africa on active service. Mr. Orlebar and himself had duly attended the Congress, which was held in the Palais des Congrès of the Exhibition from July 1-8, under the presidency of M. Jules Méline. They also had the pleasure of meeting at the Congress the delegates from other agricultural bodies in this country, including Sir Ernest Clarke, Secretary of the Royal Agricultural Society; Mr. R. A. Yerburgh, M.P., President of the National Agricultural Union; and Mr. F. J. Lloyd and Professor James Long, representing the British Dairy Farmers' Association. Being in Paris a day or two before the Congress opened, he (the Secretary) attended a meeting of the Société des Agriculteurs de France, to which were invited the foreign agricultural delegates then in Paris. That Society, founded upon the model of the Royal Agricultural Society of England, also fulfilled functions somewhat similar to those of the Central and Associated Chambers. On that occasion he had the honour as their delegate to present a short communication on the agricultural legislation of the late Parliament, which was cordially received. The French agrarian system differed from that of Great Britain, but considerable interest was manifested by some of the French agriculturists in our agricultural holdings legislation, although, as was stated by the President, the Marquis de Vogüé, the Société des Agriculteurs was opposed to measures of the kind. Some interesting papers and reports were communicated to the Congress, and were followed by discussions. These would appear in the Procès Verbaux to be duly published. One of the great advantages of these international congresses was the opportunity they afforded for agriculturists of all nationalities to enter into friendly and mutually useful relations with each other. Thus Mr. Orlebar and himself took part in an excursion to Verrières, by invitation of M. Philippe de Vilmorin, head of the well-known firm of Messrs. Vilmorin, Andrieux et Cie., and inspected their interesting seed and crop experiments. During the Congress they also had the privilege of attending a meeting of the Société Nationale d'Agriculture de France—one of the oldest European scientific societies—where they listened to a paper by M. Louis Passy, the Permanent Secretary, on the "Work of the Agricultural Societies of the World," and to an exposition of the work of the Pasteur Institute by Pasteur's successor, M. Duclaux. They desired to acknowledge the great kindness and hospitality which, as delegates of the Central Chamber, they received from the representatives of French agriculture. They both retained very agreeable recollections of their visit, which was of the most pleasant and, they hoped, profitable character. (Hear, hear.)

The CHAIRMAN then moved:—

That letters be addressed to the President and Secretary of the Paris International Agricultural Congress, the Société Nationale d'Agriculture, the Société des Agriculteurs and other representatives of French Agriculture, thanking them in the name of the Council for the cordial reception of the delegates of the Central Chamber of Agriculture on the occasion of their visit to Paris last July.

He was sure that after what they had heard from their Secretary, they would pass the resolution with great satisfaction. He believed that the Congress, as the Secretary had said, had brought together numerous representatives of all classes and all shades of opinion and thought in connection with agriculture, and that it would be attended with very satisfactory results. He was sure that the Chamber would feel grateful to those persons who received their representatives in the courteous manner which had been described, and that the meeting would express sincere thanks to them for their kindness. At the same time he should like to say how much the Chamber was indebted to their delegates at the Congress. He believed they had admirably fulfilled the duties entrusted to them, and that the Chamber could not have had two better representatives.

Mr. FRANCIS seconded the motion for the particular reason that he was chosen to represent the Worcestershire Chamber of Commerce at the Paris Congress of the Chambers of Commerce. The reception which he had met with in Paris was very cordial, and could not have been better. He wished to express his appreciation.

The resolution was carried unanimously.

Future Business.

The report of the Business Committee, settling the Order of Business at the next meeting under Bye-law 11, was as follows:—

That at the next meeting, to be held on Wednesday, December 12th, 1900, subject to the discussion of any matters of urgency, the questions for consideration shall be—

1. THE WORKING OF THE AGRICULTURAL RATES ACT OF 1896 AND THE QUESTION OF ITS RENEWAL.
2. TUBERCULOSIS AND THE WORKING OF THE "MODEL MILK CLAUSES" IN THE PRIVATE BILLS OF LOCAL AUTHORITIES.
3. QUESTION OF THE REGISTRATION OF PIG DEALERS AND THE INSPECTION AND DISINFECTION OF THEIR PREMISES.

Mr. FRANCIS desired to raise the question of limited protective duties on imported wheat; but the CHAIRMAN ruled that it would be out of order to discuss the subject on that occasion.

Alterations in the Laws and Bye-laws.

On the recommendation of the Business Committee, it was resolved: (1) "That the Laws, as amended by them on May 28th, 1900, and circulated to the members of the Council, be now adopted for submission to the General Meeting on December 12th, 1900; (2) That the word 'speaker' be substituted for the word 'member,' and the words 'address the Chair' be substituted for the word 'speak' in line 1 of Bye-law 2 (b)."

The Annual Agricultural Dinner.

On the motion of Mr. GRANT LAWSON, M.P., it was resolved:—

That the Central Chamber of Agriculture do again co-operate with the Farmers' Club in holding a Joint Dinner on the Tuesday in Smithfield Week (December 11th, 1900), and that the Chairman, the Vice-Chairman, and the Secretary be appointed a Committee with full powers to make all necessary arrangements.

Report of the Cattle Diseases Committee.

The following report of the Cattle Diseases Committee was presented:—

FOOT-AND-MOUTH DISEASE.

1. Your Committee greatly regret to have to report that renewed outbreaks of foot-and-mouth disease have occurred in various parts of the country since the last meeting of the Council on May 28th. In the first week of August the disease appeared in the East Riding of York. Later in the same month three outbreaks occurred in Flintshire. During September three outbreaks were reported in Wiltshire. On October 5th the disease was detected in Staffordshire, and the report of the outbreak was immediately followed by the scheduling of a district situated in the counties of Stafford, Derby, Leicester, and Warwick. There have thus been eight additional outbreaks if the disease since the Committee last met on May 28th.

2. According to the Official Returns of the Board of Agriculture, there have been altogether seventeen outbreaks in eight different counties since the re-introduction of the disease into this country last January, the total number of animals attacked being 227. The returns issued do not give the number slaughtered of animals which have been in contact with the diseased animals. The counties in which the outbreaks occurred are Norfolk, Suffolk, Bedford, Hertford, York (E.R.), Flint, Wilts, and Stafford.

3. With the exception of the original outbreak in Norfolk, where the animals affected were isolated, each outbreak immediately after being confirmed by the veterinary officers of

the Board of Agriculture, was dealt with by the prompt slaughter, not only of the diseased animals, but also of those which had been exposed to infection. The Orders of the Board of Agriculture scheduling districts around the areas of the outbreaks in the counties of York (E.R.), Flint, and Wilts, have now all been revoked, and the only district still remaining scheduled is that in Staffordshire and the adjoining counties.

4. In September the disease was reported to have broken out in Perthshire, and an extensive district was accordingly scheduled. Subsequent inquiries, however, proved that the outbreak reported upon was not due to foot-and-mouth, and Scotland fortunately continues to be free from the disease.

5. The Committee regret that the efforts of the Board of Agriculture to trace the origin of the outbreaks have not been successful in any case.

6. Your Committee are glad to note that the Board of Agriculture are steadily pursuing the system of stamping out the disease by immediate slaughter of the animals affected and those in contact with them. At the present time there are good grounds for hoping that the country may soon be again regarded as entirely free from the disease.

SWINE FEVER.

7. Your Committee are glad to find that the outbreaks of swine fever during the present year up to the end of last week show a decided decrease compared with the corresponding period of 1899. The following Table gives the number of outbreaks and number of swine slaughtered as diseased or as exposed to infection since the year 1893. The Contagious Diseases (Animals) Act of 1893, by which Swine Fever was brought under the Diseases of Animals Acts, came into operation on November 1st, 1893.

Year.	Number of Outbreaks.	Number of Swine Slaughtered as Diseased or as Exposed to Infection.
1,893	2,913	15,402
1,894	5,682	56,296
1,895	6,305	69,931
1,896	5,166	79,586
1,897	2,155	40,432
1,898	2,514	43,756
1,899	2,3 2	30,797
43 Weeks ended Oct. 28, 1899	2,064	27,219
43 Weeks ended Oct. 27, 1900	1,659	15,681

8. The attention of the Committee has been drawn to a Report of the Diseases of Animals Executive Committee of the Somerset County Council, dated October 3rd, 1900, which contains the following paragraph:—

> The Committee having been informed by the Chief Inspector that the Board of Agriculture had altered their practice of dealing with cases of swine fever, by abstaining from slaughtering swine in a herd among which an outbreak of swine fever had occurred, have urged upon the Board the advisability of reverting to the practice of slaughtering and paying compensation, for the following reasons:—
>
> 1. That even in infected places well adapted for isolation the presence of diseased swine is a source of possible, if not probable, danger.
> 2. That the new practice bears hardly upon an owner, who, failing slaughter by, and compensation from, the Board, is compelled, at considerable loss, to slaughter on his own premises.
> 3. That there is danger that the practice of the Board, by inflicting loss upon individuals, may lead to the concealment of disease, and so tend to render more difficult the attainment of the end which the Board have in view.

9. Your Committee concur in the views expressed by the Executive Committee of the Somerset County Council, and consider that all pigs found to be affected with Swine Fever, and those in contact with them, should be immediately slaughtered, and compensation paid under the powers conferred by the Diseases of Animals Act of 1894.

SHEEP SCAB.

10. The number of fresh outbreaks of sheep scab reported to the end of September last was 1,308, compared with 1,378 to the end of September, 1899. Your Committee strongly recommend that the Board of Agriculture should obtain the necessary legislative powers to order the compulsory dipping of sheep in order to prevent and eradicate this disease.

OTHER DISEASES OF ANIMALS.

11. ANTHRAX.—The outbreaks of anthrax for the forty-three weeks ended October 27th number 446, as compared with 442 in the corresponding period of 1899, 464 in 1898, and 363 in 1897.

12. GLANDERS.—There appears to have been a notable increase in the outbreaks of glanders for the same period, the number being 944, as compared with 682 in 1899, 630 in 1898, and 752 in 1897.

13. RABIES.—Unhappily, rabies, which it was hoped had been entirely eradicated, has reappeared in the districts from which the restrictions were last removed. Seven cases have occurred in Wales during the last two months, one of them in the county of Brecon, and six in the county of Carmarthen. Five of the cases related to dogs, and two to other animals. Fresh Muzzling Orders have therefore been imposed in the counties named, and in the county of Glamorgan.

B. ST. JOHN ACKERS, Secretary.

November 5, 1900.

Mr. ACKERS, in moving that the report be received and adopted, said the first thing which struck one as very unsatisfactory was that, as he had been informed, the efforts of the Board of Agriculture to trace the origin of the outbreaks of foot-and-mouth disease in the different counties had not been successful. Whatever their views might be as to the introduction of the disease, there did not appear to have been, after the outbreaks in Norfolk, Suffolk, and Bedfordshire, any possible means of tracing how the disease got into the other counties. On the other hand, he thought that they would all be very glad to know that England was now declared almost absolutely free from the disease, and that the last outbreak in Staffordshire had not only subsided, but had not spread, and the Order had been revoked. It would be seen from paragraph 4 that there was a supposed outbreak of foot-and-mouth disease in Scotland. It was so many years since foot-and-mouth disease was at all prevalent throughout the United Kingdom that it was not to be wondered at that certain veterinary surgeons were not certain, when animals were attacked with disease, whether the outbreak was foot-and-mouth or not. It was satisfactory, he thought, to find that the Board of Agriculture in every case, or, at any rate, in almost every case, sent down their Chief Adviser, Mr. Cope, to see whether the disease was foot-and-mouth or not. They would, he thought, also see with satisfaction that in every case after the first the views of the Chamber, and the views, he might say, of agriculturists pretty well unanimously throughout the kingdom, had been carried out by the Board, and that slaughter had been resorted to, and not isolation.

Turning to the next subject, that of swine fever, they all rejoiced to find a diminution in the number of cases of that disease. But they would find that in one particular case, at any rate in the county of Somerset, the Board had gone back from the practice of slaughter to that of isolation. He did not mean to say that they had always absolutely slaughtered all swine in contact with diseased animals, but at all events slaughter had been the rule, and, apparently, from the answer received from the Board by the Somerset County Council Committee on the Diseases of Animals, the Board were rather inclined to advocate isolation. He thought that this was a very important matter, and one which should be unanimously pressed upon the Board. As they had pressed upon the Board with regard to foot-and-mouth disease, so they should press with regard to swine fever, that isolation was not in their opinion a satisfactory method of dealing with the disease, and that there should be immediate slaughter and compensation. It would be seen in paragraph 9 that the Cattle Diseases Committee strongly supported that view.

With regard to sheep scab, the Committee again pressed that the Board of Agriculture should apply to Parliament for powers which they did not now possess to order the compulsory dipping of sheep. As to other diseases of animals, the only point that he had to remark upon was that, unhappily, rabies had again broken out, cases having occurred in South Wales. That fact was particularly to be regretted, inasmuch as they had all been congratulating Mr. Long upon the successful termination of the very unpleasant duty which fell upon him, but which was attended with great national advantage—the duty of stamping out that most horrible disease. The opinion of the Board was that the six months which had been found sufficient in all other cases was not quite sufficient in the particular case of South Wales. There had been special circumstances which rendered it very difficult to detect whether the disease had been stamped out or not, but, at all events, he thought that they would strengthen the hands of the Board if, instead of that hysterical outcry which they used to hear from certain persons in times past, so far from reproaching the Board for not having dealt severely enough with rabies, they would, if they felt that six months might not be in all cases sufficient, heartily back up the Board in fixing a longer term, so that they might render the country once more free from the disease.

Mr. MIDDLETON (Cleveland) seconded the motion. They might congratulate themselves on the fact that the country was again free from foot-and-mouth disease. That disease was shown to be of a very insidious character by the way in which it had broken out. He thought that the action of the Board of Agriculture must commend itself to every agriculturist on account of the very prompt way in which they had dealt with the recent outbreaks. There had been slaughter not only of the diseased animals, but of those animals which had been in contact with them. He thought that it must be admitted that that was the only safe way of getting rid of the disease.

Mr. BOWEN-JONES (Shropshire) suggested the addition to paragraph 10 of the following words: "And also to enable the local authority to provide public dipping tanks." It seemed to him that if they concurred in the view that public dipping was necessary for sheep scab—a view which he entirely endorsed from his own knowledge of that troublesome malady—it was a necessary corollary that public dipping tanks should be erected in order that the dipping might be carried out. This matter had not been discussed at the Central Chamber; but he thought that when powers were being obtained for the purpose of compulsory dipping, further powers ought also to be obtained for the purpose to which he referred. The local authorities should have power to erect dipping tanks, and pay for them, because he believed that the work of dipping could be best superintended by the local authorities. He also thought that, if tanks were erected, their erection would involve the necessity of appointing inspectors to see that the dipping was properly carried out, and that the ingredients used were such as would kill the parasites. Altogether he was strongly of opinion that the erection of public tanks would bring about a stricter administration of the law by the local authorities themselves, and that was what was wanted. From the part which he had taken in forming a large combination of counties on the borders of Wales where the disease was rife, he was convinced that, through the repressive action which had been taken in preventing the bringing in of sheep from outside the area of the combined counties, except under regulations of a very drastic character, they were gradually educating the farmers in the mountainous parts of the kingdom to understand that sheep scab was a disease that they must get rid of. He therefore wanted to strengthen the hands of all concerned in the administration of the law in coping with and eradicating the disease; and he believed that the means which he had suggested would be of very essential importance in doing so.

Mr. PRATT (Warwickshire) seconded the amendment because of the trouble which the disease gave in his district.

Mr. SNODGRASS (Hurstmonceux Farmers' Club) said his Club had a distinct objection to compulsory dipping. His district was almost entirely a breeding one, and the sheep were kept under conditions which were very unlikely to create or induce an outbreak of scab. In fact, it was a long time since an outbreak had been known among the sheep bred in the county, and very few sheep were introduced from other parts. He believed that what he said with regard to his own district applied to the whole county. He did not think that any person would, of his own accord, dip his sheep for scab when he knew very well that there was no scab in the district. Perhaps it might be right to compel the people in some districts to dip, but he believed that in his county the breeders of sheep would consider compulsory dipping a very great hardship.

The CHAIRMAN pointed out that the question of dipping for sheep scab had been settled by the Chamber. The question raised by the amendment was simply whether local authorities should provide public dipping tanks. He did not wish the discussion to get too far away from that point.

Mr. JOHNSON (Ixworth Farmers' Club) said that public dipping tanks might be necessary for the country as a whole, but he was not then prepared to vote for them. He did not wish to oppose any pressure which the Chamber might think it necessary to put upon the Board of Agriculture to do what was necessary in order to protect the flocks of this country. But he had kept sheep for thirty years in Suffolk, and he had never had a case of sheep scab, and he did not know that he had seen one. That fact led him to think that it was unnecessary, at any rate for the whole country, to take such measures as the amendment proposed. It might be necessary that the law which now existed should be enforced most strongly in those districts in which the disease was prevalent, but drastic measures were not necessary for his county.

Mr. MIDDLETON (Cleveland) said that there had been some little misapprehension as to what was before the meeting. The proposal of the report was that the Board of Agriculture should have power to order compulsory dipping where it was necessary; not that universal dipping should be carried out.

Mr. WILLIAMS (Monmouthshire) inquired whether it would be in order for him to ask the last speaker but one whether he did or did not dip his sheep at present. If he did, where was the objection to its being compulsory?

Mr. JEFFREYS, M.P., said that Mr. Bowen-Jones spoke with great authority upon a subject of this sort. He should like to ask him whether he meant that the public dipping tanks should be fixed at certain dipping places, or that there should be moveable dipping boxes which could be carried from place to place. The appointment of fixed dipping places would often cause great difficulty in the sending of sheep to be dipped. In the high lands of Hampshire there was great difficulty in sending sheep to the water to be washed, and nearly all the fleeces were sold unwashed. Every farmer dipped his sheep, but it was generally by means of boxes which were carried on wheels and brought to the flocks. He should himself be very much inclined to agree with the original paragraph as it stood. If the Board of Agriculture determined to carry out the compulsory dipping of sheep in a particular district, let them also find out the way of carrying their order into execution. If what Mr. Bowen-Jones suggested in his amendment was carried out, every local authority might find it necessary to put up public dipping places, and such a step would be a great expense to the locality. It seemed to him that it would be a great hardship to many farmers to have to send their flocks of sheep four or five miles to be dipped. Although he agreed that, at all hazards, sheep scab should be stamped out, yet he did not think that they ought to make the method too onerous a burden upon farmers.

Mr. JOHNSON (Ixworth Farmers' Club) explained that in Suffolk they dipped sheep when they thought it necessary to dip them, but they did not dip them for scab.

Mr. HERMAN BIDDELL (East Suffolk) said that the malady of scab was of rare occurrence on his side of the kingdom, and he should be opposed to a measure which might be needed for Wales being pressed upon parts of the kingdom in which it was not required. He did not think that the Chamber would be justified in suggesting such a course. If the proposal was to be of the sweeping character which had been described, he hoped that it would be negatived.

Mr. KIDNER (Taunton Farmers' Club) said it was quite evident that there were differences of opinion as to the mode in which sheep scab should be stamped out; but they were all at one in thinking that the Board of Agriculture should take up the subject, and that the disease should be eradicated. He thought that the report as it was worded left it open to local authorities to decide whether they would enforce the regulations after they had the power to do so. But he thought that there were objections to Mr. Bowen-Jones' proposal. As Mr. Jeffreys had said, local authorities might have to go to great expense, and

that expense might be quite unnecessary. In his own district a great many of the farmers had their own dipping tanks.

Mr. LLOYD doubted whether the wording of the report accurately expressed the intention of the Committee. He thought that after the words "the compulsory dipping of sheep" in the tenth paragraph of the report there ought to be inserted "suffering from the disease." He could hardly agree that dipping was a preventive of the disease, and he doubted whether such a view could be maintained. The report spoke of preventing disease, but he thought that it really meant preventing the spread of the disease.

Mr. BOWEN-JONES: No.

Mr. LLOYD, concluding, thought that the obtaining of compulsory powers to order dipping would go a long way towards preventing the spread of the disease, and also towards eradicating it.

Mr. WESTON (Bucks) agreed with what Mr. Jeffreys had said. In his part of the country, namely, the borders of Buckinghamshire and Hampshire, many farmers had already put up what they called swimming baths, and they allowed their neighbours to bring their sheep to them for dipping. Two men would dip a thousand sheep a day in them, and the process was very simple. He had put up one himself and notified to the farmers of the village that they could dip their sheep on simply paying the expenses. He thought that an arrangement of that sort would meet the case. It was absolutely necessary, in his opinion, that dipping should be compulsory, and that all sheep should be dipped once a year. It had been conclusively proved that the disease had been stamped out in New Zealand and Australia by compulsory dipping, and surely the same result could be obtained in this country. He was certain that the farmer received benefit from dipping by getting a better quality of wool. Nobody could object to dip once or twice a year. If sheep were to be taken from one county to another, a certificate that they had been dipped within a certain time ought to be required before they were allowed to travel. That could only be carried out by the Board of Agriculture having full powers to enforce dipping.

Mr. MULLINS (Gillingham Farmers' Club) agreed with Mr. Lloyd that the words "suffering from the disease" should be inserted in the report. He had kept sheep for thirty years, and, like Mr. Johnson, had never seen a case of sheep scab in his life. He would venture to say that not 2 per cent. of the sheep in the kingdom were afflicted with scab; and to dip the other 98 for the purpose of securing the cure of the two that were infected would be a somewhat too drastic measure to go down with English farmers. If they passed that recommendation of the report, they would, he thought, find a great deal of opposition. If he was in order he would move the insertion of the words "that are infected."

The CHAIRMAN ruled that the amendment already before the meeting must be disposed of before a further amendment could be moved.

Professor LONG (British Dairy Farmers' Association) said that both those who had had scab in their sheep and those who had not were very strong in their opinions. Some of the speakers had said that they had never seen the disease. He (Professor Long) had had to deal with cases of scab, and for that reason he supported Mr. Bowen-Jones. If in his (Professor Long's) village there had been a public dipping tank put up by the local authority, he should never have had scab in his sheep, and he should never have had any loss or anxiety from that cause. Of all diseases sheep scab was the most filthy and the most abominable. He had had the misfortune to be induced to buy sheep in his neighbourhood, and some of those sheep had scab without his being aware of it. Upon their coming to his place, they infected his flock, and caused great annoyance and vexation and considerable loss. It was all very well to suggest that farmers should dip their sheep when they had got scab, but let them be dipped before they contracted the disease. Let that precaution be taken, and they would never have scab. He thought that Mr. Bowen-Jones's advice should be listened to, for he was Chairman of the Shropshire County Council, which had done the best work in England with regard to sheep, and what was done in Shropshire ought to be done throughout England. He was quite sure that if they had all known the work of Shropshire, those speakers who had expressed themselves so strongly against Mr. Bowen-Jones's proposal would have supported it.

Mr. BOWEN-JONES pointed out that the question of dipping had been settled by the Chamber, and they could not go back without rescinding their previous resolution. His suggestion was simply that they should ask the Government to afford them an enabling means of carrying out the regulations for compulsory dipping in a way that would make it effective, and nothing further. Mr. Jeffreys had raised the question of whether there should be fixed dipping stations or movable tubs. He (Mr. Bowen-Jones) did not want to go into any of those details. He only wanted powers to be given to the local authority to spend money for the purpose if they thought it necessary. They need not provide dipping tanks if they did not think them necessary. If the local authority thought that the money of the ratepayers should be expended in the provision of such tanks, they would naturally charge some fee for the use of the tanks, and the thing would pay for itself. But, if it did not pay for itself, still, if the disease was extirpated, the farmers and the other ratepayers of the county would be thoroughly repaid for the expenditure. The point raised by Mr. Lloyd was not strictly within the limits of his proposal, but he could not pass it by without referring to it. He was sure that Mr. Lloyd could not have read the present Sheep Scab Orders. He said that there ought to be compulsory dipping for animals suffering from the disease. But every local authority had power already to enforce dipping in cases in which the disease existed. A great many of the local authorities, however, failed to exercise the power, or else the disease would have been stamped out before now. Most large farmers had been in the habit of having a swimming dipping bath. He had had one himself, and he had used it three or four times a year. As to the scab, he did not know what it was, although he lived on the border of Wales; but he should have had losses of the greatest magnitude if he had not taken means to keep the scab out of the flock. The disease would have been extirpated if it was not for the supineness of the local authorities. Therefore, he wanted the law to be altered so that there might be still stricter regulations than the regulations which existed at the present time. For that reason he had proposed what he might call the harmless and innocent enabling proposal contained in the amendment, and he hoped that Mr. Ackers would accept it.

Mr. ACKERS said that, whether dipping was proper or not, the Chamber had decided in favour of it, and that settled the question. A resolution on the subject was passed without a division quite recently, and sent up to the usual Ministers. As to its being intended that there should be an absolute Order for the dipping of every sheep in England, nothing of the kind was said either in the resolution which had been passed by the Chamber, or in the present report of the Cattle Diseases Committee. The proposal was simply that the Board of Agriculture should have power to order dipping as they might deem necessary, either universally or in a particular county or district. The power might be exercised either generally or locally, but the object was to give the Board power to enforce dipping, and to leave it to the Board to say how far it should be done. He was very sorry that he could not accept Mr. Bowen-Jones's amendment. Mr. Bowen-Jones was a very influential member of the Cattle Disease Committee, and one to whom the Chamber always listened with very great interest and attention. He was present at the meeting of the Cattle Diseases Committee when the report was drafted, and this question was brought up, though not threshed out. They wanted to give to the Board of Agriculture power to get rid of the disease. That was a plain, straight issue, which he was sure that they must all agree upon; but the moment that they began to load it with proposals that the local authority should be bound to do something else——

Mr. BOWEN-JONES explained that he used the word "enabled," not "bound."

Mr. ACKERS accepted the correction. But it was proposed that they should ask for an Act of Parliament to deal both with the powers of the Board of Agriculture and also with the powers of the local authorities. He felt—and he believed that the Chamber would feel—that it would be a much safer plan to ask the Board of Agriculture to bring in a Bill to give them compulsory powers and get it passed. No doubt in such a Bill would be given all other powers which were necessary for the effective carrying out of compulsory dipping. If the Board of Agriculture considered that powers for compulsory dipping could best be carried out or could only properly be carried out by increasing the powers of the local authorities, doubtless the increase of those powers would be one of the main features of the Bill when it came forward. But, if that was not so, they would surely then be able to press the matter, and he was quite sure that no Bill would be brought forward or any attempt would be made to carry any Bill into an Act without Mr. Bowen-Jones and those persons on the borders of Wales who not only had shown themselves deeply interested, but had taken a most intelligent and active part in preventing the spread of the disease, being consulted. The Committee had abstained from asking for the power in question because they did not want to overload their recommendation by intermingling the local authority with the Board of Agriculture. They had addressed themselves to a plain, straightforward issue. He was very sorry that he could not accept the amendment, and he would ask the Council to accept unanimously the Report as it stood.

Mr. BOWEN-JONES said that he was in the hands of the Chamber. He was himself perfectly convinced that it would be necessary to carry out what he proposed, and, if the Chamber were going to oppose it, he would rather that they should not express an opinion until they had thought over the matter further. Unless they gave a great deal of thought to the matter they could not make up their minds very easily about it. He did not want to make another speech, but he would say that what he had proposed was only an enabling suggestion. It was quite open to the Board when it made an alteration in the sense of the recommendation of the Cattle Diseases Committee to provide that the local authorities should order the compulsory dipping. He did not take it that the Board of Agriculture was going to order it. If Mr. Ackers could accept the amendment he should be very glad. He did not want a strong difference of opinion exp[illegible] on this question, and therefore he thought that perhaps the best course that he could pursue in the interests of the subject would be to withdraw [illegible].

The amendment was then by leave withdrawn.

Mr. STRACHEY, M.P., referring to paragraphs 8 and 9 of the Report, said that apparently the Cattle Diseases Committee were not aware that the Somerset County Council unanimously concurred with the recommendation of the Committee, and that their resolution was sent to the President of the Board of Agriculture. He thought that the Committee ought to go a little further than they had done in paragraph 9. As far as he could see that paragraph merely expressed a pious opinion concurring with the views expressed by the Executive Committee of the Somerset County Council. As recently as last June the President of the Board of Agriculture, referring to the question of swine fever, pointed out that in 1897-98 £125,000 was spent for compulsory slaughter. The amount decreased in 1899-00, to £78,000. The outbreaks during the period of 1898-99 were 2,400, and they decreased in the following year to 2,100. The President went on to say that in the first twenty-four weeks of this year there had been only 1,000 outbreaks in comparison with 1,370 the year before. He then proceeded:—"Generally speaking, over the whole country, there is a decided improvement in regard to this most insidious disease, and we have every reason to believe that if our efforts are supported by the local authorities it will be as satisfactorily dealt with as other diseases have been." After that statement made in the House of Commons it seemed to him surprising that the President of the Board of Agriculture should turn right-about-face and alter his regulations. He pointed out in the House of Commons that the outbreaks had decreased, and that the amount of compensation had decreased by a very large amount, and yet he had now issued regulations doing away with compensation for slaughter. As far as he (Mr. Strachey) could see there was nothing to justify that change, and he hoped that the Chamber would pass some strong resolution backing up the Somerset County Council in their disapproval of the action of the President of the Board of Agriculture in this matter. He (Mr. Strachey) knew that he was speaking the opinion of the agriculturists of Somerset as shown by the fact that the Somerset County Council unanimously passed a resolution concurring with their Committee to the effect that it was a wrong thing for the President of the Board of Agriculture to reverse the whole of his action without any reason at all. Agriculturists in Somerset had experience of the same state of things when compulsory slaughter was not prevalent and no compensation was paid. They found in that time that infected areas were maintained throughout the length and breadth of the country in consequence of the fact that people very naturally objected to slaughter when no compensation was paid to them. There might, for instance, be a small occupier who kept only two or three pigs adjoining a large occupier who kept many, and yet upon an outbreak the small occupier would refuse to slaughter his pigs unless he was to receive compensation. He ventured to suggest that the Chamber should add to the report of the Committee the following words at the end of paragraph 9:—"Also that the President of the Board of Agriculture be asked to revert to immediate slaughter and compensation in all cases."

Mr. BEECROFT (Cheshire) seconded the amendment.

Mr. ACKERS said that he cordially agreed, but the Committee thought that the paragraph in the report was strong enough. He doubted whether the words which Mr. Strachey proposed to add were stronger. If they were, by all means let them be put in. The only reason why they would not quite like the absolute wording of the Executive Committee of the Somerset County Council was that the Board had said that they had not gone back from their plan, and that they had always exercised the right of isolating in certain cases and of slaughtering in others. To use the word "revert" would be to say to the Board of Agriculture that the Chamber did not quite believe the statement that the Board had made. Could not they put in some other word instead of "revert," as, for instance, "insist upon immediate slaughter in all cases"? He should be most happy to agree to that if Mr. Strachey would accept that wording.

Mr. Strachey having accepted the alteration suggested by Mr. Akers, the words "also that the President of the Board of Agriculture be asked to insist upon immediate slaughter and compensation in all cases" were added to paragraph 9 of the Report.

Mr. MULLINS (Gillingham Farmers' Club) proposed the insertion of the words "that are infected" after the words "dipping of sheep" in paragraph 10 of the report. Those that were whole had not need the physician. The great majority of the sheep of this country were not brought into contact with sheep which had the scab. A compulsory measure for the dipping of all sheep would be found to be too drastic and too unpalatable. It was also unnecessary, because there were already ample powers to deal with sheep scab.

Mr. J. STRATTON (Hampshire) seconded the amendment, as he considered that only infected sheep should be dipped.

Mr. WILLIAMS (Monmouthshire) said that the remarks of some of the speakers were [illegible] going

back upon what had been decided by the Chamber. He thought it was not in order to be continually discussing whether sheep dipping should be or should not be compulsory. Mr. Stratton had contended that only sheep that were infected should be dipped. A neighbour of his (Mr. Williams) had kept sheep for forty years without having seen a sign of scab in them, but upon one occasion he took some of them to market and brought them home again, and shortly afterwards sheep scab broke out among them in consequence of their having been in an infected pen. Compulsory dipping would have prevented an occurrence of that kind.

Mr. KIDNER (Taunton Farmers' Club) was entirely in accord with Mr. Mullins and Mr. Stratton, but he would ask them to withdraw their amendment. As representing the National Sheep Breeders' Association he was sure that it would be the wish of that body that they should do so. There were two opinions as to the mode of stamping out sheep scab, but it was all-important that they should go with a united voice on this question to the Board of Agriculture.

Mr. MIDDLETON asked whether any amendment to a Report of a Committee was in order.

The CHAIRMAN said he believed there was no precise rule. Amendments were sometimes moved, but the general practice of the Council was they were not pressed without the concurrence of the Chairman of the Committee who moved the adoption of the Report.

Mr. STANDFIELD (Milborne Farmers' Club) said that as a farmer of many years' standing he was very much surprised to hear farmers and others speaking against the dipping of sheep. He thought that the reason why they dipped sheep had been overlooked. It was not only on account of the scab, but that if sheep were not dipped they were very likely to be afflicted with a parasite called sheep tick; and not only so, but they had flies and maggots on them which very soon ate into the flesh and caused the death of the sheep if they were not prevented. There was nothing in the world except dipping which would prevent flies from striking into the sheep, or which would kill sheep tick, which was such a scourge. He had been told on good authority that the same ingredients which would eradicate or prevent tick would cure sheep scab if it existed. Like some of the other speakers he had never seen a case of sheep scab in his life; but he had been told by a neighbour of his that once he brought some sheep from Scotland, and that on coming into the district they were found to be infected with scab. All the farmers in his neighbourhood used the ordinary sheep dip, and without exception they thought that it would be great folly not to dip their sheep. The dip that was used was a composition of arsenic, soft soap, and sulphur. In the case of the sheep of which he had spoken, and which had been brought from Scotland, the dip was made rather stronger than usual, and, although the sheep were badly infected, one dip cured them. He thought that no flock keeper who had any experience or any knowledge of sheep or of the nature of the disease which afflicted them could consistently oppose the dipping of the sheep. He should think that every farmer in his own interest would dip the sheep without a compulsory order. But perhaps the dipping might be omitted by the mountain farmers of Wales and Scotland who did not see their sheep for a month at a time, and who sold them carelessly, and such cases must be guarded against.

Mr. ACKERS said that he was sorry that he could not accept the amendment. It was not a necessary one, for all the powers which it suggested were in existence at the present time. Besides that, there would be little or no good in dipping the sheep that were diseased if those which were in contact with them were not dipped also.

The amendment for inserting the words "that are infected" was then put and negatived.

On the motion of Mr. ACKERS, seconded by Mr. MIDDLETON (Cleveland), it was resolved to send a copy of the report, as amended, to the usual Ministers.

Agricultural Legislation.

The following "Statement of Legislation Required in the Agricultural Interest," issued before the recent General Election by the Business and Parliamentary Committees in pursuance of the Council's resolution of May 29th, 1900, was presented:—

I. LOCAL TAXATION.
(a) That a permanent and comprehensive measure be passed, giving adequate relief from the excessive and unfair burdens at present imposed upon Agriculture.
(b) That steps be taken to remedy the anomalies disclosed by the First Report of the Royal Commission on Local Taxation of December 16th, 1898, and especially to provide one uniform assessment for all purposes, both Imperial and local.

II. RAILWAY RATES.
(a) That the granting by railway companies of preferential rates and facilities for foreign produce be absolutely prohibited, and that the Board of Trade be empowered and instructed to enforce the law.
(b) That more ready means be provided for obtaining the reduction of unreasonable rates on English produce.

III. TUBERCULOSIS.
That in any legislation dealing with the important national question of Tuberculosis due provision be made for compensation in respect of tuberculous animals or carcasses slaughtered or seized in the public interest.

IV. COMPULSORY DIPPING OF SHEEP.
That power be conferred upon the Board of Agriculture to order the compulsory dipping of sheep for the purpose of preventing and eradicating sheep scab.

V. BEER DUTIES AND BREWING MATERIALS.
(a) That the Beer Duty be re-adjusted by a reduction in the duty charged on beer brewed only from barley-malt and hops; and that a like amount be added on beer containing any substitute for barley-malt and hops.
(b) That brewers and publicans be compelled to declare the ingredients of their beer.
(c) That effect be given to the suggestions contained in the Majority and Minority Reports of the Departmental Committee on Beer Materials, as to the insertion in the brewing-books and in the information furnished in the Parliamentary Returns of separate columns for hops and hop-substitutes, and as to the publication of returns by brewers for sale and of the use of hop substitutes.

VI. SALE OF CORN.
(a) That there be one uniform weight for the sale of corn.
(b) That the highest and lowest prices of each kind of grain, in addition to the summary of the total quantities sold and the average prices of such grain, be published in the weekly returns now made by the Government officials in the statute markets of this country.

VII. FRAUDULENT SALE OF FOREIGN MEAT.
That in the interests of both producers and consumers all retail vendors of imported dead meat be registered, and prominent notice of the fact displayed in every shop held by each person registered.

VIII. DAMAGE TO CROPS BY SPARKS FROM RAILWAY ENGINES.
That railway companies be rendered liable to pay compensation for damage done to growing crops, plantations, fences, etc., by fires caused by sparks from their engines, and thus in this respect be placed upon an equal footing with the owners of road locomotives.

IX. LAW OF TRESPASS.
That the existing law of trespass, which is obsolete and ineffective, be amended, particularly in the direction of providing for the protection of products, which, though of natural growth, are of a marketable character.

X. INJURIES TO FARM STOCK BY UNCONTROLLED DOGS.
That steps be taken to prevent, or secure compensation for, sheep-worrying or other injuries inflicted upon farm stock by dogs, either by the enactment of the provisions of the Dogs Regulation Bill of last Session, or by other legislative means.

N.B.—The order in which the above subjects are printed does not necessarily involve an expression of opinion as to their relative importance.

ERNEST H. GODFREY, Secretary.
September 26th, 1900.

Mr. BOWEN-JONES (Shropshire) moved:—
That the Statement of Legislation required in the Agricultural Interest, issued by the Business and Parliamentary Committees in pursuance of the Council's resolution of May 29th, 1900, be now communicated to the Prime Minister, the First Lord of the Treasury, the President of the Board of Agriculture, and other Ministers.

He presumed that the meeting would deprecate discussion upon the suggestions which had been sent out by the two Committees to candidates for Parliamentary honours during the past Election; because those suggestions were founded on resolutions of the Chamber which had been passed in the usual way by the proper majority, and it would have been *ultra vires* on the part of the Parliamentary Committee or the Business Committee to go beyond those suggestions or to alter them in any material degree. But perhaps he might anticipate some objections on another matter to the Statement that had been prepared. One objection might be that the Statement was not issued soon enough to Parliamentary candidates. But the Business and Parliamentary Committees were bound by the terms of the resolution of the Council, which were that such a statement should be issued in the event of a General Election before the next meeting of the Council. The Dissolution, as they were aware, took place on the 25th September, and one day after the Dissolution this Statement was issued. One objection that he could see as being capable of being offered to this Statement was that it did not embrace all the resolutions which had been passed by the Chamber, and which had not received legislative attention. Perhaps it might be said that they made no allusion to the Agricultural Rates Act being continued. But there was no resolution that such a thing should be carried out, although they knew perfectly well that the sense of agriculturists generally was that that concession to agricultural interests should not be withdrawn, at any rate without something more permanent and equally equitable or more equitable being established in its place. In section (a), under the head of "Local Taxation" they asked for all that anyone could require with regard to the Agricultural Rates Act. Another objection to the Statement might be made that it contained no reference to Acts which had been recently passed, and which had not met the full views of the Chambers of Agriculture; but he might point out that it seemed to him personally—and he had given his strong opinion in that sense—that although they felt the shortcomings that there were in Acts recently passed, such as the Sale of Food and Drugs Act and the Agricultural Holdings Act, yet it would have been absurd to send down questions to Parliamentary candidates asking whether they would at once move for the amendment of Acts that had only been passed within one or two years. It would be quite sufficient when those measures had been in operation a little longer to press for the necessary amendments in the interest of the agricultural community. With these explanations he moved the adoption of the resolution.

Mr. LATHAM (Farmers' Club) seconded the resolution, and thought that the Chamber might be congratulated on the programme. Mr. Bowen-Jones had just alluded to a little disappointment which members of the Chamber had felt in not receiving in Parliament all that they expected, and he had said that it would be wrong, perhaps, to mention the Acts in that list; but he (Mr. Latham) wished that the Parliamentary Committee had included such Acts in the list as it would have prevented Members of Parliament from going before their constituencies and saying what wonderful Acts of Parliament had been passed for the benefit of agriculturists.

Mr. WILLIAMS (Monmouthshire) supported the motion, but expressed his regret that the subject of boundary fences was not included in the programme. Mr. Bowen-Jones had explained that it was not possible to include everything; but it would be in the recollection of the Chamber that the subject of boundary fences had been many times before them, and it had proceeded to such a length that one or two deputations had gone to Ministers on the subject. One or two Members of Parliament had drafted a Bill on the subject, though he would not say that the Bill was introduced. They knew, of course, that private Members' Bills as a rule did not pass, but nevertheless the introduction of them was the only means which they had of enforcing their wishes on those who were responsible for the Acts of the Government. He had been requested by Mr. Jasper More, M.P., whose attendance that day was prevented by indisposition, to suggest that members of the Chamber should ask their representatives in Parliament to ballot for a Bill in the next Session on an uniform weight for the sale of grain.

Mr. STRACHEY, M.P., said that in paragraph 1, sub-section (a) it said "That a permanent and comprehensive measure be passed, giving adequate relief from the excessive and unfair burdens at present imposed upon agriculture." He ventured to suggest, as he had done before, that instead of saying "imposed upon agriculture" they should say "imposed upon land and houses." He thought that it was a great mistake for them as agriculturists to separate themselves in this matter from other owners of real property. He thought it was a fact that the Government acknowledged that that was an unfortunate thing to do, when they limited their Bill to five years for the express purpose of appointing a Royal Commission to enquire into the whole subject, in order that they might introduce legislation based on the report of that Commission for the purpose of giving adequate and fair relief to all forms of real property, whether in houses or land. He knew that a great many agriculturists objected very much to the fact that they now had to pay a heavy rate, and that they got no relief at all upon their houses and upon their buildings. In some counties buildings and houses were rated at a very high rate, if they were good houses, and consequently they had to pay the full amount of the rates on those particular houses. He thought that the mere fact that the Government appointed a Commission to enquire into the incidence of local taxation showed that they did intend to deal with all forms of real property and to give it adequate and fair relief. He considered that it would be better if the Business Committee did not try to separate the interests of one form of real property from those of another, and that instead of saying "upon agriculture" they should say "upon land and houses."

The CHAIRMAN wished to make one observation on the question of order. The "Statement" represented facts and resolutions of the Chamber, which could not be altered now. The resolutions were sent out to candidates before the Election, and the only question now before the Chamber was whether a copy of the document containing them should be sent to the Ministers in the various offices. If they considered the paper sufficiently weighty and important to be sent to the Ministers affected, it would be sent; but if they thought that it was worthless they could vote against it, and the document would not be sent at all. He could not accept any amendments to add to or subtract from the resolutions recorded, and it was therefore not desirable to raise a lengthy debate on any of the subjects with which they dealt.

Colonel MILWARD, M.P., said that the different questions alluded to in the resolutions varied very much in weight and also in practicability. Although it was stated at the bottom of the document that the order in which the subjects were printed did not necessarily involve an expression of opinion as to their relative importance, yet, as a matter of fact, people, in taking up a paper, imagined that the first thing in it was the one to which the Chamber attached greatest weight. He should like to see the eighth subject, "Damage to crops by sparks from railway engines" placed after "Local Taxation," that was to say as No. 2. That was a subject which he thought they could pursue with some hope of carrying it to a definite and satisfactory result. Everyone who travelled by train could see to what an enormous extent the crops of the country were damaged by sparks from engines, and everyone knew that in other countries the damage was prevented by certain safeguards on the engines. Therefore he should be very glad if it were possible to transpose No. 8 to an earlier part of the paper.

Mr. LLOYD suggested that as the "Statement" had simply come from Committees of the Council that the Council ought to pass a resolution as to whether it met with their approval or not. At present it had gone out as simply representing the opinion of the Committees of the Council. He believed that his suggestion was exactly on the lines of what the Chairman had said, and he was surprised

that Mr. Bowen-Jones did not move the resolution in that way, namely, "That this Statement meets with the approval of the Council."

Mr. BOWEN-JONES: I quite agree, but I was bound by the resolution as drawn up by the Business Committee.

Mr. GRANT LAWSON, M.P., pointed out that the whole of the ten subjects had been dealt with by the Council in various resolutions. He should very much deprecate an attempt now to raise ten discussions on ten subjects many of which had occupied nearly a whole sitting each. It was unnecessary to say, as Mr. Lloyd suggested, that the Council adopted these resolutions, because they had adopted them already and they were on record.

Mr. LLOYD said his point was that they ought to confirm as a Council the work done by the Committees of the Council, and pass a resolution now to the effect that the "Statement" as sent down by the Committees met with the approval of the Council. He begged to propose that such words be put in after the words "May 29th, 1900."

Mr. FRANCIS suggested that the attention of the Prime Minister should be called to the various evils affecting agriculture, which arose from the action of the free and open ports that existed alone in this kingdom, with a view to the consideration of what steps could be taken to remove or mitigate those evils. He believed he was right in stating that the price of wheat was now 30s., and the farmer said that he could not grow it profitably under 40s. The baker was now charging for his bread at the rate of 40s. Why should not the farmer have the benefit? What was the utility of passing a law for the farmer, if they allowed the baker to take all the benefit of it, as was the fact.

Mr. FITZHERBERT-BROCKHOLES (North Lancashire Farmers' Association) supported Colonel Milward's proposal that the paragraph relating to damage to crops by sparks from railway engines should be placed higher in the list.

The CHAIRMAN pointed out that the document had already been issued, and they had only now to decide whether it should be sent to the Ministers. He could not accept an amendment to alter it any shape or form. (Cries of "Vote.")

Mr. MULLINS (Gillingham Farmers' Club) regretted that the Business Committee had not defined what they meant by a permanent and comprehensive measure for giving adequate relief. If they had confined themselves to asking for a renewal of the Agricultural Rates Act upon a permanent basis, it would have been more effective than a vague resolution of the character which appeared in the "Statement." The Agricultural Rates Act was of a tentative character, and therefore it was likely to be made the shuttlecock of political parties.

The CHAIRMAN stated that the working of the Agricultural Rates Act of 1896 and the question of its renewal had been put down for discussion at the next meeting.

The CHAIRMAN then put the resolution, and it was carried without a division.

Agricultural Insurance.

Mr. WILLIAMS (Monmouthshire) moved:—

That this Council is of opinion that the Fire Insurance Offices should be approached with a view to induce them to re-consider their increased premiums on Agricultural Produce, etc., and, in case the Offices decline, that the question of a special Agricultural Insurance Office should be considered.

He said that it was within the knowledge of everyone present that the insurance offices had recently raised the premium on agricultural dead stock from 5s. to 7s. 6d., and that they had slightly reduced the premium on live stock. If agriculturists went to an insurance agent he would tell them that the change made very little difference. If that was the case why was it made at all? Why should an increased premium be placed upon agricultural stock? He observed that resolutions had come from many of the Chambers of the kingdom objecting to the change and suggesting as an alternative the establishment of an agricultural insurance office. He should have liked to say two or three words on the new insurance that was now looming upon them. He was under the impression when he came to the meeting that that subject would be considered. He was under the ruling of the Chairman on the point.

The CHAIRMAN thought they must adhere to the words of the resolution.

Mr. WILLIAMS: Then I beg to move the resolution.

Mr. BEECROFT (Chester Farmers' Club) seconded the motion.

The CHAIRMAN rather deprecated the passing of a resolution of this character. It was impossible for that Chamber to go to the insurance offices as a whole and attempt to argue with them. The only way in which they could bring an insurance office to reduce its premium was by competition. He was connected with an insurance office himself, and they had to get the best business they could, and they charged as much as they could till they found that they had to reduce, and they were only obliged to reduce when competition came. He did not think that they could induce the offices to reduce the premiums in the slightest degree. As to the other question, whether an agricultural insurance company could be established, that was a more practical question, involving very big issues; but he thought it was scarcely one which an institution of that sort should make itself responsible for. Why should they form themselves into an insurance office? He did not think it wise to pass resolutions that were not of a practical character, and that would not receive the attention which resolutions passed by the Chamber ought to receive.

The Council then divided, when there appeared 7 votes for the motion and 15 against it. The motion was therefore lost.

The Council adjourned to Wednesday, December 12th, 1900, at 11 a.m.

Royal Commission on Horse Breeding.

A meeting of the Royal Commission on Horse Breeding was held on Monday, at 13, Hanover Square, W. There were present the Duke of Portland, K.G. (in the chair), the Earl of Coventry, Lord Ribblesdale, Sir John Gilmour, Bart., Mr. J. Bowen Jones, and Mr. J. Herbert Taylor (secretary). Letters of regret at being unable to attend the meeting were read from Sir Jacob Wilson and Mr. Alfred E. Pease, M.P.

The percentage of foals left by the Queen's premium stallions for 1899 season of service was read, and the average was considered, on the whole, satisfactory.

The number of mares served during the past season was also reported, and in cases where the stallions had not served the required number of mares, the premiums were reduced in accordance with the rules and regulations.

The list of premiums with conditions for the Stallion Show of 1901 was arranged and ordered to be printed, and to be presented to Her Majesty and the Treasury for approval. Other business engaged the attention of the Commissioners, who afterwards adjourned.

Somerset and Dorset Horn Sheep Breeders.

A meeting of the above association was held last week under the presidency of Mr. F. E. Pope, when the election of officers took place with the following result:—President, Mr. F. E. Pope; vice-president, Mr. S. Kidner (Milverton); councillor, in the place of the late Mr. J. Blake, Mr. R. Urry (Isle of Wight).

It was decided not to give prizes for lamb rearing at present. The following were elected judges of Dorset Horn sheep:—Messrs. Attrill (Carisbrooke), J. Chick (Compton), J. T. Ensor (Wimborne), W. Flower (Stafford), H. Farthing (Taunton), C. Hawkins (Waddon), J. Kidner (Nynehead), S. Kidner (Milverton), E. J. Legg (Melplash), G. R. Pitfield (Eype), C. B. Stiby (Bradford), and W. Roper (Littlebredy).

It was decided to give prizes value £20 for horn sheep at the Royal Counties Show.

Warwickshire Chamber.

A meeting of the Warwickshire Chamber of Agriculture was held at Warwick on the 3rd inst., Mr. W. A. Stiles presiding. Mr. J. Denny presented a report of the last meeting of the Central Chamber, at which he was a special deputy from this county. He referred to the danger of getting rid of foreign cattle suspected of having foot and mouth disease by taking them out to sea and throwing them overboard three miles from land. The carcases were ultimately washed ashore, and might possibly spread the disease inland. It had been found very difficult to account for the origin of recent cases of the disease in this country. With regard to the new Agricultural Holdings Act, regret had been expressed that the Central Chamber had not been able to make a greater impression upon the Government in framing that measure. Giving his own personal view, he said it would have been much better to have had no Agricultural Holdings Act at all than to have so unsatisfactory a measure. If there had been no legislation on the subject last session they might still have agitated until they could have secured a redress of their grievances.

A discussion arose on the compulsory dipping of sheep for the prevention of sheep scab. Mr. Pratt moved, and Mr. Denny seconded, that the Central Chamber should be urged to press the Board of Agriculture to secure legislation on the subject. Mr. Potter thought it would be going too far to ask the Government for a general regulation as to sheep dipping. It would be quite enough to confine it to imported sheep.

Sir James Sawyer moved as an amendment that it should only apply to imported sheep in the first instance. Rev. D. W. Sitwell seconded the amendment, which was lost, the original motion being carried.

Sir James Sawyer moved that in any legislation for the prevention of tuberculosis compensation should be secured to the owners of stock destroyed in the interest of public health. Mr. Pratt seconded this, and it was adopted.

A discussion followed on the insurance of farm stock and produce, and there was a general complaint as to the increase of premiums for fire insurance. It was decided that, in the opinion of the Chamber, the premiums on fire insurance were excessive, and that it was desirable that, through the agency of the Central Chamber, some combination should be organised to secure a reduction of rates.

PRACTICE WITH SCIENCE.

Agricultural Education in Shropshire.

In presenting the report of the Technical Instruction Committee, which was adopted at the quarterly meeting of the Shropshire County Council, the chairman of the committee, the Rev. L. J. Lee, said it was a matter of serious regret that there did not appear to be that interest taken in agricultural education which in a county like Shropshire they might naturally expect. Only one candidate entered for the £50 two years' agricultural scholarship. One very gratifying thing, however, was the number of scholars in the elementary schools of the county who had won £10 scholarships. This was as gratifying to the Council as it was creditable to the teachers. Mr. J. Parry Jones said he should like to hear from the farmers themselves what was the cause of the enormous failure which had been experienced in regard to the agricultural scholarships. Sir T. F. Boughey said something besides technical education was required to make farming successful.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending Nov. 3rd, 1900:—

Swine Fever.	Swine Slaughtered as Diseased or Exposed to Infection.		No.	182	298 606 301		15,863	37,787 37,301 36,238

Period.				Week ended Nov. 3, 1900	Corresponding week in	1899 1898 1897	Total for 44 weeks 1900	Corresponding period in .. ..

NOTE.—The figures for the current Year are approximate only.

The Kirbymoorside statute hirings were held on Wednesday. Girls, first time out, were asking £6 to £8 per year; older girls, £10 to £16; girls able to manage a dairy, £16 to £18; housekeepers, £22 to £24; cooks, £20 to £22; boys, first time out, £6 to £8; plough-boys, £10 to £12; wagoners, £18 to £20; foremen, £25 to £30 per year.

At Worksop Martinmas statutes which were held on Wednesday, there was a very poor attendance of servants, and much higher wages were asked all round, considerably in excess of any recent year. Horsemen asked from £30 to £40 per year; wagoners, £25 to £30; ordinary hands, £16 to £20, youths, £10 to £12; girls willing to milk were very scarce and demanded high wages, and in consequence very little actual hiring was done.

Ashbourne Fair.—The annual old chartered October Fair at Ashbourne was held on the 20th ult. In the Smithfield there was a large show of horned stock, and the attendance of dealers and farmers was good. Trade ruled rather slow, but on the whole a good number changed hands. Calving cows of the best made from £18 to £21, secondaries £16 to £17, barren stirks £7 to £9. There was a big show of bullocks, yearlings making from £7 to £9, two-year-olds up to £11. Some good fat beasts were sold, best young cows or heifers making 6½d. pound, cow beef 5d. to 5½d. pound. In the auction ring some good useful fat cows made up to £19 5s. In the sheep fair a very large number were penned, amongst them being some very good rams and ram lambs. The business done was, however, rather small. Rams (shearlings) quoted from £5 to £7; ram lambs, 40s. to 60s. apiece; good wethers, 40s. to 45s.; ewes, 36s. to 44s.; store lambs, 24s. to 30s. In the horse fair the demand was good for sound, useful horses of the heavy type. Some good animals changed hands at satisfactory figures.

LETTERS TO THE EDITOR.

Swine Fever.

Sir,—Would you kindly allow me to bring before your readers some startling facts respecting an outbreak of swine fever in the county of Hants, and the steps taken to stamp out same.

On the 15th October last an outbreak occurred amongst 80 pigs; this was duly reported the same day to the inspector appointed by the local authority. The local inspector wired the Board of Agriculture, giving information, and the local veterinary received instructions to examine and report on the condition of the pigs. His report was, they were badly infected with swine fever.

On the 19th October an inspector from the Board of Agriculture examined the pigs and confirmed the veterinary's report by killing six of them, and ordered these to be buried at once, requesting me to report any further deaths to the local authorities.

On the 28th, another inspector from the Board saw six other pigs which had since died, and admitted others were infected; he, however, refused to have any more killed, and stated the Board of Agriculture would take no further action in the matter. I conclude from this statement that swine fever in England is not to be stamped out by the Board of Agriculture.

On November 1st I again wrote to the Board stating another pig had died, and that no steps had been taken to bury those the inspector saw lying dead on October 28th.

The local authorities buried the pigs after some of them had been dead nearly a week.

On November 5th there are now four more pigs dead, and many of the remaining 63 badly infected.

It seems incredible that such a hot-bed of swine fever should be allowed to exist for such a long time, especially as the piggeries are situated on some small holdings of 60 acres, and abutting on a public road with every probability of this pest spreading—and yet no definite action is taken by the Board of Agriculture.

If this case is a specimen of the method usually adopted by the Board of Agriculture for stamping out swine fever, then it is high time county authorities should again have the power granted them of dealing with it as soon as an epidemic is discovered. The Board of Agriculture seems helpless in the matter; the only information from them is the usual statement that "Your letter will receive attention." Meantime, the contagion is spreading, and a great risk of half the county becoming affected.—I enclose my card, and remain, yours faithfully,

BEWILDERED.

The Spraying of Charlock: Nonsense!

Sir,—Why have any charlock to spray upon? It produces seed abundantly; this seed falls upon the surface of the ground, usually lies there all the winter, to be ploughed in in the spring with all the care a farmer gives the seeds of crops of value. The remedy is simply this: Soon as the crops are ended, *well harrow the stubbles*, to make every weed seed germinate, which the charlock especially will do as readily as common mustard; then when the land is ploughed some time in the winter or early spring, your dreaded enemy becomes in this turn not a nuisance, but a fertiliser. F. K.

Waldstone.

Shropshire Barley.

Sir,—In your issue of last week I note that prizes for next year's show at the Brewers' Exhibition were under discussion at the last meeting of the Shropshire Chamber of Agriculture.

I am glad to be able to say that Lord Wenlock has been good enough to tell me that he will contribute £10, and others will doubtless add to the amount.

Mr. Jasper More deserves deep thanks for the services he is continually rendering, not only to the County he has so long represented in Parliament, but to the agriculture of the whole kingdom; and with his ripe experience it may be safely left that if Shropshire does not reap to the full the benefits this exhibition confers, the only persons to blame will be Salopian farmers.

Perhaps, sir, I may add, as I never overlook or forget any generous action that falls under my notice, both Shropshire and the Exhibition owe much to the prizes for counties, first initiated many years ago by Messrs. Browne and Jones, of Shrewsbury.

This show grows in influence and importance year by year. To me it is a matter for much satisfaction that, through the kind offices of the Board of Agriculture, we shall have hereafter much greater scientific value attached to the labour of the judges, as we may expect to see proper combination of practice with science in the experiments which will be conducted at various centres through the kind instrumentality of the Board.—Faithfully yours,

H. STOPES.

11, Queen Victoria Street, London,
November 9th, 1900.

The estate of the late Mr. John Robert Jefferies, J.P., of the firm of Ransomes, Sims, and Jefferies, Ltd., has been valued at £113,610 gross and at £109,995 net.

MILLING.

The Amount of Albuminoids and Fibre in Different Flours.

Trade is anything but brisk, although flour has been reduced 6d. per 280lbs. in some parts. On the other hand, offals go off well everywhere, and with the approach of winter higher prices may soon be expected. Most of the English wheat which has been delivered at the mills is in very indifferent condition, and often causes much trouble in milling, owing to the superfluous moisture which it contains. A thorough drying before going to the break rolls greatly improves it; but then how many inland millers are there who have no facilities for treating it in the way? If it be broken down without some preparation, badly shaped and irregular looking middlings are the result, and the evil is accentuated in their purification and reduction, to say nothing of the lower yield.

Both the Australian and Plate wheats this year are very fine, and so are the hard Kansas sorts. Therefore millers who are not situated too far from the ports are managing to get along very well. Australian wheat is about the finest white wheat imported. It cannot be beaten for the purpose of

Giving Colour to Flour,

and for this reason is so much appreciated where very high-class patents are required. Its flour yield, too, is high, and even when baked alone it will make a sweet loaf of fair strength. Unfortunately it comes too dear for country millers, especially when the question of carriage is considered. Some members of the trade are milling Kansas wheats for the first time this year, and are not slow to recognise their excellent qualities when they are good, as is the case at the present time. Unless they are washed and conditioned, however, to toughen the bran there is likely to be a good deal of dark bran powder, a material which gives great trouble to remove by purification. One particular feature of these Plate wheats is worth the attention of millers—their flours are very white compared with other red sorts. Their quality seems to be improving almost yearly, and when there are better means of transport in the Argentine and sufficient warehouse accommodation British millers will find them a real boon.

Some parcels, however, give a high percentage of loss in cleaning, as they contain black oats, barley, seeds, and other refuse. The large mills can buy such lots cheap and can utilise them to advantage, but small millers, who are able to get them, should buy the cleanest samples which can be obtained. Some Plates which now reach this country are

Not at all Unlike our Red Lammas,

only they are much harder and stronger, sometimes showing as much as 33 per cent. of wet gluten. From what has been said it will be gathered that Argentine wheats vary as much in quality as in condition. The country where they are grown is so extensive, and consists of such widely varying kinds of soil, while seed from many countries has been introduced, that it is only natural to expect widely different samples. The writer has seen Plate wheat very nearly as hard as Persian, while white Plate (Saldome) occasionally arrives. These, however, have little in common with the fine and carefully graded wheats which come from the provinces of Santa Fé and Entre Rios. These are sound, dry, clean, and of uniform quality, and are much appreciated by millers.

The Treatment of Middlings.

The more millers recognise the necessity of handling middlings in the best possible way, the better will be the flour made from them. In order to secure the best results middlings should be graded as evenly as possible in sizes and qualities. Coarse and fine middlings should never be ground upon the same pair of rolls, or there will be uneven granulation. It is impossible to set rolls to work on stock uneven in size, because the larger middlings prevent the finer from being properly reduced. The result of such grinding is richer offals, with a consequent lower flour yield. The middlings from the last break should be kept separate from the rest of the stock in the mill, as the flour from them is of inferior quality to those flours made from the earlier reductions. But it is not the lack of gluten which causes the low grade, as the flour from the last break really contains the largest proportion of albuminoids; but the impurities which are present and cannot be removed destroy their values. In estimating the value of flour the small proportion of fibre must be taken into consideration as well as the large proportion of albuminoids. The closer to the bran the reductions come, or rather as the finishing process is reached, the proportion of albuminoids actually increases, but the flour is more fibrous and impure. Thus the value of flour is estimated, first by its purity and secondly by the amount of albuminoids it contains. It has been well said: "If the proportion of albuminoids be not present to the desired extent,

The Flour will not be Rated High;

if the albuminoids are present, but with bran and impurities, the flour will not be rated high." Thus flour contains a certain proportion of good qualities and a certain amount of deleterious qualities, and for this reason belongs to a certain grade.

Again in reference to the handling of the stock, there should be no returns; after once removing impurities, the stock should go to the feed to which it belongs. Therefore, as far as possible, different qualities of middlings, as well as different sizes, should be reduced on different pairs of rolls; but this is only practicable to a desirable extent in large mills. In grading middlings for purifiers as many sizes should be made as convenient, for although small millers generally have to be content with three sizes—semolina, middlings, and dunst—large concerns may have six or eight. It should never be forgotten that the better the grading and sizing, the better will the purification be. If the wheat be perfectly cleaned, well conditioned, and well broken down on corrugated rolls, the subsequent handling of the middlings on smooth rolls and purifiers will account for the flour in the direction of superiority or the reverse. In other words, grind right and make careful separations at the beginning, and the battle is half over.

MILLER-FARMER.

LITERARY NOTICES.

Messrs. Thomas Kennedy and Co., of High Street, Dumfries, have now issued their catalogue of forest, fruit, and ornamental trees, etc., for autumn, 1900, and spring, 1901.

A copy of a new catalogue of food-preparing machinery has reached us from Messrs. G. H. Bentall and Co., Heybridge, Maldon, Essex. This firm have been awarded a gold medal and two bronze medals for their chaff cutters, corn-grinding mills, etc., at the present Paris Exhibition.

NEWS NOTES.

Richmond Moor November Fair was held on Richmond Hill (Yorks.) on the 2nd inst. Good sheep and fat beasts were the chief features. Calving and milking cows made £18 to £21; calving heifers, £13 to £15; two-year-old bullocks and heifers, £8 to £10; yearlings, £6 to £8; ewes, 17s. to 20s.; half-bred lambs, from 18s.; Scotch lambs, from 9s.; half-bred sheep, from 35s.; tups, from £4 each.

Royal Botanic Society of London.—A course of four lectures on "First Principles of Colonisation and Plantation" have been arranged to take place in the Gardens of this Society in Regent's Park, on Friday afternoons, November 16th, 23rd, 30th, and December 7th, at three o'clock. The lecturer is Mr. R. Hedger-Wallace, late of the Department of Agriculture, Victoria. The chair will be taken on November 16th by Lieut.-General Sir Andrew Clarke, G.C.M.G., Agent General for Victoria. Tickets to admit to the course can be obtained of the secretary at the Gardens.

The death of Mr. Thomas Chick, of Stratton, near Dorchester, the eminent breeder of prize stock, which occurred at Stratton on Wednesday, at the age of sixty-three, will come as a blow to many agriculturists. There were few more practical business men to be met with than Mr. Chick, and his success in the showyards with his Devons and Shire horses and Dorset Horn sheep, which he had brought to a wonderful state of perfection, all testify to the position his stock held in the eyes of the keenest connoisseurs. Owing to the painful nature of his illness, Mr. Chick had for some time withdrawn from active participation in the business.

Stack Fire near Halesworth.—A fire occurred on Monday night at Mellis, near Halesworth, when several stacks, the property of Mr. J. Barker, were destroyed. The origin of the fire is at present unknown, but there is little doubt that it was the work of an incendiary. It seems to have been first observed by Inspector Berry at Halesworth, who saw flames in the direction of Wenhaston soon after midnight. On his arrival he found five small stacks on fire, with other stacks in close proximity. The stacks contained wheat, barley, beans, peas, and oats. There being no water near, the Halesworth fire brigade was not summoned, and the fire was allowed to burn itself out. The loss is believed to be covered by insurance.

Small Landed Proprietors.—At Scarning, near East Dereham, Mr. F. W. Wilson, M.P., in pursuance of his project to start a movement in Norfolk in favour of small landed proprietorships, offered to the villagers, in small lots, five acres of good fertile land. He purchased it at an inclusive cost of £150, the sum of £35 being paid for the redemption of the copyhold. He offered it at the rate of £30 an acre, money down. In the case of purchasers who desired to pay by instalments, he asked £4 money down, and £4 every Michaelmas for seven years. There was a considerable gathering of labourers and small tradesmen at the village inn, where the Rev. Dr. Jessopp presided, and the terms of the agreement were expounded by Judge Willis, of the Norfolk County Court. Amongst the purchasers were a wheelwright, a bricklayer, a farm labourer, and a ten-acre farmer. An acre or more remains to be taken up by private treaty. Dr. Jessopp and Judge Willis each bought a small lot, "for the sake of example."

FARM.

Root Show at Coggeshall.

Despite the miserable weather which prevailed, there was a large attendance of agriculturists at Mr. John K. King's annual root show, reckoned among the largest and most important of its kind held in the country, which took place on Tuesday, at Coggeshall. The exhibits, all of which were grown from Mr. J. K. King's seeds, were staged in one of the spacious warehouses belonging to the firm. The display of roots, vegetables, etc., sent for competition by Mr. King's customers from all parts of England was a truly remarkable one, and far exceeded any previous exhibition. Not only were the roots of wonderful size, but were noteworthy for rich feeding quality and a high standard of excellence, furnishing abundant evidence of the value of pedigree selections as carried out annually on Mr. J. K. King's eight large seed farms. The vegetables made an exceptionally fine show. Mr. Herbert King and Mr. Leonard King, the sole proprietors of the firm of John K. King, offered over £100 in prizes, and this sum drew about 430 entries.

The judges were:—Roots: Mr. C. W. Gray, Mr. Joseph Smith, jun., and Mr. A. Church. Corn: Mr. W. Mortimer and Mr. A. Goddard. Vegetables: Mr. A. Evason and Mr. A. Float. Below we give a list of their awards:—

ROOTS AND CEREALS.

Mr. John H. King's Champion Orange Globe mangel: 1, Mr. G. Raby; 2, Mr. W. Cunningham; 3, Sir W. N. Abdy; hc, Mr. C. Mead.

Essex Prize Winner Yellow Globe mangel: 2, Mr. R. Hodge; 3, Salvation Army.

Yellow Intermediate or Gatepost mangel: 1, Mr. W. A. Fairhead; 2, Messrs. Spear and Vellacott; 3, Mr. R. Hodge; hc, Mr. T. A. Beckett and Mr. W. Buckenell.

Orange (or Golden) Tankard mangel: 1, Mr. W. Nicholls; 2, Mr. A. Blomfield; 3, Mr. H. J. Debenham; hc, C. Tough.

Improved Mammoth Long Red mangel: 1, Mr. C. Tough; 2, Mr. C. Mead; hc, Mr. F. C. Fenner.

Special prize for weight, for the twelve heaviest mangels, any one variety, not exhibited in any of the previous classes: Mr. T. A. Beckett, 213lb.

Purple-top swede: 1, Mr. J. W. Edwards; 2, Mr. T. Doult; 3, Mr. B. Le Neve-Foster; 4, Mr. T. Scrivener's Executors; hc, Mr. F. J. Crow.

New swede, John Bull: 1, Mr. A. Bell; 2, Mr. T. Doult; 3, Mr. J. C. Taylor.

Royal Sandringham Purple-topped swede: 1, Mr. W. Elsmore; 2, Major Thoyts.

Special prize for weight, for the twelve heaviest swedes, any one variety, not exhibited in either of the above classes: Mr. T. Doult.

Imperial Green Globe turnip: 1, Mr. R. Gillham; 2, Mr. A. E. Scrivener.

Defiance Short-top Green Kohl Rabi: 1, Mr. C. A. Green; 2, Mr. Thomas Moy.

VEGETABLES.

Collection of six distinct kinds, to include not less than three of Mr. John K. King's specialities: 1, Mr. J. Round, M.P. (Mr. H. Bishop, gardener); 2, Mr. A. Basill; 3, Mr. T. A. Beckett.

Elephant Prizetaker or White Elephant Runner beans: 1, Mr. A. Basill; 2, Mr. J. Boggis; 3, Rev. W. H. Bond.

Three specimens Excelsior Brussels sprouts: 1, Mr. T. A Beckett; 2, Mr. J. Durrant; 3, Mr. J. A. Smith.

Six specimens Reading Defiance-cabbage: 1, Mr. T. A. Beckett; 2, Mr. J. A. Smith; 3, Mr. T. P. Price.

Reading Prize-winner International carrot: 1, Mr. T Leith; 2, Mr. G. H. Copp; 3, Mr. H. Folkes; 4, Mr. T. A. Beckett.

Reading Exhibition cauliflower: 1, Mr. T. A. Beckett; 2, J. Round, Esq., M.P.; 3, Mr. T. P. Price.

Matchless White Defiance Red or White Gem celery: 1, Mr. H. Folkes; 2, Mr. T. A. Beckett; 3, Mr. A. Basill.

Prize-taker Giant leek: 1, Mr. T. A. Beckett; 2, Mr. G. H Copp; 3, Mr. H. Folkes; 4, Mr. T Leith

Reading Matchless onion: 1, Mr. H. Folkes; 2, Mr. T. A Beckett; 3, Mr. G. H. Copp.

New Exhibition Globe onion: 1, Mr. G. H. Copp; 2, Mr. H Folkes; 3, Mr. T. A. Beckett.

Perfection marrow parsnip: 1, J. Round, Esq., M.P.; 2, Mr. G. H Copp; 3, Mr. H Folkes.

Peas: 1, J. Round, Esq., M.P.; 2, Mr. H. Folkes

Reading Plentiful tomato: 1, J. Round, Esq., M.P.; 2, Mr G. H. Copp; 3, Mr. H. Folkes.

Kidney potatoes: 1, Mr. A. Basill; 2, J. Round, Esq., M.P.; 3, Mr. T. A. Beckett.

Round potatoes: 1, Mr. A. Basill; 2, Mr. G. H. Copp; 3, Major Adams.

At the conclusion of the judging luncheon was provided in one of the firm's large warehouses, nearly 350 gentlemen being present. The Hon. C. H. Strutt, M.P., presied, and was supported by Colonel H. Aylmer, the Rev. C. C. Mills, Rev. T. Lloyd, Mr. C. Wing Gray, Mr. Reuben Hunt, Mr. E. E. Surridge, Mr. R. Gillham, Mr. T. M. Hudson, Mr. H. King, Mr. L. King, etc.

The Rev. T. Lloyd, in giving "Success to Agriculture," said he was sure that in their chairman farmers had a true and tried friend, and a member of the House of Commons who was not ignorant of the subject with which they were dealing. They wanted also men like Mr. C. W. Gray in the House of Commons, and he thought that in the Saffron Walden Division they had made a terrible mistake in not sending him to Parliament. He urged that there should be better combination among the units of agriculture; that they should have less cant and gossip about it, and study it better. Mr. C. W. Gray, who had a cordial reception, responded, and made a complimentary allusion to Mr. J. K. King's seeds. He said it was of the greatest importance to one and all that this little island of ours should grow as much as possible of that food which was absolutely necessary to the very existence of the people, and, in order that that should be done, there must be a reasonable amount of profit attached to the agricultural industry. He hoped the time would soon come when agriculture would be more profitable.

The chairman, in proposing "Success to John K. King's Royal Root Show," remarked that they had seen a show that morning, he thought they must all acknowledge, which could scarcely be rivalled throughout the whole of the country. The swedes shown were worthy of the highest admiration, and a revelation to him, because he had not grown a swede this year bigger than a wineglass. Last year, when this show was revived, he thought they saw in it a small sign that possibly agriculture was coming a little more to the front, but, unfortunately, this year the promise of the two previous years had not been fulfilled. He hoped and trusted, however, that it was only a temporary set-back. He was sure they all heartily wished success to Messrs. H. T. and L. G. King. Mr. H. T. King, in response, remarked that he and his brother hoped to do everything they could to maintain what he might justly claim the high reputation the firm had held for many years. Mr. L. G. King also responded, and other speeches followed.

The Eradication of Weeds.

Dr. Voelcker, the Royal Agricultural Society's consulting chemist, has, it was stated at the meeting held on Wednesday, been engaged in experiments at the Pot Culture Station on the possible eradication of certain weeds of the farm, and has obtained some interesting results. In the case of wild onions on arable land, an application of carbolic acid in January direct to the soil where a patch of wild onion was growing prevented the latter from coming up, and by the time that barley was sown the carbolic acid had been thoroughly removed from the top soil, so that no injury was done to the barley seed, and the crop throve perfectly well, and no wild onion appeared among it. In regard to wild poppy, while spraying with sulphate of copper on the top side of the leaf did not check the growth of the weed, it was found that spraying on the under side of the leaf with the same solution very largely checked the development of the wild poppy. These investigations are being continued.

Advice to Purchasers of Basic Slag.

At the monthly meeting of the Royal Agricultural Society held on Wednesday it was stated that the correspondence of the consulting chemist had brought to light several instances of deficiency of quality in the case of basic slag and the Committee had therefore thought it desirable to issue the following notice:—

"At this time of the year, when purchases of basic slag are commonly made, it is well to advise members to be careful to stipulate for a definite guarantee as to percentage of phosphoric acid and degree of fineness of grinding in the case of basic slag. The recommendation of the Council on this point is as follows:—

"Basic slag to be guaranteed to be sufficiently finely ground that 80 to 90 per cent. passes through a sieve having 10,000 meshes to the square inch, and to contain a certain percentage of phosphoric acid, or its equivalent in phosphate of lime. (The highest grades range from 17 to 20 per cent. of phosphoric acid; medium grades, 14 to 16 per cent.; and low grades from 10 to 12 per cent. of phosphoric acid.)

"As showing the advantage of submitting samples for anaylsis an instance was brought to the notice of the Chemical Committee in which a member of the Society recently received compensation to the extent of £7 10s. on a purchase of 20 tons of basic slag, which was found on analysis to be deficient in quality and fineness of grinding."

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

18,866.—I. Coalbank, of Chancery Lane, London, for an invention for "Improvements in apparatus for gathering fruit."

18,869.—H. Unmack, of Ludgate Hill, London, for an invention for "Improvements in automatic milk measures."

18,992.—T. C. Sargeant, of Albion Place, Northampton, for an invention for "Distributor for agricultural purposes."

19,207.—J. Lowson, J. Money, and W. Grice, all of Finsbury, London, for an invention for "Improvements in or relating to ploughs."

Patents Sealed.

13,963.—A. C. Bamlett, of Thirsk, Yorkshire, for an invention for "Improvements relating to reaping and mowing machines."

14,019.—J. Gillespie, of South Queensferry, N.B., for an invention for "Improvements relating to sheds for crops."

14,088.—A. Dorman, of Terry Street, Kates Hill, Dudley, Worcestershire, for an invention for "Improvements relating to harrows."

Mr. Dent, of Hartley Castle, Kirkby Stephen, who was one of the largest sheep-breeders in Yorkshire and Westmorland, was found drowned in the River Eden, near Kirkby Stephen, last Sunday morning. Apparently he had fallen into the water while on his way from a great sheep fair on Saturday night.

Handsome Prizes for Swede and Mangold Roots.

Some few years ago Mr. W. R. Smith, Tarporley Road Bone Works, Chester, offered the sum of £5 for the five heaviest swedes grown with the aid of his special manure, which has always proved a keen competition amongst his numerous customers. This year, however, he made a new departure by dividing the prize into two, namely, £25 for the five heaviest swedes and the same amount for the five heaviest mangolds, adding consolation prizes of £2 10s. each to the two competitors who came nearest the chief prize in the two classes.

This competition came off on Tuesday, when a numerous company assembled to witness the public of the weighing of the roots sent in for competition. This was conducted by Messrs. H. A. Longley and G. P. Miln, the latter being present on behalf of the competitors, whilst Mr. Longrigg looked after the interests of Mr. Smith. The result proved to be that the first prize for swedes fell to the well-known agriculturist, Mr. John Roberts, Well House Farm, Saltney, who was closely followed by Mr. Edwin Bellis, of Holt, and Mr. Robert Shepherd, of Parkside, to whom the consolation prizes were awarded. The £25 prize for mangolds was awarded to Mr. Thomas Shepherd, Burton, Denbighshire; Mr. Isaac Allen Brown, Ridley Hall; and Mr. Robert Shepherd respectively taking second and third honours. Previous to the competition the company were entertained to luncheon by Mr. Smith, after which the works were thrown open for inspection. During the past year additional works covering nearly two acres have been erected by Mr. Smith to meet the demand for his specialities, which are now of worldwide repute. The whole of the prize roots will be exhibited on the stands of Messrs. Gartons, of Warrington, at the forthcoming winter shows to be held at London, Edinburgh, Birmingham, York, and Norwich, nearly all these roots having been grown from Messrs. Gartons' improved breeds of seeds.

Agriculture at the Glasgow Exhibition.

It wil be of interest to agriculturists to know that among the multitudinous industries which will be represented at the Exhibition of 1901, the claims of agriculture are not being neglected, and that the demand for space by other more powerful, because better organised, industries has not succeeded in crowding agriculture out.

The interests of agriculture have been cared for by a representative committee of gentlemen, prominent among whom are Mr. Alexander Cross, M.P., Mr. Whitton (Superintendent of Parks), Mr. W. J. Gilmour, Woodbank, and Principal R. P. Wright, of the West of Scotland Agricultural College. With the work in their capable hands, we may rest assured that it will be performed with satisfaction to all concerned.

The chief part of the agricultural exhibit will be the Model Farm Steading, built of corrugated iron by Messrs. Spiers and Co., Glasgow. Within this steading, which is planned to economise space as much as possible, there will be byres, stable, barn, implement shed, dairy, etc., all fitted up in the most approved style with a complete collection of the best field and barn implements and machinery. Instead of having exhibits of implements from different makers, as is customary at agricultural shows, the committee in charge of the agricultural section considered it better to exhibit only one complete set of implements and machinery, which will comprise all the tillage implements and food-preparing machinery required for the full equipment of a modern farm. Arrangements have already been made for this collection, which will be the only exhibit of agricultural implements of British manufacture allowed.

A model dwelling-house has been erected in front of the farm steading. It is proposed also to erect a large hall adjacent to the farm steading, which will be devoted to exhibits of plants, seeds, manures, feeding stuffs, and other materials relating to agriculture. As the space in this hall will shortly be allotted, and as this is the only space available for agricultural exhibits, intending exhibitors should make application at once to the Secretary, Glasgow International Exhibition, St. Vincent Street, Glasgow.

"Mark Lane Express" Diary.

Nov.

15 and 16. Sale of Horses, at Carr House, Doncaster.

16. Sale of Stock, at Shrewsbury.

20. Sale of Polled Cattle, at Messrs. Mansell's Repository, Hereford.

20 to 23. Sale of Horses, at Messrs. Rymer's Repository, Worcester.

25, 26, and 27. Newcastle Chrysanthemum Show, at Newcastle.

26 and 27. Farmers' Stock and Produce Show, at Newport, Mon.

27 and 28. Whitchurch Dairy Farmers' Association's Show, at Whitchurch, Salop.

28. Sale of Shorthorn Cattle, Horses, and Sheep, at Hereford.

29 and 30. Sale of Shire Mares, Fillies, and Geldings, at Chippenham, Wilts.

30. Sale of Shire Mares, Fillies, and Geldings, at Peterborough.

MOLASSINE

FOOD FOR HORSES, CATTLE, SHEEP, PIGS, etc.

Replacing an equal quantity of Fodder.

A STAPLE FOOD AND CONDIMENT COMBINED. **Patented in all the principal Countries in the World.**

ANNUAL CONSUMPTION, 1,200,000 CWT.

Manufactured by Messrs. Henry Tate & Sons, Sugar Refineries, London and Liverpool, exclusively for the Molassine Company, Ltd.

Introduced into the Imperial and Royal Stables of **GERMANY** and **RUSSIA.** It is adopted throughout **THE GERMAN ARMY,** and during the few months it has been on the Market in the United Kingdom it has met with a **most favourable reception,** which is evidenced by the **many Repeat Orders** we are daily receiving, and assurances of its **permanent adoption.**

MOLASSINE contains **36** to **40** per cent. of **Sugar,** and is a combination of **Sugar, Treacle,** or **Syrup with Vegetable substances.** It is guaranteed to consist exclusively of natural organic materials.

RESULTS OF FEEDING WITH MOLASSINE.

IT STIMULATES APPETITE, IMPROVES DIGESTION. GRIPE AND DIARRHŒA COMPLETELY DISAPPEAR.

HORSES. From 2 to 4 lbs. per day.

CATTLE. 8 lbs. per day.
SHEEP. 1½ lbs. per day.

PIGS. Per 100 lbs. of their own weight, from 1 lb. to 1½ lbs.

MILCH COWS. 5 lbs. per day.

After a few weeks' feeding are in the **best condition,** and show **strength, highest working power,** and a **smooth** and **glossy coat.**

Thrive quickly, and especially in the last period of fattening, take willingly to their food, and thus **become weeks sooner ready for the market. The meat is of best quality.**

Eat Molassine greedily. The disagreeable smell of the Pig-Stye disappears, the **animals are in the best health.**

After 8 to 10 days' feeding give more milk, richer in cream.

MOLASSINE replaces an Equal Quantity of FODDER.

MOLASSINE packed in bags of 1½ cwt. each.

On rails, Sugar Works of Messrs. HENRY TATE and SONS, SILVERTOWN, ESSEX.

Price per ton, £6 15s. Price per cwt. £0 7s. 6d.

For buyers of regular weekly or monthly supplies we shall be pleased to quote special prices.

WINTER STOCKS SHOULD BE ORDERED WITHOUT DELAY.

For samples and prices apply to The MOLASSINE COMPANY, Ltd., 36, Mark Lane, London, E.C.

First Class Representatives and Distributors throughout the United Kingdom wanted.

PRELIMINARY ANNOUNCEMENT.

THE AGRICULTURAL ANNUAL AND MARK LANE EXPRESS ALMANAC.

1901.

THIS popular Annual, now in preparation, will be published as usual during the Smithfield Show week. Advertisers wishing to secure space in this number are requested to make early application.

THE "MARK LANE EXPRESS" ANNUAL.

PRICE - **SIXPENCE** - PRICE

Commands a far greater circulation than any other Year-book issued in the interests of Agriculture.

NOTE.—The Cover will be printed in Colours.

FOR TERMS AND FULL PARTICULARS APPLY TO THE PUBLISHER,

"Mark Lane Express" 1, Essex-st., Strand, London, W.C.

WATERLOO ROUND CAKES,

Acknowledged as the Best Feeding Cake in the Market for all Classes of Stock, and especially the Young.

Prices, samples, and particulars free on application to Ayre Bros., The Avenue, High Street, Hull, or to the

WATERLOO MILLS CO., LIMITED, HULL.

Printed and Published by the Proprietor, at the Offices, 1, Essex Street, Strand, London, W.C.—November 12, 1900. Sole Colonial Agents—Robert A. Thompson and Co., 180, Pitt Street, Sydney; 382, Little Collins Street, Melbourne; 7, King William Street, Adelaide; Edward Street, Brisbane; 3, Church Street, Capetown.

Farm, Live Stock, Dairy, Milling, Malting, Hops, &c.

(REGISTERED AS A NEWSPAPER AT THE GENERAL POST OFFICE.)

VOL. LXXXIII. No. 3608. LONDON, MONDAY, NOVEMBER 19, 1900. THIRTY-TWO PAGES PRICE 3D.

SOCIETIES.

THE NATIONAL ASSOCIATION of ENGLISH HOP GROWERS.
(Founded June, 1894.)
PRESIDENT.—COLONEL BROOKFIELD, M.P.
HON. TREASURER.—E. ALBERT WHITE, ESQ., Beltring, Kent.
SECRETARY.—THOMAS IRONMONGER.
CENTRAL OFFICE.—61, HOP EXCHANGE, BOROUGH, LONDON.
GENERAL OBJECTS.

To promote united action among English hop growers as a body for the improvement of the industry.

To promote, support, or oppose such legislative and other measures as may affect the industry

To collect and publish, for the benefit of members, special statistical and other useful information relating to English and foreign hop culture.

To arrange for arbitrations in cases of dispute between sellers and buyers of hops, for the avoidance of litigation.

ANNUAL SUBSCRIPTIONS.

Ordinary members, 3d. per acre of hops under cultivation; honorary members, £1 1s.; hop factors. £1 1s.

1900.
Life Member:
HER MOST GRACIOUS MAJESTY THE QUEEN

Particulars from the Secretary,
THOS. NUNNERLEY, Whitchurch.

AUCTION SALES.

ROTHERHITHE, within about three-quarters of a mile of the Tower Bridge, near the entrance to the proposed new Rotherhithe and Ratcliff Tunnel and the Surrey Commercial Docks.—Very extensive Freehold Riverside Premises and Steam Flour Mills, fitted with valuable modern plant and machinery on the roller system, with granaries, warehouses, engine and boiler houses, dwelling-houses, yards, stabling, etc., now and for many years past in the occupation of Messrs. J. B. and T. H. Perks, and for sale, in its entirety, with possession on completion of the purchase. The property possesses the important frontage to the Thames of about 96ft. 6in., with wharfage and lay-by for barges, frontages of about 98ft. 9in. on the north side, and 101ft. on the south side of Rotherhithe-street, also a long side frontage to Gilham's court, the total ground area being about 18,000 square feet, exclusive of the site of the old mill stream, which extends to Paradise Street in the rear, and has an area of about 7,400ft. super. The property, from its considerable river frontage, situation, and extent, would be equally suitable for wharfingers, timber merchants, large manufacturing premises, electric engineering works, or other purposes.

MESSRS. DEBENHAM, TEWSON, FARMER, and BRIDGEWATER will SELL, at the Mart, on Tuesday, November 27, at 2, in one lot, with possession, the exceedingly important FREEHOLD PROPERTY known as Rotherhithe Mill, and 9, 11, and 13, Rotherhithe-street, together with the whole of the valuable fixed plant and machinery. The premises comprise on the north side of Rotherhithe-street and abutting upon the River Thames a range of three two-storey granaries, all communicating, and dwelling-house adjoining; on the south side of Rotherhithe-street an open courtyard, with double entrance gates, extensive mill-house of five floors, with all necessary rolling and other machinery, gearing and accessories, engine and boiler houses, with 25-horse power beam engine and two horizontal boilers, tall chimney shaft, mill stores, yards, stabling for thirteen horses, coach-houses, large van shed, harness room, man's rooms, and loft, a dwelling-house, No. 26, Gilham's-court, piece of vacant ground adjoining, also the old mill stream and water course from the River Thames. The mill premises communicate with the waterside granaries by an iron bridge over Rotherhithe-street.

Particulars of Messrs. HARRIES, WILKINSON, and RAIKES, Solicitors, 38, Nicholas-lane, Lombard-street; and of the Auctioneers, 80, Cheapside.

ALDERMASTON MILL, BERKS.—Valuable Freehold Property, situate about a mile from Aldermaston Station on the Great Western Railway, half a mile from the village of Aldermaston, and about 9½ miles from Reading and Newbury.

MESSRS. DEBENHAM, TEWSON, FARMER, and BRIDGEWATER will SELL, at the Mart, on Tuesday, December 4, at 2 o'clock, a capital FREEHOLD WATER CORN MILL, with about 12 acres of land, situate on the River Kennett, comprising a brick and slated mill-house of five storeys, fitted with modern roller plant machinery, fittings, and tackle, and two pairs of stones, with the necessary water power for driving the same, mill dam, and two sets of sluices, wheat and flour stores, spacious miller's house, pair of capital cottages with gardens, and one other former used as a cottage; nag stable for four, coachhouse, cart-horse stable for six and cart shed, cattle sheds, cowhouse piggeries, rick and chaff houses, workshop, etc. There are also flower and vegetable gardens, productive orchard and several enclosures of rich meadow and pasture land skirted by the River Kennett, which affords excellent fishing. The whole embraces an area of about 17a. 2r. 11p., and is for sale with possession.—Particulars of Messrs. SURR, GRIBBLE, and OLIVER, 12, Abchurch-lane, E.C.; and of the Auctioneers, 80, Cheapside, E.C.

TENDER.

BOROUGH OF PADDINGTON.
TO FORAGE CONTRACTORS.

The Council of the Borough of Paddington are prepared to receive TENDERS for the supply of HORSE FORAGE FOR ABOUT NINETY HORSES, for a period of Three, Six, or Twelve months, on market terms. Further particulars and printed forms of tenders may be obtained at the Town Hall, Harrow Road, between the hours of 10 a.m. and 4 p.m., Saturdays 10 a.m. and 1 p.m.

The Council do not bind themselves to accept the lowest or any tender. No tender will be considered unless in accordance with the printed instructions, and the same must be sent in not later than 12 o'clock noon on Monday, December 3, 1900. At the same time a £10 Bank of England note (not to be enclosed with the tender) must be lodged with the Acting Town Clerk, as evidence that the tender is made bona fide, such deposit to be returned immediately to parties whose tenders are rejected; but in the case of the party whose tender is accepted, to be retained until the contract be signed. If the tender be withdrawn after its acceptance by the Council, the deposit will become forfeited.

By Order
FRANK DETHRIDGE
Acting Town Clerk.
Town Hall, Paddington, W.
November 17, 1900.

PUBLICATIONS.

THE NEW ZEALAND FARMER. Bee and Poultry Journal. An illustrated monthly publication, containing practical and scientific information on Farming, Stock Breeding, Cattle, Horses, Sheep, Dairying, Fruit Growing, etc. The only paper entirely devoted to Farming matters and circulating throughout the Colony. Price 1s.; by post, 1s. 2d. Proprietors, The Brett Printing and Publishing Co., Ltd., Auckland. London Manager, R. B. BRETT, 2 and 3, Imperial Buildings, Ludgate Circus, London, E.C.

THE JOURNAL OF THE BOARD OF AGRICULTURE. Issued by the authority of Her Majesty's Board of Agriculture, and printed and published by Laughton and Co., 1, Essex Street, Strand. Published each quarter day. Price 1s. Yearly subscription, 5s. (post free). This publication contains information as to the position of agriculture at home and abroad, Crop Prospects in Foreign Countries, and further particulars obtained from Foreign and Colonial Reports, Diplomatic and Consular Dispatches, and other sources of intelligence accessible to the Department; together with Notes on Dairying, Fruit Farming, Poultry Rearing, and other rural industries. Short descriptions of Noxious Insects and Fungi, with appropriate remedies; statements of the Quantities and Values of Agricultural Produce Imported and Exported; and records of the Current Prices of Grain, Meat, Dairy Products, Fruit and Vegetables, are given in each number. The official and highly valuable information contained therein commands for the Journal an unique position and circulation throughout the world amongst those interested in Agriculture and its kindred branches. The Statistical matter being of much service for frequent reference renders the Journal in constant demand by Members of Both Houses of Parliament, Landowners, and others interested in the welfare and progress of Agriculture.—LAUGHTON and CO., 1, Essex Street, Strand, London.

RATIONAL PIG KEEPING, to ensure Profit. By W. J. MALDEN. Crown 8vo, cloth. Price 2s.; post free, 2s. 3d. Illustrated. London: "Farm Field and Fireside" Offices, 1, Essex Street, Strand, W.C.

COUNTRY SPORT AND MESSENGER OF AGRICULTURE.—A weekly journal devotedentirely to the pursuits of Country Gentlemen and others interested in all forms of legitimate sport. This journal also has a farm section, giving in a condensed and readable form the cream of everything going on in the agricultural world, written in a manner appreciated by the class to whom it appeals. Obtainable at any railway bookstall; price One Penny, weekly.—1, Essex Street, Strand, London.

RAILWAY ANNOUNCEMENT.

LONDON & NORTH-WESTERN RAILWAY.

POULTRY AND PIGEON SHOW,

TO BE HELD AT

MANCHESTER

DECEMBER 14TH, 15TH, AND 17TH, 1900.

For the convenience of Exhibitors at the above Show, the London and North Western Railway Company will arrange the running of Special Through Vans for the conveyance of Poultry, Pigeons, etc., to Manchester, on Thursday, December 13th, by the Trains leaving—

London (Euston), at 8.45 a.m., 12.25 p.m., 2.45 p.m.; Northampton, at 10.29 a.m., 2.29 p.m.; Carlisle, at 8.30 a.m., 1.40 p.m.; Leeds, at 11.30 a.m., 1.45 p.m., 4.0 p.m.; Birmingham (New St.), at 7.20 a.m., 2.0 p.m.; Shrewsbury, at 11.25 a.m., 4.40 p.m.

These will be in addition to the Vans running regularly on the through trains to Manchester.

Consignments from the Branch Lines, and from Nottingham, Peterboro', Oxford, Cambridge, etc., will be placed in these Vans at the various Junctions, thus ensuring direct transit to the exhibition.

Rates for the conveyance of the traffic, which in no case exceed those charged by any other route, can be obtained at the various Stations on the Line.

Arrangements will also be made for the return of the Traffic in Through Vans direct from Manchester at the close of the Show, and Exhibitors wishing to avail themselves of these facilities are requested to order their Consignments "Per London and North-Western Railway."

Exhibitors are requested to be careful to write their names and addresses distinctly on the backs of the direction labels issued by the Show Committee.

The Company's representatives will be at the Show to answer enquiries with regard to the arrangements for the return journey. All information can be obtained of Mr. Robert Turnbull, Superintendent of the Line, Euston Station, London; or from the Company's District Superintendent, Mr. H. Linaker, Exchange Station, Manchester.

FRED HARRISON, General Manager.

General Manager's Office, Euston Station, London, N.W., November, 1900.

RAILWAY ANNOUNCEMENT.

GREAT NORTHERN RAILWAY.

LEEDS AND DISTRICT RABBIT AND CAVY SHOW, NOVEMBER 27TH AND 28TH.
LEEDS SMITHFIELD LIVE STOCK SHOW, DECEMBER 4TH, 5TH, AND 6TH.
YORK POULTRY, PIGEON, AND RABBIT SHOW, DECEMBER 11TH, 12TH, AND 13TH.
MANCHESTER RABBIT, CAT, AND CAVY SHOW, DECEMBER 14TH, 15TH, AND 17TH.

In connection with these important shows, the Great Northern Railway Company are making arrangements for the conveyance of exhibits from stations on, and in connection with their system.

THROUGH RATES.

Rates for the conveyance of the traffic may be obtained on application to any Great Northern Station Master or Agent, and the rates will in no case exceed those in force by any other route.

To ensure prompt attention, exhibitors should be careful to address their exhibits "Per Great Northern Railway."

Through vans for the conveyance of exhibits will be run wherever necessary.

RETURN TRAFFIC.

Special arrangements will be made for the return of exhibits, etc., at the close of the respective shows, and exhibitors are requested to mark the return labels "Per Great Northern Railway."

A Great Northern Company's representative will be in attendance at all shows prepared to give exhibitors and others all information with respect to train service, etc.

CHARLES STEEL, General Manager.

READERS of ADVERTISEMENTS in these pages will greatly oblige and assist us by mentioning MARK LANE EXPRESS when writing to our Advertisers.

HUSK OR HOOSE

IN HEIFERS, CALVES & SHEEP

No time should be lost in attacking the above fatal disease at the onset, and for this

DAY, SON, & HEWITT'S "BRONCHOLINE"

is without doubt the most effectual medicine extant, if given on first symptoms. It allays Bronchial irritation, destroys the parasites, soothes the lungs, and gives strength to overcome the malady. A well-adjusted dose acts as a capital *preventive*, and is equally invaluable for Tapeworms.

Price 7s. 6d. per ½-doz box.
Sold also by the half-gallon and gallon, at greatly reduced rates.

THE GASEOUS FLUID.

Unmatched for Fret, Colic, or Gripes in Horses, Diarrhœa, Scour, Debility, &c. Hoven or Blown Cattle and Sheep instantaneously relieved. For Coughs, Colds, Chills, and all weakly animals.

Price 7s. 9d. per bottle; 20s. per doz. box.

SILCOCK'S CALF MEAL

CALF REARING.

To rear Calves economically and profitably use SILCOCK'S SOLUBLE CALF MEAL. Thousands of Calves are reared on it annually; it is a true milk substitute, is very easily digested, dissolves at once in water, gives least trouble in preparing, does not scour, is very economical in use, as one pint makes one gallon of thick gruel, and it fits early for cake feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter-milk, and whey the figures stand at 12½, 9, and 6 per cent. respectively. With the minimum of cost and trouble SILCOCK'S CALF MEAL gives the maximum results. Use SILCOCK'S SOLUBLE CALF MEAL, feed regularly, in right quantity and at correct temperature and you will have little trouble in rearing paying calves.

Price, 12/6 per cwt., carriage paid. 5 cwt. lots, 12/-.

R. SILCOCK & SONS, Poulton-le-Fylde, Lancs.

BIBBY'S

"CREAM EQUIVALENT"
for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the "Cream Equivalent" fed Calves as having been fed on New Milk.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

POULTRY FARMING.

The National Poultry Organisation Society last Wednesday had a most successful meeting at Frome, and formed a branch there under most favourable auspices. Her Grace the Duchess of Somerset presided at the meeting, supported by the Marchioness of Bath and several of the Somerset gentry. As both the Duchess and Lord Ludlow expressed their intention to give £25 each for the establishment of a depôt, and the carrying on of the administrative work of egg collection, the success of this branch society is already secured, and we trust that it has a highly prosperous career before it. The National Poultry Organisation Society has been steadily working for a considerable time past in establishing other branches in different parts of the kingdom, so we may fairly hope that in regard to the success of English poultry farming the Rubicon is already passed, and that farmers throughout the kingdom will gain great and lasting benefit through the instrumentality of this highly serviceable Organisation Society. We may indeed join in the hope expressed by the Duchess of Somerset on the occasion referred to that "we see the inaugurating of a grand movement which will extend to table poultry as well as to eggs, and that as the result of combined efforts farmers will get better profits."

At the Coggeshall Root Show the other day Mr. Strutt, M.P., in presiding at the luncheon, defended farmers from the charge of being indifferent to the sterling advantages extended poultry farming is calculated to give them. He is reported as declaring that during his lengthy experience and agricultural observations, covering a period of forty-five years, nothing had struck him more forcibly than the great extension of the poultry departments on farms. As a proof of what had been accomplished he stated that one of the largest farmers in Essex had recently told him that this year he had realised more money from poultry than sheep. Still, without the slightest disparagement to what has been accomplished already, we may be very certain that it has been very little in comparison with what farmers will be able to effect in future, in the event of this great Organisation Society being able to spread its net-work for the collection of eggs and table poultry throughout the length and breadth of the land.

What has militated most against the home industry in the past has been by no means indisposition on the part of farmers to adopt it more heartily, but difficulties in the way of egg collection and marketing. But with the powerful aid of the organisation and the establishment of depôts in rural localities this bids fair to be removed, and we may hope very soon to find some highly important results accruing. Mr. Edward Brown, in his lecture at Frome, may have been a little sanguine when he stated that farmers who now marketed eggs by half-scores would have to think of furnishing them by the million, but at any rate cheap and ready collection and economic transfer to the best possible market will afford them every inducement to develop their capabilities of producing both eggs and table poultry to the fullest extent found remunerative.

A great deal was advanced at Frome on the advantage both of keeping fowls that lay abundantly in winter, and in bringing poultry early to market. According to an article that appeared in the "Royal Journal," cottagers in the Aylesbury and Leighton Buzzard districts a few years since gave a shilling each for ducks' eggs at the present period of the year, that they might place them underneath broody hens so as to get hatching soon after Christmas and a rearage of ducklings to go to the London market in February, when they yield highest prices. As the early bird picks up the worm, so does the early duckling grasp the epicure's fancy price. The article just mentioned states that as much as 15s. per couple has often been given in February. Even in March as much as 10s. to 12s. may be considered the general retail rates; but afterwards, when supplies get more abundant, there are declines amounting to quite 2s. a month. The chicken market commences with extraordinarily high prices likewise, which slowly dwindle but remain comparatively high until the asparagus season has passed; consequently, both in the supply of ducklings and chickens, it is of paramount importance to have early hatches, and to give attention, care

and management to the early broods calculated to ensure rapid growth and flesh formation.

Farmers ought to be able to cater for this remunerative market much better than cottagers. The rules for success are few and simple. In the first place ducks and fowls must be kept for laying that will produce eggs at the proper time required. Winter layers are usually pullets or young ducks from the spring broods of the previous season, and it is quite as easy to train poultry to lay in autumn as to make cows to calve at that period. Any farmer intending to work the enterprise largely should have an incubator, and also a warm rearage room free from draughts, which might be heated by an oil stove. Care, good feeding, and attention with these provisions and appliances ought to ensure genuine, remunerative success, and combined with egg production on a large scale form an enterprise which farmers in present hard times can scarcely afford to overlook.

Portable houses on wheels are very necessary provisions for the hens kept for laying, because all birds like change of pasture, and by moving the fowls frequently from one field to another they not only get every chance to pick up all the worms and grubs they require, but vegetable food of a more healthful character than is obtainable at farm homesteads or in close runs. There is another want better supplied also, for they can help themselves to the grit they so badly require to assist digestion, by being moved about from place to place. Young birds should invariably be kept in preference to old hens, fowls after arriving at a certain age should be systematically got rid of, young pullets being taken in to supply their place. The sorts best for laying are not those which should be raised for table poultry; but we need not refer to that matter, as any farmer about to enter into the enterprise largely would naturally perceive it to be absolutely necessary at the onset to acquire sufficient knowledge of the characteristics and capabilities of the various breeds, so as to satisfy himself what would be the best for selection.

THE NEW MINISTER OF AGRICULTURE.

Mr. R. W. Hanbury, M.P. for Preston (Lancashire), late Financial Secretary to the Treasury, has been appointed President of the Board of Agriculture, in succession to the Right Hon. Walter Long, now President of the Local Government Board. The Marquis of Londonderry, who was thought to be the coming man, remains as Postmaster-General.

SAMPLES.

By a Man of Mark Lane.

The Board of Trade tells us that agricultural labourers were generally well employed during the month of October, the weather outside the northern and north Midland counties being dry and mild and favourable for outdoor work. In the north of England there was a good deal of wet weather, and a few extra hands lost a little time.

I learn that Mr. E. J. Russell, B.Sc., Assistant Lecturer and Demonstrator at the Owens College, has been appointed Lecturer in Chemistry at the South-Eastern Agricultural College in place of Mr. H. H. Cousins, M.A., who has been appointed Agricultural Chemist to the Government of Jamaica.

According to ancient custom the ceremony of nominating the Sheriffs for the counties of England and Wales, with the exception of the Royal Duchies of Lancaster and Cornwall, took place at the Royal Courts, on Monday, in the Court of the Lord Chief Justice of England on "the morrow of St. Martin." The Chancellor of the Exchequer, representing the Privy Council and the Exchequer, who wore his black and gold robes of State, presided. As usual, many were the reasons set forth by the nominees as to why they were not liable for the shrievalty, but for once in a while not one made the excuse of agricultural depression. It would therefore seem that this excuse is out of date.

The New South Wales Government Statistician in his report on the wheat crop of the colony, states that there are this season 1,563,060 acres under wheat for grain, as compared with 1,426,165 last season. "It would be premature," he says, "to venture to give a definite forecast, but the average yield of ten bushels per acre is well within prospect, if the weather is favourable, giving a total yield of 16,000,000 bushels."

The annual report of the New Zealand Agricultural Department states that the harvest is satisfactory as far as the yield of grain is concerned, but that the price of wheat leaves a very small margin of profit. Oats, however, have maintained a fair price. There is an apparent surplus of 7,160,350 bushels of wheat.

The receipts on account of Revenue from April 1st, 1900, when there was a balance of £3,517,047, to November 10th, 1900, were £63,265,201 against £61,743,025 in the corresponding period of the preceding financial year, which began with a balance of £8,919,173. The net expenditure was £110,075,420 against £68,533,390 to the same date in the previous year. The Treasury balances on November 10th, 1900, amounted to £3,118,627, and at the same date in 1899 to £1,699,528.

The second general memorandum issued by the Government of India on the sesamum (til or jinjili) crop of the season 1900-1901, states that in Bombay and the Panjab the area sown is below the average; but everywhere else it is either equal to the average or in excess of it. The crop was not sown in ideal conditions, but the abundant rain of August and September fell when it was most beneficial, and though it was perhaps somewhat too heavy in places in September, the clear weather which followed favoured the further development of the crop and it has thriven well generally, with the prospect of at least a full average yield. Bombay, however, forms an exception to the general prosperity of the crop. There the cultivators in the region ravaged by famine turned their attention to the production of food-grains to replenish exhausted stores, and the area placed under sesamum was materially restricted, not more than from half to two-thirds of the average being sown in most places. Nor is the condition of the crop all that might be desired in some places, as in parts of the Karnátak, where the recent absence of rain has done serious injury.

The Bengal Department of Land Records and Agriculture has now issued its preliminary forecast of the winter rice crop of Bengal for the year 1900, which reports on the state of the crop about the middle of September. In estimating the provincial outturn, however, consideration has been taken of the rainfall during the latter part of September. Since the publication of the final forecast of the winter rice crop of 1899, the District Officers of Midnapore, Rajshahi, Dacca, and Champaran have revised their figures for the normal area under this crop, with the result that the provincial total of the normal area under winter rice now stands at 31,023,000 acres against 31,076,400 acres shown in the final forecast of the preceding year.

The area sown with winter rice this year is estimated at 28,883,300 acres against 31,344,700 acres in 1899. The decrease in the area sown is due to the scanty and badly distributed rainfall in the early part of the season, and also to the drought at the time of transplantation. On the whole, the season has not been altogether favourable for the winter rice crop. Out of the forty-five districts in the province, only eleven (the twenty-four Parganas, Khulna, Backergunj, Bhagalpur, the Southal Parganas, Angul, Puri, Ranchi, Palamau Manbhum, and Singhbhum) have returned an outturn of 100 per cent. or over. In nine, the outturn is estimated at between 90 and 100 per cent., in ten others between 80 and 90 per cent., while in all the rest, except Gaya, the estimate varies between 50 and 80 per cent. Gaya with 49 per cent. shows the poorest outturn of all.

According to the estimates made by the district officers, the outturn this year for the province, as a whole, will amount to 87 per cent. of a normal crop, as compared with 90 per cent. as finally estimated last year. While the recent heavy rains have been beneficial to this crop in most parts of the province, although the record fall in the Burdwan and Presidency Divisions will no doubt cause partial damage to the *aman* paddy there, the weather in the month of August was distinctly unseasonable, and I do not feel justified (says Mr. G. C. Dutt, the Assistant Director of the Department) in raising this estimate beyond 88 per cent., although I am aware that the general tendency of the returns is towards an underestimate. An estimate of 88 per cent. corresponds to what was formerly known as a fourteen-anna crop.

From the same Department I have received a copy of the first note on the indigo crop of Bengal for season 1900. This forecast furnishes the first estimates of the area and outturn of indigo in the twenty indigo-growing districts of this province. Owing to the heavy fall in the price of indigo, due to the introduction of synthetic indigo into the markets of Europe, there has been a great diminution in the area sown with this crop. The fall has so severely affected the industry in East Bengal that many factories have recently been closed, while even in North Bihar there has been a considerable contraction in the operations of many concerns.

The total area sown with indigo this year in this province is estimated at 355,800 acres as compared with 441,600 acres reported in the final forecast of last year. The falling off is remarkable, and is chiefly due to the present unfavourable prospects of the industry. It is probable that the estimate of area sown is rather above the mark, and that some officers have not fully appreciated how greatly the area under this crop has fallen off in their districts. Only one district (Gaya, which has only 100 acres under this crop) of the twenty districts reports a normal outturn. Only two (Darbhanga and Monghyr) forecast an outturn of between 90 and 100 per cent., while two more (Jessore and Saran) anticipate an outturn of 80 per cent. only. In six districts, the outturn is estimated at between 70 and 80 per cent. Muzaffarpur returns a 65 per cent. outturn, Bankura and Rangpur estimate 50 per cent. crop each, while the estimate in other districts varies between 35 and 45 per cent. The outturn for the five indigo-growing districts of North Bihar, taken together, is given as 77 per cent. of a normal crop, but there is reason to believe that the excellence of the outturn of the *khunti* crop has been somewhat under-estimated. According to the district reports, the outturn for the province, as a whole, comes to 71 per cent. of a normal crop against 62 per cent. as finally estimated last year. I am inclined to think, however, says Mr. P. C. Lyon, Director of the Department, that this estimate is a very low one, and that the crop actually harvested is not likely to fall beow 80 per cent. of the normal.

According to the estimates of the district officers, the outturn for North Bihar will probably amount to about 52,500 factory maunds, and that for Lower Bengal to about 11,000 factory maunds. A factory maund is equal to about 75lbs. These figures differ very considerably from those which have been estimated by Messrs. Moran and Company, which are 61,250 factory maunds for North Bihar and 5,750 factory maunds for Lower Bengal. Allowing for an over-estimate of the area under indigo in Lower Bengal, and for there being, on the other hand, a good deal of indigo grown by native cultivators for local consumption, which would not be included in the returns of Messrs. Moran and Company, Mr. Lyon is inclined to estimate a total outturn of about 8,000 maunds in the districts outside North Bihar.

Brutal Horse Copers.—The Canterbury Coroner and a jury on Monday resumed their inquiry into the death of a market gardener named George J. Wright, aged sixty. Deceased attended a [illegible] sale, and was induced to buy a horse for £16 on the promise that a person desiring it would give him £20. The man had also secured by the time Wright made the purchase. Confederates are alleged to have helped deceased to obtain his pursuit, and then to have thrashed the horse in such a manner that Wright received fatal injuries. A verdict of manslaughter was returned against some [illegible] The Procession Constabulary have [illegible] in hand.

AGRICULTURAL POLITICS.

By a Lobbyist.

Of course, my readers will comprehend that I am not inappreciative of the great abilities and Parliamentary significance of Mr. Hanbury, the new Minister of Agriculture. He is one of the ablest men in the Ministry; and in the House of Commons he has a Parliamentary distinction which belongs to few men. What I do say is that he has not hitherto devoted any Parliament attention to the agricultural question, and that his interests are absolutely non-agricultural. However, there is the gratifying fact that Mr. Hanbury's own Parliamentary moment is of so grave a character that it will tend—I pray that every agriculturist will forgive the phrase—to dignify the office.

There is no doubt but that Mr. Hanbury is a great Parliamentary force—so great, indeed, that the men who are skilled in judging the capacity of other men had, in view of the anticipated retirement of Sir Michael Hicks-Beach, marked him out for the Chancellorship of the Exchequer. He has dignity of presence, a fine commanding diction, a cleverness of dialectic method, concisement in argument—all, in fact, that goes to impress the House of Commons. He is esteemed by the House—by every section of it—as a man of fine wit and generous capacity, and, moreover, as a statesman of admirable temper.

Beyond this, he is regarded as a man who has not been quite fairly treated—as a statesman who has not had the position to which his abilities entitled him. All this will combine to give the position a distinctiveness it might not otherwise have had. All the same, let it not be forgotten that Mr. Hanbury is not an agriculturist.

It would be idle to say that the cynicism of the appointment—to me, at all events, it seems that the appointment is cynical—is not comprehended in political circles. The Radicals marvel much at it. Mr. Hanbury is a man whose mental trend would make him an ideal Chancellor of the Exchequer, and whose industrial training would make him a most valuable President of the Board of Trade. Yet he, an industrialist, a man whose whole past has been given to the great mining businesses of the north of England, has been appointed to the Board of Agriculture. There is, however, the satisfaction that he is a supremely practical man. Hitherto his great subjects have been Tommy Atkins, financial purity, and the Post Office. Fortunately he is an acquisitive politician; and it will not be long ere he knows something of agriculture.

An appointment which must inevitably give a good deal of satisfaction to agriculturists is that of Mr. Ailwyn Fellowes to one of the junior positions. Mr. Ailwyn Fellowes is a young man who, in politics, might have achieved more than he has. I am not going to say that he has the brilliant parts of Mr. Hanbury, but he has admirable qualities, a genial manner, a ready sympathy with agriculture, and a personal popularity that is not entirely due to the excellent name he inherits. Of course, it was not possible to give him a position in which he would be able to render direct service to agriculture; but we must at least expect him to give indirect service.

I thought of him once as a sedulous whip of an agricultural party. The agricultural party is non-existent; and there is, I fear, little likelihood that we shall see it rise above the political horizon. Had it been called into existence Mr. Fellowes would probably not have cared for the whipdom—he has been a little afflicted with a Parliamentary lassitude out of harmony with his abilities. However, he has now the opportunity of rendering service of definite character. I believe him to be the man who will not neglect the opportunity, notwithstanding his lassitude.

On the whole, I do not think that we have serious reason to be dissatisfied as agriculturists with the general character of the Ministry. True, Mr. Chaplin has been excluded; but Mr. Long has been given a more distinctive position, and, while this is so, we have a Minister for Agriculture who is practical, far-seeing, able, and of a naturally sympathetic disposition. The Ministry, too, is in a fair measure recruited from the squirearchal class. True, the squires have been placed in positions to which their training would suggest that they are not altogether attuned; and the squirearchal positions have—at least there is one flagrant instance of this—been given to men hitherto associated with our great industries. On the whole, however, I do not, I repeat, think that we have reason to be dissatisfied. The next question is—will the new Minister for Agriculture consent only to be an administrator? Will he be anxious to be a legislator? Let us hope so.

There is one of the later appointments which—a little effort of cynicism it will again appear to be—will commend itself to farmers. Captain Pretyman, a man entirely of military association, goes to the Admiralty as Civil Lord. Captain Pretyman possesses fortunately a more adequate equipment than military associations. He is one of the great squires of Suffolk. He inherited the famous Tomline estates, and has shown himself to be a wise landlord and a sportsmanlike squire. In the House of Commons he has revealed an excellent Parliamentary capacity, and in the debate on parish councils and agricultural holdings law showed himself to be a wise-minded legislator. He has the military instinct; he is an admirable squire. So he goes to the Navy. There is thus a Gilbertian humour about the appointment. Still his influence will tell in the right direction in the consideration of agricultural questions. Yes; on the whole agriculture is fairly represented in the new Ministry.

PRACTICE WITH SCIENCE.

The Yorkshire College.

The annual meeting of the Board of Governors of the Yorkshire College was held on Friday afternoon at Leeds. It was presided over by Mr. A. G. Lupton.

The chairman, alluding to the work of the college, pointed out that during the year the textile and leather departments had been completed, and that practically every part of the college was full of students. The legal department had been working successfully, and the farm buildings on the experimental farm at Garforth were about complete. The question now was whether the college was to stand still, or to continue to progress in the future as in the past. For their guidance they had the example of the Mason College at Birmingham, which was founded about the same time as the Yorkshire College, and which had shown its determination to keep pace with the demands made upon it. Yorkshire, he hoped, would not be behind Birmingham in doing the work required.

Sir John Barran, Bart., moved the re-election of the Marquis of Ripon as president of the college. Lord Ripon had, he said, always shown a deep interest in the welfare of the college, and made an admirable president. Mr. John Arthur Brooke (Huddersfield) seconded the resolution, which was adopted.

Mr. F. J. Munby (York) proposed the election of Professor Thomas Clifford Allbutt and of Sir Francis Sharp Powell, Bart., M.P., as representatives of the college on the Court of the Victoria University. Speaking of the law department of the college, he said the idea was gaining favour with most thoughtful solicitors that university training and legal education were associable if not always associated. In Manchester Mr. Chancellor Christie, and now Principal Hopkinson had set an example at Owens College, and in Liverpool the solicitors had allied themselves with the University through the Liverpool Board of Legal Studies. In Yorkshire that good example had been followed, and the Law Department of the college in Leeds gave great promise. For its complete success, however, the co-operation of two parties was essential the solicitors to whom the students were articled, and the parents of those students. It was for both of those parties to use their influence to secure for those entering the legal profession the benefits of university training. He trusted that the representatives of the college would have an opportunity of urging this matter forward, and upholding the value and merit of Victoria law degrees.

The reception of associates and distribution of prizes won by students at the Yorkshire College took place in the large hall of that institution in the evening. Mr. A. G. Lupton, chairman of the Council, presided, supported by Principal Bodington, Sir John Barran, Professor De Burgh Birch, Dean of the Medical School, and other members of the college staff. There was a large attendance of students of both sexes.

The Chairman of the Council eulogised the work of the college, which, he said, was making an impression not only in the industrial life of Yorkshire but throughout the country.

Report on Destroying Charlock in Corn Crops, 1900.

In submitting the second annual report on destroying charlock, which is based on over 700 inquiries in Great Britain and Ireland, I am unable to include a large number of practical observations made to my correspondents, and have only given the most important points, which have been analysed and condensed as accurately as possible.

It is most satisfactory to observe the increased proportion of successful work in destroying the charlock, and the consequent improvement in the corn crops.

It will be remembered that the season was abnormal and late. The cold weather to the end of June had a most marked effect in checking the growth of the charlock, which in some cases was destroyed by frost, and in others by the flea beetle.

The figures below are calculated from all the operations, and given at the rate per cent.:—

Date of spraying. The spraying was in progress from the last week in April to the last week in July: 2 per cent. of the operations having taken place in April, 62 per cent. in May, 30 per cent. in June, and 6 per cent. in July. The average was eight or ten days earlier than last year.

The crops amongst which the charlock was growing were 58 per cent. oats, 30 per cent. barley, 6 per cent. tares, and 4 per cent. mangolds.

The average height of the charlock at the time of spraying was 30 per cent. 4in., 25 per cent. 4in. to 8in., 18 per cent. 8in. to 12in., and 18 per cent. about 12in., or in flower.

Material and quantity of solution used. Copper sulphate, having been found better and far more convenient last season, was used in every operation this year. In two instances iron sulphate was tried for comparison, but was less successful.

In nearly all cases 50 gallons of solution was applied per acre, and this quantity seems to be generally sufficient to distribute the copper. In a few instances, where only 40 or 45 gallons were used, the results were not so good; and in two instances, where 60 gallons per acre were applied, there was no advantage over the 50 gallons.

The strength of the solutions varied as follows: 47 per cent. were 2 per cent. solutions, 39 of 3 per cent., 10 of 4 per cent., and 4 of over 5 per cent.

It will be noticed that the strength of the solutions were higher than last year. The 3 per cent. was very successful in destroying charlock, and showed the best results in improving the crops. In no case was there any permanent injury to the different crops by the different solutions.

Fourteen days after spraying. The appearance of the corn crop and the charlock were described as follows:—

The corn is 89 per cent. as improved or normal, and in 11 per cent. discoloured.

The charlock in 88 per cent. as killed, burnt, or withered, and in 12 per cent. as withered or scorched, but not dead.

The approximate proportion of charlock destroyed.—In 47 per cent. of the operations, 90 to 100 per cent of the charlock was destroyed: in 15, 70 to 90 per cent.; in 22, 60 to 70 per cent.; and in 22, 50 per cent. or under.

The spraying machines used were in the proportion of 71 per cent. large machines, drawn by a horse, and 29 per cent. knapsacks.

The large machines gave the best results, probably owing to greater uniformity of distribution of the liquid.

The conclusions arrived at, from careful compilation of the original reports, are:—

1. That charlock can be destroyed in growing corn crops, without injury to the latter, by spraying with 50 gallons of 2 or 3 per cent. solution of pure sulphate of copper per acre; and that this year a 3 per cent. solution shows better than a 2 per cent. solution.

2. That generally the corn crops are much improved and give a better yield where the charlock is destroyed.

3. That spraying early, when the weed is young and in soft fibre, is most successful.

4. That the large sprayers are more successful than the smaller.

I should like to point out to those who intend to spray charlock next year, that to obtain the best results they should be prepared well beforehand to spray at the time when the plant is most susceptible.

I feel gratefully indebted to those who have taken the trouble to send me the information upon which this report is based, and trust it may be found to advance a new and valuable farm operation.

G. F. STRAWSON.

71A, Queen Victoria Street, London, E.C.,
November 6th, 1900.

ALL farm live stock should be given "Mistassini." It is an excellent tonic and ensures a good appetite. See advertisement on back page of this issue.—[ADVT.]

FARM.

Root, Fruit and Grain Show at Gloucester.

The annual exhibition of the Gloucestershire Root, Fruit and Grain Society was held at the Corn Exchange, Gloucester, on the 9th inst. Last year the entries numbered 620, which was a record for the society, this being due to the exceptionally large number of classes which were set apart for fruit. This year, however, the committee judiciously cut down the classes, and as a result the number of entries fell to the extent of 100, but the quality of the exhibits was fully up to the average, as many of the entries contained some good specimens. In regard to the quality of the fruit, it was considerably better than that of last year, especially in the culinary sections. Mr. Conway Jones took a first prize for a dish of Cox's orange pippin apples. There were some excellent specimens of potatoes, although not very large. The root crops were much better than was anticipated owing to the dryness of the season, the turnips being an exceedingly fine lot. Mrs. J. Smith, of the Scarr, Newent, practically swept the board in the classes for specimen roots, as she secured some six premier awards and four seconds. In regard to the grain, white wheat showed signs of the weather, except that of the prize-takers. The grapes were good and fully up to the average. The preserves formed a fair class, some of them being boiled too much, and did not give that bright appearance which is often to be met with at these shows. Cider and perry was again a strong class, the former being better than in previous years, this no doubt being due to the dry season. The only remark that is necessary to make as to the butter classes is that the exhibits of prize-winners were very good, especially in the keeping classes. The Channel Island butter was also very good, but there was some butter of very doubtful quality.

Proctor and Ryland's Root Prizes.

The importance of a good supply of sound roots for wintering the stock is not likely to be underestimated nowadays, and the best means of producing abundant crops cannot fail to be of interest to farmers generally.

It has long been the custom of Messrs. Proctor and Ryland, the old-established agricultural chemists of Birmingham and Chester, to offer prizes for the best crops of swedes and mangolds grown with the aid of their manures, and the judge's report of their forty-seventh annual competition deserves attention, proving, as it does, what excellent results can be produced by these well-known fertilisers.

Mr. Ed. Parsons, Wollaston Farm, Stourbridge, acted as judge, and the following is a copy of the awards:—

District No. 1.—Class A.—Five acres of swedes, grown with Messrs. Proctor and Ryland's special prepared manure, upon any farm within the counties of Hereford, Salop, Stafford, Warwick, Worcester, Gloucester, Berkshire, Hants, Surrey, Oxford, Buckingham, Hertford, Bedford, Northampton, and Huntingdon: First prize, 15gs., Mr. J. S. Billington, Balterley Hall, Crewe, 46 tons 18 cwt. 2qrs. 8lbs. per acre; second, 10gs., Mr. William Humphreys, Evenall, Oswestry, 41 tons 5 cwt. 2 qrs. 24 lbs.; third, 5gs., Mr. J. B. Ball, Eccleshall, and Mr. Levi Lawrence, 40 tons 1 cwt. 1 qr. 20 lbs. each per acre.

District No. 2.—Class B.—Five acres of swedes grown upon any farm within the counties of Cumberland, Westmoreland, York, Lancaster, Lincoln, Nottingham, Leicester, Rutland, Derby, and Chester: First prize, 15gs., Mr. T. E. Griffith, Rhyhyclafdy, Pwllheli, 55 tons 15cwt. 2qrs. 24lbs. per acre; second, 10gs., Mr. R. Roberts, Portmadoc, 52 tons 18cwt. 2qrs. 18lbs. per acre; third, 5gs., Mr. Hugh Williams, Llanddaniel Fab, Anglesey 47 tons per acre.

Class C.—Five acres of swedes, grown with Messrs. Proctor and Ryland's special prepared manure, upon any farm in England or Wales: First, 10gs., Mr. Owen Lewis, Llangefni, Anglesey, 61 tons 18cwt. 2qrs. 8lbs.; second, 5gs., Mr. W. E. Hughes, Llangain, Pwllheli, 53 tons per acre.

Class D.—Two acres of mangold wurtzel, grown with Messrs. Proctor and Ryland's special prepared manure, upon any farm in England or Wales: First, 15gs., Mr. R. Hull, Edleston, Nantwich, 77 tons 1cwt. 1qr. 20lbs. per acre; second, 10gs., Mr. T. E. Griffith, Rhydyclafdy, Pwllheli, 71 tons 18cwt. 2qrs. 8lbs. per acre; third, Mr. W. E. Hughes, Llangain, Anglesey, 70 tons 4cwt. 1qr. 4lbs. per acre.

The Yeoman Peasantry of England.

A lecture on "How to Restore the Yeoman Peasantry of England to English Land" was delivered by the Rev. Dr. Paton, of Nottingham, at the People's Hall, Albion Street, Leeds, on the 10th inst., the meeting being held under the auspices of the Education Department of the Leeds Co-operative Society.

Dr. Paton said the statistics showing the rapidity with which the strictly agricultural population was declining were alarming. At the census of 1851 the agricultural labourers of England and Wales numbered 1,253,800. At the census of 1891 their numbers had fallen to 780,700. Since 1891 the decrease had probably been at a quicker rate. The causes of the depopulation of agricultural districts were briefly—the poverty of the farmer, the increased use of machinery, the laying down of corn fields into pasturage, and the growing discontent of country folk caused by the democratic spirit of the age that could not brook the dull monotony and servile customs of the labourer's life. The yeomen of England, who had been her strength, and the noblest types of Englishmen, were almost extinct. England, which once, of all countries of Europe, was the richest in men who occupied and tilled their own land, was now, of all countries in Europe, the poorest in this class of men.

In England half the whole land was in possession of 2,250 landlords, and two-thirds of Scotland was owned by 250 landlords. He pointed to the danger of the bulk of the population having nothing behind their weekly wages, to the competition of agricultural labourers with town-bred men in our great cities, and to the enormous imports of food stuffs, especially wheat and dairy produce, remarking that the food imports in this country averaged £4 per head of the whole population, whilst in Germany the food imports averaged only a little over 7s. per head.

The problem of problems, he remarked, was could England supply itself with the provisions needed by its larger population. He believed that England could to a considerable extent do this by a combination of two large productive forces; first by the thorough cultivation of the land by spade industry; and, secondly, by what had been termed "the magic of property."

Sketching a plan by which the restoration of a large order of peasant or yeomen farmers to the English land could be effected, he stated that the time was opportune, for land was cheap, and large farms were crumbling into small farms; the settlement of men on the land must be carefully organised under conditions which must ensure success, and men should be settled in groups or colonies; the farms should be cultivated by spade industry, and there should be about eight acres for each occupier; there must be co-operation in marketing operations and dairying; and indoor industries should be taught for the long winter evenings. He strongly urged, in conclusion, that the Leeds Co-operative Society should take up this question, and that a committee for the North of England, with Leeds as its centre, should be formed for carrying out the scheme.

The Regulation of Agricultural Expenditure.

Speaking at the last meeting of the Cambridge and Isle of Ely Chamber of Agriculture, Professor Somerville dealt with the regulation of agricultural expenditure. He was convinced, he said, that a wider application of the law or principle of diminishing returns would result in largely increasing the aggregate profits of agriculture. Although in agriculture it was the rule that increased expenditure in the same area of land failed to yield a return proportionate to the return from previous expenditure, there were some exceptions, and then they had fresh doses of capital yielding a larger return than earlier applications. This would occur where fresh capital was brought to bear on a farm which had hitherto been much too large for the capital available.

It was quite certain that if the law did not operate farmers would concentrate their energies on much smaller areas. The practical application of the law to the conditions of English farming was of the highest importance, and the great secret of success in farming lies in taking full advantage of it. This was what, to a large extent, enabled one man to hold his own, and even to make money, when other farmers were losing money. Land, without the expenditure of labour and capital, would yield practically nothing, and the farmer who could employ most capital judiciously—that was profitably—was the one who was most successful.

It seemed to him that a farm should be less regarded as a natural agent that produced commercial commodities, such as grain and meat, than as an opportunity for a man to use his energies, judgment, and capital to the best advantage. Some land was more responsive to treatment and expenditure than other land was, but in every case it was the first duty of a farmer to ascertain the capabilities of his land in this respect and regulate his expenditure accordingly.

Put in general terms, the guiding rule should be this—a farmer ought to increase his expenditure up to the point when his return from the last application of capital was sufficient to restore to him his expended capital, together with a satisfactory profit. He ought to ascertain very carefully whether an increased supply of labour for tillage would result in such an increase of crop as to leave a margin of profit, whether in extra 10s. spent on manure would produce an extra yield that would be worth 10s. plus interest and profit, plus the increased expenditure necessary to produce the extra yield, and so on.

Poor Rates Past and Present.*

I suppose that from the earliest times the moral responsibility of the laity to support the priests of the (by law or custom) established religion of the country, and of the entire community to provide funds for the expenses of the civil government, have been universally recognised; and in the moral obligation to provide by the payment of tithes for the support of the clergy being not only ministers of religion, but also the distributors of the alms of the richer members of society among the indigent poor, we find the germ of the Poor Rate of modern times. The first authentic civil recognition of compulsory tithes appears to be a Synodal decree ratified by two kingdoms of the Heptarchy about A.D. 786. In the year 900, by a treaty between Guthrun the Dane and Alfred and his son Edward the Elder, we find the payment of tithes not only enjoined, but also a penalty mentioned for neglecting to pay tithes; this I take to be the first British compulsory Local Taxation. At that time the tithe payable was the gross tenth of all corn, grass, hops, and wood, considered in those days as the natural products of the earth; the gross tenth of wool, milk, pigs, etc., as partly natural and partly artificial; and a tenth of the clear profits of all trades, manual occupations, fisheries, and the like. Upon the first introduction of compulsory tithes, though every man was obliged to pay tithes in general, yet he might pay them to whatever priests he pleased, which was called arbitrary consecration of tithes; or he might pay them into the hands of the Bishop, who distributed among his diocesan clergy the revenues of the Church which were then in common. But when dioceses were divided into parishes, the tithes of each parish were allotted to its own particular minister, first by common consent or the appointment of Lords of Manors, and afterwards by the written law of the land. At this first establishment of parochial Clergy the tithes of the parish were distributed in a four-fold division: one for the use of the Bishop, one for maintaining the fabric of the Church, a third for the poor, and the fourth to provide for the incumbent. Notwithstanding this law

Arbitrary Consecration of Tithes

was common till the reign of King John. This naturally accounts for the number and riches of the Monastic houses, for a layman who was bound to pay tithes to somebody often thought it good policy to build an Abbey, and pay his tithes to his own Monks or to grant them to some Abbey already erected, since by this arbitrary consecration, which cost him nothing, he might have Masses for ever sung for his soul.

However historians differ as to the morality and usefulness or otherwise of the Monks, it is certain that although they appropriated to themselves a vast quantity of tithe and land, they did not forget the poor, to whom a part of the tithe belonged, but up to the dissolution of the Monasteries provided adequately for the necessities of the poor. In 1536 the lesser Monasteries were dissolved, and in about two years more the whole revenues of all English Monasteries were confiscated, and whereas up to this time, from the year 1388, we find various statutes had been passed having for their object the suppression of vagrancy and the punishment of vagabonds and sturdy beggars, it now became necessary to pass several Acts of Parliament having for their object compulsory charity. All historians call attention to the very large number of poor persons rendered destitute at this time, presumably by the dissolution of the Monastic institutions. It is not surprising that different historians give various reasons for this widespread destitution; on one hand it is said that the Monks let out the Abbey lands in small holdings to the peasants on very favourable terms, and that on the dissolution the new owners increased both the extent of the holdings and the rents, and that the new occupiers found pasturage more profitable than tillage; thus the peasantry were ousted not only from the occupation, but also from the cultivation of the soil. Of course, in an agricultural country, as England at that time was, almost entirely, this would be

A Calamity to the Rural Population.

Another historian may say that the Monks had fostered a crew of indolent parasites who had lived on the charity and industry of the Monks. Whichever view is correct, and probably both are partially so, it is certain that during the rest of the reign of Henry VIII., that of Edward VI., and the first forty-three years of that of Elizabeth, at least eight or nine Acts of Parliament were passed having for their object reform of the Poor Law and relief of destitution. In 1601 the famous statute which is the basis of our present Poor Law was passed. This statute enacts that the overseers of the poor, now first appointed, shall raise with the consent and allowance of the justices in every parish "By taxation of every inhabitant, parson, vicar, and other, and of every occupier of lands, houses, tithe impropriate, propriation of tithe, coal mines, or saleable underwood in the said parish, in such competent sum and sums of money as they shall think fit, a convenient stock of flax, hemp, wool, thread, iron and other ware and stuff to set the poor on work, and also competent sums of money for and towards the necessary relief of the lame, impotent, old, blind, and such other among them

* A Lecture delivered by Mr. James Crouch before the Reds Chamber of Agriculture.

being poor and not able to work." We know that with small amendments this Act of Queen Elizabeth's Parliament continued in force till it was further greatly amended by the Poor Law Amendment Act of 1834. I find no legal exemption of "every inhabitant" of a parish from taxation to the Poor Rate till 3 and 4 Vic. cap. 89, which enacts: "That it shall not be lawful for the overseers of any parish, township, or village to tax any inhabitant thereof, as such inhabitant, in respect of his ability, derived from the profits of stock in trade or any other property, for or towards the relief of the poor." And then, in 1840, for the first time, the whole relief of the poor throughout the country became a tax exclusively on the occupation of real property. At that time the village community was almost entirely shut out from the rest of the world, its members were very much dependent one on the other, they rarely left their parish (I am speaking now particularly of the industrial classes) except as soldiers and sailors;

Few Persons Migrated to the Towns,

and what money was earned in the parish was mostly spent in it, and almost the only property owned in rural districts was land and farming stock; any savings were almost invariably hoarded up in specie or invested in real property or on mortgage. It is not surprising that the relief of the poor was then considered, even by the largest ratepayers, as a legitimate and equitable tax on real property in, at all events, rural districts; for under these circumstances, so different to those of the present day, each resident in a rural parish had spent his working days in some shape or other, for the benefit of some person or class in the parish, whose wealth was derived from the occupation or ownership of realty. In these days of cheap, and what is more important, easy and speedy means of communication between village and town, between county and county, and between continent and continent; of universal advertising of and for situations through the agency of the penny or half-penny paper; also, perhaps in consequence partly of the recent alterations in the law of settlement; we find each year a greater inclination among the younger and stronger members of each rural community to try to better their condition by moving from the parish in which they were born. We know that the population of many of our villages is decreasing in a manner that cannot be contemplated without regret by philosophical statisticians; we also know that the proportion of paupers is often eminently unsatisfactory.

It is obvious that whereas in the sixteenth, seventeenth, and eighteenth centuries it was quite easy to rate real property—and perhaps in those days the occupation of more or less real property was the best test of a man's ability to pay more or less rates—it was extremely difficult to get at the nett profits of trades and professions when the books of the professional man or tradesman were of the most elementary kind, even if they were not altogether wanting; consequently it generally happened that even before the passing of the Act in 1840 the only property assessed to the relief of the poor was real property, viz., houses and land. About 1850, in the altered circumstances of the country, it began to be generally admitted that the

Poor Rate Pressed most Unequally

on parishes as such, and in 1866 the parish ceased to maintain its own poor; since that time out and indoor relief has been a common charge throughout the Poor Law Union.

I have now very briefly sketched the past history of the Poor Rate in relation to Poor Relief.

Though the parochial rate now collected is called a Poor Rate, it is much more than that, for by it, and on its assessment, it now collected a sum which fifty years ago would have been considered vast, which supplies, with a small sum from Imperial taxation, money to maintain all roads, for sanitation, for police purposes, for the registration of voters, for vaccination, for the various charges on the County Rate, for all sums spent by Parish Councils, and lastly in parishes having a school board, the whole amount required for elementary education outside the annual earned Government grant.

Can these amounts be considered in these times equitable charges on real property? First as to the roads. Surveyors of highways were first appointed in parishes in the reign of Henry VIII., when vehicular traffic was almost unknown on the majority of rural roads, but gradually, as luxury and commerce increased, better roads than the mere tracks of the earlier times became a necessity, for the transport of merchandise from place to place, for the purposes of social intercourse, and the quicker conveyance of the mails. It now became generally admitted that the occupiers of realty could not equitably be called on to bear the burden of the greatly increased expenses of the improved roads; and various turnpike Acts were passed till in the first half of the nineteenth century nearly all roads carrying any considerable amount of traffic were turnpike roads, maintained by those who used them. Of course, under this system the burden of maintaining the bye roads was small; now the whole cost of the repair and improvement of all roads is a charge on the Poor Rate.

The most casual observer must see how greatly the cost of the roads has increased, and how greatly the proportion of foreign traffic to local has also grown during the last fifty years.

By the various Public Health Acts many duties are thrown on District Councils and County Councils in regard to the health of the people.

Forty years ago, when the only expense to Boards of Guardians, who were then the only sanitary authorities, was a small annual payment to an Inspector of Nuisances in each Union, who was often a superintendent of police,

The Expense was Trifling,

but now with a County Medical Officer of Health, District Medical Officer of Health, and competent and energetic sanitary inspectors, the cost is greater and is, and will be, an increasing charge on the rates.

The police are a protection to all persons and property, and are quite as indispensable to persons possessed of personal property as to the occupiers of land, and I fail to see why all police pay and pensions should not be paid out of taxation.

If there is any charge on the rates to which all persons entitled to vote should equally contribute, it is the preparation of the voters' lists. This some years ago was a very small charge in many parishes, but of late years it has grown from so many shillings to pounds. In the year I was born the Revising Barrister allowed the Ridgmount overseers for preparing the list six shillings, in 1899 he allowed £7 7s., in 1900 £7.

Surely compulsory vaccination is for the benefit of the whole community, and the cost of this is increasing rapidly by reason of the new scale of fees, introduced by the last Vaccination Order.

Elementary education costs in school board parishes from 5d. to half-a-crown in the pound, on the poor rate assessment. No one can think it equitable to rate rural real property exclusively to educate boys and girls to take all sorts of situations in towns, on railways, all over the world, wherever trade happens at the time to be most brisk, instead of staying and working in the parishes in which they were born, helping their old parents, and by their labour helping to produce the money to pay the rates as their forefathers did. The charges on the county rate, whose name will soon be legion if they go on increasing, are incurred for the benefit of the whole community.

I think this very brief sketch of the rise and progress of the so-called Poor Rate proves that although the parochial rate for the relief of destitution may have been, and was, an equitable charge on real property during the fifteenth, sixteenth, seventeenth, and eighteenth centuries, the present Poor Rate cannot be considered as such. I feel that it would be unwise to remove Guardians of the Poor from their present position, for only persons living near can possibly know the circumstances and necessities of applicants for relief, and I am of opinion that unless a great part of the money for the relief of the poor is raised locally, carelessness or extravagance might be charged against the Poor Law administrators. Perhaps

Sanitation is Fairly a Ratepayers' Question

but as to the highways, police, registration of voters, vaccination, education, and county rate charges, I do think they should be paid out of the general taxation of the country, to which all persons should contribute according to their ability, whether they own or occupy real property, own shares, stock-in-trade, or other personalty, or earn large or small business or professional incomes.

I think it is scarcely widely enough realised that the question of parochial rates is nearly as interesting to many dwellers in cities and towns as it is to us in the rural districts. Take the Metropolitan area. Under the Valuation (Metropolis) Act a new assessment is made every five years, and in many cases, perhaps in most, the rack rent is very nearly approached by the gross assessment; only one-sixth is allowed off this gross assessment to get the rateable value on all fair and good houses. In the parish of Marylebone this year the rates are over six shillings in the pound. The occupier of a house I know in that parish, who occupies it for purely professional purposes, pays as rates this year £78.

The large amount of Metropolitan rates presses hardly on the less successful professional and trading classes, as a man with a large family must have a good-sized house, and, to get on in many trades, an expensive shop, and often must live in a highly-rented street to be near his patients, clients, or customers, as the case may be, and it may, and I believe frequently does happen, that a man earning £5,000 a year pays quite as small a sum as rates as a man in the same trade or profession whose income does not exceed as many hundreds, and in some cases whose profit is non-existent.

Suppose a man with an income of £500 a year as interest on brewery debentures, or any similar practically safe investment, should be called on by the rate collector to pay, in addition to all other taxes,

£160 a Year as Rates,

would he not think it a monstrous tax? Yet this is about the proportion in which realty in London pays to the rates. Suppose, again, that owing to unfortunate and unavoidable circumstances his debentures ceased to pay any dividend, and he was still called on to pay the £160 a year, would not his case be called a very hard one? But have not the cases of many farmers been very nearly analogous to this hypothesis?

A hundred years ago the wealth of the country consisted very largely of real property, but during the last century, owing to the great expansion of our commerce and the general industrial prosperity of Englishmen, an enormous amount of personalty has accumulated, the owners of which certainly do not contribute according to their ability to what is called local taxation. There is no doubt that the Agricultural Rates Act, 1896, is a step in the right direction. Everyone having the most elementary knowledge of local taxation must admit that in 1895 occupiers of farms paid far more poor rates than was equitable, but I think that the remission should have been given on the farm, not on the land alone. It seems to me to be impossible to assess, even approximately, the value of the farm house and buildings, apart from the land; house, buildings, and land together make a farm, and (although there are exemptions), generally speaking, farm buildings are absolutely valueless except as farm buildings, and if the land that is about, it follows the buildings are of no value; so with the land, in most cases. I therefore think whatever percentage it is equitable to allow, it should be allowed on the whole farm. Another objection to this Act is that without professing to do so, remitting half the rate on agricultural land necessarily increases the rate on all other rateable property. This I have seen denied, but it is so, because the amount lost in the collection of the rate is not made up to the collector of the rate, but it is said that the spending authorities receive from the exchequer the amount they severally lose. The Parish Council and overseers, however, are not recognised as spending authorities; consequently, if the Parish Council spent much money the rate on property other than agricultural land must be appreciably increased. In parishes in which the assistant overseer's salary and the preparation of voters' lists are about the only sums paid directly by the Parish Council and overseers, these amounts together are equivalent to about a twopenny rate or more.

Do ratepayers as a body appreciate the continual growth of the sum collected as poor rate? In 1680 this sum was only £665,380, just over half a million of money; in 1773 £3,000,000 was the estimated sum; in 1850 £7,270,493 was the amount collected; in the year ending Lady Day, 1895, the amount was £19,063,893; in the year ending Lady Day, 1898, the last year of which the whole figures are yet published, £21,410,311. It is sometimes asked, "How can this be? I pay no more rates than I did years ago." Of course, a very large increase in real property value has taken place in populous places; and in rural districts the Assessment Committees have carefully watched the development of railway and industrial property; and while

Agricultural Assessments have Gone Down

with the long-continued decline in the value of agricultural land, caused by the disappearance of profit from its occupation, at the same time a great increase has taken place, during the last fifty years, in the assessments of railways and rateable property other than agricultural land. The time will arrive, if it has not already come, when it will be no longer possible to increase the assessments of these properties, and then any increase in the total amount of rates collected will of necessity fall on land and rural buildings as well as on other property.

In addition to the 21½ millions we have been considering, the so-called Exchequer contributions and grants in aid of rates are really, to a large extent, drawn out of the pockets of owners and occupiers of realty. The tax and licence collectors take out of the one pocket what the State puts into the other pocket of the ratepayer.

About eight millions a year, including the grants under the Agricultural Rates Act, are altogether paid from taxation, as it is said, in relief of rates; but a very large proportion of this amount comes out of the very pockets it is supposed to relieve. The names of certain taxes suggest, or I may say prove, this: Local taxation, licences 5¼ millions, estate duty 2½ millions.

It is sometimes said that the amount of rates is only of consequence to the owner of the land, but the fact remains that in those cases where agricultural land is let to a tenant, the amount of rates remitted by the Act of 1896 does go into the pocket of the farmer. Even granting that a large permanent reduction of rates will in future tend to raise the rent of land, may we not expect that if the burdens on land are lightened, and should its occupation once again become profitable, a race of yeoman farmers would spring up in many districts? There are now many owners of small and medium sized landed estates, who would gladly sell and invest the money in the fashionable industrial and commercial limited companies, in foreign and colonial bonds, and railways all over the world, which are now financed to such a large extent by British capital. Land now supports the clergy of the Established Church; no doubt this has been an obligation for more than 1,000 years; its owners and occupiers pay just the same taxes as other people, and in addition local taxation raises a sum approaching 30 millions a year. This is a serious question, and I am sure the more it is considered, the more certainly the inquirer will see that land and houses pay far more as rates and taxes than is equitable.

The directors of the firm of Richard Hornsby & Sons Limited recommend a dividend of 5s per share, place £10,000 to reserve fund, and carry forward £5,899.

AGRICULTURAL LAW.

A Wool Dispute at Winchester.

An important case concerning purchasers and sellers of wool was heard by his Honour Judge Gye at Winchester County Court on the 7th inst. The plaintiff was Mr. W. D. Forder, wool stapler, of Winchester, and he sued Mr. W. Nicholson, of Basing Park, for £7 17s. 7d., by reason of damage suffered in consequence of 245 fleeces of wool he bought from the defendant containing "cleg" or dirt to the extent of 207lbs.

Mr. Mears, who appeared for the plaintiff, said the wool was bought at the Winchester wool sale on July 4th, which was conducted by Messrs. Harris and Sons, auctioneers, of Winchester, and there were in all about 250 lots offered. One of those was lot 100, which was the subject of the claim. Mr. Forder bought some £2,600 worth of wool and paid for it, and £187 15s. 6d. was the amount of the lot in question. The case was taken under the Sale of Goods Act, and the first sections he relied on were Sections 13 and 15. Section 13 said that where "there is a contract for the sale of goods by description there is the implied condition that the goods should correspond with the description; and if the sale be by sample as well as by description it is not sufficient that the bulk of the goods corresponds with the sample if the goods do not correspond with the description." In the catalogue the wool was described as "clean" wool, and the contract at those sales was that the sale was by sample. There were taken one or two sheets which contained a certain number of fleeces, and these were exhibited between hurdles so that buyers could walk along and view them. In that instance the samples were on view from six o'clock in the morning until one o'clock, when the sale began, at Lower Brook Street, Middle Brook Street, and the Corn Exchange. Mr. Forder was one of the bidders for lot 100, and secured it at a price of 9¾d. per lb. It was described as the property of Mr. Nicholson, of Bordean. Amongst other fleeces it contained 245 fleeces of Down tegs. When these came to be unwound they were discovered to be what was called "cleggy." The sample was "cleggy," but was slightly better than the bulk, though that was "cleggy" also.

Mr. Mears went on to remark that, while he could not say the goods did not correspond with the sample, he said they did not correspond with the description. In the catalogue it said that Lots 1 to 158 were clean wool, whereas Lot 100 contained 207lbs. of "cleg." The other section of the Act he relied on was Section 15, in which there was the implied condition that the goods should be free from any defect rendering them unmerchantable, which would not be apparent on reasonable examination of the sample. The issue would be first, whether it was entitled to succeed on Section 13, when he said that it was not sufficient that the bulk of the goods corresponded with the sample, but they must also correspond with the description. He should call expert witnesses to show that there were "clegs" in the wool.

Mr. Simonds (who appeared for the defendant): I say there were "clegs," but I also say the fleeces were clean within the language of the wool market, which we are dealing with.

Mr. Mears said that as regarded the reasonable opportunity of examination he should call witnesses who were present and who did not discover the "clegs." It would be physically impossible to unwind and examine each particular fleece in 250 lots, which were at three different places, and it was not the custom of the trade to do so.

His Honour: But he could do so if he liked. It may be the custom not to do so, but he is not bound to follow it; he must take the risk.

Mr. Mears: I hope to convince your Honour that what my client did was a reasonable examination of the samples. I say the wool contained a defect which would not be apparent in a reasonable examination of the sample. I also say it was not clean wool, and that Mr. Forder exercised reasonable opportunity of examination under the circumstances without detecting the defects.

After having heard extensive evidence His Honour summed up at some length. He said all the witnesses agreed that the sale was conducted in the ordinary and usual way of wool sales, and that being so the plaintiff, who had had some forty years' experience, must be taken to know what that was in the same way that the auctioneers and the vendor did. He was entitled to take whatever benefits he might get by the sale, and he was also bound to accept the ordinary and usual burdens, whatever they might be. He saw the samples, according to his own admissions, in the usual way, and he bought upon the faith of his inspection. It was admitted by his witnesses that there was nothing whatever to have prevented his ripping open every single bundle of fleece he pleased. Time might have been against him, but he could at least have ripped open one or two; but he did not do it. He, however, chose to deal in the customary way of the trade and buy according to the custom of the trade, and he must take the consequences. It did not lie in his mouth to say, "Although you gave me every opportunity for inspection and did everything in the same way as has been done in my own experience of the last forty years, yet on this particular occasion I have been deceived and you must pay damages." That would not do. Unless he could say there was something unusual in that sale, and something unusual in the way in which the samples were shown and the opportunities for inspection given, he could not recover, because he must be taken to have—being in the business—assented to the sale being conducted in that way, which was the ordinary and usual way. Therefore he (the Judge) held upon that that there had been reasonable and proper opportunity for examination of the sample that the plaintiff picked out, that he acted upon his own knowledge after examination, and that as a result he was not entitled to recover the damages he sought to recover. He should, therefore, give judgment for the defendant with costs.

On the application of Mr. Simonds his Honour gave costs on the higher scale, with counsel's fees.

Farmer v. Patriotic Waggoner.

At the Retford County Court on Wednesday, Private John Durham, of the 2nd Battalion Lincolnshire Regiment, sued Mr. George Bingley, farmer, of Wheatley, for £11 10s wages said to be due.

It appeared that the plaintiff was hired by the defendant as a waggoner at £21 per year, and in January last he enlisted into the Lincolnshire Regiment. He asked defendant to pay him his wages from the previous May hiring, less a month's wages in lieu of notice, and £1 previously paid. The defendant refused to pay him anything, and now set up a counter-claim for loss said to be caused by the plaintiff leaving his service, as he was unable for fifteen days to get anyone to replace him.

Judge Masterman said that in ordinary times agricultural labourers were not entitled to their wages until the year was up, because the value of their services was much greater in summer than in winter. This, however, was not an ordinary case. The plaintiff was inspired with the patriotism which prevailed so generally throughout the country, and desired to serve the Queen. He thought he had acted particularly well in giving up a month's wages instead of notice. Under these circumstances the counter claim had failed, and the defendant would have to pay the amount claimed with costs.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended November 10, 1900, together with the quantities imported in the corresponding week of the previous year :—

	1899.	1900.		1899.	1900.

Carlisle Hirings —The half-yearly hirings at Carlisle were held on the 10th inst. There was almost as large an attendance of masters as of men. The former complain of the difficulty of getting suitable servants, even at high wages. Boys demand the wages of men, and then sometimes refuse to do a certain class of work, such as milking. Women were very scarce. Best men obtained £16 to £17 for the half-year; youths, £8 upwards. Many servants hold back for the second hirings, knowing they can command situations.

A singular spectac'e was witnessed in Warwickshire on Monday morning. Before sunrise a group of persons from all quarters gathered round the ancient mound on Knightlow Hill, near Dunchurch, and deposited what is known as "wroth silver" in the hollow of the cross. The money is payable to the Duke of Buccleuch for the privilege of using certain roads. The sums contributed by the parishes vary from 1d. to over 2s. The penalty of non-payment is 20s., or forfeiture of a white bull with red nose and ears.

THE GARDEN.

In a few districts potatoes are still in the ground growers having been unable to lift them owing to the weather. Already the price is beginning to rise, though many farmers are selling off what stock they have at a comparatively low rate before they go wrong. In London sound potatoes are now realising from 75s. to 95s. per ton, and already the Belgian and other foreign growers have commenced to send over supplies, this being considerably earlier than usual.

The moral of all this is that the indispensable tuber is bound to be both scarce and dear during the coming winter and spring. After Christmas, or thereabouts, we shall probably see a considerable advance in the price, and those who have any stock of sound "ware" will then be able to dispose of them in a very satisfactory manner.

Moreover, when the time comes the "new" potatoes will be wanted badly, and the earlier supplies will probably command good prices. My advice to all who have warm and sheltered land, suitable for the growth of early crops of this important subject, is to plant every bit of it in the best possible manner, with the earliest and best kinds, and on the earliest possible date. In naturally warm and early districts it will soon be time to commence operations now; the land must be cleaned and prepared in good time, and the seed—or as much of it as possible—should be laid out in some light and moderately warm place to sprout soon after Christmas, preferably in shallow boxes or trays, so as to avoid any breakage of the young shoots in removing them to the field or ground.

As regards varieties for early cropping there are none better, among the older kinds, than Sharpe's Victor (though this has the disadvantage (?) of yellow flesh), with the old Ashleaf Kidney and Early Regent and Beauty of Hebron for succession. I do not care for the quality of Early Regent, but it is a very heavy cropper, when well done, and on certain soils undoubtedly gives excellent results. Among the newer varieties Ninety-fold is one of the very best; it is of the kidney class, exceedingly early, and of superior quality, while it crops as heavily as many main crop potatoes. When the seed becomes a little cheaper this will probably be grown very largely. Another fine early potato is Harbinger, a white, round variety, something in the way of Early Regent, but a week or two earlier, and a capital cropper. Windsor Castle becomes fit to dig about the same time as Beauty of Hebron, and on some soils is nearly or quite as good as this well-known favourite.

A sowing of peas, for an early crop, may be made now, or as soon as the soil becomes in a proper condition to enable the seed to be got in well. This autumn sowing, however, is only advisable on comparatively light and warm soils, and a somewhat sheltered position is also advisable. In my experience English Wonder is the best variety for present sowing—that is if a dwarf kind is wanted—or Day's Sunrise and Gradus of the taller kinds. At the same time a few rows of a good broad bean may be got in.

The propagation of any of the "bush" fruits by means of cuttings should receive attention now. Almost any healthy pieces of the current season's growth if firmly inserted in a bed of light loamy soil at this season will strike root, and in due course form a plant, but the best cuttings are those with a slight "heel" of the older wood, and from a foot to 18in. or so in length. Pare the base of each quite smooth, remove any unripe or unsound tops, and also all eyes or buds, but the three topmost ones. Now cut one or more "nicks," 8in. to 10in. deep, in a bed of suitable soil, and place the cuttings therein, 4in. to 6in. apart, and burying them to about two-thirds of their length. Fill in with soil, and make this quite firm again. A sheltered and half-shaded position is best, and if the soil is at all heavy or damp place an inch of sand in the bottom of each "nick" for the bases of the cuttings to rest on. Both the red and white, as well as the black currants, and gooseberries, are easily propagated thus.

Bulbs of all kinds should have been planted by this time, also any of the hardy, spring-flowering subjects, such as Alyssum, Arabis, Silene, Daisies, and so forth. As soon as all the leaves are off the trees a general clear-up should take place, but do not burn the leaves, but place them in a heap in some odd corner to form that invaluable material, leaf-mould. Do not bury the leaves, as this hinders decay.

"A Reader of the MARK LANE EXPRESS writes:—"I think it only correct that you should give some short notices of the present Mayor for the agricultural town of Cowbridge, namely, Mr. Alderman Edward Johns, who I believe is a contributor to your paper. I may say very few men have identified themselves so much in defence of the farming interest as Mr. Johns has done for over thirty years. He is a successful corn and seed merchant, and he gave very important evidence before the Welsh Land Commission. Very few men in this county have done so much in taking part and reading papers at the farmers' clubs and county associations. He is a man fearless in defence of his opinions, and is respected generally by all classes. He was also Mayor of Cowbridge for 1890-91."

FARM PROSPECTS.

North Lincolnshire.

The rain is the one topic amongst the market folk, and the hindrance it has caused. I am glad to say that although the glass has fallen, yet to-day is very fine, and the threshing machines hum around me, which they have not done lately. The whole of the wheats are decidedly damp in the stack, and if not sprouted yet the bud in many cases has started under the skin, and thus the resulting flour is weak. Consequently old wheats have been called for, which are so dry that they in part counteract the moisture in the new. I sold three stacks of old for 30s., and could have made 31s.; but the machine had split it so, and I would not screen the half corns out. The new was a dragging trade at 27s. Barleys are poor, and if anyone makes 29s. or 30s. they are talked about; 25s. to 26s. is more general. Most of the

Wheat Sowing

on the lighter lands is finished, but I hear week after week that the strong land men cannot get theirs in. Poor beggars! I pity any farmers always, but clay farmers, oh! A very good turnip crop is getting the lambs on well, and mine and my neighbours' are healthy; the store cattle, too, enjoy cabbage *ad libitum*, a bumper crop, which I shall not be able to use. I got some horses into my neighbour's field by accident, so I told him to fetch ten loads of cabbages, and we are good friends again. Potatoes are being withheld for better prices; the crop is so small, and much disease. Alas, fifteen thousand tons of foreign came last week. I trust it will soon freeze, and stop them; then we will make the towns pay smartly! We will, if we can!—NORTH LINDSEY (November 16th).

Shropshire.

The mildness of the weather favours turnip carting and storing, but makes it unpleasant for the waggoners. Stocks go pretty comfortably on the pastures, thus saving a lot of keep. Where wheat has not been put in before farmers have to wait for fine weather, although the time of its coming seems uncertain. Feeding stuffs, although rather dear, are more in demand than formerly, both for dairy and feeding cattle, as they contributed both to the milking and feeding properties of cows, and, we may add, helps the selling as prime beef. It is well for farmers even in a busy time to record the working of the bulls and rams to get an approximate idea of the time of calving and lambing, which may be of advantage in the arrangement of keep and condition of sale.—J. G. (November 16th).

Somerset.

A deal of rain has fallen of late, and not before it was wanted, as the ponds had been dry for a considerable time, and water having had to be carried to the cattle, and the pastures had become very dry, causing a considerable shrinkage in the flow of milk at the dairies, but since the rain, with the present mild weather, considerable growth has taken place in the pastures, but the season is now too far advanced for such grass to be of much value. A good crop of mangolds have generally been stored, and the land which is usually ploughed for wheat is now too wet for the teams to proceed with at present. The procuring of the potato crop, which is generally good, is still being attended to, but many tubers now being taken up are diseased, consequently those who lift their crops early generally get the best result, in sound tubers. Apples are not a good crop, and the fruit is smaller than usual, consequently less cider will be made.—A. L. O. (November 16th).

Foreign Prospects.

FRANCE.—In the aggregate crop accounts are satisfactory, weather during the last few days having brought agricultural matters well forward.

BELGIUM.—Wet weather and mild temperature favours the crops, but does not stimulate the wheat market, which in Antwerp was not so favourable to sellers as in previous week.

HOLLAND.—With mild temperature and damp atmosphere farmers are satisfied with the present agricultural position.

SPAIN.—In many parts of the Peninsula the sowings are being effected with the utmost dispatch, and in Murcia at night by moonlight. The area under wheat this season in that province is very large.

GERMANY.—Weather mild and wet is not inimical to the autumn-sown crops.

HUNGARY.—Temperature continues mild for time of year. Wheat has dragged along at weakening prices, the result of good supplies and poor demand.

ITALY.—During the past ten days the weather has been favourable to agriculture. The rainfall was everywhere beneficial, particularly in Sicily, where for some time it had been so much desired, but in the upper provinces and in Calabria more is required. The sowing of wheat has terminated in te best conditions in the north of the Peninsula and in Emilia, and in many localities germination has already commenced. In the central and southern provinces sowing operations are still in progress under desirable atmospheric conditions.

RUSSIA.—The season seems to be mainly favourable to the autumn-sown crops. The rainfall in most parts of the country did not reach the normal quantity, being heaviest in some of the southern governments and Poland, while in other regions, and chiefly in the eastern governments, rain was completely wanting. The land is still free from snow.

ASIA MINOR.—Advices from Smyrna say the weather has been fine, dry, and fresher. Drought still prevails both here and in the interior, and farmers' complaints are becoming general as the autumn sowings are suspended.

UNITED STATES.—The *Cincinnati Price Current* says the wheat crop is mostly doing well, and marketing is very moderate in all districts. The situation generally favours the development of confidence in the trade. Maize is moving considerably east of the Mississippi and moderately to the west of that river, the cool weather helping the situation.—*Dornbusch.*

The Agricultural Labourer of To-day.*

Few things are more distressing to us country folk than the astonishing change which has come over the agricultural labouring classes in the last twenty or thirty years; their dislike to their hereditary vocation, and disinclination to live on the land. Nowadays they must all needs earn their livelihood in a town, or (young Hodge's highest aspiration) wear a seedy black coat and a made-up tie, and toil in some stifling office or shop for probably no better wage than he would have earned as a waggoner or shepherd. No one admits more readily than myself the evils which formerly were, and in some districts still are, mainly responsible for this state of affairs; evils for which, alas! the upper classes were far too accountable. Insanitary dwellings, insufficient wages and consequent insufficient food, a monotonous and dreary existence, to which intoxication on the vilest of liquors offered but too often the only palliative, were a combination not calculated to raise the agricultural population either morally or physically. But in all the above unhappy shortcomings, the lot of the agricultural labourer has been enormously improved of late years, and it was confidently asserted that the introduction of Schools Boards and consequent superior education would prove the panacea for all his further ills.

Well, Hodge has been educated for a quarter of a century, and what has been the result of his superior education? It can be summed up in one word—discontent. By this I do not mean the discontent of Socialism and Anarchism of continental countries, nor, thank God, do I think that will ever come in England, but general dissatisfaction with his lot and things in general. As Mr. Rudyard Kipling said of another member of society, he "knows too much and does too little." No doubt the English peasant *was* badly treated two generations ago, but so was Chummy the sweep, and Chips the carpenter, and Geordie the pitman, and I am afraid a great many other deserving people as well, including those who wield that weapon poetically reputed mightier than the sword. But all these gentlemen have participated in the blessings of superior education, and yet none of them have responded to the spur of learning in the way that Hodge has done; firstly, perhaps, because they live a little more in touch with the outer world; and, secondly, because the latter's education is totally beyond and outside either his requirements or his vocation.

Only last week out shooting, Joe, the son of the ploughman at the Moor Farm, was carrying my cartridge bag for me. I asked him what special work he was engaged in at school. "Oi be dra-a-in' a map o' H'orsetrier," he replied with diffidence. A map of Austria! for a country lad of fourteen, who has not yet learnt to guide a plough, nor even fork muck out of a cart. I should dearly like to see some proportion of the School Board rate in agricultural districts applied to instilling the rudiments of their hereditary handicrafts into such labourers' sons as have mastered the three R's. By this, I do not mean the endowment of institutions where young gentlemen in breeches and gaiters dabble in agricultural chemistry, but sound technical instruction in the elements of ploughing, draining, hedging, and ditching, and so forth; arts which their forefathers were content to practise, but which the present generation of countrymen have not only forgotten, but evince the greatest disinclination to learn.

It will probably be urged that it is undesirable, if not impossible, to make distinctions between classes in the matter of State-aided education, and that it is unfair to deny to any man the possible benefits derived from scholarship; but to this I would reply that, in the present overcrowded state of every profession, not one man in a thousand, be he shepherd or solicitor, can ever hope to attain to more than mediocrity. If it be in him to rise in the world, rise he will, education or no education, ample proof of which statement may be found among our modern aristocracy; but here, perhaps, I am trenching on delicate ground. Of one fact, however, I am convinced by experience, and that is that, out of the many agricultural labourers I have known in my life, the worst educated have usually been, not only the best craftsmen in their particular vocation, but also the steadiest and most respectable men.

* From "Pages from a Country Diary," in the November "Badminton Magazine."

THE WEATHER.

MONDAY (November 12th).—A complete change of weather was experienced, rain falling over nearly the whole country. A shallow [illegible] had appeared over Ireland, and was associated with a southerly wind, with a rapid rise of temperature. The early part of Sunday night was again cold in parts of England, and in Scotland the morning temperatures showed that the milder southerly current of air had not then spread over the entire kingdom. Rain fell during Sunday night at all the western stations, but the amounts were not generally large. The minimum temperatures were still rather low in the north, but in the southern and western districts the reading touched 50deg. The day was wet and unpleasant in London.

TUESDAY (November 13th).—Rainy and unsettled weather prevailed over the whole of our islands. A large cyclonic disturbance had its centre to the north of Scotland, and this was occasioning a moist and warm south-westerly current of air from the Atlantic. Rain was measured in the morning, as the result of the fall in the preceding twenty-four hours, all over the country, and at places in the north and east the fall was heavy. Temperatures were high for the time of year, and at several places in the south of England the thermometer remained above 50deg. [illegible] Monday night. In London the lowest temperature during Monday night was 52deg., which is 15deg. above the average, and is 4deg. higher than the average highest day reading in November.

WEDNESDAY (November 14th).—The weather was fine in most parts of England, but rain fell again at several places in Scotland and Ireland. Temperature fell briskly over England during Tuesday night, and the exposed thermometer indicated a frost in the Midland Counties. Rain was measured in the morning over the entire kingdom, as a result of the fall in the preceding twenty-four hours, but the amounts were not generally large. The cyclonic disturbance which had occasioned the unpleasant weather on Tuesday was moving away across the North Sea, and the barometer was recovering in England, where a light north-west wind was blowing. The day was mostly dull in London, and the highest temperature was 52deg.

THURSDAY (November 15th).—The weather was again very unsettled in all parts of our islands, and strong southerly winds, with rain, were experienced generally. A cyclonic disturbance had arrived from the Atlantic during Wednesday night, and its influence spread rapidly over the whole country. A gale was experienced at many places on our west coasts, and the rainfall was very heavy at the western stations, exceeding an inch in the twenty-four hours in the Hebrides. The temperature continued high, and the midday readings exceeded 50deg. in the south of England. In London it was raining almost throughout the day, and the air was very mild, the thermometer rising to 54deg.

FRIDAY (November 16th).—Rainy and very unsettled weather prevailed over our islands, and the temperature was generally rather lower than of late. Rain had fallen heavily in most parts of the country, and the amounts measured in the morning were further augmented during the day. North-easterly winds or gales were blowing in Scotland, and the winds were equally strong from the north-west in places on our south-west coasts and over the western portion of the Channel. In the afternoon the wind became easterly over the south of England, and the centre of the disturbance had moved to the north of France. The day was very wet in London, and the highest temperature was 49deg.

SATURDAY AND SUNDAY, November 17th and 18th.—During the two days was witnessed one of the few attempts at a winterly type of weather the country has experienced this season. The cyclonic area which crossed the south-western counties on Friday passed down into France next day, and the barometer rose more or less steadily all over Western Europe, anti-cyclones being on Sunday shown off our western coasts and over Scandinavia. Winds from a northerly quarter consequently became general, blowing rather briskly in most places, and on the east coast of England strong breezes to moderate gales were felt each day. With the change of wind the weather became much drier, only a few local showers being reported, while temperature declined everywhere, night frosts being registered in Scotland and Ireland, and only here and there did the afternoon maxima reached as high as fifty degrees.

Doncaster Hiring Statutes.—The annual statutes for the hiring of farm servants took place at Doncaster on Wednesday. Farm foremen received £22 to £24; seconders, £16 to £22; young men, £10 to £16. Female servants were scarce, and wages were high. Girls obtained £10 to £13; women, £14 to £20.

Malton Hiring Statutes.—The first of the three annual statute hirings at Malton was held on the 10th inst. There was a large attendance of male servants, but females were fewer than usual. Little hiring was done, and both men and women were firm in their demands. It is not anticipated that in this district there will be any great deficiency in the labour supply during the current Martinmas. The Corn Exchange was open but the attendance of female servants

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt: We have had a fair enquiry for new during the past week. Barley: Grinding steady. Malting fully as dear. Wheat: Firm. Oats: Slow. Maize: About 6d per qr. cheaper on the week. Flour: Unchanged.—NIXON, GOWER AND CO.

Mark Lane Wednesday.—English wheat remains in limited supply, but there is quite sufficient on hand to meet the views of buyers, prices being rather easier since last Monday. Flour occasionally rather lower, and granaries continue well stocked. The London Millers' Association made no change at this afternoon's meeting. Useful qualities of malting remain in support. Oats distinctly in holders' favour, and supplies moderate, with Government buying of late assisting the market at intervals. Flat maize in rather better supply, and barely so firm, at 21s ex ship; 22s to 22s 2d landed. Round corn firm.

Mark Lane, Friday.—Home-grown wheat slow and unaltered while in buyers' favour, and the country Exchanges still take what little supply offers. Fine white held for about 31s, and good red 30s, 63lb, delivered. Stocks of American descriptions remain heavy, but holders decline concessions in face of matters being generally unsettled at present, while quotations remain nominal. Flour was steady, but there was insufficient to test prices, while granaries continue well supplied. Top price, town made, 30s net. The London Millers' Association kept to last rates. Feeding barley steady. Persian, 17s 3d ex ship, 18s 9d ex quay; Azov, 18s 6d ex ship, 19s 3d ex granary. Supplies are restricted. Oats were well maintained. Maize is in better supply, but unchanged.

COUNTRY.

Ashford, Tuesday.—Not much trade doing, but prices generally pretty firm. Wheat was quite as dear as last week, but nothing was quoted above 31s. Barleys of malting quality were heavy and difficult to move, nothing making above 33s. Maize was firm, and quite as dear.

Aylesbury, Saturday.—Moderate attendance, and trade on the whole dull. Wheat 6d lower on the week. Best samples barley sold fairly well at fully 1s advance. Other grain unaltered.

Banbury, Thursday.—Wheat (white) (old), 29s to 31s per qr; wheat (red) (new), 26s to 28s 6d per qr; beans (new), 28s to 30s per qr; beans (old), 33s to 34s per qr; oats (new), 16s to 18s per qr; oats (old) (black), 21s to 22s per qr. Prices the same as last week; small supply of wheat.

Barnsley, Wednesday.—The market was quiet, and most kinds of grain sold at late rates. Best wheat, 10s 3d to 10s 9d per load of three bushels; black oats, 16s to 17s; white, 18s to 19s; barley, 23s to 28s per qr.

Birmingham, Thursday.—The market was generally quiet, English wheat being offered in limited quantities. Quotations ranged from 10s 6d to 11s per bag. In foreign wheats from 3d to 9d lower was accepted for common, and 3d more money was taken for best wheats. Kansas on spot quoted at 6s 0½d, Manitobas 6s 2d, and No. 1 Northern Duluths 6s 6d per cental (Liverpool). Flat maize was about 6d cheaper per qr, the price per cental at Liverpool being 4s 0½d, and at Bristol 20s 9d. Round maize unchanged at 23s 6d (on spot) (at Sharpness) and 23s to arrive, and Plate maize 4s 3d per cental (at Liverpool). Grinding barley 18s to 19s 6d (Sharpness); new English white oats scarce and making better prices, viz., 19s to 20s; old, 23s to 25s; and black oats, 17s 6d to 18s 6d. English beans 12s 3d for new and 14s 6d for old (at Birmingham).

Boston, Wednesday.—A small show of wheat, at last week's prices. Malting barley, 24s to 31; grinding barley, 22s 6d to 23s; oats, 16s to 19s; peas, 45s to 55s; beans, 25s to 29s; maize, 23s.

Brighton, Thursday.—New white wheat, 28s to 29s; new red ditto, 27s to 28s; barley, 29s to 33s; grinding ditto, 21s to 22s; oats, English, 17s to 21s; small maize, 27s to 28s; flat ditto, 20s to 21s. Barley and oats firm at last week's prices. Fair attendance.

Cambridge, Saturday.—During the week the wheat trade has been dull, but with the farmers very busy on the land we have had such small supplies that prices are the turn against the buyer. At the market to-day there was a small attendance, and very little grain on offer for this time of year. Wheat made the extreme prices of last week and barley was rather dearer. Red, 28s to 31s; and white, up to 31s per 504lb.

Canterbury, Saturday.—Wheat a trifle easier; barley slightly better; oats firm. Ruling prices:—White wheat, 30s to 32s 6d; red ditto, 29s to 32s; malting barley, 28s to 35s; grinding ditto, 21s to 24s; white oats, 18s to 21s; ditto black, 15s to 20s; peas, 30s to 33s; tick beans, 32s to 33s; mazagans, 27s to 29s; flat maize, 23s to 24s; round ditto, 27s to 28s per qr; winter tares, 6s to 7s per bushel.

Carlisle, Saturday.—Larger show of oats to-day, brisk trade at fully last week's prices. New oats, 17s 6d to 18s 6d, 336lbs; old, 23s 6d to 26s, 336lbs.—THOMAS ROBINSON.

Chester, Saturday.—There was a small trade passing in English grain, and wheat was quiet and unchanged. Oats were steady, and best samples 1d per bushel dearer. Indian corn 6d per sack lower. Quotations:—Wheat, white and red, 4s to 4s 2d per 75lb; grinding barley, 3s to 3s 6d per 64lb; beans, 4s 8d to 5s 6d per 80lb; oats, new, 2s 3d to 2s 6d; old, 3s 6d to 3s 9d per 46lb; Indian corn, 10s 6d to 10s 9d per 240lb.

Chichester, Wednesday.—There was only a small quantity of wheat on offer and with business quiet, prices were unchanged. A similar remark applies to feeding stuffs and flour.

Colchester, Saturday.—Wheat, very small supply, the full prices of last week were readily obtainable for all dry samples. Barley, very little offering for time of year, all qualities sold at fully late rates. Beans, peas, and oats few offering, prices favouring sellers.—FRANCIS AND CO.

Dorchester, Saturday.—Quiet trade for English wheat, prices rather easier. Foreign 6d. per quarter cheaper. Malting barley met a very dragging trade except for the finest lots, which were scarce. Grinding barley unchanged. Feeding stuffs firm.

Glasgow, Wednesday.—Wheat held for rather more money on the week, but met with very small demand. Flour dull and pressed for sale. Indian corn scarce, and held for 1½d per boll advance. Grinding beans steady. Canadian peas dull at a decline of 3d per boll. Foreign oats firm but unchanged; home steady. Barley and oatmeal firm. Bran and thirds quiet and unchanged.

Glasgow, Wednesday.—There was a small attendance at our Corn Exchange to-day. Wheat held for rather more money on the week, but meets with very small demand. Flour dull, and pressed for sale. Indian corn scarce, and held for 1½d per boll advance. Grinding beans steady. Canadian pease dull, at a decline of 3d per boll. Foreign oats firm, but unchanged; home steady. Oatmeal firm. Barley firm. Bran and thirds quiet, and unchanged.—GIBSON AND CLARK.

Hereford, Wednesday.—Small attendance; somewhat firmer feeling in English wheat trade. English barleys difficult to sell, except finest qualities. Oats, beans, and peas steady. Prices: Wheat, white, 3s 4d to 3s 6d per bushel; wheat, red, 3s 3d to 3s 5d; barley, 2s 9d to 3s 9d; oats, 2s to 3s; beans, 3s 8d to 4s; maize, 2s 8d to 3s 2d; vetches, winter, 4s to 6s; vetches, spring, 3s 6d to 5s.

Ipswich, Tuesday.—Small supply of wheat. Trade firm at fully last week's rates. Red, 28s to 30s; white, 31s. Moderate supply of barley; fine samples sold freely at from 33s to 36s. Other descriptions slow. Oats unaltered. Maize rather lower. Beans and peas steady.

Leeds, Tuesday.—The market proves rather disappointing to-day. Factors are asking higher prices, but meet with little response from buyers. Red wheats must be quoted 6d per qr. dearer; whites are about unchanged. Barley slow, only fine qualities being wanted. Maize the turn dearer. Beans and oats unaltered.—DUNNS AND CO.

Leeds, Friday.—There is a firm tendency for both English and foreign wheats, and Tuesday's advanced prices are fully maintained, the top quotations of the former being 31s and the latter 32s. Malting and grinding barleys, beans, peas, oats, maize, and flour quiet at late values.

Leicester, Saturday.—Good attendance of buyers and dealers, with fair supplies of home-grown wheats, but many of the samples were out of condition. Trade quiet, at 27s to 31s per 36 stones. Barley quiet; oats firm.

Lincoln, Friday.—Fair supply of English wheat, with a slow trade at last week's rates. Reds, 27s to 29s; whites, 28s to 29s. Foreign wheats quiet. A large show of barley, at prices from 27s to 32s. Oats dull, but firm. Maize, peas, and beans, no change.

Liverpool, Friday.—Wheat quiet with a moderate business at ½d to 1d under Tuesday's prices. Flour steady, but with only a quiet trade at last market day's prices for foreign. The Liverpool Millers' Association have reduced the minimum prices of bakers' 6d per sack. Maize—Mixed American is in brisk demand at 1d under last market day. European continues scarce, and has a retail trade at unchanged prices. Plate has a fair inquiry and firmly held without quotable change. Barley—A little more doing in malting, but unchanged. Feeding slow with prices favouring buyers. Beans are in better demand and occasionally dearer, owing to less pressure on quay. Peas are steady with only a moderate retail trade. Oats meet with only a moderate business at late rates for English. Foreign sorts meet an improved inquiry, and a moderate trade is passing, prices favouring sellers. Oatmeal steady, but slow at last Tuesday's prices. Oilcake firm with a fairly good demand, quotations being unaltered from last market day.—SEGAR AND TUNNICLIFFE.

Manchester, Thursday.—The tendency of prices this week has favoured the buyer. English wheat is practically unchanged, but American sorts are 1½d to 2d per cental lower. Flour can be bought at 6d per sack below last Thursday's rates. Indian corn is easier by 2d per cental on the past seven days. Beans, oats, and barley, however, are rather firmer, with a moderate demand.

Newark, Wednesday.—Wheat a firm trade, at previous prices. Barley, some enquiry for best qualities; inferior samples a dull sale. Oats and beans at the same prices as last week.

Newcastle-on-Tyne, Saturday.—This day's market was moderately attended. The trade in wheat closed quiet, and there were more sellers than buyers. Prices nominally unchanged. Flour slow, and only a consumptive demand. Malting barley flat, best samples simply being in request. Oats shaky and may tumble any day. Beans and peas not a fast sale.

Newcastle-on-Tyne, Saturday.—Wheat easier to make sales. Maize a better demand, and prices favoured sellers. Oats steady at late rates. Barley almost unsaleable, owing to condition. Beans and peas unaltered. Flour no change.—JOSEPH POLLARD AND CO.

Newport, Wednesday.—Wheat a dull sale; quiet and no change. Maize a poor trade, and 3d cheaper. Barley steady, quiet and unchanged. Oats quiet, and at late rates; fines 21s. Bran, £4 15s to £5; sharps scarce and dearer.

Northampton, Saturday.—Small market; supply and demand limited; condition not so good; prices lower than last week. White wheat, 29s to 30s; red, old, 28s to 30s; red, new, 26s to 28s; malting barley, 24s to 30s; grinding barley, 20s to 23s; oats, 17s to 24s; beans, 30s to 35s; peas, 26s to 36s; flour, 22s to 25s.

Norwich, Saturday.—There was only a very small supply of wheat on offer at our market to-day, with values unaltered. Not much business transacted with barley, for which prices remained nominally the same as last week. The weather of the past week has been quite of a November character, being constantly wet and damp hindering farmers in threshing. Wheat, red, 29s to 29s 6d per qr, weight 63lbs. per bushel imperial. Corn Inspector's return for the week ending 12th November, 1900:—Wheat, 1,441, 27s 2½d; barley, 12,385, 25s 9½d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat in less supply, and a fair trade at previous values. Fine barleys inquired for, and full values maintained. Inferior lots slow of sale. Oats but few offering, and prices in sellers' favour. Poor show of beans and values supported.—ROBERT HUBBLE.

Oxford, Saturday.—Wheat small supply, slow trade at 6d less than last week. Barley, not many farmers offering. Slow trade for all but best qualities.

Peterborough, Saturday.—There is no change to note in the wheat trade, demand to-day was not active, but last week's prices were made. Barley firm for June parcels, others less pressed for sale. Oats the turn in sellers' favour.—THOMAS HILL AND SON.

Plymouth, Thursday.—There was an average attendance at our Corn Exchange to-day. Business was very moderate, and prices of wheat have declined 6d. Maize holds firm. Barley and oats firm at last week's prices.—ORLANDO DAVIS AND CO.

Reading, Saturday.—We had a large attendance to-day, but trade was unusually dull. The wheat supply was below the average, but there was little inquiry, and where sales took place recent quotations were realised. Barley was in average supply and sold at last week's figures. Oats and other cereals changed hands at unaltered currencies.

Ripon, Thursday.—Owing to the wet weather little thrashing has been done, consequently there is a light show of local grain, and business is dull. Wheat, English, new, 27s to 29s; ditto old, 31s; ditto foreign, 30s 6d to 31s 6d; barley, malting, 24s to 28s; ditto, grinding, 21s to 23s; oats, old, 25s to 26s; ditto new, 17s to 19s; maize, round, 24s to 27s; ditto flat, 23s 6d per qr; beans, old, 1s per stone.

Romford, Wednesday. Wheat trade slow at last week's prices. Only a small supply. Red wheat made 28s to 29s 6d, and white wheat 29s to 31s 6d per quarter.

St. Neots, Thursday.—A small attendance and a poor show of all kinds of grain. Rather a slow demand both for wheat and malting barley, without any malterial alteration in prices. Oats and beans firm in value.—ELLIOTT AND SON.

Salisbury, Tuesday.—There was a large attendance of buyers at the Corn Exchange to-day, and, with a good supply of grain, trade was fairly brisk throughout. Little change, if any, in prices obtained last week. Black oats were the turn dearer. Quotations: Wheat, 26s to 32s; barley, 26s to 37s; oats, black, 16s to 29s; ditto white 18s to 23s; beans, 32s to 36s.

Sheffield, Tuesday.—A little better attendance. Good English and foreign in better demand at 6d per qr advance. A slow trade in feeding stuffs at unaltered prices. Malt and barley slow trade at rather less money. Wheat, white, 32s to 33s; red, 31s to 32s; new, 30s to 31s per 504lb; oats, old white, 26s; ditto, new white, 17s 6d to 19s; ditto old black, 22s; ditto new black, 16s to 17s per 336lb; peas, grinding, 32s to 34s; ditto blue, 53s to 70s per 504lb; beans, Egyptian, 33s; ditto, English (new), 31s 6d to 32s per 432lb; barley, grinding 23s 6d to 24s 6d; ditto malting, 27s to 35s per 448lb; Indian corn, small old, 29s to 30s; ditto American mixed, 23s 6d to 24s per 480lb.

Spalding, Tuesday.—Wheat to-day was 3d to 6d dearer, making 27s to 27s 6d per qr. with a good trade. Oats were a firm trade at 17s to 18s per qr. Barley firm and unchanged. Beans, peas, and other articles firm at late rates.

Stockton, Wednesday.—A fair quantity of farmer's wheat showing, which made last week's prices. The foreign wheat trade during the week has kept fairly steady, with a better demand for miller's, but prices show no change excepting strong red wheats, which were 6d dearer. Oats and maize unchanged. Only a moderate show of malting barley, prices exhibiting a downward tendency.

Sunderland, Saturday.—Few samples of grain on offer. Wheat steady at late rates. Barley dull. Oats unchanged in value. Arrivals coastwise, barley, 885 qrs; oats, 459 qrs; peas, 600 qrs; foreign nil.—E. AND F. RICHARDSON.

Taunton, Saturday.—Wheat slow supply at 6d per qr reduction on the week. Malting barley quiet, and little business doing except for best qualities. Feeding stuffs dull.

Wakefield, Friday. — The decline in America has depressed the option market, but actual wheat has continued to rule firm. Foreign limits are practically unaltered, and generally above the parity of values on this side, rendering fresh business exceedingly difficult; spot prices are unchanged on the week. The trade in malting barley shows no improvement. Maize, beans, and oats slow.—DUNNS AND CO.

Wakefield, Friday.—We have a slightly improved demand for wheat to-day, at last week's prices. Barley is in large supply, and meets with but little demand, except for best quality, which sells slowly at about former quotations. No alteration in oats or beans.—MICHAEL SANDERSON AND SON, LIMITED.

Winchester, Saturday.—Wheat in short supply, which met a firm trade at fully last week's prices. Good demand for best quality barleys, inferior difficult to quit. Oats in fair request at late rates. Maize unaltered. Flour, 24s to 25s, with more inquiry.—FEAR, COLEBROOK, AND CO., LD.

Wisbech, Saturday.—Small supply of grain. Wheat a slow trade at barely late rates; red, 28s; white, 28s 6d; old, 29s. Oats 6d dearer, 17s 6d to 19s. Barley, little offering.—JAMES FLETCHER.

Wolverhampton, Wednesday.—There was a fairly good attendance, but trade was quiet at last week's rates. Wheat kept quiet. English wheat, new, 12s to 12s 6d; old wheat, 13s per 216lb; oats, old, 15s to 16s; ditto new, 11s to 11s 6d; beans, old, 14s 6d to 15s 6d; ditto, new, 12s 3d to 13s per 196lb; maize, 23s 6d to 24s 6d per 480lb.

Worcester, Saturday.—Quiet market all round. A slow demand for wheat, which sold mainly at previous rates. Maize was 6d cheaper, and barley favoured buyers. Oats dull, but firm.

Worksop, Wednesday.—Fair attendance, but small show of grain. Wheat was about 6d per qr dearer. Barley was a slow trade and dear, only very best samples being saleable. Oats scarce and dear. White wheat, old, 31s to 32s 6d; red ditto, old, 30s to 31s 6d; white ditto, new, 28s to 29s; red ditto, new, 27s to 28s 6d; best malting barley, 31s to 33s; secondary, 28s to 29s; grinding, 23s to 25s; old white oats, 25s to 27s 6d; old black ditto, 24s to 25s; new white, 18s to 20s; new black, 17s to 18s; flat maize, 24s to 25s; round ditto, 28s to 29s per qr.

York, Saturday.—Large attendance, but small offer of grain. White wheat, 28s to 29s; and red and mixed, 27s to 28s per quarter of 36 stone. Barley in moderate offer, and prices firm except for inferior sorts, which were a shade lower. Oats very small display, but maintain late rates. Beans and rye also realised late rates. The average prices of grain for the week, according to the official corn return, have been: Wheat, 27s; barley, 23s 7d; and oats, 17s 1d per quarter.

FOREIGN.

The Antwerp wheat market has been pretty well maintained, with a steady current of business. Wheat sowing has been completed under favourable conditions in France, and the young wheats are coming up well in some districts. Wheat quotations have shown little improvement upon the French country markets, although farmers have continued to restrict their deliveries. Millers contend that the low price of flour and the difficulty which they experience in disposing of their production absolutely prohibit any advance in wheat prices, but farmers reply that the situation will be generally unchanged until the large millers have succeeded in accumulating sufficient stocks of wheat to carry them through the winter and spring. The Lille wheat market has been pretty well maintained, but business has at the same time shown no great activity. At Paris holders of wheat have stood out for an advance of 2½d per quintal, and, upon the whole, a better tendency has prevailed. Flour for consumption has made fully former rates in the French capital. Disposable wheat has remained without change at Konigsberg and Dantzic. Advices from Odessa state that a good deal of rain has fallen in Southern Russia, and that the newly sown wheats which have suffered from drought have now come up well. The quantity of wheat now en route for Europe is returned at 1,120,000 qrs as compared with 1,310,000 qrs at the corresponding date of 1899. The total of 1,120,000 qrs. representing the quantity of wheat en route for the Continent, is made up as follows:—France, 170,000 qrs; Belgium, 310,000 qrs; Holland, 220,000 qrs; Germany and the North, 140,000 qrs; and Italy, Spain, etc., 280,000 qrs.

Hamburgh, Saturday.—Market quiet, the demand for foreign bread and feeding stuff being curtailed by mild weather and plenty of fruit and potatoes. The imports during the past two weeks amounted to:—8,683 tons wheat, 3,172 tons rye, 7,970 tons barley, 20,681 tons maize. There is but little demand for wheat, on the other hand, farmers offer sparingly, and our millers have to pay full prices. Fine dry Holstein, Mecklenburg, and Saale is held at 27s 6d to 28s; common Holstein, at 25s 6d to 26s 3d per 504lb f.o.b.; hard winter No. 2 and River Plate is offering at 28s 9d to 29s 6d per 480lb. Rye firm. 9 15-20 South Russian, prompt, 22s 3d; 9 20-25 April-May, 22s 6d per 480 lb, c.i.f. Hamburg. There is a demand for good malting barley for prompt and spring delivery, brewers wanting to buy good Bohemian and Saale at 30s to 33s, but offers at these prices are scarce. We quote good Saale, 31s to 32s 6d; fine quality, 34s to 37s 6d; good Bohemian, 34s to 35s; Mecklenburg, 27s to 30s; Holstein, 25s 6d to 26s 6d per 448 lb f.o.b. 60-61 Ko Russian feeding barley is offering at 17s 9d to 18s per 400 lb c.i.f. Hamburg. Mixed maize meets a slow sale, but arrivals being moderate prices are not materially lower. Prompt shipments are held at 20s 3d; February-March at 19s per 480 lb c.i.f. Hamburg.—JOHN TAYLOCK.

CORN STATISTICS.

POULTRY AND PROVISIONS.

Smithfield, Saturday.—Heavy supplies this morning and bad weather helped to make trade very quiet. Calves are Yorkshire, 2s 3d to 2s 9d; Essex, 2s 6d to 3s; Welsh, 1s 9d to 2s; Surrey, 3s to 3s 6d; Boston 2s to 2s 6d; Irish, 1s 6d to 1s 9d; Sussex 2s 6d to 3s; turkeys (cocks) 6d to 7d; hen ditto, 6d to 8d; capons ditto, 2s 3d to 2s 6d; Bordeaux pigeons, 8d to 10d; feathered, 7d to 9d; wild rabbits, 10d to 1s; tame, 6d to 8d each; Australian 7s 6d to 8s 6d per dozen; pheasants, 2s 6d to 4s; young partridges, 3s to 3s 6d; old, 2s; young grouse, 3s 9d to 4s 9d; old, 3s 6d per brace; hares, 3s to 3s 3d; leverets, 1s 9d to 2s 6d; wild ducks, 2s; widgeon 1s 6d; teal, 10d to 1s; pintail, 1s 6d; snipe, 6d to 10d; woodcock, 2s 6d to 3s; golden plover, 8d to 10d; black, 6d each.

Liverpool, Saturday.—Bacon: The market has ruled firm all week and with more general demand prices are well maintained, and on some cuts an advance is obtained. We quote, to-day, choice Cumberland cut, 20lb to 22lb, 48s to 51s; 26lb to 30lb, 46s to 48s 6d; 31lb to 38lb, 42s to 45s; long middles, rib in, 18lb to 22lb, 50s to 54s; clear bellies, 14lb to 16lb, 55s to 56s; 18lb to 20lb 54s to 55s; Staffordshire (lean on), 35lb to 40lb, and Birmingham cut, 33lb to 38lb, 42s to 48s; clear Staffords (lean off), 40lb to 44lb, and Yorkshire cut, 40lb to 45lb, 44s to 46s; singed Wiltshire, Canadian, 45lb to 55lb, 50s to 55s; American, 40lb to 50lb, 43s to 48s; short clear backs, 12lb to 16lb, 44s to 46s; 16lb to 20lb, 42s 6d to 44s 6d; fat backs (export), 35s to 39s; long clear middles, 35lb to 40lb, 45s 6d to 46s; 40lb to 45lb, 44s 6d to 45s 6d; short clear middles, 45lb to 50lb, 40s to 40s 6d; short middles (rib in), 18lb to 23lb, 47s to 49s; shoulders, square cut, 12lb to 14lb, 34s 6d to 39s; 14lb to 16lb, 33s 6d to 38s 6d; New York cut, 11lb to 13lb, 36s to 38s per cwt. Hams are in good request at somewhat higher values. We quote choice long cut, 8lb to 12lb, 46s to 52s; 14lb to 16lb, 44s 6d to 50s; short cut and A.C., 10lb to 12lb, 46s to 51s; 12lb to 14lb, 45s 6d to 50s; 14lb to 16lb, 43s 6d to 49s per cwt. Lard is dearer in sympathy with higher cables; demand is fair. We quote pails and kegs, 39s to 40s; prime Western (in tierces), 38s to 39s per cwt. Beef exhibits no new feature. We quote extra India mess 68s 9d to 72s 6d; Plate and Packet, 63s to 68s 3d per 304lb. Pork dull and unaltered on the We quote finest prime mess, 68s to 72s 6d per 200lb. Cheese.—The trade is still disappointing, but with holders pressing sales at reduced prices there has been rather more business passing, chiefly confined, however, to early make ready summers, which are very plentiful and freely offered. We quote finest Canadian, coloured, September, 53s to 54s; white, 52s 6d to 53s; finest States, coloured, 52s 6d to 53s 6d; white, 51s to 52s; summer cheese, ripe and ready, 46s 6d to 50s; lower grades, skims, and half-meats nominally quoted 18s to 32s per cwt. Butter rules quiet and easier; the inquiry is restricted. We quote, fancy Canadian creamery, in boxes, 100s to 103s; second quality (no inquiry), 90s to 93s; finest States (nominal), 88s to 94s; finest ladles and imitation creamery, 75s to 82s; finest Danish, 108s to 111s; Australian, 100s to 108s; Irish creamery, 106s to 109s; Cork firsts, 98s; seconds, 84s; thirds, 78s per cwt.—HODGSON BROTHERS.

Newport, Wednesday.—Good attendance, average supply, everything cleared. Quotations:—Cheese: Somersets, farmers' dairies, 62s to 64s; doubles, 58s to 60s; Cheddars, 56s to 60s; truckles, 56s to 63s.

HOPS.

Canterbury, Saturday.—There have been some big transactions during the past week, and the market is very firm. Brewers' purchases have thus far been below average, but the small remaining stocks are held with great confidence.

Worcester, Saturday.—A very small attendance, and it is evident that only few new hops remain unsold. A good inquiry prevails for both new and yearling Worcesters, and holders are very firm in their demands. During the week 441 pockets of new hops passed the scales, but none were weighed to day.

Worcester, Saturday.—Trade on our market has been quieter this week, and only one or two lots of hops were offered at our market to-day. Prices remain very firm, growers not being disposed to give way for the hops they have left; 441 pockets have passed the public scales during the week, making a total of 16,029 weighed up to date. PIERCE AND CO.

MANURES.

Liverpool, Friday.—The continuous wet weather somewhat retards the application of basic slag to the land, and the demand in consequence is not so active as is usual at this period; a few fine days would day the sudden condition of the land, and doubtless cause a pressure of orders and delays in deliveries, which could be obviated by buyers now entering their supplies. Prices are unchanged, and quotations for the respective tests are annexed. Feeding stuffs continue firm, and holders are rather less firm in their demands, although prices in America are without change. Values in this port are as per annexed, and, comparatively speaking, palm nut cake appears to be exceptionally good value. Nitrate of soda, best quality, i.e., guaranteed 95 per cent., pure, in bags, £8 7s 6d to £8 10s per ton; East India bone meal, in bags, £4 10s per ton; kainit, prime 25 per cent., in bags, £2 7s 6d to £2 10s per ton; prime mixed cake, prime, in bags, £5 5s to £5 7s 6d per ton; linseed cake, Anglo on the spot, prime, in bags, £7 17s 6d to £8 per ton; linseed cake, English, prime, in bulk, £8 17s 6d to £9 2s 6d per ton; linseed cake, foreign, round, prime, spot and early, in bags, £8 12s 6d to £8 15s per ton; cottonseed cake, decorticated, prime, in bags, £6 17s 6d to £7 per ton; cottonseed cake, English, decorticated, prime, very scarce, in bags, £7 7s 6d to £7 10s per ton; cottonseed cake, English, undecorticated, prime, in bulk, £4 18s 6d to £5 3s per ton; cottonseed cake crushed, 20 to 25 per cent. oil, prime, in bags, £7 5s per ton; maize germ meal, English, prime, in bags, £5 5s to £5 7s 6d per ton; maize germ meal, Hungarian, prime, in bags, £4 12s 6d to £4 15s per ton. In bone meal, grocery, fine grinding, prime, in bulk, 11s to 11s 9d per 240lb; linseed, fine meal or dust, in bags, £5 5s per ton; 41 per cent. N linseed, new crop, for spring sowing, in bags, per cent. DNS superphosphate of lime, guaranteed 30 to 32 per cent. nominal; DNS Basic superphosphate of lime, guaranteed 30 to 34 per cent. in bags, nominal; DNS Basic superphosphate of lime, guaranteed 35 to 36 per cent. in bags, basic slag, prime quality, guaranteed 35 to 40 per cent. phos., in bags, £1 11s to £1 12s 6d per ton; basic slag, prime quality, guaranteed 35 to 40 per cent. phos., in bags, £1 13s 6d to £1 14s per ton; basic slag, finest quality, guaranteed 38 to 45 per cent. phos., in bags, £1 16s to £1 17s 6d per ton, at the purchasing depots. H. DAVIES LANGTON AND CO.

Winsford Cheshire, Saturday.—Common grass salt 4s 6d per ton; common white salt 11s per ton; packed 8s 6d per ton; fine white salt 14s per ton. DICKINSON LIMITED.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The weather has been too wet for field wor , and threshings have equally been prohibited. A high temperature (six degrees above the mean for mid-November) has reduced food wants, whether of men or of cattle, and the course of the markets has been what we have to expect when supplies are heavy and demand small. Farmers have not themselves to blame this season for the dull trade and lower prices, as they have been singularly moderate in their market deliveries.

It is reckoned that from September 1 to November 17 they put only 1,284,000 qrs. of English wheat on sale against 1,636,000 qrs. brought to market in the same period of 1899. The corrected returns of October imports, with flour reduced to its equivalent in wheat, are now officially issued, and show that the foreigner and the importer must share between them all the responsibility of an overstocked market. The following is a comparison between October, 1900, and October, 1899, in all the chief items of the trade, and the situation is much elucidated thereby : —

	Oct., 1900.		Oct., 1899.
Atlantic ports	1,362,773	.....	1,276,180
Pacific ,,	206,760	.....	196,990
Russian ,,	153,907	.....	44,217
Indian ,,	70	.....	146,907
German ,,	131,280	.....	53,626
Danubian ,,	93,010	.....	1,167
Australian,,	95,875	.....	67,457
Argentine ,,	265,650	.....	227,127
All other ,,	49,270	.....	34,813
	2,358,633	.....	2,048,464

The items which show increase are receipts from Atlantic, Pacific, Russian, German, Danubian, Australian, and Argentine ports, and seven increased items completely swamp the influence of Indian abstention from shipping. The German wheat has been the chief surprise of the recent markets. It is offered at 29s. to 30s., and finds a brisk sale. The Germans import 5,000,000 qrs. of wheat every year, and it is therefore a curious transaction this incurring two freights, one of the German wheat to London and Hull, the other of the American and Argentine wheat to Hamburg to replace the grain sent out of the country.

The imports of breadstuffs continue to exceed such spot requirements as the sales of farmers' wheat leave to be satisfied. The figures of the past seven days indicate an appreciable increase of granary stocks :—

	Qrs.
English wheat sales	94,000
Foreign ,, ,,	416,000
,, flour ,,	174,000
Total ,,	684,000
,, wants	567,000
Surplus	117,000
Stocks, November 10	3,008,000
,, 17	3,125,000

Wheat on passage on the last-named date was not a large total, or the effect on the markets for the last ten days of November might be expected to be very depressing. The following quantities are at present afloat.

	Qrs.
Californian	895,000
North American	210,000
South American	200,000
Russian	90,000
All Other Countries	250,000
Nov. 17, 1900	1,645,000
,, ,, 1899	1,570,000
,, ,, 1898	1,170,000
,, ,, 1897	2,030,000

Of these there are now 436,000 sacks on passage as compared with 390,000 sacks a year ago, and 380,000 sacks two years since.

The imports of spring corn have been :—

	Barley. Qrs.		Oats. Qrs.		Maize. Qrs.
Sept. 1—Nov. 10	1,910,000	..	1,532,000	..	2,180,000
Nov. 10—Nov. 17	209,000	..	134,000	..	159,000
Total	2,119,000	..	1,666,000	..	2,339,000

The receipts of maize have been rather smaller than usual, while those of barley, though smaller than in 1898, have considerably surpassed the total received in 1899. Imports of oats have been decidedly heavy. This is due, a good deal, to the fierce competition of America and Russia for the English market. Horse owners profit, but farmers who grow oats for sale off the farm are not at all favoured by this keen contest, as it results in keeping even 320 lb. sorts below 16s. per qr. The "moral" of the oat trade certainly is to grow heavy oats and to spend freely on pedigree and special seed. Anything weighing 336 lb. is saleable at 18s. to 20s., and special weight above 336lb. commands specially enhanced value. There is no reason that New Zealand should be able to put samples weighing 384 lb. on our market without finding an English sample to match them.

Quantities of spring corn on passage are as follows :—

	Maize. Qrs.		Barley. Qrs.		Beans. Qrs.
1900	680,000	....	520,000	....	22,000
1899	1,160,000	....	680,000	....	7,000
1898	645,000	....	540,000	....	14,000
1897	370,000	....	690,000	....	15,000

The American Government announce that the yield of maize for the year is 25·3 bushels per acre against 25·3 bushels last year, 24·7 in 1898, and a ten years' average of 24 bushels. America, therefore, has had three good maize crops in succession

The States most favoured this year have been Ohio, Indiana, Illinois, Iowa, Missouri, and Nebraska ; while Kansas, Texas, and the Old Confederacy have not done nearly so well. Maize seems to yield best as near the frost line as one dares sow it. Canada produces some very excellent corn of a fine small type and a pale colour. The plant known is by its nature sub-tropical. We never get any returns from Mexico, but there is a large production of maize in that country, and, if the present half-civilised state of that region is ever replaced by American rule, we may soon see a big export surplus produced.

Rye at our markets is now offered at a slight decline. The shipments last week included 185,000qrs from Russia, 22,000qrs. from Roumania, and 1,000qrs. from the United States. Malt is a steady trade at 36s. to 40s. for most samples of English, and at 36s. for good Californian. The Smyrna malt is of very fair quality indeed, and sells well. The curious "locust beans," which belong botanically to a very different order from the true bean, are now an article of regular use and sale at all our biggest markets. About 115s. per ton is paid for the meal made from them. Dari is growing in favour ; it is a small grain, which is suited to pigeons and young poultry, at the same time that bigger animals do not disdain it, and the feeding value is comparatively high. Its weight is that of the Government quarter, 480lb., and the three chief sorts come from India, Smyrna, and Syria There are occasional consignments from America and from North Africa. About 25s. per qr. is the mean price. London imports of linseed, rapeseed, and cotton-seed have been liberal, and though the difficulty of landing the cargoes keeps up value for any supplies which can be delivered within forty-eight hours of signing the contract, prices for a fairly near future, say the end of the present month, are decidedly lower all along the line. The week's receipts include the following special consignments :—50 qrs. of poppyseed, 350 qrs. of millet, 40 qrs. of mawseed, 200 qrs. of sunflower seed, and 280 qrs. of canaryseed.

THE BALTIC.

The sales of wheat cargoes have been very difficult to effect, even at a slight decline. Nevertheless the following transactions have taken place :—Californian, 30s. 6d., nearly due, and 31s. for December shipment ; No. 2 Red Winter, 29s., on passage ; No. 2 Hard Winter, 28s., on passage ; No 1 Northern, 31s. 3d., on passage ; and Argentine, 29s., February shipment.

Maize has been a poor trade, for cargoes for 1901 shipment are depressed owing to the good new crop in America, and those near at hand are not bought because delivery can only be promised at ports other than London. Sales have been : Mixed American, 19s. for December shipment ; Argentine, 21s , due ; and Roumanian, 19s. 3d. for April shipment.

Barley is 6d. cheaper for brewing cargoes, but firm for feeding kinds. Sales include Californian at 26s., Odessa at 18s. 3d., Persian at 17s., Novovossisk at 18s. 6d., and good new South Russian, 408lb., at 20s. per qr. Other sales of cargoes embrace Canadian white oats at 14s. 9d., Azoff rye at 23s. 9d., Canadian peas at 27s. 6d., Argentine linseed at 45s., Guzerat rapeseed at 51s. 6d., and Bombay poppyseed at 47s. 6d., all per qr.

The arrivals of grain and seed laden vessels at ports-of-call for the week were 3 wheat (2 Portland (O.), 1 San Francisco) ; 1 locust beans (Tavira) ; total, 4.

The sailings of grain and seed-laden vessels from ports-of-call for the week were :—4 wheat (1 Birkenhead, 1 Cardiff, 1 Hull, 1 Waterford) ; total, 4.

Since January 1, 1900, the total arrivals have been :—304 wheat, 14 wheat and barley, 1 wheat and pease, 7 flour, 12 maize, 1 maize and oats, 26 barley, 19 beans, 10 locust beans, 1 pease, 1 linseed, 5 canaryseed, 2 fenugreek seed, 5 valonea ; total, 408.

Last year, during the same time, the arrivals were :—257 wheat, 10 flour, 4 maize, 7 barley, 1 barley and beans, 1 rye, barley, and oats, 10 beans, 2 locust beans, 6 linseed, 6 canaryseed, and 7 valonea ; total, 311.

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

The touch of cold weather helped the market a little, but prices were not in sellers' favour. Some fine English, weighing 64lb., was on offer at 31s., while chicken wheat, 58lb. to the bushel, was sold for 27s. per quarter. Foreign wheat was the turn in buyers' favour. North German fetched 29s. to 30s. Some really good wheat from La Plata was on offer at 31s. 6d., with buyers at 3d. less. The demand for American sorts at 31s. to 34s. left a good deal to desire. Maize was not much altered. Some white corn from America was offered at 21s. 6d. ex granary, and found buyers. Too much damaged maize, mainly from La Plata, was on offer. It affects the whole market in an adverse manner. Round corn and good flat maize were quite as dear as formerly. Barley was steady in price and demand. Vologda oats at 14s. to 14s. 9d. soild fairly well, as did White Sea oats at 14s. 3d. to 14s. 6d. per quarter. Fine, heavy New Zealand were in request at currencies. Some English buckwheat made 27s. 6d. per quarter. Pure crushed linseed was offered at £16 per ton.

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

AS THE DAY WORE ON IT WAS SELLERS MORE THAN BUYERS WHO EXHIBITED AN ANXIETY TO DO BUSINESS, SO THAT THE MARKET CLOSED WITH A WEAKER FEELING THAN MARKED ITS EARLIER COURSE.

THE FLOUR TRADE.

MARK LANE, Nov. 19th.

The demand for town whites and households was disappointing, buyers want to see if the frostier air continues to prevail. Country flour was in fairly good supply, and was offered at 6d. decline. American sorts were often quoted 6d. lower, but so many kinds are quoted that a perfectly uniform quotation is impossible. American "patents" to-day are making 25s. to 25s. 3d. for Morrison's Superlative, 25s. 3d. to 25s. 6d. for Washburn's Superlative, 25s. 6d. to 25s. 9d. for Gold Medal, and 25s. 9d. to 26s. for Star. The good serviceable second grades are realising 18s. to 18s. 3d. for Manhattan, 18s. 3d. to 18s. 6d. for Gilt Edge, 18s. 6d. to 18s. 9o. for Improved Straight, 18s. 9d. to 19s. for Princess Royal, 19s. to 19s. 8d. for Iron Duke, and 19s. 3d. to 19s. 6d. for Palisade. The fine Kansas flour sold as "Crosby's" makes 23s. when marked with three A's, 22s. with two A's, and 21s. with one A. The fine French known as Renaux' AA makes 24s., but common French flour is a drug on the market.

LONDON TERM MARKET.

This market is held twice a day, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made :—

WHEAT.—		Nov.	Dec.	March.
		s. d.	s. d.	s. d.
Nov. 12	11 a.m.	6 8	6 9	6 11
	4 p.m.	6 8	6 9	6 11
Nov. 13	11 a.m.	6 7	6 8	6 11
	4 p.m.	6 7	6 8	6 10
Nov. 14	11 a.m.	6 7	6 8	6 10
	4 p.m.	6 7	6 8	6 10
Nov. 15	11 a.m.	6 7	6 8	6 10
	4 p.m.	6 7	6 8	6 9
Nov. 16	11 a.m.	6 7	6 8	6 9
	4 p.m.	6 7	6 8	6 9
Nov. 17	11 a.m.	6 7	6 8	6 9
To-day	11 a.m.	6 6	6 6	6 8

The deposit required from members of the Term Market has been fixed at £50 *minimum* and 1s. per quarter margin on any purchases above 1,000 quarters.

A few sales for June delivery were effected at 6s. 8d. per cental.

Maize made 4s. 2d. for December and 3s. 11d. for March delivery.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

The Term Market (while the "Baltic" is rebuilding) is temporarily situated at the Great Eastern Hotel, No. 190, Bishopsgate Street, ground floor.

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough High-street, London, S.E., report : There is more inquiry for most descriptions of hops, and several of the few remaining large lots have changed hands. Stocks are now getting into a very small compass.

GRAIN AND FLOUR FACTORS' REPORTS.

The trade remains in a very lethargic condition, and buyers are cautious. Sellers of milling offals have to give way from the recent top prices, and bran is 2s. 6d. lower ; also fine middlings are offering at less money. With the lighterage question still unsettled business is impossible for steamer lots.—RICHARD DOGGETT, Mark Lane.

Wheat.—More inquiry at a decline of 3d. and 6d. per qr. Flour a slow trade at rather less money. Maize 6d. per qr. lower. Barley and oats unchanged in value.—COVENTRY, Mark Lane.

Flour.—A slow trade at 3d. decline on the week. —T. S. MEDILL, Mark Lane.

Our market continues in a quiescent state, and presents no feature of interest. New England red clover is very sparingly offered and scarcely any fine samples appear. The finest seed this year seems likely to come from South Germany. American red is firm on the other side, but the quality does not tempt our buyers. White clover, alsike, and trefoil are without quotable change. Ryegrasses are quiet. Spring tares are held above buyers' views. Birdseeds unchanged. J. PICARD AND CO., Mark Lane.

The arrivals of wheat into London have again been in excess of requirements, and prices have declined 3d. to 6d. on the week. At the close of the market, however, rather better demand was found. Maize and barley quiet, unchanged, but steady trade. American 3d. dearer, but the strike interferes with the working.—W. P. WOOD AND CO., Mark Lane.

Offals : Though the weather has become colder, there is no perceptible improvement in the demand. Broad brans are firm, while for smaller brans some quotations are even below the point previously reached.—GREENHILL BROS., Belfast, November 17.

Flour.—The market continues dull and depressed by heavy arrivals and easier American market reports. Grain.—Indian corn more plentiful on spot, and 1½d. per boll cheaper. Beans, with large arrivals, are dull. Oats in good demand, at unchanged prices. Barley 1½d. to 3d. per boll lower. Other feeding stuffs unaltered. Mills stuffs.—Bran and thirds in fairly good demand at steady prices.—MCKINNON AND MCDONALD, Glasgow, November 17.

Wheat quiet, with a moderate extent of business at ½d to 1d per cental under Tuesday's prices. Flour steady, but with only a quiet trade at last market day's prices for foreign. The Liverpool Millers' Association have reduced the minimum prices of bakers 6d per sack. Maize : Mixed American is in brisk demand at 1d per cental under last market day. European continues scarce, and has a retail trade at unchanged prices. Plate has a fair inquiry and firmly held without quotable change. Barley : A little more doing in malting, but unchanged. Feeding slow with prices favouring buyers. Beans are in better demand and occasionally dearer, owing to less pressure on quay. Peas are steady with only a moderate retail trade. Oats meet with only a moderate business at late rates for English. Foreign sorts meet an improved inquiry and a moderate trade is passing, prices favouring sellers. Oatmeal steady but slow at last Tuesday's prices. Oilcake firm with fairly good demand, quotations being unaltered from last market day.—ROSS T. SMYTH, Liverpool, November 17.

PROVISIONS.

London, Monday.—The arrivals from Ireland last week were 3,083 bales bacon, and from foreign ports 8,059 bales bacon. The endeavour to get the prices of hogs down to meet selling rates here so restricted the killings in all places, Ireland, Denmark, and Canada, that the consequent shortening of arrivals has forced prices up some 4s, 6s. The market last week was strong ; Irish, 56s to 62s ; Danish, 56s to 62s ; Canadian, 54s to 58s. There was a somewhat improved demand for some sorts of butter, especially Danish, which was in good demand at 120s to 122s ; Colonial, 102s, 108s, up to 110s ; Canadian, 98s to 102s. Lard, unchanged, firm.

FEEDING STUFFS.

London, Monday.—Linseed Cake : Market quiet, and about unchanged on spot and near shipments. Distant positions are easier. Cotton cake as before. Decorticated cake, stocks exhausted on spot. Meal very scarce. Linseed very irregular. New crop Calcutta and La Plata have fallen heavily.

English linseed cake	—		£8 12 6	ex mill
American Calcutta linseed cake	—	to	—	ex quay
American Western linseed cake	7 16 3	to	7 18 9	ex quay
Russian oil cake	—	to	7 17 6	ex quay
Feeding cake, Samuelson's S.P.F. (10 to 12 per cent. oil)	6 17 6		—	ex warehouse
Feeding cake, Primox (10 to 12 per cent. oil)	6 15 0		—	ex warehouse
Decorticated cotton cake	none		—	ex quay
Decorticated cotton meal	6 15 0		—	ex quay
London made cotton cake (best)	5 5 0		—	ex mill
Egyptian cotton cake (in bags)	4 16 3	to	4 17 6	ex quay
Burton desiccated ale grains	4 5 0		on rail, Burton	
Rangoon Rice Meal	4 12 6		—	ex warehouse
Russian linseed in bulk, per 416lbs	2 15 0	to	2 17 6	ex warehouse
Calcutta linseed in bags, per 410 lbs	2 18 0		—	ex warehouse.

—ROBT. AND JOHN HEWETSON.

CATTLE.

Metropolitan Market, Islington

Monday, Nov. 19th, 1900.

	British	Total. Nov. 20th, 1899.
Beasts	1,639	[illegible]
Sheep and lambs	6,580	[illegible]
Calves	10	[illegible]
Pigs	130	[illegible]
Milch cows	35	[illegible]

Quotations per 8lbs (sinking the offal).

ENGLISH.

	Inferior.	Second.	First.
	s. d.	s. d.	s. d.
Beasts	2 10 —	3 2 —	3 [illegible]
Sheep	3 2 —	3 8 —	4 [illegible]
Pigs	2 10 ..	3 10 ..	4 6

Milch cows, per head, £[illegible] to £[illegible].

British arrivals include as follows :—Scotland, [illegible] ; Eastern Counties, 137 ; Midland, Home and Western Counties, [illegible] ; Devon, 40 ; Ireland, 124.

The supply in the Foreign market to-day's show [illegible] consisted of eighty head. Arrivals from the Midland Counties were shorter, but stronger from Scotland and Lincoln and Yorkshire. For both prime and second qualities trade ruled fairly satisfactorily, standing the weather was more favourable, and prices were lower. For fat bullocking cows and heifers there was a good demand, and prices firmer. Amongst the [illegible] were a few stores.

The following are top quotations per 8lb (sinking the offal) :—

	To-day	Nov. [illegible], 1899.
Scotch	4s 9d to 4s 10d	4s [illegible] to 4s [illegible]
Devons	4s 8d to 4s 9d ..	to
Herefords	4s 8d to 4s 10d ..	4s 6d to 4s 8d
Norfolks	4s 8d to 4s 10d ..	4s [illegible] to 4s [illegible]
Runts	4s 8d to 4s 9d ..	4s 6d to 4s [illegible]
Lincolns	4s 4d to 4s 6d —	4s 0d to 4s 2d
Irish	4s 1d to 4s 3d ..	4s 2d to 4s 4d
Fat cows	3s 8d to 3s 10d ..	3s 8d to 3s 10d

There was a larger supply in the sheep market ; both wethers and ewes met with more inquiry, and trade ruled firm, a clearance being effected. The supply included 800 Scotch, 1,000 Irish, and 1,200 from the Eastern Counties. A few lambs were on offer, but were difficult to vend.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class penned :

	To-day.	Nov. 20th, 1899.
7½ to 8 stone Downs	5s 10d to 6s 0d	5s 8d to 5s 10d
9-stone ditto	5s 8d to 5s 10d	5s 6d to 5s 8d
10-stone half-breds	5s 4d to 5s 6d	5s 2d to 5s 4d
12-stone half-breds	5s 0d to 5s 2d	4s 10d to 5s 0d
10-stone Irish	5s 0d to 5s 2d	4s 10d to 5s 0d
10-stone Down ewes	4s 2d to 4s 4d	4s 0d to 4s 2d
11-stone half-bred ditto	3s 8d to 3s 10d ..	— to

Calf trade not worth noting.

There was less demand for pigs, rates consequently were easier. Best small breeds were quoted at 4s 6d per 8lb.

London Central, Monday.—Good supplies, trade slow. Beef : Carcases, 3s 9d to 3s 10d ; hindquarters, 4s 4d to 4s 6d ; rostings, 5s to 5s 4d. Sheep : Ewes, 3s to 3s 2d ; wethers, 4s to 4s 2d ; hindquarters, ewe, 4s to 4s 4d ; wether 4s 2d to 5s 6d. Pigs, large, 3s to 3s 4d ; small, 3s 8d to 4s.

St. Ives (Hunts), Monday.—Beasts, 810 ; sheep, [illegible] ; pigs, 466 ; horses, 4. Beef, 7s 3d to 8s 3d ; mutton, 7s 7d to 9s 4d ; pork, 6s to 7s ; sows, 5s to 6s. Fat cattle fair, stores slow, fat and stores sheep fair. Fat pigs good demand. Store pigs fair. Milch cows fair, prices £14 to £22.

FOREIGN CATTLE.

Deptford, Monday.—Beasts, 1,546. To-day's supply, compared with Monday last, showed an increase of 163, and consisted of 791 from the United States and 355 from Canada ; for the former there was a steady demand at an advance of from 1d to 2d per 8lb, but for the latter trade ruled dull and heavy at last week's quotations, a clearance being forced. The best States beasts on offer made 4s 4d per 8lb, offal given in, to dress about 720lb ; second quality, 4s to 3s 11d to 4s. The best Canadians, 2s 8d, and occasionally 3s 10d ; plain, ditto, 3s 4d to 3s. 5d. No sheep on the market. The following were the numbers on offer on the corresponding day last year, with the current top rates :—Beasts, 1,880, 4s 6d per 8lbs, to dress about 720.lbs. Sheep, 952, 3s 10d per 8lbs. to dress from 68 lbs to 72lbs.

Liverpool, Monday.—Demand slow for cattle. Prices, however, were in favour of sellers. Trade very slow for sheep, and prices rather lower. Beef, 6¾d to 4¾d per lb ; mutton, 8½d to 5½d per lb. At market : 1,921 cattle and 7,565 sheep. Christmas market on December 17.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., report cloverseeds inactive, sowing wants naturally do not now exist, whilst no speculative inquiry for the moment shows itself. Quotations all round, in the absence of business, are consequently without change. There has been rather more doing in winter tares, but rye is neglected. Meantime full prices are asked for mustard and rapeseed. Canaryseed, with an improving sale, has advanced 1s to 2s per qr. but in other birdseeds there is no alteration in value. As regards linseed, trade moves in narrow limits. Haricot beans and blue peas command former terms. Windsor and long-pod beans continue in good request, whilst good scarlet runners are now obtainable at tempting rates. The Board of Trade returns give the imports of clover and grass seeds into the United Kingdom for October this year as cwts. 24,817, value £47,876, as against cwts. 24,708, value £45,593, for same period of 1899.

THE BALTIC, MONDAY, 1 p.m.

STATE OF TRADE.

The American maize crop is a good one, and thu the trade in that staple for future delivery, January to March, shows 3d. to 6d. decline. For December delivery old prices are asked. Wheat cargos are 3d. lower from Saturday, but this concession seems to be answering its purpose, a better inquiry being already apparent. Barley and oats are no lower, but oilseeds are forced on sale.

BUSINESS DONE.

WHEAT.—Oregon, 30s 6d, arrived ; Californian, 30s 3d, arrived ; Walla Walla, 29s, due ; Argentine, 28s 9d, nearly due ; Argentine, 29s 3d, Feb. shipment ; Australian, 30s 3d, on passage ; Manitoba, 32s, on passage ; Duluth, 33s, on passage ; Hard winter 27s 9d, December shipment ; German (Barley), 28s 3d, arrived.

MAIZE.—Roumanian, 21s, December shipment ; American, 19s 6d, December shipment ; American, 18s 6d, January shipment ; American, 18s, March shipment.

BARLEY.—Azoff, 18s 6d, May shipment ; Persian, 17s, arrived.

OATS.—White Ladani, 14s 3d, arrived ; Petersburg, 14s 6d, prompt shipment ; Canadian, 14s 6d, prompt shipment ; American, 14s, on passage.

LINSEED.—Calcutta, 36s, arrived.

RAPESEED.—Egyptian, 30s 6d, May shipment.

PEASEED.—Bombay, 47s 3d, prompt shipment.

COTTONSEED.—Egyptian, £6 15s. 0d. per sack.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

Owing to the short supply of prime beasts at Islington, rates ruled firm and steady, an early clearance being made, but for other qualities sales ruled slow at a slight decline in value, notwithstanding there was more inquiry by carcase butchers and contractors. For fat butchering cows and bulls there was more demand; rates in consequence were firmer during the beginning of the week, but rather slack owing to the unfavourable weather on Thursday. At the foreign cattle market, there being a much larger supply, trade ruled slower, but no practical decline in value can be noted; on neither market days were the total arrivals shown, 156 on Wednesday and 675 being withheld. The total number of beasts offered for sale at both markets was 6,421 (previous week 4,887), consisting of 1,810 British (increase 170) and 4,611 foreign (increase 1,364), these latter comprising 2,871 from the United States and 1,740 from Canada. The following were the top rates paid per 8lbs. (sinking the offal):—90-stone polled Aberdeens, 5s.; 90-stone Herefords, 4s. 10d.; 90-stone Runts, 4s. 8d. to 4s. 9d.; 80-stone Devons, 4s. 8d. to 4s. 10d.; 100-stone Lincolns, 4s. 4d. to 4s. 6d.; 100-stone Dublins, 4s. 4d.; 95-stone Waterfords, 4s. 2d. to 4s. 3d.; 110-stone Lincolns, 4s. 2d.; 90-stone States, 4s. 2d. to 4s. 3d.; 90-stone Canadians, 3s. 9d. to 3s. 10d.; 100-stone fat cows, 3s. 6d. to 3s. 8d.; 100-stone fat bulls, 3s. 4d. to 3s 6d. There was a larger supply of sheep in both the Islington and foreign market, in the latter there being an increase of 1,263, all of which arrived from Canada, those in the Islington Market consisting chiefly of Downs and halfbreds, with about 1,000 from Ireland. For wether sheep there was a fair demand at last week's quotations, with a more ready sale, there being more demand for ewes; 2d. per 8lb. more money was both asked and obtained. Best pens made per 8lb. as follows (offal given in):—7½ to 8 stone Downs, 6s.; 8-stone Scotch, 5s. 10d. to 6s.; 9-stone Downs, 5s. 10d.; 10-stone ditto, 5s. 8d.; 10-stone halfbreds, 5s. 4d. to 5s. 6d.; 10-stone Irish, 5s. to 5s. 2d.; 12-stone halfbreds, 5s. to 5s. 2d.; 10-stone Down ewes, 4s. 2d. to 4s. 4d.; 11-stone halfbreds, 3s. 8d. to 3s. 10d.; 8 to 8½ stone Canadians, 3s. 10d. to 4s.; 5-stone fat Down lambs, 5s. 10d. to 6s.; 6-stone halfbred ditto, 5s. 8d. Calves were only in short supply, numbering thirty-five, for which trade was slower, the best being quoted at 5s. 4d. per 8lb. Pigs numbered 460, as against 290 during the previous week. For these trade was firm and steady at fully last week's quotations, best small breeds making from 4s. 8d. to 4s. 10d. per 8lb.

Trade in the West.

There has been a slight reaction in one or two departments since our last report, but this has been more in respect to demand than in any lessening of values, though indications are not wanting that bullocks are by no means the fast trade they were a few weeks since, and sooner or later this is bound to affect prices. Mutton, on the other hand, maintains its value, wethers and young mutton commanding a ready sale at 8d. to 8½d., and ewes at 7d. to 7½d. Veal continues to sell very freely at full values—8d. for best calves and 7d. for seconds; rearers are very dear. The trade displays a trifling less buoyancy than has been the case now for so long past. We may quote best porkers 9s. to 9s. 6d., but baconers rather favour buyers at 8s. to 8s. 6d. Store stock, despite a very wet time, still command considerable attention, the demand for milch beasts at all the leading centres being very brisk, as great difficulty is experienced in keeping pace with the demand on town dairies; and it looks as if both dairy cows and their produce are going against consumers. Barreners, with plenty of keep, are coming to hand in rather above the average condition, and the trend of prices is against the buyers. In-calvers and young stock likewise promise to bring higher rates.

Trade in Ireland.

Business has been of a decidedly stronger tone for well-finished beasts, but prices of rough cattle were very irregular. The shippers took a large number of cattle, presumably in anticipation of the Christmas trade on the other side of the Channel, as the beasts bought were chiefly in forward condition, and will be house-fed for a couple of weeks. Prime ox and heifer beef made from 52s. 6d. to 56s., and a few extra lots 57s. 6d. per cwt.; second quality, from 47s. 6d. to 50s., and inferior 42s. 6d. to 45s. There was a big falling off in the number of calves. The few well-fed ones made up to 8d. per lb., others selling at from 4½d. to 6d. There was a very spirited trade for sheep, and prices were decidedly firmer. Shippers were busy picking up nice medium hoggets at from 42s. to 48s. a head, while for the best heavy London hoggets from 55s. to 56s. was about the average. Prime wether mutton made from 6½d. to 6¾d. per lb.; ewe, 5d. 6d.; and inferior, 4¾d. to 5d. Coarse sheep were in excess of requirements. A small show of really first-class cows, which were in strong demand at from £17 to £22 each, and for some extra springers as much as £24 was paid. The pig market was the only one which did not show signs of an improvement. Even the best light weight hogs were worse than last week, and the fall all round may be noted at from 1s. to 2s. per cwt. Heavy coarse pigs met with a most unsatisfactory, dragging sale. Choice light weight made from 38s. to 40s. per cwt.; inferior, from 28s. to 34s.

Trade in Scotland.

John Swan and Sons, Limited, give the following as their report on above for the current week:—The numbers of fat cattle on offer this week were large, but not quite so large as last week. The trade throughout was steady, though except for the very primest quality last week's extreme prices would not quite be maintained. Rather a larger show of fat sheep met the best trade for several weeks, the better reports from the South and a strong local demand causing prices to advance about 2s. a head. Rather more fat calves made exceedingly high prices. A small show of fat pigs sold at about late rates. In the store market the supplies of sheep were very light, h s trade being about over for the season. There was a fair inquiry, and prices are without alteration. This being Hallow Fair week, there have been the usual very large sales of store cattle. There have been plenty of buyers from the surrounding counties, but feeders from the North have not attended in such force as usual. With the excessively bad weather and a determination on the part of farmers to buy cheaper, the trade must be reported very dull and prices fully £1 a head back from those of two or three weeks ago. The best class of cattle, however, have been sold, but a large number of those of inferior quality have not been able to be cashed. A fair number of milch cows met a very slow trade at reduced prices. Quotations:—Top price, best beef, 8s. to 8s. 6d. per stone; current, 7s. 9d. to 8s. Mutton from 7½d. to 8½d. per lb.

LONDON.

London Central. Wednesday.—Fair supplies, but trade quiet. Arrivals of beef included 40 tons Scotch, 650 Liverpool sides, 1,600 hindquarters, and 650 forequarters American refrigerated. Quotations:—Beef, Scotch, short sides, 4s 4d to 4s 8d; long, 4s 2d to 4s 4d; English, 4s to 4s 2d; American, Deptford killed, 3s 8d to 3s 10d; Liverpool, 3s 8d to 3s 9d; American refrigerated hindquarters, 3s 8d to 3s 10d; forequarters, 2s 6d to 2s 8d. Mutton: Scotch, 4s 8d to 4s 10d; English wethers, 4s 2d to 4s 6d; ewes, 3s to 3s 4d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 3s 8d to 4s; Dutch, 3s 4d to 3s 8d; and Irish, 3s to 3s 2d per 8lb.

London Central. Friday.—Good supplies, but trade very slow. Arrivals of beef included 100 tons Scotch, 460 Liverpool sides, 3,000 hindquarters, and 1,800 forequarters American refrigerated. Quotations: Beef, Scotch, short sides, 4s 2d to 4s 6d; long, 4s to 4s 2d; English, 4s to 4s 2d; American, Deptford-killed, 3s 8d to 3s 10d; Liverpool, 3s 8d to 3s 9d; American refrigerated hindquarters, 3s 6d to 3s 10d; forequarters, 2s 8d to 2s 10d. Mutton: Scotch, 4s 8d; English wethers, 4s 2d to 4s 6d; ewes, 3s to 3s 4d; Canterbury, 2s 6d to 2s 8d; Wellington, 2s 5d to 2s 6d; Sydney and River Plate, 2s 4d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s 4d to 4s 8d; and Dutch, 3s 10d to 4s 4d per 8lb.

Islington, Thursday.—Quiet. A moderate supply of sheep and lambs penned, but inquiry for both wethers and ewes ruled dull, at about late quotations. 7½-stone to 8-stone Down wethers, 5s 10d to 6s; 9-stone ditto, 5s 8d to 5s 10d; 10-stone half-bred, 5s 4d to 5s 6d; 10-stone Down ewes, 4s 2d; and 11-stone half-bred ditto, 3s 8d to 3s 10d. Calves in moderate supply rule steady, the best on offer making 5s 6d to 6s 6d. Pig trade quieter, with heavy supplies available. Neat small, 4s 6d to 4s 8d per 8lb, to sink the offal. Total supplies, 100 beasts, 660 sheep, 25 calves, 380 pigs, and 5 milch cows.

COUNTRY.

Ashford, Tuesday.—There was a fair trade for beef, but prices were not very satisfactory, best animals not exceeding 11s 6d per score, and secondary ones ranging between 10s and 11s. Mutton was dearer, small Kents and half-breds making 4s 10d to 5s 4d per 8lb; larger wethers, 4s 4d to 4s 8d; and barrens, 3s 6d to 3s 10d per stone. Veal calves made 5s to 5s 6d per 8lb Pork was very dear, the best roasters making up to 12s per score.

Basingstoke, Wednesday.—At Raynbird and Sons' sale-yard there was a fair attendance of buyers to meet a supply of 27 fat beasts, 70 calves, 500 fat sheep and lambs, 266 pigs, and 74 head of dairy and store cattle, for which the following prices were realised:—Fat beasts, £11 10s to £19; fat calves, 80s to £6 5s; small, 15s to 45s; fat wethers, 41s to 55s; fat ewes, 32s to 38s; fat lambs up to 28s; fat hogs, 65s to 90s; fat porkers, 45s to 56s 6d; small, 32s to 44s; store pigs, 10s to 22s 6d. With a short supply of fat beasts there was a fair enquiry, prime lots selling readily, and other grades maintaining late rates. Young Devon steers made up to £18 15s; Shorthorns, £19; runts, £15 10s; etc. A clearance nearly made of the shorter supply of sheep and lambs, and prices well maintained, some of the fancy lots making more money. Hampshire Down wethers and ewes made 45s, 47s, 41s, 44s 6d, 44s, 51s, 45s 6d, 41s, 46s, 43s 6d; ten-months-old ditto, 47s, 49s, 55s, 44s, 54s, 57s, 48s 6d, 56s, 54s 6d, 49s 6d, 40s, 30s 6d, 40s 6d, 43s; Exmoors, 29s; old ewes, 38s, 38s 6d, 34s, 35s, 33s 6d, 32s; rams, 38s 6d, 39s, 46s; Exmoor ewes, 28s; Black face Scotch ewes, 24s 6d; three-months old sucking lambs, 25s, 26s 6d, 28s, 22s. A clearance was made of all dairy cows and heifers with a ready sale throughout. Store cattle met a slightly better trade. Fat calves of all descriptions met a firm trade with prices in favour of the tendors. Fat hogs showed an improvement on the trade of last week, and prices were higher. Parkers are a good trade and last week's satisfactory prices are fully maintained. Store pigs met a better enquiry at an advance. Ruling values:—Pure Devon beasts, 7d to 7½d per lb; ditto Shorthorns, 6d to 6½d; cows, bulls, and inferior beasts, 5d to 5½d per lb; best quality sheep, 8½d to 8¾d; second ditto, 7d to 7½d; old ewes, rams, and inferior ditto, 5½d to 6d; choice fat sucking lambs, 8d to 9d per lb; fat calves, 6d to 8½d per lb; porkers up to 11s; hogs to 9s 6d per score.

Boston, Wednesday.—There was a useful show of store cattle, with a fair trade at satisfactory prices. Best beef, 7s 9d to 8s; and cow beef, 6s 6d to 7s 6d per stone; strong stores, £14 to £15 10s; useful young steers, £11 to £12 10s; good heifers, £10 10s to £11 10s; milch cows, £18 to £23; in-calvers, £16 to £18; calves, 60s to 63s; fat sheep, 8d; ewes, 5½d to 6d per lb; store lambs, 34s to 38s.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs	2½ in. and under.. ..	9s 0d
Under 10 sc 10 lbs	Not exceeding 2½ in.	8s 6d
Under 11 sc 10 lbs	Not exceeding 2¾ in.	7s 9d
Under 12 sc	Not exceeding 3 in.	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND CO., Limited, Calne, Wilts.

Cambridge, Monday.—The stock exhibited for sale at this market and the prices obtained were as follows:—Beasts, 1,083; sheep, 507; pigs, 356; horses, 6. Beef, 7s to 8s per stone; mutton, 4s to 5s 4d; pork, 6s to 7s 3d. A good show store beasts, not all sold. Fat beasts, a fair number to hand, prices unchanged. Fat sheep, a good show, prices not so good; stores, very few to hand. Fat pigs, a good brisk trade all round; stores, a fair trade. Hay, straw, and roots short supplies.

Canterbury, Saturday.—A short supply and a fair trade. Lambs ranged from 18s to 25s 6d, and one or two exceptional pens made up to 28s; ewes, 25s to 33s 6d; ewe tegs, 28s to 34s 6d; wethers, 26s to 33s. A number of Irish cows were selling at from £5 15s to £6 10s; yearlings, £7 to £8; rough cows and calves, £10 to £14 per head.

Carlisle, Saturday.—The supply of Irish store cattle was a good one for the season, though smaller than last week's. The bulk of the animals were good heifers, and there were also a number of polled bullocks. A fair number of buyers attended, and a quiet trade was done at £13 10s for polled bullocks, and £6 10s ranging up to £14 10s for heifers. Young pigs a small show at 20s each.

Chichester, Wednesday.—In the fat stock department there was a fair supply of beef with a steady trade at unaltered values. Small supply of mutton, for which a poor demand was experienced. The trade for store sheep was also inactive and prices eased off in many cases to the extent of 2s per head. With the removal of swine fever regulations, pigs were again on offer, and business in this department was on the whole brisk, though prices were a little irregular. In many instances, however, good values were obtained, small porkers selling especially well.

Dorchester, Saturday.—Rather extensive supplies of beef came to hand, but trade on the whole was quiet. Best fat heifers sold from £16 to £21 5s; heifers and calves, £16 to £19 15s; seconds, £9 to £13; bulls, £9 to £16; best young barreners, £11 to £14; plainer descriptions, £16 to £22 pair; Devon steers, £20 10s to £21. Sheep were in moderate supply, Horn ewes, 38s to 47s; fat wethers, 48s to 51s 6d; Down ewes, 42s to 46s.

Dublin, Thursday.—Slightly improved tone in demand for cattle, but quotations show no alteration. Rough and unfinished sorts still in the majority, but a clearance easier to effect. Better demand for all classes of sheep at last week's prices. Cattle (best), 30s to 32s 6d per cwt; other descriptions, 25s to 29s per cwt. Mutton, 5½d to 6½d per lb; extreme, 7d per lb.—GANLY, SONS AND CO.

Dumfries, Wednesday.—Large supply. Beef in good demand, realising up to 37s 9d per live cwt; horned bullocks, to £16; ditto heifers, to £17; polled bullocks, to £16; ditto heifers, to £17; Highland bullocks, to £19; Galloway bullocks, to £18; Ayrshire bullocks, to £16; sheep, Cheviot ewes, to 28s; black-faced ewes, to 29s.

Edinburgh, Wednesday.—Sheep fewer, and cattle larger show. Sheep good trade; Cheviot Dinmonts, 23s; crossbreds 30s; half-bred lambs, 25s. Horned bullocks, to £15; polled, to £13; stirks, £7 to £10; shorthorn cows, to £24 10s; secondary, to £21; Irish, £19; Ayrshires, £17 to £19.

Glasgow, Wednesday.—At market, 884 cattle and 5,108 sheep. Trade better; prices a shade higher. Top Scotch cattle, 68s; secondary, 60s to 62s; top Irish, 58s to 60s per cwt. Top hoggs, 8¼d to 8½d; top wedders, 7¾d to 8d per lb. Demand moderate for dead meat; quotations steady; best Scotch beef, 5¾d; best States, 5½d; secondary, 5¼d per lb.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 794, calves 62, sheep and lambs 1,006, pigs (fat and sows) 23, sucking pigs 21, pigs (stores, not more than ten) 252, pigs (stores, more than ten) 194.

Leicester, Saturday.—Fair supplies of stock in good condition; trade quiet, at easier prices. Milch cows made £16 to £24 per head. Bullocks, £10 to £16 per head. Calves dull trade.

Lincoln, Friday.—This being the November fair there was a fair supply of milch beasts, and a good supply of store stock. Trade, however, was slow throughout. Milch beasts made £15 to £20 each; three-year-old stores, £15 to £17; two-year-olds, £10 to £13; and young stock, £7 to £9. There was a large number of sheep and lambs penned. Lambs made from 25s to 35s each.

Newcastle, Tuesday.—Large supplies, fair business. Pork down 6d per stone. Numbers:—Cattle, 2,096; sheep, 5,666; calves, 56; pigs, 1,327. Prices (sinking the offal):—Beef, 5s to 8s; pork, 4s 6d to 9s per stone; mutton, 5d to 8d; veal, 5d to 8d per lb.

Newport, Wednesday.—Best beef, 6¼d; seconds, 6d wether mutton, 7¼d to 7¾d; lamb, 7¾d to 8d; ewes, 6d to 6¼d; calves, 7d to 7¾d per lb.

Norwich, Saturday.—The supply of store beasts on offer here to-day was considerable, consisting largely of Scotch and Irish lots; business was dull, at barely former terms. Fat beasts, which were in moderate supply, made 7s 6d to 7s 9d and 8s per 14lb. Store sheep were in about average supply; the demand was more active, and hoggets advanced 1s per head, being quoted at 36s to 42s each; keeping shearlings made 40s to 46s each. The supply of fat sheep was not very large, but trade ruled dull at 8s to 8s 6d and 9s per 14lb.

Preston, Wednesday.—Fair attendance and supplies in all departments fully up to the average. Choice cattle were in fair demand at last week's prices, and rates for sheep were also unaltered. Beef, heifers, and bullocks, 5¾d to 6¼d; cows and bulls, 5d to 5¼d; mutton, hoggs, and lambs, 7d to 7¼d; tups and ewes, 5d to 6d; calves, 5¼d to 6¾d per lb.

Romford, Wednesday.—A short supply of fat beasts, and trade about the same. Best animals made 4s 6d to 4s 8d, and middlings 4s to 4s 2d per stone. Calves in short supply, and trade dearer, at 5s 2d to 5s 4d per stone. Sheep in short supply, and trade a little better. Best sheep made 5s 4d to 5s 6d, and middlings 5s to 5s 2d per stone. A few store beasts on offer, and demand fair. Pigs in large supply, and prices about the same.

Salford, Tuesday.—There was a smaller supply of both cattle and sheep. A better trade was experienced for cattle, and the tendency was towards higher prices. The demand for sheep was also better, and prices, though not quotably higher, were in favour of the seller. Fewer calves on offer, and a fair trade, with prices against the buyer. Quotations—Cattle, 5d to 6¼d; sheep, 6d to 8¼d; calves, 5¼d to 7¼d per lb. At market—Cattle, 2,824; sheep, 5,793; calves, 114.

Sheffield, Tuesday.—The show of milch beasts was better than usual, and a good trade was done, with the best qualities making £18 to £25; secondary, £12 to £16 10s.

Shrewsbury, Tuesday.—Fat stock and cows with calves brisk generally. Store stock fair at late rates. Small supply of sheep offered. Quotations:—Beef, 6d to 7d; mutton, 6½d to 8d; and veal, 6½d to 7¾d per lb. Porket pigs, 9s 6d to 10s 6d; and bacons, 8s 6d to 9s 6d per score. Cows with calves, up to £21 17s 6d. Number offered:—702 cattle, 55 cows with calves, 712 sheep, 86 calves, 65 fat, 140 porket, and 519 store pigs.

Spalding, Tuesday.—In the cattle market there was a fair show of beef; best, 7s 9d per stone; cow beef, 7s. Good number of stores on offer, and average trade, strong stores

being in demand. Cows and in-calvers were also inquired after, and made satisfactory prices. In the sheep market trade was rather better than last week, but was still dull, wether mutton selling well.

Stockton, Wednesday.—There were on offer 244 cattle, 384 sheep, and 416 pigs. Best cattle were shown in smaller numbers than last week, and trade was firm, with prices ranging from 7s 6d to 8s per stone, rougher kinds making 6s 6d and 7s. Young sheep sold 8d and 8½d; ewes, about 6d; and tups, 5d per lb.

Taunton, Saturday.—Rather short supply, moderate attendance, and quiet trade.

Thame, Tuesday.—There was a capital attendance of buyers, and a brisk trade ruled throughout for all classes of stock, a clearance being effected. Beef was in demand and made more money than it has done for the past few weeks. Mr. Bond's sale comprised 66 fat beasts, 151 fat sheep, 102 fat and weaning calves, and 177 fat and store pigs. Fat bullocks made £16 to £18; fat heifers, £14 to £20 5s; fat wether sheep, 44s to 57s 6d; fat ewes, 35s to 47s 6d; fat calves, £3 to £4 17s; cow calves, 19s to 63s; bull calves, 14s to 48s; fat pigs, 10s per score. Stores a good trade.

Wakefield, Wednesday.—The beef on show is of rather rough description, and finest qualities make 6½d per lb, as the top price, with one or two exceptions of 6½d. Rather better trade in sheep, but quotations unchanged. Choice little animals make 8d; good strong sheep, 7d to 7½d; and ewes from 6d per lb. Beasts penned 1,598, sheep 2,675.

Wakefield, Wednesday.—A lighter supply of both beef and mutton, but the demand was slow and late rates prevailed. Best beef, 6½d per lb, and other qualities 5d to 6¾d. Small sheep, 8½d; average sorts, 7d to 7½d; ewes and tups, 5½d to 6d.

Wolverhampton, Wednesday.—Beasts: A fair supply; slow trade. Sheep: Moderate supply; fair trade. Calves: Ordinary number offered; good demand. Milch cows: Large supply; trade fairly good. Beef, 5½d to 7d per lb; mutton, 6d to 8½d per lb; veal, 6d to 8d per lb. Bacon pigs, 9s per score; porkets, 9s to 9s 6d per score; sows, 8s 6d to 7s per score.

Worcester, Saturday.—The market was well supplied in all departments, but trade showed no improvement. Beef sold slowly at last week's prices. Mutton also quiet. Calves were a little firmer, and there was a fair trade for pigs at late rates. Best beef, 6d to 7d; inferior, 5d to 6d; wether mutton, 7d to 7½d; ewes, 5d to 6d. Veal, 7d to 8d per lb.

Worksop, Wednesday.—A moderate show. Good attendance of buyers. Sheep made 5s a head more than last week. Better inquiry for beef, which had an upward tendency, with a fair show. Several strong store beasts met with a ready sale. Best beef, 7s 9d to 8s; secondary, 7s to 7s 3d; rough, 6s to 6s 6d per stone; best wether mutton, 8d to 8½d; ewes, 6d to 7d per lb.

York, Thursday.—A large offer of sheep for the time of year, but the wet weather led to a very dull trade. North country lambs made up to 36s each, Good display of West country lambs up to 28s each. Large display of West country grey-faced sheep, which made up to 42s each. This was the last of the big markets for store cattle of the season, and the display of both English and Irish was a large one. Buyers were scarce and trade slow, and for heifers and bullocks a reduction of 10s per head had to be submitted to. Three-year-old bullocks, £16 to £18; two-year-olds, £9 to £11; stirks, £6 to £9 each. Small offer of calving and milch cows, and active demand. Trade improved, the best making up to £22; secondary sorts, £13 to £19 each. In the fat market beef was 7s to 8s per stone; mutton, 7½d to 8½d per lb.; and pork, 6s 9d to 7s 3d per stone.

FOREIGN.

Deptford, Wednesday.—Beast supplies totalled 1,450 head, being an increase of 451, as compared with last Wednesday's figures, and comprised 499 United States, and 951 Canadian. Trade was of a very slow character at 3s 9d to 4s 2d and 3s 5d to 3s 9d respectively. 1,161 Canadian sheep ruled very slow, at 4s per 8lb, to sink the offal.

BUTTER.

Tuesday.—Bedale: 1s 3d to 1s 10d per roll of 24oz. Gainsborough: 1s 3d to 1s 4d per lb. Settle: 1s to 1s 1d per lb. Sheffield: 1s 3d to 1s 4d per lb. Spalding: 1s to 1s 2d per lb. Stone: 1s 3d per lb.

Wednesday.—Barnsley: 1s 4d to 1s 5d per lb. Boston: 1s to 1s 2d per lb. Colne: 1s 2d per lb. Goole: 1s 2d per lb. Hereford: 1s 2d to 1s 4d per lb. Keighley: 1s 3d per lb. Kirbymoorside: 1s to 1s 1d per lb. Knaresborough: (wholesale), 1s 7d to 1s 8d; (retail), 1s 8d to 1s 9d per roll of 24oz. Louth: (wholesale), 1s 2d per lb. Market Drayton: 1s 2d to 1s 3d per lb. Market Weighton: 1s 1d per lb. Northallerton: 1s 8d to 1s 9d per roll of 24oz. Stockton: 1s 2d to 1s 4d per lb. Uttoxeter: 1s 2d to 1s 3d per lb. Whitby: 1s per lb. Worksop: 1s 3d to 1s 4d per lb.

Thursday.—Brigg: 1s 1d to 1s 2d per lb. Devizes: (wholesale), 1s 1d to 1s 2d per lb; (retail), 1s 2d to 1s 3d. Driffield: 1s per lb. Kidderminster: 1s 3d per lb. Penistone: 1s 3d per lb. Ripon: 1s 7d to 1s 10d per roll of 24oz. Scarborough: 1s 3d to 1s 4d per lb. Wetherby: 1s 3d to 1s 4d per lb.

Friday.—Altrincham: 1s 4d per lb. Crewe: 1s 3d per lb. Easingwold: 1s 1d to 1s 2d per lb. Grimsby: Danish, 120s to 122s; Dutch, 110s to 115s; Canadian, 100s to 110s per 112lb. Helmsley: 11d to 1s per lb. Leeds: Danish, 116s to 124s per 112lb; Irish creameries, 102s to 106s; York lump, 15s to 16s per stone; ditto long rolls, 1½lb, 1s 9d to 1s 11d; fresh butter in 1lb prints, 1s 3d to 1s 4d per lb. Leyburn: 1s 8d per roll of 26oz. Lincoln: 1s 1d 1s 2d per lb. Otley: 1s 6d to 1s 9d per roll of 24oz. Sandbach: 1s 3d per lb. Whitchurch: 1s 1d to 1s 2d per lb.

EGGS.

Tuesday.—Bedale: 7 for 1s. Gainsborough: 7 or 8 for 1s. Settle: 7 or 8 for 1s. Sheffield: 8 or 9 for 1s. Spalding: 8 for 1s. Stone: 6 for 1s.

Wednesday.—Barnsley: 6 for 1s. Boston: 6 to 8 for 1s. Colne: 2s 8d per score. Goole: 8 for 1s. Hereford: 8 to 10 for 1s. Keighley: 6 for 1s. Kirbymoorside: 8 or 9 for 1s. Knaresborough: 6 or 7 for 1s. Louth (wholesale): 10 for 1s. Market Drayton: 7 or 8 for 1s. Market Weighton: 8 or 9 for 1s. Northallerton: 7 for 1s. Stockton: 6 or 7 for 1s. Whitby: 7 for 1s. Worksop: 3s per score.

Thursday.—Brigg: 8 or 9 for 1s. Devizes: 10 to 12 for 1s. Driffield: 11 for 1s. Kidderminster: 7 for 1s. Penistone: 8 for 1s. Ripon: 6 or 7 for 1s. Scarborough: 6 for 1s. Wetherby: 6 or 7 for 1s.

Friday.—Altrincham: 5 and 6 for 1s. Crewe: 6 and 7 for 1s. Easingwold: 7 or 8 for 1s. Grimsby: Austrian, 6s 6d to 7s 10d per 120; Russian, 6s 5d to 8s 2d; Swedish, 11s 6d; Canadian, 6s 6d to 8s 6d. Helmsley: 8 for 1s. Leeds: Yorkshire, 16s 6d to 17s per 120; Irish, 13s to 16s; Danish, 10s to 11s 6d; Austrian blues, 7s to 8s 6d. Leyburn: 8 for 1s. Lincoln: 7 or 8 for 1s. Nantwich: 6 or 7 for 1s. Otley: 6 or 7 for 1s. Whitchurch: 6 and 7 for 1s.

COLONIAL DAIRY PRODUCE.

London, Friday.—Butter.—The demand for Australian and New Zealand butters is far from brisk, and prices are showing a downward tendency. Prices quoted in salemen's circulars are freely departed from, and, though there may be no nominal reduction in quotations, actual sales are made at the lower values of 1s and 2s on last week's prices. Choicest may be quoted at 106s to 108s with a few sales at more money. Finest makes 96s to 98s. The Copenhagen official quotation has this week been raised two kroner, and thus the mistake of lowering it three kroner last week is admitted by the committee. Cheese.—The market has been dull during the early part of the week, but is improving at the close. Advices from Canada report firmer markets, and prices showing improvement. Some authorities on that side believe values have touched bottom for some time.—W. WEDDEL AND CO.

FEEDING STUFFS.

London, Thursday.—Linseed has continued to decline, buyers being alarmed at the prospects of the large crop in La Plata. Calcutta to London finds sellers near at hand 58s, November-December 57s 6d, April-June, 45s 6d. La Plata December-January, 48s, sellers, January-February, 47s, Hull has also suffered a serious decline. Calcutta, April-June, 46s 6d. Azov, Black Sea, October-November, 56s. La Plata, December-January, 48s, January-February, 47s. To the Continent Bombay, is quoted February-March, 50s 3d; March-May, 49s. Calcutta, April-May, 47s 6d. ; April-June, 46s 6d. La Plata December-January, 48s 6d; January-February, 47s 3d. Linseed cakes quiet. London made, £8 10s to £8 12s 6d. Russian, £8 2s 6d to £8 7s 6d ex dock. American Westerns at £8. Cotton cakes quiet. London made £5 to £5 2s 6d; Egyptian, £4 17s 6d. Rapeseed continues dull. Brown Calcutta to London November-December, 44s; March-May, 40s 6d. To the Continent we quote, Yellow Guzerat March-May, 46s; November-December, 52s. Yellow Cawnpore March-May, 44s 3d. Brown Cawnpore November-December, 47s 3d; March-May, 39s 9d. Brown Calcutta, October-November, 45s; April-June, 41s. Ravison to Hull, prompt 33s. Cottonseed.—The market has been quiet, and prices have declined. Spot London, £6 17s 6d; November-January, £6 15s; February-March, £6 15s. Hull spot, £6 13s 9d; November-January, £6 12s 6d. Cargoes, December, £6 13s 9d; January, £6 13s 9d. The import into London for the week has been 2,617 tons, and since January 1st 39,518 tons against 35,038 tons corresponding time last year.—THE PRODUCE BROKERS COMPANY, LIMITED

Mark Lane, Monday.—Linseed Cakes: There is no improvement to note in the demand, which continues extremely small, while supplies come to hand rather more freely, with the result that values are weak. Russians are 2s 6d per ton cheaper on the week, Americans unchanged, while English sell quietly at a slight reduction. Cotton Cakes: A better enquiry has been experienced during the past week, and quotations are well maintained. Decorticated: There is a parcel of new seed cake now on the way offering at £6 15s, and meal at £6 10s and £6 12s 6d. Rape cakes scarce and unchanged. Maize Germ Meal: Arrived or near at hand, American sells freely at a slightly easier rate, and English remains unaltered. Rice Meal: A large business has been done in Rangoon meal, and the market leaves off rather dearer, with shippers holding for £4 7s 6d ex ship for November-December parcels.

—PINNOCK BROS., Mark Lane

Hull, Tuesday.—English wheat is in small supply to-day, and meets a steady sale at fully last Tuesday's prices. Foreign in fair demand at last week's prices for white sorts, red being 3d per qr dearer. Malting barley unaltered in value, only best samples meeting a ready sale. Grinding rather easier to buy. Oats steady at last week's rates. Beans unaltered. Maize not plentiful on the spot and flat corn held 3d per qr higher. Linseed.—The arrivals are 750 qrs from Konigsberg, 1,400 qrs Libau, 4,467 qrs New York, 4,912 Novorossisk, 2,000 qrs Riga, 6,290 qrs Petersburg; total, 19,899 qrs. Since this day week the market has had a drooping tendency. Baltics have not experienced much change, but new crop Plate and Calcutta are decidedly lower. Calcutta, April-June, can be bought at 48s 6d. Black Sea, on passage, 57s the value. Petersburg, afloat and immediate loading, 51s 9d to 55s. Riga and Libau, a little business done at 51s 6d. American Duluth scarcely offers. River Plate, December-January, 50s; January-February, sellers at 49s. Cottonseed.—There was a steady business doing during last week at £6 18s 9d to £6 17s 6d spot and passage, but the market has ruled much quieter the past day or two, and yesterday £6 16s 3d to £6 15s accepted, which latter taken to-day with further sellers. November-January and February-March £6 16s 3d, but sellers now at £6 13s 9d, and buyers scarce at over £6 12s 6d. Linseed cakes: A steady market at previous rates. Hemp firm, but no change in prices.—KEIGHLEY MAXSTED AND CO

WATERLOO ROUND FEEDING CAKES, £6 17s 6d PER TON; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £9 5s 0d PER TON; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £9 2s. 6d. PER TON; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £5 10s 0d PER TON. ALL F.O.R. HULL.

MOLASSINE, packed in bags, of 1¼cwt. each. Price per cwt. 7s. 6d. Price per ton, £6 15s., on rail at works, Silvertown, Essex.

WOOL.

London, Friday.—Wool, English, per pocket of 240lb:—Fleeces, Southdown hoggs, £8 to £11; half-bred hoggs, £7 to £8 10s; ditto wethers, £6 10s to £8; Kent fleeces, £6 to £7; Southdown ewes and wethers, £8 to £11; Leicester ditto, £6 to £7. Colonial, per lb:—Victorian, fleece, superior, 1s 4d to 1s 5d; scoured, good, 1s 5½d to 1s 6d; scoured, average, 1s 4d to 1s 4½d; greasy average to fair, 10d to 10½d; New South Wales, scoured, average, 1s 1d to 1s 2d; greasy average, 7½d to 8½d; South Australian, greasy, average, 6d to 6½d; New Zealand, scoured, average, 1s 2d to 1s 3d; greasy, average, 7½d to 8d; Cape, scoured, superior, 1s 3½d to 1s 4½d; fleece, average, 6½d to 7½d; greasy, average, 5d to 5½d; Natal, scoured, 1s to 1s 1d; greasy, average, 5½d to 6½d; crossbreds, greasy, Victorian, good to superior, 9d to 11d; New Zealand, fine, 8½d to 10d; ditto, medium, 6½d to 7½d; ditto, coarse, 5½d to 6½d.

Bradford, Thursday.—The market is very flat, and without signs of improvement. Some inquiries are made for sixties tops, but little is wanted. Fine cross-breds are quite neglected, and for the stronger sorts users are demanding concessions. Mohair quiet and neglected. In yarns there is no improvement of importance in any branch, and there is no change in the piece trade.

Canterbury, Saturday.—A fairly good demand for Down fleeces, at from 7½d to 9½d per lb, as also for halfbreds at 7d. Kent fleeces are very dull at 6d, and lambs' wool at 4d per lb.

Leicester, Saturday.—No material alteration in the local wool market. In yarns the old orders on hand keep up the production, but there is less doing in knitting and worsted yarns, side by side with a steady turnover in lambs' wools.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—A good supply of [illegible] was offered, but trade ruled slow. Potatoes very slow, and only samples more than adequate enough for sample being in a generally poor condition, prices [illegible] week. Good arrivals of fruit, and in good condition. Green stuffs: Cabbages, 3s; savoys, 4s to 6s; brussels sprouts, 2d to 3d per basket; cauliflowers, 1s 6d to 2s per dozen. Brussels sprouts, 1s to 1s 6d per half-sieve; spinach, 2s per bushel; carrots, 1s to 2s; turnips, 2s to 3s; parsley, 1s 6d; red cabbage, 3d per dozen bunches; celery, 12s to 14s per dozen rolls; horseradish, 1s per bundle; English onions, 8s per cwt.; Valencias, 9s to 9s 6d per case. Potatoes: Maincrops, 100s; Snowdrops, 80s to 90s; Up-to-Dates, 70s to 80s; Imperators, 70s to 75s; Reading Giants, 70s; German Sixties, 70s; Belgian Market, 55s to 60s per ton. Fruit: English grapes, 6d to 1s 6d per lb; Almeria, 10s to 16s; Denia, 3s 6d to 8s per barrel; English apples, 3s to 9s per bushel; Nova Scotian, 8s to 14s per barrel; kieffer pears, 3s to 6s per bushel; Californian, 4s to 7s per box; cases, peaches, 2s to 12s per dozen; pineapples, 1s 6d to 4s each; bananas, 5s to 10s per bunch; English tomatoes, 3s 6d to 4s 6d per 12lb; French, 2s 6d to 3s per crate; chestnuts, 6s to 10s; Grenoble walnuts, 10s to 12s 6d per sack.

POTATOES.

Borough and Spitalfields, Saturday.—Arrivals this morning have been heavy, and with the trade very dull, prices have had a downward tendency. English Reading Giants, 3s to 3s 9d; Professor Maerkers, 3s 3d to 3s 6d. Up-to-Dates, 3s 6d to 4s 6d; French and Belgium Magnums, 3s to 3s 6d. Imperators, 2s 9d to 3s 3d per cwt.

HAY AND STRAW.

Whitechapel, Saturday.—Short supplies, trade very quiet. Best clover, 85s to 100s; inferior ditto, 70s to 80s; specially picked hay, 90s 6d; good ditto, 80s to 85s; inferior ditto, 50s to 60s; mixture and seeds, 70s to 80s, and straw, 24s to 36s per load.

Bristol, Saturday.—Clover hay, 75s to 80s; meadow hay, 70s to 75s; straw, 45s to 50s.

Leeds, Tuesday.—There is a good demand in all warehouses for hay and straw, prices remaining firm. Quotations: Meadow hay, 64d to 74d; clover, 74d to 84d; wheat straw, 50d; oat straw, 51; rye straw (retail) 7d per stone.

FOREIGN HAY AND STRAW.

London, Saturday.—The continuance of the lighterman's strike this week has again curtailed business, and until we see a settlement arrived at there can be no hope for any improvement in trade. In the meantime we can only quote prices as nominal Canadian timothy and clover mixture, 82s 6d to 83s; Dutch 1st cut clover, 87s 6d; French and Dutch 2nd cut clover, 90s; good Dutch hay, 72s 6d to 75s; common Dutch hay, 63s; large bale French wheat straw, 46s 6d; small bale French wheat straw, 43s; small bale French oat straw, 43s, all per ton delivered by barge alongside.—FULLER AND PRENTIS, 9 and 10, Great Tower Street, E.C.

Farmer Found Shot.—Mr. William Savage, a farmer, of Yarnton, a village about four miles from Oxford, was discovered on Friday evening lying in the kitchen of his house with a portion of his head blown away. A young man named Richard Hopcroft, aged 29, an adopted son of the deceased, is in custody charged with the murder of Savage. It appears that the two men had been in Oxford together during the day, when they quarrelled, the quarrel, according to the deceased's housekeeper, being renewed when they returned to the farm. She left the premises about four o'clock, the two men being the only occupants, and when she returned about two hours later she found the door fastened, and had some difficulty in getting it open. As soon as she got inside she discovered the body of Savage lying against the door with one side of the face blown away. It is stated that about five o'clock the same evening Hopcroft went to a public-house in the village, when he was carrying a gun. Later on the same night he went to the County Police Station at Oxford, and stated that he wished to give himself up, as he believed he had caused the death of Mr. Savage, of Yarnton, and that he had thrown the gun away. The gun, which has since been found at a public-house in Summertown, where it had been left by Hopcroft, was, according to the housekeeper, safe in a drawer in two pieces when she left the house. In reply to the questions of the Inspector when he gave himself up, Hopcroft said that the affair was an accident; he was, however, subsequently taken to Woodstock and remanded.

LIVE STOCK.

OUR ILLUSTRATIONS.

The Shorthorn cow Olivette Ingram, sire Ingram's Hope 61109, dam Olive Hanson, by General Ingram 51312, was bred by Mr. Anthony Dobson, and is now the property of Lord Rothschild, Tring Park, Tring. At this year's Dairy Show at the Royal Agricultural Hall, Islington, Olivette Ingram won first inspection prize in the class for Shorthorn cows entered in Coates's Herd Book, or certified by the secretary of the Shorthorn Society, to be eligible for entry; was reserved for the Shorthorn Society's prize in the milking trials, but in the butter test did not get an award.

The two-shear Kerry Hill ram—Bahaillon Samson—Number 27 in the Kerry Hill Flock Book—was bred by Mr. R. Morgan, Bahaillon, Newton, North Wales, who exhibited it at the Shropshire and West Midland Show last year, where it won second prize. In the same year it won a similar award at the Kerry Great Sheep Fair and Sale, but this year came out on top. It was sold for twenty-one guineas.

STOCK AND SHOW NOTES

By Herdsman.

Messrs. Alfred Mansell and Co., of Shrewsbury, have just received notices of the safe arrival at Buenos Ayres of the two Clydesdale mares they shipped to an estanciero in the Argentine last September.

I hear that Mr. W. R. Trotter, of South Acomb, has sold, to go to South Africa, his promising young horse, Stylish Prince, by First Lifeguard out of the noted old mare Topsman's Princess, by Prince of Wales.

A meeting was held at St. Helens Town Hall on Wednesday, under the presidency of the Mayor (Alderman J. Forster) to consider the desirability of inviting the Royal Lancashire Agricultural Society to hold their show in St. Helens in 1901. After discussion it was resolved that, subject to the sum of £500 being raised by subscriptions before the 24th inst., the society be invited to hold their next show in St. Helens. A local committee was formed, with Mr. David Gamble, jun., as secretary, and Mr. Wm. Gamble, C.C., as hon. treasurer, while the hon. secretary and treasurer were deputed to attend the meeting of the executive at Preston on the 26th inst. and convey the invitation to the society.

During the past week the Shorthorn Society of Great Britain and Ireland has issued volume forty-six of Coates's Herd Book, which gives particulars of cows and their produce up to December 31st, 1899, and of bulls number 75978 to 78198. The cows in this volume total 4,359, which is a record number of entries, the previous best being 3,963 in volume forty-five. The number of bulls entered is also much above the average of recent years, so that the volume is a striking testimony of the increasing popularity of the Shorthorn.

Messrs. Laird Brothers, of Birkenhead, have just turned out from their shipbuilding yards a fine steamer, specially built to fill the requirements of the live stock trade between Dublin and Holyhead. This splendid steamer, "South Stack," is the property of the London and North-Western Railway Company, and will be a most important addition to the fine fleet of this company. Her capacity for carrying live stock is equal to 579 head of cattle and 34 horses (which have padded boxes allotted to them). The electric fittings, ventilating fans, etc., are all up-to-date, and the accommodation for drovers and third-class passengers is excellent. The most modern arrangements are adopted to secure steadiness at sea and the safe and humane transit of stock. Altogether the "South Stack" is a magnificent addition to the steamers now employed in the Irish cattle trade.

The entire breeding studs of pedigree Hackneys and hunters belonging to Sir Oswald Mosley, Bart., and Mr. J. S. E. Eadie, are to be sold by auction at the Hall Farm, Rolleston, Burton-on-Trent, on Wednesday, the 28th inst., Messrs. Sexton, Grimwade, and Beck being the auctioneers. With the exception of a very valuable four-year-old hunter all will be sold without reserve. The dispersal of the two studs is owing to Sir Oswald Mosley's intention to devote more interest to the breeding of Shire horses, and Mr. Eadie is selling to make room for his growing stud of the same breed. Both are selling mares of the very best strains with some very promising young stock of both Hackney and hunter blood. There will be a luncheon at noon, and at one o'clock the sale will commence.

A preliminary schedule of prizes for the hunter, charger, and polo pony sections of the next spring show of the Hunters' Improvement Society has been issued so as to afford members and exhibitors early intimation of the additions and alterations to the classes of the previous show. On the fourth page is a form of application, which, upon being filled up and returned to the secretary, will ensure prompt despatch of the prize lists and entry forms required. They will be ready on January 1st, 1901, the cash offered in classes of the Hunters' Improvement Society amounting to £1,160, and in classes of Polo Pony Society to £426.

I would remind intending exhibitors at the West of England Fat Stock and Poultry Society's Show that the entries close on Saturday next, the 24th inst. The show, which will be the society's thirtieth annual fixture, will be held in Devonport Market on December 12th and 13th. The prizes offered include several specials, and amount in value to about £450.

Lord Rothschild's Shorthorn Cow, "Olivette Ingram," First Prize at the Dairy Show.

Norwich Cattle Show.

The first of the principal Christmas fat cattle shows of the season will commence on Thursday next, when the twenty-fourth annual exhibition of the above association opens at the Agricultural Hall, Norwich, under the presidency of Mr. A. W. Soames, M.P. The show opens at 10 a.m. on Thursday (at which hour catalogues may be obtained), and the admission each day will be as follows:—Thursday, from 10 a.m. to 3 p.m., 2s. 6d., from 3 p.m. to 9.30 p.m., 1s. All day Friday, from 10 a.m. to 9.30 p.m., and Saturday, 10 a.m. to 5.30 p.m., 1s. All classes are well filled, and are quite up to the average, and in some cases above, as will be seen by the following comparative statement:—

Date.	Winner of £100 Champion Prize.	Beasts.	Sheep.	Pigs.	Roots, Grain, etc.
1890	John Cridlan	91	105	60	75
1891	H.M. The Queen	101	96	48	25
1892	J. J. Colman	98	117	36	33
1893	C. Stephenson	123	111	30	42
1894	H.M. The Queen	85	75	36	12
1895	J. J. Colman	77	57	18	30
1896	J. Wortley	120	93	24	26
1897	J. Wortley	111	114	24	33
1898	J. J. Colman's Exrs.	119	81	51	38
1899	H.M. The Queen	123	93	24	35
1900		90	105	48	31

Entries have been received from most of the noted breeders and graziers in the Kingdom, including Royalty, and keen competition in all classes is anticipated, and the judging, which will commence on the Thursday, at 10 o'clock, will be watched with much interest by exhibitors who will be anxious to see what is coming out.

The prize list, amounting to nearly £700, comprises eighteen classes for cattle, with prizes amounting to nearly £460, which includes a number of specials. The best beast in the show will win the champion prize, amounting to £100. Seven classes for sheep, with prizes amounting to nearly £90, including specials. The best pen of sheep in the show will win prizes amounting to £15. Three classes for pigs, with prizes amounting to over £26, which includes a special prize of £5 5s. for the best pen of pigs in the show. Seven classes for roots and grain, with prizes amounting to £11 10s. Ten classes for dressed and undressed poultry, with prizes amounting to £15. Twelve classes for butter, cheese, eggs, etc., with prizes amounting to £28 15s. This includes £10 offered by the Technical Education Committee of the Norfolk County Council for three classes for butter and cheese exhibited by students who have regularly attended classes in the county. Sixteen classes for garden produce, etc., with prizes amounting to £5 5s., for cottagers and holders of allotments under thirty rod.

Judges from different parts of England have been selected to adjudicate the awards in the various departments.

The Assembly Room, as usual, will be an effective feature of the show. Here will be exhibited the dead poultry, butter, cheese, eggs, etc., including the ornamental butter which is so greatly admired and looked upon as quite a work of art; also including the students of the Technical Education Committee of the Norfolk County Council, exhibits of butter and cheese. This proved a very interesting feature last year, and a numerous entry has been received this, so that keen competition may be anticipated.

The Great Eastern and Midland and Great Northern joint Railway Companies have made arrangements to convey the public at reduced fares, and have also provided special trains, particulars of which are advertised by the companies, for which see bills.

The necessary arrangements for fitting up the Hall for the accommodation of the stock and stand holders (which each year grows in demand) are well in hand under the direction of the secretary, and with such a capital entry all round, leaves nothing to be desired to ensure success but fine weather and a good attendance.

Next year's show of the Herefordshire and Worcestershire Agricultural Society will be held at Evesham on Tuesday, Wednesday, and Thursday, June 11th, 12th, and 13th.

Surveyors' Institution.—Next ordinary general meeting will be held on Monday, November 26th, when a paper will be read by Mr. A. T. Walmisley (Fellow), entitled "The Roofing of Farm Buildings." The chair will be taken at eight o'clock.

Milk Prosecutions.—At Stratford Police Court on Saturday, William Mitson, a milk dealer, of 100, Harrow Road, Leytonstone, was summoned for selling milk adulterated with 25 per cent. of added water. Mr. M'Kirdy, the Essex County Council inspector, proved the case, and the defendant pleaded that he had sold the milk as he had bought it. The Bench reminded him that he had been fined twice before, and inflicted a penalty of £10 and costs. John Dyer, a milkman of Cowslip Road, George Lane, South Woodford, was summoned for refusing to serve a reasonable quantity of milk to Mr. M'Kirdy, an inspector under the Food and Drugs Act. Defendant said he only had a little milk in the can the inspector wanted it from, but he offered to let him have some from a churn. He was fined 40s. and costs.

The Nantwich Rural Council and Tuberculous Cattle.

At the meeting of the Nantwich Rural District Council, held on the 10th inst., Dr. Turner, medical officer of health, asked for powers to enable him to take action against persons suspected of improperly disposing of the carcases of cattle affected with tubercle. He explained that the Manchester Corporation were displaying considerable activity in the matter, and were taking action against a farmer in the Council's district for not having reported to them the sale of tuberculous meat, which was sent by a middleman to Manchester.

The Vice-Chairman (Mr. C. B. Davies) said it seemed to hm that the intermediate buyer was going to get off scot-free, whilst the farmer, for having neglected to notify the Corporation, was going to be made to suffer.

Dr. Turner said the corporation had decided to prosecute unless the farmer could show that he sold the carcase for knackering purposes.

The Vice-Chairman said he did not think it would be right for the Corporation to be down on the farmer because they missed the intermediate dealer.

Mr. Wood said the matter was a very important one. The public required to be protected. The Council empowered the medical officer and the clerk to take the necessary steps for a prosecution in cases which might come under their notice.

Transactions in Store Stock.

[From the Irish Department of Agriculture and Technical Instruction.]

The fair at Enniskillen, co. Fermanagh, on the 10th inst. was a large one, composed chiefly of two and three-year-old cattle, for which demand was rather dull. Prices:—Calves, first class, £5 3s. 4d. to £5 10s.; second class, £4 3s. 4d. to £4 10s.; third class, £2 10s. to £2 15s. Yearlings, first class, £8 to £9; second class, £6 10s. to £7 7s. 6d.; third class, £5 1s. 8d. to £5 12s. 6d. Two-year-olds, first class, £11 5s. to £13 10s.; second class, £8 to £10 10s.; third class, £6 16s. to £7 5s. Three-year-olds, second class, £13 5s. to £14 10s.; third class, £8 10s. to £10 17s. 6d. Springers, first class, £16 6s. 8d. to £21 5s.; second class, £12 10s. to £14 10s.; third class, £9 5s. to £10 10s. Young pigs, eight to ten weeks old, sold at from 16s. to 22s. each.

There was an average-sized fair at Killarney, co. Kerry, on Monday, and a good demand prevailed at the following prices:—Calves, second class, £3 12s. 6d. to £4 7s. 6d.; third class, £2 5s. to £3 7s. 6d. Yearlings, second class, £5 10s. to £6 17s. 6d.; third class, £4 to £5 5s. Two-year-olds, second class, £7 5s. to £10 2s. 6d.; third class, £5 5s. to £6 10s. Three-year-olds, third class, £6 to £6 17s. 6d. Springers, first class, £12 5s. to £15; third class, £8 to £11 12s. 6d.

At Mullingar, co. Westmeath, on Monday, there was a very large fair, composed to a considerable extent of first and second class three-year-old cattle Some choice lots were fairly well placed, but on the whole the fair was a dragging one, and prices showed a downward tendency. There was a small supply of sheep. Shipping lambs and hoggets met a fair trade, but middling sorts were slow to sell. Prices:—Calves, first class, £4 15s. to £6 5s.; second class, £3 15s. to £4 10s. Yearlings, first class, £8 5s. to £9 10s.; second class, £5 17s. 6d. to £7. Two-year-olds, first class, £11 5s. to £12; second class, £8 10s to £10 10s.; third class, £6 10s. to £7. Three-year olds, first class, £13 17s. 6d. to £16 15s.; second class, £11 5s. to £13 10s.; third class, £8 10s. Springers, first class, £16 10s. to £17 15s.; second class, £13 to £14 10s.; third class, £10. Lambs, first class, £1 9s. to £1 13s.; second class, £1 5s. to £1 7s. 6d. Over twelve and under twenty-four months old, first class, £2 2s. to £2 10s.; second class, £1 12s. 6d. to £1 15s.

The fair held at Newport, co. Mayo, on Monday, was a small one, composed chiefly of third class mountain cattle, for which there was a fair local demand. Prices:—Calves, third class, £2 5s. to £5. Yearlings, second class, £6 5s. to £7 15s.; third class, £4 10s. to £5 5s. Two-year-olds, second class, £8 10s. to £10; third class, £6 to £7. Three-year-olds, third class, £7 to £9 5s. Springers, third class, £8 to £9 15s.

HORSES.

Prevention of Horse Poisoning in Lincolnshire.

The twenty-first annual meeting of the Lincolnshire Horse Poisoning Prevention Association was held at Lincoln on the 9th inst., Mr. J. Pears presiding. The Right Honourable Henry Chaplin, M.P., was re-elected chairman, and Mr. J. Pears was again appointed vice-chairman. The committees were re-appointed, Mr. S. Smeeton being added to the General Committee.

The report of the committee stated that several items of expenditure had been incurred by the association during the year on behalf of members for suspected horse poisoning, but in one case only had the preliminary investigation led to a prosecution. The case was that of a waggoner in the employ of Mr. J. H. Copping, Timberland, where several horses under his care were seized with illness, and two died. The result of a *post mortem* was that there were strong appearances of arsenic poisoning. Some of the powders from the waggoner's bin were sent for analysis, together with the stomach of one horse, and it was found that both the powders and the stomach contained arsenic. The waggoner was prosecuted, and sentenced to three weeks' hard labour without the option of a fine. The expenses of the prosecution amounted to £15 8s. 9d.

One result was the addition of members to the association and insurance fund. Several names had been taken off and additions made, leaving 157 members, an increase of one, and the insurance fund had been increased by £32. The members' attention was drawn to Rule 8, which requires a veterinary certificate to be produced before cases of supposed poisoning can be taken. The financial statement showed a balance of £185 10s. 8d. to the credit of the association. The accounts of the insurance fund showed that the balance to credit was now £591 0s. 7d. The accounts were adopted.

Sale of New Forest Ponies at Chichester.

At Chichester Cattle Market on Wednesday Mr. C. Stride, of the Chichester Auction Company, brought under the hammer a little over fifty pure-bred unbroken New Forest ponies, consigned to him by Mr. W. G. Bennett, of Brockenhurst, Hants. The sale attracted a large gathering round the ring, and most of the ponies found purchasers at prices ranging from £7 or £8 to £3 10s., although in the case of a few of the smallest animals less money was paid.

Sale of Coach Horses, etc., at Tattersall's.

At Tattersall's on Monday coach horses and hunters divided attention. In a long catalogue the stud of the "Comet," from the London and Brighton road, was a strong feature; but they did not realise high prices, and 96gs. for a chestnut wheeler that had been hunted was the highest accepted bid. A little later one of the same consignment, a useful-looking grey, made 72gs.; but this was one of the picks of the basket. Count Scilern found purchasers for a matched pair of chestnuts at 100gs., and for a hack that had won prizes in the show ring at 120gs., whilst Mr. F. Pritchard obtained 105gs. for a brown harness horse and 90gs. for a bay. From the Blackmore Vale country Mr. T. H. Miller disposed of Muriel, a brown weight-carrying huntress by Lifeboat, for 100gs., and Mr. J. Farrant, with Quorn, a black horse capable of carrying 15st. to hounds for 115gs.

Sale at Bury St. Edmunds.

There was a large attendance of buyers at Messrs. Sampson and Son's Auction Mart, Bury St. Edmunds, on Wednesday, when just over a hundred horses were brought under the hammer. Amongst the consignments were two young bay hackney mares, the property of Mr. G. C. Capon, and they realised 26½gs. and 25gs. The cart horses included five belonging to Mr. J. G. Weller Poley, which were sold in consequence of one of the Low Hall farms being let. Three chestnut geldings, named Short, Prince, and Boxer, went at 36gs., 31gs., and 16½gs. respectively; whilst Jockey, a bay gelding, realised 21gs., and Snip, a chestnut mare, 10½gs. The other principal lots were: Bay mare, 5 yrs., 18½gs.; Suffolk filly, 3yrs., 16½gs.; Tinker, black gelding, 11½gs.; brown gelding, 14½gs.; [illegible] 2yrs., 23½gs.; cart colt, 2yrs., 21½gs.; brown gelding, 21½gs.; brown cob, 7yrs., 15.1 h.h., 20gs.; brown mare, rising 5yrs., 15.2 h.h., the property of Mr. H. Johnson, of Ravensfield Farm, 17gs.; black [illegible] 7yrs., 14.3 h.h., 12gs.; White Socks, chestnut gelding, 9yrs., 16 h.h., the property of Mr. C. T. Pyke, who has left the neighbourhood, 21½gs.; bay cob, 6yrs., 14.2 h.h., 19½gs.; bay cob, 8yrs., 11gs.; bay mare, 6yrs., 15gs.; bay cob, 4yrs., 14.2 h.h., 12½gs.; bay cob, 5yrs., 14.2 h.h., 14gs.; chestnut mare, 6yrs. 15.2 h.h., 17gs.

Horse Sale at Glasgow.

A special sale of horses, carriages, and harness was held on Tuesday, by Mr. Joseph Vine, within the Horse Bazaar, Port Dundas Road, Glasgow. The catalogue included 110 horses, consisting principally of carriage and harness horses, while there were also a number suitable for van and cart purposes. Carriage and draught horses secured the best demand, and realised high prices. Vanners met a rather dull trade. Cobs and ponies had a fair selling trade. Carriages and sets of harness met a dull demand, and realised very poor prices. Carriage horses of the best class realised up to 60 guineas; secondary, 20 to 28 guineas; and inferior, down to £6 10s.; best draught horses, to 40 guineas; secondary and inferior, 5 to 20 guineas; vanners, £4 10s. to 26 guineas; according to style and action; best cobs, to £30; secondary, 8 to 14 guineas; ponies, 5 to 18 guineas; and lorry animals, 10 to 36 guineas.

Sale of Mr. J. Andrews's Stud of Trotters.

An important sale of trotting horses took place at Ashton-under-Lyne on Wednesday, when the entire stud, comprising the fastest trotting horses in the kingdom, owned by Mr. J. Andrews, were put up for auction. This was brought about owing to the expiration of the lease of the trotting grounds. There was a large attendance of buyers. All the lots put up were sold, the highest price being fetched by Rustic Beauty, who was knocked down at 120gs. Details of the other animals, together with purchasers, prices paid, etc., are given below:—

		£
Little Neil, [illegible] 13.1 hands, five years	Mr [illegible]	[illegible]

The first hirings of the season at Howden were held on Tuesday, when there was a large number of [illegible] farmers and labourers. [illegible] up to £27; second [illegible] £20 to £[illegible]; [illegible] £15 to £20; youths £[illegible] to £[illegible]; boys who could plough, £10 to £12. Girls were [illegible] and young girls [illegible] to £10; experienced girls, £13 to £20; and cooks, £22 to £27 per annum.

SHEEP.

Inspection of the Champion Suffolk Flock.

In accordance with the conditions of the flock competitions organised by the Suffolk Sheep Society, the champion flock were on Monday open to the inspection of members of the society, at Walton. The honour of winning the Bristol Champion Challenge Cup for the best flock of ewes and the Pretyman Challenge Cup for the best ewe lambs was this year accorded to Mr. Herbert E. Smith, of Walton Grange. It is no small distinction to have attained, seeing that the champion flock had come into competition with the winning and reserve flocks in District A (East Suffolk), B (Mid-Suffolk), C (West Suffolk and Cambridgeshire), and D (Essex). A considerable number of gentlemen, whose names have been for some time more or less prominently connected with the best examples of the breed, were in attendance on Monday. There would doubtless have been a much larger attendance upon an occasion so attractive to breeders of Suffolk sheep had the weather been less unpropitious. There was still another and much more sad drawback to the pleasure of the visit—the serious illness of Mr. Joseph Smith, a gentleman who has devoted a lifetime to the improvement of the Suffolks as a distinctive breed of sheep, and who would without doubt have felt pride and pleasure in meeting his many friends under circumstances so specially gratifying. In consequence of Mr. Smith's indisposition, the flock was retained on the marshes near the Felixstowe Beach Railway Station, but the inspection was of rather short duration, owing to the persistent downpour of rain. There were nine score ewes on view, and they formed a grand collection, possessing as they did beautiful features, and being wide and short on the leg. There were, in addition, about thirty choice ewe lambs, reserved for addition to the flock next year, while the rams used in the flock came in for a great deal of favourable comment, two of them being prize-winners at the summer shows this year.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending Nov. 10th, 1900:—

Total for 45 weeks 1900							
Corresponding period in ..	1899 1898 1897						

NOTE.—The figures for the current Year are approximate only.

The first of the November hirings at Durham took place on the 10th inst. There was a large attendance of masters and servants, and many engagements were effected. The free registry was again in operation, and most of the domestic servants obtained their situations through this agency. Boys, £3 to £5; girls and women, £9 to £11; men, £12 to £14.

Kendal Hiring Fair.—There was a large attendance of farm servants at the hiring fair at Kendal on the 10th inst., but there seemed little disposition to come to terms, the wages asked being considerably higher than at corresponding half years previously. First-class men asked as high as £20, but a few were hired at £18; second-class men, £15 to £16; boys and youths, £6 to £10. There was a strong demand for female servants, and first-class women obtained £16 to £18; second-class women, £14 to £16; and girls, £10.

SOCIETIES.

Clydesdale Horse.

A meeting of the council of the Clydesdale Horse Society was held on Wednesday in the society's office, 93, Hope Street, Glasgow, when seventeen candidates were elected members of the society. The General Purposes Committee reported that the income for the ten months ending October 31st was about the same as the figures for last year. Accounts amounting to £30 were passed for payment.

A recommendation of the committee that a new Cawdor Challenge Cup for mares be raised by voluntary contributions, and that condition No. 3 be amended to read, "either of these cups must be won three times by an exhibitor with different animals (but not necessarily in consecutive years) before it becomes his absolute property," was adopted by the council. This condition applies only to the third Cawdor Cup for either sex.

Intimation of the award of the society's medals at the various district shows was received. It was resolved to insert the portrait of Prince Thomas (10,262) in the twenty-third volume of the Stud-book, and arrangements for the printing of the volume were gone into. A new form of export certificate to comply with the United States Customs regulations was drawn up and approved. The next meeting was fixed for Wednesday, December 19th.

Polo Pony.

Sir Richard D. Green-Price, Bart. (President), occupied the chair at a meeting of the Council of this Society, held at 12, Hanover Square, London, W., on the 8th inst.

A letter was read from the Inspector-General of Remounts acknowledging the resolution passed by the Council at their meeting in June, urging the Government to encourage breeders to supply the demand for horses of 14h. 2in. in view of their acknowledged utility in South Africa.

Upon the presentation of this letter Captain Daly urged that the War Office should be asked to purchase their horses direct from the breeders.

Mr. John Jones thought that the society should endeavour to learn from the Government the class of pony they required, and also the maximum price that they were prepared to give. Further, he thought that a committee should be appointed to interview the Inspector-General of Remounts, so that a regiment mounted upon ponies of 14h. 2in. should be formed, if only for an experiment.

Mr. Tresham Gilbey considered that it was premature just now to ask the Government these questions. The society should encourage the breeding of the best pony for riding purposes.

Mr. Marshall Dugdale thought that when a remount officer visited a certain district due notice should be given to the neighbouring farmers, naming the day, age, and price he was prepared to give. At present the dealers were those who obtained this information, and were the only ones to profit by it.

Mr. Barker said that even when Government inspections were advertised it did not beneficially affect the breeders. The Army authorities seemed to prefer to puchase horses from the dealers, and until we got reform in the Army it mattered little what the society suggested. There ought to be a buyer in each district.

Mr. Jones, in answer to Mr. Gilbey, thought that the members were breeding entirely in the dark. The Government should state definitely whether they intended patronising the 14h. 2in. horse, and on their giving a promise to this effect, the members would have something to go on in breeding. As regards what Mr. Dugdale had said, he knew of two cases where musters of 200 and 120 horses respectively were got together ready for the expected Government buyer, and in both cases only some thirty horses were finally purchased by him, the majority of the cast horses being bought at the end of the sale by various dealers, who eventually disposed of them to the Government buyer at a later date.

Sir Richard Green-Price informed the meeting that General Truman, the Inspector-General of Remounts, had given him every encouragement that the Government would consider the society's views when the question of reform in the mounted troops was being discussed by them. This society should, however, be foremost in giving advice on the subject, and he thought that Mr. Jones's motion as to the formation of a small committee was worth consideration.

Rev. F. Furse Vidal urged that if the society could induce the Government to deal direct with the breeder something would be gained.

On the motion being put to the meeting, it was unanimously resolved that a committee be appointed to confer with the Inspector-General of Remounts on the matter, and the following gentlemen were appointed to act on same:—Rev. T. F. Dale, Captain Daly, Mr. A. L. Goodson, Mr. John Jones, Mr. G. Norris Midwood, Rev. D. B. Montefiore, Mr. E. Mucklow, jun., and Sir Richard Green-Price, Bart.

Finance Committee.

Mr. Tresham Gilbey (Chairman) stated that the balance at the bank on the current account was £57 3s. 11d., with £210 on deposit; receipts since the last meeting, £153 15s.; while the members in arrear with their subscriptions amounted to twelve, as compared with fourteen last year. Accounts for payment, £101 1s. 3d., were recommended for payment. This report was adopted.

Editing Committee.

Sir Richard Green-Price reported that an entry of 333 ponies had been received for Vol. VI., as compared with 330 in Vol. V. Of this number 33 polo pony stallions were registered, as against 31 in Vol. V.; and 175 mares, as against 121. The Committee had dealt with several animals entered for inspection, while they approved the arrangements by which Lord Arthur Cecil and Professor Cossar Ewart had appointed a local committee to register entries from the Connemara district, resulting in an entry of four stallions and twenty-three mares for the new section. The reproductions of the champion stallion Rosewater and the champion mare Lightning at the last show, and groups of Welsh ponies belonging to Mr. J. Marshall Dugdale, were approved, and the Committee also agreed to insert portraits of the North Wales mare Welsh Diamond and the South Wales stallion Starlight. They fixed December 7th for considering the Stud Book proofs, while they referred to the next meeting of the Committee the conditions of entry for Volume VII., and several suggestions received from members of the society.

Horse Show Committee, &c.

Mr. G. Norris Midwood (Chairman) submitted the schedule of prizes which had been drawn up for the 1901 London Show. The Committee had increased the riding classes by dividing the older class into two, for light and heavy weights; they had allotted three prizes for the bending race and three for the jumping competition, to take place on the afternoon of Friday, March 15th. In all, including challenge cups and gold medals, the schedule of prizes would total £426, or an increase of £76. The Committee proposed no alteration in the measurement of ponies, as Mr. G. L. St. Quintin had kindly consented to place the services of the Official Measurer of Hurlingham, when appointed, at the disposal of the society. All stallions and brood mares would have to undergo a veterinary examination before entering the judging ring.

It was resolved to invite Mr. A. L. Goodson and Mr. Stuart Forster to be the stewards at the next show, while invitations had also been issued to the judges of the riding and breeding classes. The special prize of £5 which Mr. Stonebridge had placed at the disposal of the Council had been allotted for the best four or five-year-old pony in the riding classes that had never played polo.

In presenting this report, Mr. Midwood called attention to the increase which the Committee had deemed it desirable to make to the schedule of prizes at the London Show, but they thought that in view of the increasing public interest in the small horse of 14h. 2in., and his adaptability to the mounted infantry branch of the service, that the society should do all in its power to encourage breeders to produce good riding ponies. They would also learn that the Committee proposed to make a large grant to the polo pony classes at the Royal Show to be held next year at Cardiff; and, with their schemes of silver medals at various affiliated shows, they must, with their present membership, again open a special prize fund. Their membership was increasing, and no doubt they would soon be able to dispense with it, but, at any rate, they could not do so in 1901. From the figures prepared by the secretary, a sum of £400 was necessary. As a result of the chairman's appeal, £180 was subscribed in the Council-room, and it was resolved to make a special appeal to all the members.

Royal Show at Cardiff.

A letter was submitted from the Cardiff Local Committee intimating that they were prepared to offer £25 in prizes for the polo pony classes, and the Council supplemented this amount by a grant of £94, amounting in all to £119, to be allotted in seven classes for polo ponies—two for stallions, two for mares, and three for young stock—while the Polo Pony Society would also give a gold medal for the best stallion or entire colt, and a gold medal for the best mare or filly in these classes. It was also resolved to suggest to the Cardiff Local Committee the desirability of offering classes for Welsh breeding ponies, as follows:—

Stallions, not exceeding 12 hands, foaled in or previously to 1898.

Mares, not exceeding 12 hands, foaled in or previously to 1898.

Stallions, not exceeding 13 hands, foaled in or previously to 1898.

Mares, not exceeding 13 hands, foaled in or previously to 1898.

The Council urged the acceptance of these suggestions as the height of Welsh ponies varied in the different parts of the Principality, and, in view of the Royal Show being held in Cardiff next year, every encouragement should be given to Welsh pony breeders.

Country Shows in 1901.

A statement was submitted showing the award of the gold and silver medals in 1900, indicating that sixteen gold and sixteen silver medals had been allotted. The Council dealt with several protests

arising out of the awards, and drew up their scheme for 1901, viz. :—

(a) The Society's gold medals shall only be awarded at the London, Dublin, and Royal Shows under the existing conditions.

(b) The Society's silver medals shall be offered at the affiliated country shows.

(c) That such silver medals shall be only offered for breeding animals; stallions, brood mares (foal at foot by or in foal to, a registered Polo pony (stallion), and fillies one, two, and three years old. Geldings to be excluded.

(d) The amount to be offered by the affiliated societies shall be £10 for one medal, and £20 for two medals.

(e) The Polo ponies to be judged by the hunter judges.

(f) No pony to take more than one medal in the same year.

Election of Councilman.

Mr. Clervaux Morley Saunders, of Bovacott, Brandis Corner, Devon, was unanimously elected a member of the Council to fill the vacancy caused by the death of Lord Kensington.

Dublin Meeting.

The suggestions of the Irish members made at the meeting at the Royal Dublin Show :—

(a) That no pony from Ireland be admitted to the Stud Book except after inspection, and none under four years old;

(b) The desirability of systematic measurement of young stock, and the registration of heights in the Stud Book

were referred to the Editing Committee for consideration when they go into the question of conditions of entry for Vol. VII.

Next Meeting of the Council.

It was arranged that the next meeting of the Council should be held on Friday, December 14th, in the Smithfield Club week.

No. 2, Heroine 3rd, exhibited by Lady Henry Bentinck, having been inadvertently entered as August 10th (the date of calving of her sister, Heroine 5th) instead of September 2nd—a mistake pointed out by the exhibitor this cow was not entitled to the points allowed for lactation. The first milking trial prize, therefore, reverted to No. 4, Musical 86th, exhibited by Mr. J. T. Hobbs, Heroine 3rd taking the second milking prize as well as the Shorthorn Society's prize for cow in Class 1 gaining most points on inspection and in milking trials.

A vote of thanks was passed to Mrs. George Alexander in acknowledgment of her kindness and hospitality in entertaining the judge, stewards, and competitors in one of the milkers' contests which took place on the premises of Messrs. A. L. Alexander and Sons.

The next meeting of the Council was fixed to be held on Tuesday, December 11th.

Smithfield Club.

A meeting of the Council was held at the Royal Agricultural Hall on Wednesday, Mr. Leopold de Rothschild (President) in the chair. Before commencing the business of the meeting the President said he felt that the Council would like to express to Her Majesty the Queen and the Prince and Princess Christian of Schleswig-Holstein their deep regret at the sad loss which they had sustained by the death of H.R.H. Prince Christian Victor of Schleswig-Holstein. The members present knew the interest H.R.H. Prince Christian took in the Smithfield Club, and he was sure they would all desire to express their sympathy, and he begged to move that—

The Council of the Smithfield Club humbly desire to convey to Her Majesty the Queen and their Royal Highnesses the Prince and Princess Christian of Schlewig-Holstein the expression of their deep sympathy in the sad loss which they have sustained by the death of H.R.H. Prince Christian Victor of Schleswig-Holstein.

Mr. Clare Sewell Read seconded the motion, and it was unanimously adopted.

The minutes of the previous meeting were approved and signed.

A communication was read from the Home Secretary, acknowledging the resolution to Her Majesty the Queen, passed at the last meeting.

The President regretted to have to announce the death of Mr. Robert Garne, a valued colleague on the Council, and who had been a member of the Club for upwards of twenty years, and

On the motion of Mr. T. Latham, seconded by Mr. J. J. Cridlan, it was unanimously resolved that a letter of condolence and sympathy be sent to the relatives of the late Mr. Robert Garne.

A communication from the London Butchers' Trade Society, asking if the Council could include pigs in the block test, and suggesting that in the pig-classes the animals should be weighed, was, on the motion of Mr. J. Bowen-Jones, seconded by Mr. J. P. Terry, referred to the Carcase and Stock Prize Committees for consideration and report.

Mr. Clare Sewell Read, as chairman, reported that the Finance Committee had examined the banker's pass book and arranged for the audit of the Club's accounts; that the Committee had also considered the design for the Club's seal, and instructed the secretary thereon.

Sir Walter Gilbey, Bart., presented the report of the Selection Committee, recommending that the following twenty-two names (out of the twenty-five names nominated) be submitted to the members for the election therefrom of eleven members to serve on the Council in place of the eleven who retire by rotation at the ensuing annual general meeting, and who are not eligible for re-election until after the expiration of one year, viz. :—Messrs. George Adams, Richardson Carr, A. F. Milton Druce, Arthur Eggington, J. B. Ellis, G. S. Grant, George James Henry Lambert, John Lindsay, H. D. Marshall, Henry Overman, Hon. Alexander Parker, W. Parkin-Moore, William Reid, Henry Smith, Sanders Spencer, Joseph Stratton, C. W. Tindall, Henry Webb, John Wortley, William Wright, J. H. Yeomans.

This report was adopted.

Mr. Alfred Cresskill, chairman of the Improvement Committee, reported that the committee had considered the applications for space at the forthcoming show, and had allotted the same. The report was adopted.

Mr. William Coggan, as chairman, reported that the Carcase Committee had considered estimates and arranged for the carrying out of the carcase competition at the ensuing show. The report was adopted.

The report of the Council of the Club's proceedings for the present year was considered, amended, and adopted.

Applications by various societies for the use of the club room for meetings during the show were considered, and the secretary instructed thereon.

The following resolution was received from the National Sheep Breeders' Association in reply to the resolution passed by the Club in February last :—

That this Association deprecates the excessive use of dyeing or colouring of show sheep, but at the same time thinks as little interference as possible should be exercised in preventing exhibitors to show their sheep in the best possible form

Mr. J. Bowen-Jones called attention to certain local authorities adopting the method of isolation in place of slaughter in cases of swine fever, and hoped the Club would press for immediate slaughter as the best means of eradicating the disease, and he therefore moved the following resolution :—

The Council of the Smithfield Club trust that the immediate slaughter of pigs in outbreaks of swine fever will still be adhered to by the Board of Agriculture.

This was seconded by Mr. Clare Sewell Read, and adopted, and ordered to be forwarded to the President of the Board of Agriculture.

The next meeting of the Council was fixed for Tuesday, December 11th, at 11 a.m.

KERRY HILL RAM, "BAHAILLON SAMSON," BRED BY MR. R. MORGAN, BAHAILLON NEWTON, NORTH WALES, AND SOLD FOR 21GS.

British Dairy Farmers.

A meeting of the Council of the British Dairy Farmers' Association was held at 12, Hanover Square, London, W., on the 7th inst., Mr. Geo. Barham in the chair. Mr. L. C. Verrey and Mr. T. Stone were introduced and welcomed by the chairman on the occasion of their attendance at the first monthly meeting of the Council since election.

Two new members were elected, viz., the Reading Dairy Company, Limited (represented by Mr. Lee), Reading, and Edward Upton, Crabb Place, Warbleton, Sussex, whilst Major Alvord, of the U.S. Department of Agriculture (Dairy Division), was elected an honorary member of the Association.

The Finance Committee brought up a report principally connected with the recent Dairy Show, and upon their recommendation cheques amounting to £4,488 were passed for payment of prizes and other items of expenditure.

The Education and Journal Committee reported the publication of the third part of the Association's Journal for the current year, and their prospective arrangements for future issues. The report was adopted, and cheques to meet current liabilities were passed.

Upon a report with reference to the class for new inventions at the Dairy Show, it was agreed to award a silver medal to Messrs. Allen and Barker, Limited, for their "A.B." oil engine.

A certificate of the analysis of eight samples of cream taken by the steward in Classes 62 and 63 was laid before the Council. Six of these were certified to be free from preservative, and Nos. 1,173 and 1,193 respectively to contain formalin and boric acid. The conditions applicable to these classes required the exhibits to be without any admixture either for colour, taste, thickening, or preserving, and it was resolved to disqualify exhibits Nos. 1,173 and 1,193. The second prize for "cream other than clotted" will, therefore, be awarded to the Mid-Sussex Dairy Company, Limited.

It was also reported to the Council that in consequence of the date of last calving of Shorthorn cow

FIRST-CLASS representatives and agents required throughout the United Kingdom for the sale of "MOLASSINE"—Write for particulars to the "MOLASSINE" CO., LTD., 36, Mark Lane, London, E.C.—[ADVT.]

Highland and Agricultural Society.

A meeting of the directors of the Highland and Agricultural Society was held in the Society's offices, George IV. Bridge, Edinburgh, on the 7th inst. On the motion of Sir James Gibson Craig, Mr. A. M. Gordon of Newton, was unanimously re-elected chairman of the Board, and took the chair and returned thanks for the renewal of their confidence.

The Chairman said the Queen's exhibits at the Stirling Show had achieved such marked success that the secretary and himself had thought they should have a specially bound copy of the catalogue prepared for presentation to Her Majesty. That had been done, and Her Majesty's Commissioner, Mr. Forbes, had written stating that the Queen had instructed him to convey Her Majesty's thanks for the gift. (Applause.)

The Chairman said they had had the misfortune since their last meeting to lose by death three of their members—Mr. Maxwell of Munches, Mr. Peter M'Lagan, Pumpherston; and Mr. Anderson, Lochdhu. They were all old and respected members of the Society, and had taken an active interest in promoting the agricultural interests of Scotland. It was agreed to minute an expression of their sense of the loss which the Society had sustained by the deaths of these gentlemen, and to send copies of the resolution to their families.

The secretary intimated that the accounts of the recent Stirling Show showed that there would probably be a balance to the good of about £1,000.

A letter was read from Mr. Thomas Smith, Powrie, Dundee, claiming that the Ballindalloch Challenge Cup for the best Aberdeen-Angus cow at Stirling should be awarded to him for his second prize cow, on the ground that the first prize cow, belonging to Her Majesty the Queen, had failed to comply with the Society's calving regulations. The secretary said the Ballindalloch Cup had in the past been awarded without any regard to the calving regulations. After the decision of the judges in the showyard, the cup was handed over to the party winning it. On the recommendation of the Shows Committee, it was agreed to adhere to the custom that had prevailed in the past.

A donation of £20 was intimated from the Duke of Richmond and Gordon towards the funds of the Inverness Show of 1901 next year. Arrangements were made in connection with the show, and it was agreed that the headquarters of the Society should be at the Star on Board. The draft premium list for the show was submitted, and ordered to be circulated among members, the secretary stating that the amount was £2,359, which was £116 less than at Stirling this year, but £892 more than at Inverness in 1892.

Sir James Gibson Craig explained that the committee had in the meantime omitted poultry from the premium list. He could assure the Board and the public that that had not been done from any want

of sympathy with the poultry interest. They knew what a very important factor it was in the economy of the farm, and they were also painfully aware of the ignorance and neglect of this question which existed in many quarters, especially among the smaller farmers. They also knew the large amount of money that went abroad for poultry, and which might be kept in this country; but they felt that the money they were spending on the poultry department of the show did not receive an adequate return, and they thought a great deal more good might be done by assisting local exhibitions of poultry. They spent some £280 a year on that department of the show, and he thought the poultry interest would be better served by a regular system of aiding local shows by means of prizes. The committee did not, however, feel justified in making such a radical change as they proposed without the public being made aware of it, so that it might be discussed at their next meeting.

Some discussion took place on the regulations for the clipping of blackfaced sheep to be exhibited at the Inverness Show, Sir Robert Menzies having written suggesting that a committee of extensive sheep farmers, who were not regular tup-breeders, should be appointed to report as to what the date for clipping should be. On the recommendation of the Shows Committee it was agreed that the date for clipping should be changed from 1st January to 1st February for the Inverness Show, and that before the regulations for 1902 were prepared the question should be more fully considered by the general members of the Society.

On a letter from Mr. Charles Duncan, Little Kilmorey, it was agreed that the milking regulations with regard to the exhibition of Ayrshire cows should be done away with. A number of special prizes for the Inverness Show were intimated in addition to champion medals in each of the sections of live stock, by Mr. Cameron of Lochiel, the new president of the Society.

The Secretary intimated that the County Council of Aberdeenshire had resolved to raise £500 by voluntary assessment in aid of the funds of the Aberdeen Show of 1902, and that the Banffshire County Council had agreed to raise £150 by a similar method.

A committee which was appointed to consider the influence of different forms of ploughing recommended the Society to carry out a series of experiments on lea land, that three types of ploughs should be tried—the high-cutting plough, the broad-shared plough, and the American plough—and that the trials should take place in each of the eight show districts. The report was approved. Professor Hamilton, Aberdeen, having asked the co-operation and assistance of the Society in continuing his investigations in regard to braxy among sheep, Mr. Sinclair Scott moved a grant of £50 in aid of the investigation. On the suggestion of Mr. Shirra Gibb, Boon, it was agreed to remit the matter to the Science Committee of the Society.

Scottish Chamber.

The annual general meeting of the Scottish Chamber of Agriculture was held at Edinburgh on Tuesday, Mr. George W. Constable, of Traquair, president, in the chair. The secretary (Mr. Isaac Connell) presented the directors' annual report. They stated that the past year had been one of considerable activity. It had seen the passing into law of two important measures affecting agriculturists, these being the Agricultural Holdings Act, 1900, and the Workmen's Compensation Act, 1900. By the amendments contained in the former of these Acts the directors were of opinion that the agriculturists of Scotland had had considerable benefits conferred on them. They considered that the provision for giving compensation for corn grown and consumed on the holding, for laying down temporary pasture, for dispensing with the necessity of notice of intention to claim, for appointing official arbiters by the Board of Agriculture, and generally extending the powers of that Board in connection with the Act, were all in the right direction. Another change of benefit to agriculturists has been effected by the order of the Privy Council to the effect of excluding from the operation of the Pharmacy Acts sheep dips or other articles containing carbolic acid and used for the washing of sheep or for other agricultural purposes.

The directors desired to remind the members that the Agricultural Rates Relief Act would lapse unless renewed next year, and they thought it of the utmost importance that every agricultural society in the country should raise its voice and support the recommendations of the Royal Commission on Rating in order to ensure the renewal of the Act.

The Chairman, in moving the adoption of the report, said he thought they would agree with him when he said the interests of agriculture in Scotland had been carefully watched and safeguarded by the directors during the past year. (Applause.) Touching on the Agricultural Holdings Act, he expressed the hope that it would prove a boon to the agriculturists of Scotland. He expressed the hope that the directors would press upon the Government during the coming year the necessity for inquiry into the cause of "louping ill," with the view of finding out if there was any cure for the disease. It had been a matter of considerable disappointment to the directors that Mr Long was unable to meet with the Scottish agriculturists in Glasgow, and now there was no chance of Mr. Long appearing again as President of the Board of Agriculture. They trusted that Mr. Long's successor might see his way in a very short period to visit Scotland. Whoever that gentleman might be, he would have some difficulty in filling Mr. Long's shoes.

Mr. Constable concluded by expressing the very deep debt of gratitude the agriculturists of Scotland owed to Mr. Long for the interest he had taken in them. (Applause.)

Mr. Alex. Cross, M.P., was elected honorary president of the Chamber, and Mr. Cunningham of Dallachy, Burntisland, president. The latter having taken the chair, thanked the Chamber for the honour done him.

A short discussion on the Agricultural Holdings Act having taken place, Mr. J. Wilson, Chapelhill, moved a resolution approving of the Agricultural Rates Relief Act as an act of justice to tenant farmers, and expressing the hope that it be continued. He said that although the Government had not dealt them justice to the utmost, seeing they were still charged upon three-eighths of their rental, still this Act had brought them somewhat into line with other ratepayers—(hear, hear)—and they were now in a much better position than ever they were before. The Chamber did not express any opinion as to the source of the money. That was a matter for the Legislature, and it was sufficient to know that they got the relief which justice demanded. He thought no Government, no Legislature, would have the conscience to propose to revert to the former state of things.

Mr. G. W. Ralston, advocate, seconded. The Secretary said all that was done by this measure was to carry out logically and uniformly a principle which was admitted in 1845, when local authorities were expressly given power to rate agricultural subjects on a different basis, and many of them did assess them at one-third or one-fourth of their rental. The resolution was adopted.

Council Meeting.

A meeting of the directors of the Scottish Chamber of Agriculture was held in No. 5, St. Andrew Square, Edinburgh, on the 7th inst., Mr. G. W. Constable, Traquair, presiding.

A letter was read on behalf of the secretary of the Board of Agriculture acknowledging receipt of the directors' resolutions passed at a recent meeting, and assuring them that Mr. Long very much appreciated the expression of approval of the Chamber of his work in connection with the passing of the Agricultural Holdings Act, 1900; and also stating that the views of the Chamber with regard to the consolidation of the Agricultural Holdings Acts would receive Mr. Long's careful consideration. The directors agreed to recommend to the annual meeting the election of the following office-bearers:—Honorary president, the Hon. James Hozier, M.P.; honorary vice-presidents, the county members of Parliament; president, Mr. Cunningham of Dallachy; vice-president, Mr. Shields of Dolphinston, Tranent.

A draft of the annual report was read and approved of. Some discussion arose as to the terms of the motion to be proposed at the annual meeting with regard to the Agricultural Rates Relief Act. Ultimately it was agreed, Mr. Rutherford, Crailing Tofts, Kelso, dissenting, that the terms should be as follows:—"Approve of the Agricultural Rates Relief Act as an act of justice to tenant farmers, and express the hope that it be continued."

Lincoln Longwool Sheep-Breeders.

The Council of the Lincoln Longwool Sheep-Breeders' Association met at the Lincolnshire Agricultural Society's rooms, Lincoln, on the 9th inst., Sir John H. Thorold, Bart., in the chair. Mr. T. T. Campion (of East Heslerton, York), Mr. J. B. Mellor (Over Haddon with Bakewell), and Mr. C. Pate (of Canwick Heath) were elected members subject to the inspection of their flocks. Inspectors were appointed to see and report upon each flock. It was decided to hold sales of rams at Lincoln on the 2nd of August and 6th of September next, and sale regulations were provisionally agreed to. It was also decided that special prizes should be given as usual next year through the Royal, Yorkshire, Lincolnshire, Nottinghamshire, and Leicestershire Societies. The Council adjourned to the 30th November. The Editing Committee meet on the same day.

Lincolnshire.

The first meeting of the Council of the above society for the present season was held at Lincoln on the 9th inst. The Earl of Yarborough presided. The Finance Committee were re-appointed. The Secretary reported an investment of £400 in Consols. Numerous suggestions of members were considered, and instructions given in reference thereto.

Several special prizes, offered through the Brigg Local Committee, were accepted with thanks, and a committee was appointed to prepare a prize list for the Brigg meeting, and to select judges. Mr. D. Grant, Brigg, undertook to procure supplies of hay, green fodder, and straw, and the Finance Committee were requested to obtain tenders for wood.

Upon the suggestion of the Brigg Local Committee the Secretary was requested to communicate with the executive of the Brigg and Scunthorpe District Agricultural Associations with a view to ascertain whether any arrangement could be made to suspend their annual exhibitions for one year, so as to render this Society's exhibition for the district the more successful for the ensuing year.

The Secretary was instructed to send a copy of the pamphlet for the year to several landowners in the county, and invite them to become vice-presidents.

The Secretary reported that Mr. John St. Vigor Fox, of Grisby Manor, had contributed a vice-president's life subscription of £50.

National Sheepbreeders' Association.

At the last meeting of the Council of the National Sheepbreeders' Association the report of the executive committee was submitted and in part adopted as follows:—

1. That, under the existent state of affairs, with no agreement between the home and the colonial and foreign sheep societies as to the admission of sheep into their records, not only it is possible, but it actually occurs, that these societies can and have admitted into their records sheep which previously to being shipped from England were unrecorded, and presumably ineligible for record.

2. That, provided the recommendation of the York Conference be adopted by all breed societies at home and their corresponding societies in other countries, the state of affairs as stated in No. 1 would be impossible, and the whole of the export trade in registered pure-bred sheep would be confined to the members of the different sheep societies adopting the same, and—

(*a*) Those breeders who keep registered pure-bred flocks will secure their just share of the demand, a portion of which either does or may under the present system go to others than themselves.

(*b*) The different registered pure breeds will no longer be liable to suffer damage by reason of other than registered pure-bred animals being exported as such.

3. That, although the Committee consider it would be desirable that the regulations of the home societies should be more uniform, they do not at the present juncture make any definite proposals other than those necessary for the carrying out of the recommendations of the Conference in connection with the transference of registered sheep from their record in one country to that of another.

4. That, provided the resolutions of the Conference be adopted by the societies represented at the Conference, it is recommended that the societies interested shall adopt the following regulations, to be applicable to all sheep which are transferred from their record in one country to that of another, or, in other words, sheep which are exported from the country of their birth:—

(*a*) That every sheep transferred or exported be individually entered in the Flock Book and numbered.

(*d*) That the secretary of the society to which the sheep being transferred or exported belongs shall send with the said sheep a certificate of transfer or export, upon which shall be given its full pedigree and Flock Book number (or in the case where this is not allotted at once, its provisional number, the former being sent to the secretary of the society to which it is transferred so soon as given), the name of its breeder, vendor, consignor, and consignee, the certificate being signed by the secretary of the society issuing the same, and stamped with its corporate seal.

N.B.—This, provided that Sub-sec. A be adopted, would mean its sire and dam, their Flock Book numbers and breeders.

(*e*) That the breeder of the sheep to be transferred apply for the transfer or export certificate, and pay the cost of the same.

(*f*) That the secretary issuing the certificate of transfer or export shall furnish a press copy of the same to the secretary of the society to which it is being transferred.

(*g*) Every export certificate shall be accompanied by a sanitary certificate signed by a duly qualified veterinary surgeon, testifying that the animal or animals in question are not suffering from any disease, and by a sworn affidavit from the vendor to testify that no contagious disease has existed on the farm for three months previous to the date of their shipment, and that they have not been in contact with any diseased animals during that time; and any other certificates which the import regulations of any importing country may from time to time require.

The following sections formed part of the original report, but were not adopted by the Council:—

(*b*) That the sire and dam of every sheep transferred or exported be individually entered in the Flock Book and numbered, their breeder and full pedigree being given.

(*c*) That every sheep transferred or exported be legibly, individually numbered in its right ear or horns with its breeder's private number referring to his private flock record, and in its left ear or horn the breeder's registered flock number and the society's registered trade mark.

N.B.—This, provided that Sub-Sec. B be adopted, would mean its sire and dam, their Flock Book numbers and breeders.

National Sheep Breeders' Association.

THE FOLLOWING TABLE IS AN EPITOME OF THE RULES AND REGULATIONS OF THE VARIOUS FLOCK BOOK SOCIETIES. (Drawn up and issued by the National Sheep Breeders' Association.)

	COTSWOLD.	DEVON LONG WOOL.	DORSET HORN.	HAMPSHIRE DOWN.	KENT OR ROMNEY MARSH.	LEICESTER.	LINCOLN LONG WOOL.	OXFORD DOWN.	SHROPSHIRES.	SOUTHDOWN.	SUFFOLK.	WENSLEYDALE.
PRINCIPAL CONDITIONS OF FLOCK ENTRY :—												
1. Membership necessary	Yes	Yes.	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
2. Submission of history previous to acceptance	Not definitely stated	Not definitely stated	Not definitely stated	Not definitely stated	Compulsory	Not definitely stated	Compulsory	Not definitely stated	Not definitely stated	Not definitely stated	Not definitely stated	Not definitely stated
3. Inspection necessary	Yes, if thought desirable	Yes	Yes	Yes	Compulsory	—	Yes	Yes	—	Yes	Yes; and every four years	—
4. Qualifications of Sheep eligible for Entry	Any accepted by Editing Committee	Any passed by Inspectors	No Ewe that has been served by other than a pure-bred Ram bred by members only	Registered Sheep or by inspection if for five years previously Registered Sires have been used	Rams produced of a Registered Sire Ewes from flocks wherein none but Registered Rams have been used for previous two years	No conditions made	Registered Sires for four previous years	To be pure bred	No sheep other than the produce of a Registered Flock or directly descended from one	To be pure bred	Pure-bred, which since 1890 are only such that have the Trade Mark in their left ear	None named
5. Flock Numbers allotted	No; letters given	Yes	Yes	No	Yes	No	Yes	No	No	Yes	Yes	No
6. Trade Marked with Registered Trade Mark and Owner's Flock Number	No	Yes	No	No	Yes	No	Yes	No	No	Voluntary	Yes	No
7. How done, Tattooed in left Ear	No	Yes	No	No	Yes	No	Yes	No	No	Yes	Yes	No
8. Individual Registration of Sires used in Flock compulsory or not	Voluntary	Compulsory	Compulsory	Compulsory	Compulsory	Voluntary	Compulsory	Compulsory	Compulsory	Voluntary	Compulsory	Compulsory
9. To make an Annual Flock Return	Annual Flock Returns Made	Compulsory	Compulsory	Compulsory	Compulsory	Compulsory	Compulsory	Compulsory	Compulsory	Compulsory	Compulsory	Compulsory
PRINCIPAL CONDITIONS APPLICABLE TO SUBSEQUENT PURCHASES OF EWES OR LAMBS :—												
10. Source from whence they may be obtained, etc.	No provision made	Pure flocks, inspected and Trade Marked	Must be bred by members	From Registered Flocks;	Produce of Registered Sires, two crosses, inspected and Trade Marked	No specific provision made	Registered Flocks only	No specific provision made	Registered Flocks only	Any pure Flock by inspection	Registered Flocks only	Particulars of breeding to be supplied
11. Identification: Registered Sheep from Non-registered	No provision made	Trade Mark, etc., left ear	Registration of owner's private mark	None	Trade Mark, etc., left ear	None	Trade Mark, etc., left ear	None	None	Trade Mark, etc., left ear	Trade Mark, etc., left ear	None
12. Identification of individually Registered Rams or Ewes	No provision made	Trade Mark, etc., left ear, owner's private No. in right ear	No provision made	No provision made	Trade Mark, etc., left ear. Owner's private number right ear	No provision made	Trade Mark, etc., left ear. Other voluntary Ewes not individually entered	No provision made	No provision made	Trade Mark, etc., left ear, and owner's private No. right ear	Trade Mark, etc., left ear. Flock Book Number right ear. Ewes not individually entered	No provision made
CONDITIONS OF INDIVIDUAL REGISTRATION, RAMS AND EWES :												
13. To be Trade Marked in left Ear with owner's Flock Number and the Registered Trade Mark and individually numbered in right Ear [Other than as stated above, it is generally required with some slight variations that all Sheep offered for individual Registration must be named, and the Name and Address of Breeder, Sire and Flock Book Number, Dam, her Breeder and Date of Birth]	Not required	Compulsory	Not required	Not required	Compulsory	Not required	Compulsory except individual number	Not required	Not required	Compulsory for Registered sheep	Compulsory	Not required
CONDITIONS OF THE ISSUE OF ENTRY CERTIFICATES.												
14. Must be individually Registered in Flock Book	Not compulsory	Yes	Not compulsory	Not compulsory	Yes	—	Not compulsory	Yes	—	Yes	—	—
15. Require Registered Name, Number, and Purchaser's and Vendor's Name and Address	—	Yes	—	—	Yes	—	—	—	—	Yes		
16. Signatures required	Breeder, Vendor, and Secretary	Secretary	Breeder, Vendor, Secretary	—	Secretary	Breeder, Vendor, Secretary	Breeder, Vendor, Secretary	Breeder, Vendor, Secretary	Breeder, Vendor, Secretary	Secretary	—	Breeder, Vendor, Secretary
17. Identification	Ear or distinctive mark	Nos. 11 and 12	Mark of identification	—	Nos. 11 and 12.	—	No. 11	Ear mark.	Ear or distinctive mark	Nos. 11 and 12 for registered sheep		Ear or distinctive mark
18. Qualification	Sire Dam, G. Dam, G. G. Dam, and G. G. G. Dam	Individually registered	Sire and Sire of Dam, G. D., and G. G. D.		Individually registered	Sire to three generations	Sire, G. and G. G. Sire and Flock No.	Sire and Sire of Dam. G. and G. G. Dam	Sire and Sire of Dam both to be registered	Individually registered		Sire, Sire of Dam and G. G. Dam

N.B.—The Southdown Society has two divisions in its Flock Book—Registered Sheep which are Trade Marked, and Entered Sheep which are not Trade Marked. The Suffolk has two divisions of Ram Entries—Pedigree Rams, i.e., Rams entered with Sire and Dam's pedigree; Registered Rams, i.e., Rams entered with Sire's pedigree only

Agricultural Values and Changes.*

When sixty years ago I commenced my business life in the office of a country land agent, there were very few facilities for acquiring professional knowledge, and scarcely any of the opportunities which now exist for intercourse and communication between surveyors in London and in the Provinces.

A young beginner in the country had then the greatest difficulty in obtaining instruction and information outside the practical work of the office in which he was engaged, but this want has, I am happy to say, now been supplied by the establishment of this institution. I think I may therefore venture to impress upon all and particularly upon our younger members, the importance of making good use of these advantages, so that the fact of being a member of the Institution may be, as it is intended to be, a guarantee of knowledge and efficiency in the profession.

Many changes have taken place in the work and practice of surveyors during the past 60 years. In the year 1836 two important Acts of Parliament were passed, one for the Commutation of Tithes in England and Wales, and the other for regulating Parochial Assessments, both of which soon came into operation. The Tithe Commutation Act was the means of bringing into the profession a large influx of young surveyors, of whom I happened to be one, my own experience commencing shortly before the year 1840. The Parochial Assessment Act also gave rise to a great deal of valuable work of a special kind, which, as we all know, has since assumed large proportions, the rating of railways, mines, and public works now requiring special knowledge and skill in this branch of the profession.

The introduction of railways, just at the close of the tithe surveys, and the passing of the Lands Clauses Consolidation Act of 1845 for regulating arbitration proceedings, also brought much employment to surveyors. The Public Health Act of 1848 and the subsequent Acts (particularly that of 1875 in connection with drainage and water supply) created another special branch of practice, in which many of our members are now distinguished experts.

Thus I have seen great changes in the practice of surveyors, and I am happy to say in the scale of remuneration for professional services, now more generally based upon the value of the work done and upon the skill and experience displayed than, as formerly, on the time employed. I have always held that in this as in other respects the profession owes a great debt of obligation to our former president, the late Mr. Edward Ryde.

It is, however, rather with my own branch of the profession that I propose to deal. I have thought that, as a land agent, it might not be unacceptable to the Institution if, in my opening address, I referred to some of

My Own Experiences.

In 1840, in my early days, tenant farmers in the Midland Counties were, after many years of difficulty, doing fairly well, as corn and other produce realised good prices and labour was cheap. At that time almost all kinds of farm work had to be carried on by manual and horse labour. The corn averages for the five years to 1840 were as follows:—

Wheat	55s. 9d.	per imperial quarter.
Barley	32s. 4d.	,, ,, ,,
Oats	23s. 4d.	,, ,, ,,

I find from actual returns in my possession that the prices of other farm produce were—

Beef	6d. per lb.
Milk	7d. to 8d. per imperial gallon.
Pork	7d. per lb.
Cheese	66s. per cwt. of 120 lbs.
Butter	9d. to 1s. per lb.
Wool	30s. per tod of 28 lbs.

The payments for labour of course varied very much between northern and southern counties, but in my own neighbourhood the following wages were paid:—

Wagoner and Cowman, each	2s. 2d.	per day.
Shepherds	2s.	,,
Ordinary Labourers	1s. 8d. to 2s.	,,
Farm Boys	9d. to 10d.	,,
Farm Women	9d.	,,
Piece Work.		
Mowing hay grass	3s. an acre.	
Mowing corn	2s. 6d. an acre.	
Reaping corn	5d. per thrave of 24 sheaves, or 10s. to 12s. an acre.	
Threshing by flail	4s. per quarter.	

The Farm Labourer,

while receiving these low wages, had to pay dearly for bread, and cottages, except on some large estates, were very small and poor. Those whose experience is of a comparatively recent date can have no idea of the discomforts which some labourers endured both as to cottage accommodation and the great distances which they had to travel to and from their work. There were, however, many exceptions in this respect, and, as a rule, a more kindly feeling existed between master and servant than, unfortunately, is now the case.

The change from the old poor law system was gradually making itself felt, and it is probable that the abandonment of outdoor relief and of the many allowances formerly made to labourers and their families accounts for the rise in wages which began about this period

I believe that farm rents in 1840 were based to a great extent upon the price of cattle, corn, and cheese, for at that time there was not much income from other sources, or many outgoings beyond rent and labour, as rates were low and on a reduced rateable value, in some cases about one-third less than the rental value of the farm.

The establishment of the Royal Agricultural Society and the first meetings at Oxford and Cambridge gave a

Great Impetus to Agriculture.

At the Derby meeting in 1842 there was a wonderful exhibition of live stock and improved implements. Both landowners and tenant farmers took the greatest interest in the show, and its effect on both stock and implements, and the improvement from that time of farm management was very marked indeed.

With a powerful Government supposed to be friendly to the landed interest, there seemed a promise of a great revival in all agricultural matters throughout the country. Many poor cottages were either removed or improved, and new and commodious cottages were built in large numbers; this was also the case as regards farm houses and buildings. Experiments and improvements in cropping and in the use of bones and guano and other fertilisers also became general, and the teaching of M. Liebig and others in agricultural chemistry attracted much attention among many of the leading agriculturists.

The gradual introduction of railways naturally caused further marked changes, and proved advantageous to many districts by affording increased market facilities.

But the

Repeal of the Corn Laws

in 1846 and the occurrence of the Irish Famine in 1847 gave rise to a great feeling of uncertainty, though allayed to some extent by the discovery of gold in Australia, which certainly had a great effect both upon trade and agriculture.

A good deal of strong arable land was laid down to permanent pasture, and in my own locality and other districts a large expenditure was made by landowners in deep draining and other permanent improvements. A better and more liberal system of tenant right was introduced, and much attention was paid by landowners to provide for the difficulties which then appeared to threaten agriculture. There came, however, a favourable change, and (except for the cattle plague, which was severe and disastrous in 1866 and subsequently) a general revival took place, rents increased, and landed property was much sought after and commanded high prices. It should be mentioned that the passing of the Contagious Diseases (Animals) Act conferred great benefit upon the country generally.

During the prosperous years which ensued farmers and others made a good deal of money, but when the next depression came there was unfortunately very little available farming capital to meet the emergency. Charges of extravagance in the more prosperous times were made against tenant farmers, and no doubt much money was spent that should have been laid by; but the same charge might, I fear, be brought against others, and perhaps it might be better if all classes of the community would revert to greater simplicity of habits and requirements.

The Depression

which began in 1875 and 1876, and was rendered acute by the extremely wet season of 1879, was severely felt both by landlords and tenants, and had a remarkable effect upon all dealings with agricultural land. Rents went down rapidly, and it became difficult to let ordinary agricultural land except under great concessions. Many farms fell out of occupation, and many old landowners, dependent upon comparatively limited estates, were practically reduced to poverty owing to mortgages and other charges which had been piled upon the land under prosperous circumstances, and which could not be met, in some cases, even by selling the whole property, while in the case of a sale the number of years' purchase was much reduced upon a reduced rental.

In former times the income derived from the

Public Funds

regulated to a great extent the value of agricultural land, whereas for some years during the depression the price acted in an inverse ratio, for as the funds increased in value agricultural land seemed to go down. Thus the depression was felt not only in the letting but also in the sale of agricultural land, and there was no competition in land investments except in the case of land near a town possessing a building element, in which a good deal of speculation took place.

At the beginning of the depression large percentage remissions were made by landlords upon the rentals in the hope that as seasons improved the times would improve also.

The Royal Commission which was appointed in 1880 to inquire into the cause of

Agricultural Depression

and its remedies concluded that with a return of better seasons the evil would pass away. Many eminent men of great experience were of the same opinion, as were some of the members of the Council of this Institution, as appears from a statement prepared by them which attracted a good deal of attention in Parliament at the time. But when it was found that low prices continued from year to year, with no prospect of any change for the better, rents had to be greatly and permanently reduced. Unfortunately, however, many tenants as well as landowners had to succumb altogether.

In some districts, however, a

New Trade in Milk

was gradually established which proved very beneficial. Large quantities of milk were daily sent to London and Manchester and other large towns, and thus many tenants were kept from going to the wall. The wholesale price of milk at that time averaged in the summer season about 8d. per imperial gallon after paying railway carriage, which was a very remunerative price. Cheese factories and butter factories were also established. The cheese factories, although useful in some outlying districts, did not succeed generally as the trade extended, and the wholesale price of milk became much reduced, in some cases to not more than 5d. per imperial gallon in summer. But milk and butter factories (where favourably situated) were more successful, and there is no doubt that butter of a uniformly good quality made at these factories, or even in a small way at home on the improved method, has fetched greatly improved prices, not only when sold wholesale, but also in the local markets.

While the difficulties in connection with the ownership and occupancy of land became more and more serious, the position of the labourer greatly improved, although the amount of manual labour upon a farm has been much reduced by the introduction of improved machinery and implements for almost all kinds of farm work.

Much has been done during the time of depression towards

Improving the Breed of Cattle and Horses

(particularly Shire horses), and in the rearing of poultry and production of eggs and the cultivation of garden produce in favourable localities, with great advantage to tenant farmers.

Although it has been considered that large farms may be more economically managed proportionately than smaller farms, it is now, as a matter of fact, very difficult in the Midlands to let farms of more than 200 acres, while those of 100 to 200 acres and less are much sought after, the reason being that the smaller holdings may to a great extent be managed by the tenants themselves without depending so much on hired labour. Certainly those who can give close personal attention and some personal labour have been lately the most successful farmers. Of course this does not apply to the large farms in Wiltshire and other counties, which cannot practicably be divided, and must perhaps be carried on as heretofore.

In my own experience the

Rent of Agricultural Land

has been reduced from 10 to 40 per cent. according to position as regards markets and other circumstances, and taking into consideration the ordinary charges upon the land. Of these, tithe rent-charge and land tax are in nearly all cases now paid by the landlord, but there are a number of rates and charges now piled upon the land which did not formerly exist, and which on a revision of taxation ought not to be charged upon it. This is a matter deserving close attention in the future. Many owners of settled estates have made such concessions to their tenants that they would be in a better position if they sold their property, even at the late low prices, so little income being left after making the allowances and paying off the annual charges. If landlords dealt on strict commercial principles with their estates, many of the tenants, and particularly the small occupiers, could not live.

Many of us could give instances in our own experience in which as much as 25 to 35, and even 50 per cent. in some cases, of the annual rentals have been spent annually by owners of agricultural estates on better buildings and homesteads, to enable tenants to improve their stock management. Great sympathy has also been shown and substantial assistance rendered by landlords in cases of special difficulties and loss, and it is to be hoped that the good feeling which has so long existed between landlord and tenant may continue in the future.

I have alluded to the

Great Fall in the Prices of Farm Produce

and the increased payments for labour since 1840.

I find that the average prices for five years to the end of 1899 are as follows:—

Wheat	27s. 10d.	per quarter.
Barley	24s. 3d.	,,
Oats	16s. 4d.	,,
Other farm produce:—		
Beef	6d. to 7d.	per lb.
Mutton	8d. and 9d.	,,
Cheese	55s.	per cwt.
Butter	10d. to 1s. 3d.	per lb
Wool	7d. to 8d.	,,

The payments for labour at the present time average about as follows:—

Wagoner 18s. a week and cottage 2s. = 20s.
Ordinary labourer 16s. to 18s. a week and sometimes a cottage free.

Piece Work.

Reaping corn which cannot be mown by a machine 14s. to 15s. an acre.
In some cases 18s. to 20s. an acre.

But it is not only with the increased cost of agri-

* The paper of which this is Mr. John Shaw, President of the [illegible] Session of the Surveyors' Institution, November 19th, 1900.

cultural labour, but also with its scarcity and inferior quality, that the farmer has now to contend In former times a great deal of what may be termed foreign labour could be obtained from Irishmen and others who were available periodically in time of harvest, but no supply of this kind can now be relied on.

Referring to the

Average Prices

during the last century from 1800 to 1899 inclusive, we find that—

Wheat has averaged	57s. 0d.	per imperial quarter.
Barley „	34s. 11d.	„
Oats „	23s. 8d.	„

And although the tithe rent charge has for some years been so low, the tables show that £100 fixed by the Commutation Act has during the 64 years from 1835 to 1900 averaged £96 11s. 2d., but for the present year it is only £66 15s. 9¾d.

	Wheat. Price per Quarter.	Barley. Price per Quarter.	Oats. Price per Quarter.
	s. d.	s. d.	s. d.
The average prices of corn for the five years previous to 1840, as before given were	55 9	32 4	23 4
And the average prices for five years to the present time	27 10	24 3	16 4
The reduction between 1840 and 1900 =	27 11	8 1	7 0

Taking the corn averages for the five years previous to 1870 the average prices will be:—

	Wheat. Price per Quarter.	Barley. Price per Quarter.	Oats. Price per Quarter.
	s. d.	s. d.	s. d.
	53 7	37 11	25 3
And five years to the present time as above	27 10	24 3	16 4
Reduction between 1870 and 1900 =	25 9	23 8	8 11

This shows a difference of 27s. 11d. per quarter in the price of wheat between the five years to 1840 and the five years to the present time, and 25s. 9d. per quarter between the five years to 1870 and the five years to the present time, so that we may safely take it that there has been a reduction of at least one-half in the value of the wheat crop. This is a most serious depreciation, and one of the chief causes of agricultural depression.

Notwithstanding the considerable depreciation in barley and oats, there would probably not on the whole, taking all other farm produce together, be much practical reduction in the farmer's gross income from all sources (except wheat). The labour bill and other expenses have greatly increased, but, on the other hand, railways and other improved means of transit, by giving greater facilities of marketing, have enabled tenants to overcome many of the difficulties with which they have been beset.

I think it is now generally felt that there is but

Little Prospect in the Near Future

of any increase in the price of cereals, and that we must accommodate ourselves as far as we can to the existing conditions. Most agriculturists have as far as possible accepted the fact, and with the experience of recent better seasons and an improved yield they have to some extent overcome the worst of their troubles, and those who have, by patience and courage and attention to business, done what they could, are in a much better position than they were a few years ago, though there are unfortunately still some tenants in great difficulties.

Years ago small occupiers or cow-keepers had a good trade in milk in the neighbourhood of large towns, and accommodation land commanded high rents, but in consequence of farm tenants a few miles away taking up the milk trade, there has been severe competition with the small milk sellers, who have in many cases given up their land and purchased milk from the larger farmers to retail amongst their customers, so that the rents of accommodation lands in urban districts have been very much reduced, and the rates and payments on such lands have much increased.

(To be concluded in our next.)

Notes on Argentine Agriculture.

Very few people in England know anything about the Argentine, except that it produces large quantities of corn and meat, which tends to keep the price of agricultural produce low in our own markets. The Argentine is a country of vast dimensions, reaching from the Tropics to Cape Horn. It is divided into twenty-four provinces, many of which exceed the size of England. The population of the whole of the Republic is less than that of London, and of this number one-fifth live in the capital, Buenos Ayres. This town, the finest, handsomest, and most luxurious in South America, is surrounded by the province of the same name, which, like its capital town, is the largest and richest in the country. Imagine, then, a vast tract of land, much larger than England, perfectly flat, composed of rich alluvial soil, covered with a herbage as rich as that of the best grass lands of England, and you have some idea of the

Rich Natural Resources

of this one province of the Republic. Over the whole vast expanse neither trees nor hedges are to be seen, except when in small clusters they have been planted round the farmhouses, or estancias, as they are called. You may wander, too, for many miles and dig for many yards without being able to find a stone of any description. At the present time the whole of this rich province is divided up amongst a number of large proprietors, each of whose portions is divided up into several large fields, and also separated from its neighbours by strong barbed wire fences. In the fields are to be seen thousands of cattle and sheep. The climate is so equable that the animals never need shelter. They are born in the open fields, grow there, and fatten there, and when ready are sent direct from the grass to market. On a great many of the farms the cattle are Shorthorn or polled, and it would be easy to pick many hundreds worth out here less than ten pounds each that would do well at our Christmas fat stock shows.

The Expense of Raising Cattle

by the thousand is comparatively small. There are no buildings to pay for, very little for fences, nothing for corn and cake, and the labour entailed in looking after the herds is not great. To own a few square miles of this land is to be fairly sure of a comfortable income. The principal drawbacks to be considered are droughts, floods, and disease. Every now and again a drought comes, and the whole country is burnt up, and as there is no store of artificial food the animals have to die. At the present time floods are playing havoc with the land. Over many hundreds of square miles for the last few months, where the fattest of cattle used to graze, nothing but water can be seen, and

Large Flocks of Wild Duck

have replaced the cattle. The land is so flat and the rain has been so continuous that as far as the eye can reach the water lies some four, five, or six feet deep. The oldest inhabitant had been quoted months ago as never having seen such floods as these, and since that time people have begun to wonder if this low-lying tract of country may not be returning to its previous state of sea or river estuary. At the best this year will be a heavy loss to all these low-lying farms. But the profits of the good years more than compensate for these small drawbacks. The diseases which are most prevalent are those which are either parasitic or contagious in their origin. The former are likely to prove a source of much trouble in the future, as the estanciers, like many modern English farmers, forget the elementary axiom that no one species of life can live long on one spot without drainage or renewal of surface soil, whether the life be plant or animal, and the system of the country is not to alternate horses, sheep, or cattle in the fields, but to always have one class of animal there. Of

Contagious Disease

in this province the one most prevalent is foot-and-mouth disease. During the summer and autumn months it has run through the flocks and herds, and though, being fortunately of a mild type, it has not caused a large percentage of deaths, its effect on the general condition of the animals is very marked, and the province will take some time to recover from its effects. Added to that, the disease is still rife in other provinces of the Republic, and with the approach and mild, warm weather there is a danger of a second outbreak of a more virulent type. One effect of the outbreak of foot-and-mouth disease here was the stopping of a very profitable trade which was assuming large proportions, namely, the sending of fat bullocks and sheep alive in England. The danger of introducing disease to our flocks and herds caused all British ports to be closed to stock from the Argentine. In a conversation I had recently with the Minister of Agriculture in Buenos Ayres, he expressed the hope that a *modus vivendi* would soon be found, so that animals could be again exported alive to England. Perhaps in a short time the English agriculturist may arrive at a similar desire, though by a different process of reasoning.

The Danger of Competition

to be feared arises from the fact that whereas now to put a fat bullock into the slaughter-houses at Deptford or Liverpool the importer pays at least half the prime cost of the animal in freightage, some means will be devised to convey the carcase in a fresh condition for perhaps a tenth of the cost. The amount of frozen beef and mutton is increasing yearly, and there are experiments being carried out now by sterilising the meat which promise to place the animals' carcases killed here in England as fresh and sweet as they are when shipped. If this can be done and a bullock's carcase can be delivered in England for five shillings instead of the live bullock at five pounds the farmer here can sell his meat in England for less than he gets now, and still have as big a profit. There is no doubt that the fat animal here, either bullock or sheep, is as fat and of as good quality as the animal bred at home, and has had the advantage of always living out of doors. With careful arrangements for a proper inspection of live stock leaving this country, and with careful quarantine in England until the animals are slaughtered, there would be very little danger of the conveyance of contagious disease. The other contagious disease, and which chiefly affects English agriculture, is tuberculosis. Every animal landed in this country is subjected to

The Tuberculin Test.

and those which react are slaughtered. Up to the present some fifty odd animals have been killed, and only in one case has a post-mortem examination shown the test to be incorrect. Many of these animals had been tested in England and France, and before embarkation certified free from disease. As most of the animals imported cost [illegible] of pounds, this apparent [illegible] to say the least, aggravating to [illegible] are inclined to lay the fault to the [illegible] The Ministers and Director of Agriculture [illegible] given me permission to see any animals [illegible] tested while I am here, and although I have not been able to avail myself of the permission I hope to do so shortly. As far as I can gather the test here is very carefully carried out, and I am inclined to think, from a very considerable experience in [illegible] land, that it may

Not be the Test that is Wrong,

but the method of applying it in England or France. Few people realise that tuberculin [illegible] delicate physiological reaction, requiring great care in detail in its execution, and owners of animals [illegible] for export are inclined to look upon it as a tax to be paid before the animals are shipped. Much [illegible] could be prevented if the English and Argentine Governments. France has at present all its animals interdicted could arrange to have all animals officially tested in England before they are embarked instead of after the expense and inconvenience of conveying them here. Somewhat as a set-off against the losses of foot-and-mouth disease and the flood during the last six months has been the

Enhanced Prices of Horses.

When the war in South Africa began the English Government began to buy horses here, as well as in other parts of the world. The country teems with horses, but there was no market for them. Many good useful riding horses were sold for some two and three pounds each, and thousands were sent to the slaughter houses for the price of their skin and fat. Since the English Government commenced buying some twenty-five thousand of these horses have been sent to South Africa for the mounted infantry. Although there are such large numbers of horses in the country it has not been easy to pick the number wanted by the Government. In the first place, the native idea of a good horse is one that he has ridden himself for some time, which suffers from chronic infirmities, is very poor in condition, and in make and shape may be described as having a head, four legs, and a body. When the English buyers have travelled some distance to see some hundreds of horses collected at a centre for them, of which they are assured there will be two or three hundred suited to their requirements, they may be able to get only ten or twenty. This, when perhaps a thousand horses are required at a week or fortnight's notice, often very largely handicapped the buyers. Again, the horses required had all to be ridden before purchase, and the number of good tamed or broken horses is small compared with the number of suitable animals running wild on the camp, waiting to be broken or killed for grease. So, too, the animals ordered to be purchased by the Government were the comparatively big and fat animals from the rich grass lands of Buenos Ayres. The small, ugly, weedy, wiry ponies of the warmer provinces were not considered suitable. Unfortunately this very exceptional winter of perpetual rain and floods has reduced horses as well as other stock to a thin condition, and those horses which do carry any flesh or fat are often useless animals that have done nothing for months but graze on flood grass, not a very fitting conditioning for a campaign. In spite of many adverse conditions horses have been bought and those owners in the country are being educated in a practical manner to the fact that defective eyes, bad joints, ugly colours in horses may make a pecuniary difference to them. At the same time the uncertainty of

War Office Requirements,

the thought that each cargo was the last, has prevented owners breaking in, training and conditioning suitable horses, as they would otherwise do. If the Remount authorities chose to take the time and pains they could buy a great number of quite good, whole-colour, mounted infantry cobs at a moderate price. These cobs, when taught to eat dry food—hay and corn—and given time to condition and get used to the English way of bridling, of trotting, and of galloping, which are different to the Argentine way, would prove a very superior article to the soft, grass-fed, hurriedly-purchased animals sent [illegible] campaign. But the two hundred thousand pounds of gold that they have brought into the country has helped to lessen the dreariness of the winter's agriculture, and has made a market value for horses where previously none existed. Already other European countries have commissioners out [illegible] to purchase.

HAROLD SESSIONS

Mr. Gilbert Bedford Holltum, a well-known agriculturist and chairman of the Thame Guardians, died on Saturday. He attended the Mayor's dinner at Ramsgate on Friday night, and shortly after returning home was seized with a fit, from which he never recovered. The deceased was fifty-eight years of age.

There were few farm servants seeking places than usual at Penrith Statute Hiring, held on Tuesday. Female servants were very scarce. Men received £14 to £15 10s., and lads from £8 to £17; good men, £10 10s. to £14; youths, £7 to £10; first-class women, £10 10s. to £12; women, £8 to £10; and girls, £5 10s. to £7 10s. The St Andrew's Rooms were opened as a free register

By LUPULIN.

Colonel Brookfield, M.P., and the Hop Growers' Association.

A luncheon was given at the Holborn Restaurant on Monday, under the auspices of the National Association of English Hop Growers, to Colonel Brookfield, M.P., on his return from the South African campaign. Mr. W. W. Berry, Selling, Faversham, occupied the chair, and the company also included Lieut.-Colonel Cheesman, Ashford; Major Honeyball, Teynham; Mr. E. Albert White, Beltring; Mr. A. S. White, Bowhill, Maidstone; Mr. James Chalcroft, Aldersnapp, Petersfield; Mr. A. D. Hall, M.A., Principal of Wye College; Mr. C. W. Seward; Mr. G. Barham, J.P., Snape, Wadhurst; and Mr. Arthur Lord.

The toast of "The Queen" having been drunk with musical honours,

The Chairman proposed the health of Colonel Brookfield. He said he had hesitated, or rather wished to hesitate, very much when it was suggested that he should preside here. He felt absolutely unequal to the task set him in referring in suitable terms to the matter upon which they had met. But no sooner had he taken his seat beside Colonel Brookfield than feelings of that kind vanished. He remembered that they had received immense kindness and help from their guest in the past, and that they were there simply for the purpose of giving him the heartiest possible reception on his return amongst them again. He had a little memorandum to help him to remember one or two things which he should mention, and he would just read it before he said anything more. When Colonel Brookfield left them rather suddenly to take up his duties in South Africa he went out in command of the 14th Battalion of the Imperial Yeomanry. The battalion was composed as follows:—One company East Kent, one company Sussex, one Northumberland, and one Middlesex. Soon after reaching Kroonstadt he was given command of a brigade of cavalry, and his first engagement was on the 22nd June, when he was sent to relieve the garrison at Kaatbosch. He was being hard pressed by a commando of the enemy about 1,000 strong. Colonel Brookfield succeeded in taking the enemy by surprise, and was favourably mentioned by General Knox in his despatch. Two days later Colonel Brookfield was ordered to proceed in charge of a convoy to Lindley, where General Paget was anxiously waiting for the means to advance to Bethlehem. The convoy under Colonel Brookfield's command consisted of seventy-three ox wagons and three traction engines, and the force he had to protect it with comprised 1,000 mounted men, six field guns, including the C.I.V. battery, one battalion of militia, and half a battalion of regular infantry being the Yorkshire Light Infantry. Four engagements were fought before Lindley was reached, Colonel Brookfield's opponent being the redoubtable Christian de Wet. For the convoy actions Colonel Brookfield received favourable mention from General Kelly-Kenny, and later on thanks from the Commander-in-Chief. (Hear, hear.) Soon after reaching Lindley Colonel Brookfield moved out with General Paget's forces, forming for his brigade an advance cavalry screen in the advance against Bethlehem. Some hard fighting took place, especially on 2nd July. When the troops had entered Bethlehem a junction had been effected with General Hunter and General Clements, and Colonel Brookfield's force was redistributed, he himself being made Governor of Bethlehem. He was present at the capture of Vryburg and the battle of Retjief Nek, where the Royal Sussex battalion lost so heavily. At Vryburg Colonel Brookfield was given charge of Mrs. Steyn and her children. Including small affairs Colonel Brookfield took part in fourteen engagements and was never hit. He knew that it would be distasteful to Colonel Brookfield if he enlarged on any of these matters. He had given them the principal features of the Colonel's experience in South Africa, and they would hear from him, no doubt, some very interesting details. For a good many years Colonel Brookfield had taken every possible opportunity of doing a good turn to his friends the hop growers, both in and out of Parliament. Some eight or nine years ago, when it was decided to form the Hop-growers' Association, they had the assistance of numerous members of Parliament, foremost amongst whom was Colonel Brookfield. It was the attention and energy which he had put into their affairs which had enabled them to hold together, and to do that amount of good which they had been able to do. (Hear, hear.) That gathering was only small in number, but it represented the whole of the hop-growers of the country. They one and all wished to join them in saying how heartily glad they were that he had been brought safe home again, and looked forward to his presidency, when they would be able still to hold successful meetings, and do something further than had yet been done towards assisting the industry in hop growing. (Hear, hear.)

Colonel Brookfield, who was enthusiastically received, said he appreciated more than he could describe in words the great kindness they had shown and the honour they had done him on this occasion. He was getting almost accustomed to be fêted on account of a few weeks spend in South Africa, which was a proceeding entirely of his own free will, and of which he did not feel he deserved any credit whatever. Two of the public bodies with whom he was most closely associated not only paid him the compliment of giving him a reception on his return, but also were kind enough to give him a send-off as well. They speeded the parting guest as well as welcoming the coming. And besides the Corporation of Rye, who were so extremely kind to him, he had always remembered the great kindness he had received from that Association. He believed they had invited him to an entertainment similar to this. He was unable to be present, so they gave him some very material evidences of their goodwill in some handsome presents, which were of the greatest use to him afterwards. The chairman, in the far too kind words which he had delivered, spoke of his (Colonel Brookfield's) giving them some details of his military experiences. He was afraid they would sound extremely tame and commonplace if they did not take the opposite nature of braggadocio, which he thought was the one thing a person should avoid who had been on active service. But he could tell them the adventures of the telescope and the burning glass and sketching block, and the illuminated address which they so kindly presented him with, and, shortly speaking, the illuminated address, which he thought he valued most of all for the very kind and gracefully-worded expressions it contained, he left behind him. The telescope was his faithful companion on all those hazardous occasions to which the chairman had referred, and without boasting of his own achievements he could only say that the telescope two or three times had a very narrow escape. (Laughter.) They would see in some remarks made last night by that great soldier, Sir Redvers Buller, who had just returned—(hear, hear)—that he referred to the superiority the enemy enjoyed in having better eyesight than ours, or, as he should put it, being better accustomed to the very clear peculiar atmosphere, which often led our soldiers astray when they first got out there. To give them a concrete example, when they first arrived in the country they would send and tell somebody to go to a certain hill, thinking it was about four miles off and find it was eleven. Everyone made the same mistake. It was universal. They would see the application of this digression when he said how greatly he valued the handsome telescope that they presented him with. For ordinary purposes he thought they would all be prepared to give a little gratuitous advertisement to the firm of Zeiss, who supplied the field glasses that everybody used, but it was only limited in its range, and for officers with command of any considerable force a telescope was absolutely necessary, and the instrument they had given him was of the greatest possible use. It was rather a descent to come to the burning glass, which was chiefly used for the humble but necessary purpose of lighting his pipe. But as matches were at a premium on several occasions, and as the only tobacco they could find was the very coarest damp Boer-rolled tobacco, it was an important matter keeping it alight. As they had a bright hot sun during the great part of the day the glass was usually in full working order, and he many and many a time appreciated and thought over the kindness and foresight which led them to make him that present. The sketching block was used, though not so much by himself. He very much appreciated their kindness to him in seeing him off. He should like to take that opportunity of referring to a resolution which the Association kindly passed and forwarded to him, full of kind expressions and congratulations on what they were pleased to call his successes in the field, and he only had to say that that letter dated 11th September must have crossed him on his passage home. He only received it the other day. He was extremely obliged to them for having thought of him. Now he found himself again thanking them for the generous hospitality they had accorded to him on the present occasion. It was only a case of repeating the word "Thanks" several times over, but he assured them he did it with the greatest possible sincerity and cordiality, and whatever befell him in his public career he always had a feeling of affection and esteem for the gentlemen whom he had met in connection with their common labours for the hop industry. With regard to the present position of the industry, he should think there was hardly any person present who knew less about it than himself or was less competent to say anything on the subject as regarded prices in the past year, because he had really been out of the way of hearing such things. But of course they had the usual grounds of anxiety and hopefulness and regret. What was one man's meat was another man's poison as usual, but he believed there was good ground for supposing that there would be eventually a substantial advance in prices. That was very little consolation to the general bulk of hop growers when four-fifths of the growth was already taken over by the merchants. But there were several signs of next year being a very good one, and very reasonable grounds for thinking it ought to be a particularly good one. Whatever discomfitures or misfortunes had been involved there was the fact of the steady diminution in cultivation. While that was really a disastrous thing to the labouring population, of course, it meant that the few who were left in would have less competition to face, and the competition from abroad and from the States had recently been less formidable. And there was the fact also that with the short crop this year they had an immense increase in the barrelage, which must be very disconcerting to those who were opposed to the consumption of the national beverage. He was afraid their old friend Sir Wilfrid Lawson, whom they had so often admired, would no longer be able to express his views in the House of Commons. He condoled with his friend, Mr. Berry, on the absence of Sir Wilfrid Lawson, but he dared say that the true cause of temperance would be just as much advanced by their doing what they could to promote healthy interest in the national beverage, and especially in seeing that it was made good, from the best quality of hops. Therefore he did not think it was a very disastrous piece of news that the number of barrels sold according to duty in the last ten years had increased from thirty-two millions to considerably over thirty-seven millions, and showed signs of still greater progress. He thought they should always keep in mind the main principles of their Association. Matters that to-day they might think hopeless might become perfectly feasible to-morrow. They should never forget or lose sight of the ends that they ought to have in view which would really benefit them. The present Government was in the same position as himself in one way. It had obtained a most unwieldy majority in the late elections. He did not know that that was an unmixed benefit. A Government with such a huge majority was apt to become rather careless of its friends, rather careless of pleasing people, and rather apt to perpetrate jobs occasionally. But there was no reason why they should not turn that to their account. If a huge majority made a Government more careless as to offending public opinion, why should not they offend public opinion for once by doing something for the agricultural interest? (Laughter.) And he was sure if they should think of perpetrating a good job purely in the interest of their faithful friends the hop-growers, who had been extremely loyal to the party now in power, they would be the last to complain seriously. He hoped that individually as well as collectively they would favour him with their advice and confidence in any

All official reports and notices of the National Association of English Hop Growers will be printed in the MARK LANE EXPRESS, *which will also contain all current information likely to be of interest and benefit to the members of the society.*

matters that they thought they might advance in Parliament during the coming session. It was very difficult to know what ought to be done at the present moment. If they took a more aggressive and vigorous policy he was sure he should be quite at their disposal to do anything he could. But they would do well to attempt only what they were likely to accomplish. His opponent in the recent election advocated a difference in the revenue regulations between what was called pure beer and what was not pure. That subject was a very old friend of theirs, and he dared say his being in Parliament instead of Dr. Hutchinson would be quite as good for their interests in that respect, because it did not do only to be enthusiastic in favour of some theory that would advance their interests. It was as well also to know the practical difficulties, the numerous pitfalls and devices that the constitution and Parliament had invented, not for the purpose of forwarding but for the purpose of impeding all legislation. He had known a measure that was absolutely imperatively necessary pass through all its stages in a few hours. But when any measure that would benefit a particular industry was brought forward there were so many opposition industries put on their mettle that it was a most ticklish matter to get it through all the stages of the House of Commons. He should very much like their advice and confidence if they could think of any active policy that they could pursue, at the present time more particularly, and there were some points of course that they had not lost sight of that their good friend Mr. Ironmonger would always keep before them as to which they must make a little actual progress now. He took that gathering and that honour and kind compliment they had paid him as an evidence that their confidence and friendship was not at an end. (Hear, hear.) He very deeply appreciated the kindness they had always shown him, and thanked them very much for their congratulations, for their kindness to him on leaving the country, in sending him resolutions of encouragement while he was out there, and above all for the great kindness of their reception that day on his return. He thanked them very much, and also for drinking his health. (Hear, hear.)

Mr. Ironmonger said his object in rising was to draw attention to the fact that they had another gentleman present besides Colonel Brookfield who had fought for the Queen in that cause, and who had not only fought for her, but had had either the luck or the ill luck of shedding his blood on account of the cause that they had so much at heart. Mr. Arthur Lord was with them (applause) the son of an old member of their Association and a very esteemed gentleman in his own neighbourhood, who voluntarily associated himself with the struggle in which the nation was engaged in the early stages, and served with Colonel Plumer's column in the advance from Rhodesia which was instituted to assist Lord Roberts in the relief of Mafeking. He would not say very much about Mr. Lord's achievements, but he would tell them this, that he was one of those who felt what the power of the Mauser rifle and the Mauser bullet was, for he believed he was struck by a Mauser bullet across the chest; it entered his right arm and incapacitated him from further action. It did not absolutely daunt him, for he continued to the best of his ability to fire at the enemy till he could fire no longer. What struck him in the recitals that they had read of was that soldiers of the Queen when they went out were called upon to fulfil many obligations. They were not only to direct the operations of others and to take part in those operations themselves, they had not only to enter into very great dangers, but they had sometimes to perform family duties. Turning for a moment from Mr. Arthur Lord, Colonel Brookfield had to perform several family duties, for he had an illustration of that in his pocket. It was a print from the *Daily Graphic* some time ago, and it gave a photograph of Colonel Brookfield on the veldt. He was surrounded by a little party of children, and one wondered what on earth he should want children out in Africa for, because he had plenty of children at home to look after. Nevertheless the title of the picture was "Where is father?" These were the children of ex-President Steyn. Colonel Brookfield had the honour and privilege of being put in charge of Mrs. Steyn. He did not mean to say that there was any association, but at any rate he occupied the position of a local parent. (Laughter.) "Where is father?" must be fairly answered by "Here is father," for he was the father for the time being. He only showed this as an illustration of the various duties that had to fall upon our soldiers when they went into active service, and they might quote the words of Lord Roberts in saying our soldiers had always proved themselves under all possible circumstances to be gentlemen. (Hear, hear.) Whatever duties had devolved upon them they had fulfilled to the utmost of their ability. He asked them to drink with all cordiality to the health of the brave young fellow who had done his duty to his country and who had honoured them with his presence in company with his father, Mr. Arthur Lord. (Hear, hear.)

Mr. Lord, in response, said he was very much obliged for the kind words Mr. Ironmonger had said about him. He thought he had said too much about him. He had been for nearly ten years in South Africa and over seven in the Transvaal. He found himself up in Rhodesia, and things were looking very bad, as they had for five years. Colonel Plumer's force would be raised, and he thought it was the duty of everyone to join it. (Hear, hear.)

In proposing "The Chairman," Major Honeyball said they were under obligations to a gentleman for having taken the chair on that auspicious occasion, and he was sure they would not wish to depart without thanking Mr. Berry for the manner in which he had performed the duties which they had laid upon him. If they wanted a man to do anything they must go to a busy man, and Mr. Berry was a busy man. He was one of the mainstays of their Association. It was not because he had plenty of time on his hands, but because his time was always thoroughly well occupied. A man who farmed 300 acres of hops could not very well be an idle man. Besides which he had given a very large amount of time to their interests in the matter of railway rates, and had fought their battles in more ways than most of them knew. Mr. Berry was a man whom agriculturists in the south east of England could not dispense with. He believed he was asked to stand for Parliament at the last election, but his views were supposed to be Liberal, and he would not, although he was a Liberal, at this juncture oppose the present Government. That showed how very independent and really Liberal his views were. If ever he got into the House of Commons, as he was sure he would be able to if he wished, he believed they would find in Mr. Berry a most useful member to whichever side he might belong. He had very great doubts about his Liberalism. It was very desirable that they should have a really representative hop-grower in the chair. They could not have found a more representative man than Mr. Berry, and he begged to propose his very good health, and to thank him for his services in the chair. (Hear, hear.)

Mr. Berry said, with regard to the present state of affairs, Major Honeyball very much doubted his Liberalism. It was a great question what was Liberalism. He felt when Colonel Brooksfield was leaving for the front, when various members of Parliament and others who were supposed to be leaders among sections of the Liberal party were making various speeches about the country, he did feel that it was his duty at that time to say that it would be impossible for him to remain Liberal unless something were done to stop these men's mouths. He was not one of those who, because they might disagree in some particulars with the action taken by the Government, took every opportunity of maligning the Government, and running down their own nation and their own friends on such occasions. He was very glad to find that among the Liberal party there was, he believed, to-day a very much larger section who were as thoroughly Unionist in the sense of a determination to maintain every inch of empire that we had—(hear, hear)—and on that ground many Liberals who would have liked to have a fight at this last election determined that they would not fight, and many hundreds of others positively declined going to the polls in support of anything which might have the appearance of wishing to prevent the Government of this country saying that what we had we would hold and take care of, and we would undertake that where an Englishman was he should be properly respected if he conducted himself properly. That he believed was the first duty of every man, or one of the first duties of every man. Whether it was among the hop-growers or wherever it was they might meet, he hoped he should be always one to try to do what could be done for the benefit of their industries, and for the benefit of anything which they felt it was their duty to help. (Hear, hear.)

Hereford Hops at the Brewers' Exhibition.

The following letters on this subject have appeared in the *Hereford Times*:—

Sir,—At the recent hop competitions, held at the Brewers' Exhibition in London, I heard of general dissatisfaction on the part of competitors and others at the result of the championship, which consisted of hops from all the counties for which a class was set apart, and which eventually went to a Kent growth.

The general feeling seemed to be that the Herefordshire hops were finer, thicker in the sample, a finer colour, and equally good in flavour. Now if this was so, I cannot see how the Kent hops could get the advantage of the others, for the management appeared to be equally good in both cases.

I think, however, if the judges were going more for one thing than another, they should announce for what particular virtue in the hop they were seeking.

Growers would also do well to see that their county is fairly represented by the judges, and not only by their names, as is sometimes the case, I believe, but by the individuals themselves. And then I feel certain that given an even chance with our southern county we should sometimes be fairly allowed premier honours, without their envying our superior position.

HEREFORDIAN.

Herefordshire, October 29th, 1900

Sir,—It is with pleasure that I read in the current issue of MARK LANE EXPRESS the criticism by "Lupulin" of the award for the champion prize. He is to be congratulated on the courage he shows in expressing publicly an opinion in which he places the best sample of Hereford hops as superior to the best sample of East Kents. That such is and has been frequently the case I have long upheld—that is, taking our Mathons against East Kent Goldings, and the fact is demonstrated [illegible] years when unbiassed judgment has been [illegible] as hops that the article [illegible] of the day when it will be [illegible] that our local hops are the [illegible] country.

It is also to be hoped that [illegible] connected with the [illegible] hop [illegible] hop [illegible] from keeping [illegible] as yearlings." Like many [illegible] but a sore death [illegible] ested traders. The fact that Kent [illegible] by year at least 20s. per cwt. more than ours would lead anyone to think that they are [illegible] Do we find this to be the case [illegible] decidedly no. For the last four years samples of our hops have been examined [illegible] brewers' analysts, and also at Wye College in Kent itself, the result being our hops [illegible] having a larger amount of resins, that being the essence representing the actual bitter [illegible] hop.

If thus our hops are better from the standpoint of quality, the case is proved, for as regards appearance it is not suggested that we are [illegible] casual observer can note that.

Reverting to the particular case the prompted me to write this letter—the claim Mr. Pudge's sample has for champion honours. I took the [illegible] critically examine and compare it with the one which took the champion, and I had the satisfaction of convincing to my view three of the largest growers in Kent who were present. We commenced by comparing for appearance, this being speedily decided in favour of Mr. Pudge's sample; then came question of amount of lupulin, and here again the palm went to the "Worcester": my friends the Kent growers like drowning men catching at straws, said it must be flavour that decided the award. To [illegible] this a disinterested person rubbed [illegible] from the Kent and some from the "Worcester," [illegible] to us to smell without our knowing [illegible] and once more Mr. Pudge's sample was [illegible] in each of these tests the verdict was unanimous.

What I feel sure would be of great value to the hop growers of Herefordshire and Worcestershire would be the formation of a combination of representative growers whose aim would be to prove and convince brewers of the superiority of our hops, to break down improper prejudices, and to generally raise the tone and status of our local hops. There are many ways in which this can be done. For instance, circulating and publishing the results of analyses; promoting competitions; experimenting with a view to exploding the fallacy that our hops do not keep so well as others; establishing a board of arbitration and inspection in cases of dispute between grower and buyer; obtaining concessions in railway rates, and a general inclination to combine for mutual benefit.

The scheme need not be at all a costly one, and I for one should be pleased to subscribe to its funds, and would, moreover, undertake any work free of expense that would further any plan having for its aim the raising of Herefordshire and Worcestershire hops to their legitimate market value, which if estimated truly should be at least equal to [illegible] East Kents are appraised.

I hope to have the opinions on the subject of the letter from hop growers themselves, and that some tangible result and benefit will arise.

Many growers have themselves owned that they suffer from lack of combination, without which no scheme has any chance of success. It is certainly strange that an industry that so eminently requires organisation has so long been satisfied to exist without some effort to form one.

SYDNEY MAYO.

Hereford, November 1st, 1900.

Home Notes.

The Borough.

Our people have but little reason to complain of the course of business during the past week, for although the general trade is rather quiet, some good sales have been made, several fairly long lots having changed hands. The most satisfactory feature is found in the fact that despite the efforts of buyers to depreciate values, holders have been sufficiently firm to secure the prices demanded. The results have therefore revealed the continued strength of the market, and enable me to contradict the rumours that prices have fallen off, even by one so much [illegible] Such a movement could only follow from the weakness of sellers, which would be not only foolish, but reprehensible. I am glad to say that I have no knowledge of any such inclination to yield the advantage that the present position and future [illegible] holders, as all the planters with whom I am acquainted whose hops are still unsold are firm in [illegible] consider are warranted by the circumstances.

Foreign Growths

are not offered freely on our market, though a fair

HOP AND WIRE.—Users of WIRE WORK should [illegible] Best English galvanised Steel Hop Strand, [illegible] Bros. Ltd., Warrington, Lancs. For prices, [illegible] their London office, 86, Leadenhall-street, E.C.; or their Sole Agent for Kent and Sussex, Mr. Edward [illegible] road, Lee, S.E.—[ADVT.]

quantity of Continentals has recently arrived. States and Californians have also been landed since this month opened to a rather greater extent than previously. But all descriptions are realising full prices, and they cannot be looked upon as being in any dangerous degree competitors with ourselves. They have their due place in the estimation of some consumers, who take a certain proportion of them for special purposes, and therefore always buy them according to custom. This season the arrivals will be so limited that they cannot produce any perceptible effect on the market for English produce, and there is abundant proof that as the season progresses, or when our hops increase in value, imported hops will also advance, as it is impossible that we should at any time this season find our market overweighted with them.

Colonel Brookfield's Return

from the South African campaign was very heartily celebrated by the planters present at the welcome luncheon on Monday last. The gallant Colonel shows some signs of his hardships and anxieties, being rather thinner than when he left us in March. But it is satisfactory to know that he has gone through all the chances of the campaign without being sick or sorry for a single day, and, though in immediate proximity to dangers to life and limb from shells or bullets, which on several occasions struck down his comrades at his side, he escaped them all, frequently to his own astonishment. He gave us, in his usual genial manner, a little insight into the experience of a soldier, preferring, however, to speak of the risks run by the telescope presented to him by the Association rather than of himself. But privately some forcible incidents were elicited from him, which illustrated the close acquaintance he had had with sad mutilation and sudden death. The Colonel was evidently well satisfied with the warmth of his reception, and has now willingly settled down again to the routine of his life as the member for the hop-growers in Parliament, the responsibilities of which position he has hitherto discharged so efficiently.

Apologies for absence from the luncheon were received from the Earl of Ashburnham, the Earl of Cranbrook, Lord Harris, Sir Anchitel Ashburnham-Clement, Bart., Laurence Hardy, Esq., M.P., Captain Boscawen, M.P., Lieut.-Col. Warde, M.P., and so many others that it is impossible to find space for their names. But one and all emphatically expressed their admiration for the public services and patriotism of our guest, and regretted the various circumstances which hindered their presence at our gathering.

Foreign Notes.

Nuremberg.

Some relaxation of the export demand, and comparatively few inquiries by brewers, have resulted in a quieter trade during the past week. The total sales have not much exceeded 2,500 bales, which compares unfavourably with the business of the preceding period. Buyers are endeavouring to take advantage of the situation, and are making reduced offers, but holders have not generally given way, although isolated transactions are heard of at slightly lower figures. Only the medium and common qualities have, however, as yet been in any degree affected, the choice grades still maintaining their full recent values. From interested motives reports are in circulation that the tendency of the general market is towards weakness, but I do not attach any importance thereto, as I believe the present quietude will be but temporary, and will soon be followed by increased activity, when it is found that the tactics of buyers have been defeated by the firmness of holders. A little revival of the export trade, which is inevitable, would speedily restore strength to the trade, and remembering the limitation of the unsold portion of the crop we shall certainly experience a movement in an upward direction in the near future. There is no other probability worthy of consideration, therefore I am still confident that we shall see the market value of all hops greatly enhanced, and that the course of business throughout the remainder of the season will be noted by figures much in advance of any we have heard of for some years.

Aischgrund.

Though the trade here has been influenced by the calmer tone at Nuremberg, several important lots have changed hands at prices quite on a par with recent currency.

Hallertau.

Prices have not shown any alteration. A large quantity of sealed hops has been sold.

Wurtemberg.

After a short spell of comparative calmness, business has been briskly resumed at recent rates, and the tone of the market is getting stronger.

Neutomischel (Prussia).

The value of hops is fully maintained, although business has been rather less active of late. The greater part of this year's crop has passed into the hands of dealers, whose demand is in the direction of medium grades, rather than for choice qualities.

Munich.

The sales of the past week have about doubled the arrivals; the stocks in hand are therefore substantially reduced. Holders are firm in their quotations, which remain at about the same level as previously reported.

Burgundy.

Exports to England having fallen off a little there is at present a rather easier tone on the market, and the extreme prices recently quoted can hardly be realised by sellers who wish to operate. But there is no important reduction, and 105 to 115 francs are still the average current figures.

Belgium.

Important business has been done during the past few days in 1900 crop hops at 100 francs (80s.) per cwt., first cost, but following this activity the market is at the moment rather inclined to rest, buyers having become somewhat reserved. But as at least seven-eighths of this year's growth have been sold by planters, and as it is known that some heavy sales for future delivery have yet to be provided for, it must follow that any weakness in the market which may now be apparent can only be momentary, especially as it is not supposed that brewers are sufficiently stocked for the coming season. There are practically no old hops to be purchased, and the trade can therefore only be supplied by this year's crop, so that the future course of the market may be easily and safely foreseen, it being more than probable that higher rates than have yet been quoted will rule for the remainder of the season. The most recent news from Poperinghe declares that quotations are very firm at 100 francs for best selections.

America.

Business in hops is advancing very satisfactorily to sellers, both on the New York market, in New York State, and on the Pacific Coast. Brewers are still somewhat shy, hoping against hope that by their apparent indifference they will be able to defeat the firmness which marks the attitude of both dealers and growers. But their efforts are vain, inasmuch as quotations are strongly upheld, and there is a daily development of a tendency towards advancement. It is the settled opinion of experts that we shall hear of such prices for hops before the season closes as have not been thought of for a very long period. The actual shortage of the American crop, coupled with the very small stocks of old hops, is forcing this conviction upon the minds of those who are very unwilling to accept it. But the issue will certainly come, and present predictions must be fulfilled, as no other outlook is before the trade.

On the whole, I consider the condition of the foreign hop trade to be sufficiently healthy to warrant the expectation of increasing strength. The prospect for holders is everywhere favourable.

(*For Hop Market Reports, see pages* 655, 657.)

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

19,304.—D. M. Nelson and C. Ritchie Nelson, both of Glasgow, for an invention for "A fertiliser.

19,573.—J. N. Reeson, of Weybridge House, Beckton, Essex, for an invention for "A butter press."

19,628.—S. J. Symes, of Dublin, for an invention for "An improvement in corn and grass-cutting machines."

Patents Sealed.

14,463.—J. K. Stewart, of Chicago, Illinois, U.S.A., for an invention for "Improvements relating to sheep, etc., clippers."

14,522.—J. Green, of Leeds Road, Bradford, for an invention for "Improvements relating to seeds, sowing."

14,611.—E. Hixson, of Ashland, Ohio, U.S.A., for an invention for "Improvements in threshing machines."

Watery Milk—At Worship Street Police Court on Wednesday, Mrs. May Ann Boughtwood, trading as Boughtwood and Sons, of Islington-green, was fined £5 and two guineas costs, at the instance of the St. Luke's Vestry, for selling milk adulterated with 25 per cent. of added water; and Frank Pettitt, of 3A, Perceval-street, Goswell-road, was fined £3 and two guineas costs for a like offence, the "added water," however, being less than 10 per cent.

BARLEY AND MALT.

By Hordeum.

Date of Sowing.

One of the most useful lessons of the many which intelligent growers can learn at the Brewers' Exhibition is how to determine the proper time to sow barley.

Necessarily the weather is the chief factor, and can always wield absolute sway, but putting aside the conditions which some seasons make it out of the question to attempt to sow at the right time, there must of necessity be some given date which is to be preferred whenever practicable.

This year the spring was a very backward one, and the state of the weather towards the end of winter made it almost impossible to get any seed in before Valentine's Day, or even right up to the first week in March. The table shows that only six samples out of 160 were planted in February, with not one in January. One had been planted in the preceding autumn (October 18th), and this obtained a prize. Of the six sown in February one-half (three) obtained awards.

Those who hurried to get the drills working early in March did not this year meet with the success that commonly rewards such efforts.

A Good Seed Bed

was only rarely obtained in nearly all good barley districts until towards the third week of March; consequently, although twenty-seven samples were sown by the first week, they fared badly, only one-third securing awards. The second week was even worse, as only six prizes fell to twenty-nine samples sown that week.

The best time was throughout the third week, when thirty-five lots were got in, and no less than twenty-one of them obtained prizes, being equal to 60 per cent. During the last week still more were sown, viz., thirty-eight, but the awards fell away very significantly down to fourteen, or only 37 per cent.

This difference of a week only on so large a number of samples had a very marked effect, and it once more emphatically confirms the lesson that, as soon as the land is in good tilth, it is time to sow.

Not a Day Should Be Lost

after the land is ready to receive the seed. In April the results are not good. Of twelve sown in the first week only two won anything, and of the twenty-four lots sown in the month, only six, or twenty-five per cent. did any good.

The following table deserves careful consideration, for the one point where intelligence can have free play, and prove remunerative, is deciding to lose no time directly the conditions make sowing possible and desirable:—

Dates of Planting.

Date of sowing.		No. of samples sown.	No. of prizes awarded.	Percentage of prize winners.

Sale of Corn by Weight.

It is curious to note how obstinately East Anglian farmers resist the sale of corn by weight. Practically there is every reason why such mode of dealing should be encouraged, and yet we see every effort put forth to make the practice uniformly adopted resisted with dogged determination.

A number of the principal buyers in Ipswich Market have decided to insist upon all sales of a coomb (4 bushels) being regarded as 16 stones. This is promptly met by a protest from sundry farmers in the *East Anglian Daily Times*, who object. They urge "brother farmers" to resist this, but give no reasons why it should be opposed.

Now, in reality, no buyer ever fixes in his own mind the price he may feel disposed to give for barley without considering weight. There are few competent judges of barley who do not know the weight of a sample, and without intending a pun, it has great weight in determining the amount they feel disposed to give.

It is exceedingly common now for bargains to be struck on the basis of

16 Stones a Coomb,

or 56lbs. per bushel, and a very much larger number of samples run to this weight or exceed it than fall under it.

With the clear understanding between both parties

that 56lbs. is bought and not a bushel, the real advantages rest with the seller. Few growers sell without ascertaining the weight, and they know, what the buyer only guesses. Weight is a pure matter of fact capable of proof. Measure is a variable quantity. A thousand men can weigh a thousand tons of grain and no difference in weight should be recorded. No two men can ever be found who would measure such a heap and record the same number of bushels.

Bad delivery by the grower merely means trickery, but no farmer ever gained anything in the end by attempting to delude a buyer. The sooner every one concerned realises that a bushel of barley is 56lbs. the better for everyone interested.

POULTRY.

The Trade in New-Laid Eggs.

During the autumn and early winter in each year there is a great falling off in the home supplies of eggs, with a consequent increase of the prices This season the decline has been greater than usual, due, in large measure, to the late hatching season of 1900, and the fact that pullets and hens alike have been much later than usual coming into profit. At the present time fresh eggs are in great demand, and sell at high rates. The increased production of eggs in winter is one of the problems before the practical poultry-keeper, if he intends to secure full reward for his labour, for without regularity of supply he cannot expect adequate returns. That this can be accomplished is unquestionable, as has been proved by experience in this country and also in America, where the climatic conditions are less favourable than in Britain. It is not my present purpose, however, to discuss that question. To such as are interested I shall be pleased to forward a copy of our No. IV. leaflet on "Winter Egg Production." In spite of the deficiency referred to, it is unquestionable that a fair proportion of eggs are produced during the autumn and winter months. But as nearly every trader and many consumers know, very little reliance can be placed upon eggs at this season. I do not say that if a consumer can buy from the actual producer fresh eggs are unobtainable. When, however, they become an article of commerce, producers, higglers, and traders alike are equally responsible for the lack of confidence prevailing.

A very general custom among both producers and higglers at this season is the

Holding of Eggs in Order to Obtain Better Prices,

From the beginning of September this is done to a larger extent than is commonly supposed. The temptation is great. Eggs will realise in November and December fifty per cent. more than in September, so long as the buyer can be deceived into accepting them as new-laid. I was once in a shop in a provincial town when a man came in, and after asking and learning what price the shopkeeper was prepared to give for a lot of eggs, he replied, "I'll keep them another week." To the knowledge of the shopkeeper those eggs had been in his possession a month, probably longer, and would almost certainly be two or three weeks old when he received them. Nor is this custom peculiar to Britain. The other day a French egg merchant in London stated that he could not now guarantee the freshness of Normandy eggs, for the reason that producers in France keep back their supplies to secure better prices in November and December, and especially in December. If these eggs were sold for what they really are no one could complain, for the business would be straightforward on both sides, but to sell them as "new-laid" is

An Unquestionable Deception,

which re-acts seriously upon producers, destroying confidence and reducing prices. Preserved eggs do not enter into consideration. They bear their sign manual. No respectable shopkeeper dare sell such for anything else than they really are, though often they are better than the non-preserved or "kept" eggs.

Much more serious is

The Custom of "Mixing,"

which is growing almost as rapidly as the demand for eggs. Recently I have been making inquiries into this system, and find that it is widely prevalent. It would occupy too much of your space to enumerate the many cases which have come under my notice. That it has been long in vogue is well known, but it is decidedly on the increase, and one is surprised to find firms of good standing lending themselves to such a method of deception. Some time ago I saw foreign eggs being transferred into Irish cases in one establishment, and more recently I saw French eggs mixed with English and packed in hampers in another. We know what that means. The buyer of one of our largest London stores informed me that last year, by accident, he learnt that one of his country collectors was found to be buying foreign eggs in large quantities, and yet was being paid high prices for English new-laids. We have evidence that lately several cases per week of foreign eggs are going to a village station in one of the home counties. There lives a higgler. And in a district where we have a collecting depôt, the higglers are at the present time paying a higher price for eggs than they are afterwards receiving. They are known to mix. It does not appear to be thought dishonest to mix eggs in this way. The excuse made is,

"We all do it."

Probably the retailer knows what is taking place, but the consumer is defenceless under present methods. As a partial protection, many of the best retailing firms never sell an egg that has not been carefully tested by "candling." That, however, does not guarantee it to be English, or more than a measure of freshness.

Lest it should be thought that I am suggesting that English higglers and dealers alone are dishonest, it may be mentioned that I have evidence that Irish eggs are mixed with Canadian, and Danish with Russian. Hence, when our own people mix Danish with English, it may be that not a few sold as English really originated in Russia. "How is this system of fraudulent trading to be stopped?" Such a question has pressed itself for consideration for several years. After careful survey of the position, the National Poultry Organisation Society has determined to attempt it by the

Establishment of Collecting Depots,

in which, by the mutual efforts of the producers themselves, by a rapid system of collection, by careful testing and speedy marketing, eggs can be placed in the hands of retailers within two or three days, and whilst they are absolutely fresh. The Society has registered a trade mark, which is only stamped upon eggs that can be guaranteed as British and new-laid. The work is necessarily slow and difficult. We have to meet the opposition of "rings," who resent interference with their machinations. The methods of generations cannot be altered in a day; but we hope that as the number of depôts increases, we shall be able to afford consumers who know the value of a fresh egg the opportunity of securing reliable eggs of home production absolutely fresh, without fear of deception, and that the "Rose-brand" will become recognised as proof positive of both origin and quality. One of the largest merchants in the Metropolis last week stated that the only way to restore confidence and prevent deception was by the general adoption of our trade mark.—EDWARD BROWN, Secretary, The National Poultry Organisation Society, 12, Hanover Square, London, W., Nov. 12th.

Rural Depopulation.

At a recent meeting of the Derwent District Agricultural Society, a most interesting discussion took place on the subject of rural depopulation. Dr. A. D. H. Leadman read a paper in which he set himself to answer the question, "Why do the rural districts become so thinly populated?" It was certain, he said, that labourers had for many years been caught by the higher wages of towns and the more continual high pressure of excitement to be found in them. Farm work had become derogatory, objectionable, and out of fashion. The labourers would rather wheel a barrow in a foundry than attend to stock. Short hours were longed for; numerous "nights off" were wanted—and pray what for? Simply to loaf about in idleness. If the country places remained better peopled wages would always be more equable; as it was, the difficulty of getting labour had become so serious to the farmers, nurserymen, and others that wages had been forced up to an abnormal pitch which could not possibly be maintained. Hence masters had to toil and sweat, denying themselves of many a pleasure they had justly earned.

After comparing the life of the agricultural labourer with that of a doctor, Dr. Leadman attributed the principal cause of the present leakage to the system of education taught in the rural districts. It was wrong, he said, to cram boys and girls in the way they were crammed. The subjects, too, were absurd. The labourer's son learnt Latin, Greek, French, mathematics; his daughter an equally useless set of subjects. The former would no longer follow the plough; for the latter domestic service had no attraction. Not more than two or three per cent. be fited by this kind of teaching.

Why, then, were the ratepayers to smart under what could easily be proved to be a useless and unjust burden on the rural taxes? He was not opposed to education, but the fault of the present system was to make boys and girls dissatisfied with their position and unfit them for the condition in which they were born. A time would come, in his opinion, when this false system would find its own level. The law of supply and demand would again find this out, for every one could not be a master. Dr. Leadman largely attributed the depopulation of the village to the red tape of the Education Department, which, he said, neither knew nor cared anything about rural requirements.

The exchange from the country to the large town was, in his view, a poor one, and in the long run not always to the benefit of the young man who migrated. He maintained that a skilled farm labourer any day was the equal of the artisan, were he mechanic or engineer. In towns a man might, he granted, obtain larger wages, but he would also have larger expenses, and the money he received could [illegible] And what would he have? Health and happiness. To make village life attractive he would brighten the church services, and teach every boy and girl either vocal or instrumental music, or both. All those musical instruments and voices he would have in the church choir.

The village dance upon the village green should be restored every summer under proper management, the crowning of the May Queen revived, and cricket and football clubs well encouraged, along with a variety of other things which could only be properly followed up in the open country. Some of the old customs, too, which were [illegible] depending revived with both success and pleasure. It may seem a dream of Utopia, but he saw no other pleading for no one either impossible or impracticable.

In the course of a discussion which followed, the president Dr. Wright said that many [illegible] lads found country life very dull, and he thought Dr. Leadman hit the nail on the head when he said that the present system of education was not what it should be. If the boys were taught more about the technical side of farming he thought that would do a great deal; but one of the great difficulties was the unsuitability of farm cottages. Frequently it was absolutely impossible for a man and his family to live in the cottage provided for him in decency and health. If landlords improved their cottages he thought that both they and the farmers would benfit.

He agreed that it would be a good thing to teach a lad music if he had got any music in him. Dancing, too, was a splendid thing for both boys and girls, if properly conducted, and providing mammas took care of their daughters when they were coming home. Unfortunately they could not make either farmers or their men great readers, because after tearing about a farm all day they soon dropped off to sleep when they commenced to read a book. He thought it would be a good thing if they could get village schoolmasters to give their boys a superficial technical education in agriculture.

NEWS NOTES.

Hirings at Lancaster.—The first Martinmas hiring fair at Lancaster was held on the 10th inst. Very few servants presented themselves, and business was rather slack. Those who were present asked prices considerably in advance of those obtained at Whitsuntide, but farmers preferred to wait until next week. Boys were in several cases taken on, and obtained between £8 and £10.

The Martinmas Hiring Fair.—This Ulverston fair embracing the whole of North Lonsdale, South Cumberland, and parts of Westmorland and Lancashire was held on Thursday. Headmen received £20; first class men, £16 to £18; second class men, £13 to £15; boys and youths, £5 to £12; dairymaids, £14; best women servants, £11 to £13; second class, £9 to £11; girls £5 to £7.

Uttoxeter Cattle Fair.—The first of the November cattle fairs was held on Monday, when the show of horned stock was unusually large, many farmers who have been compelled to keep their stock up by the order of the Board of Agriculture now rushing it into the fair. In the early part of the day a large quantity of stock changed hands, though the bad weather that prevailed later in had a depressing effect. Calving cows made from £14 to £18 10s., calving stirks, £7 10s. to £8 10s.; barren stirks, £7 to £8; lying-off cows, £14 to £15; yearling bulls, £6 to £7; two-year-old bulls, £9 to £10; yearling calves, £3 10s. to £4.

Thirsk Hiring. The principal statutes were held on Monday, when there was a large attendance of both male and female servants. There was a better supply of ploughboys and farm men generally than last year, but for farmhouse girls there was a general dearth. Good managing farm foremen and hinds obtained £23 to £24, secondary hands £20 to £21, first ploughboys up to £20, second ploughboys up to £17, farm lads £11 to £13, head farmhouse girls £18 to £20, second girls £14 10s. to £15, general servants for town places £12 to £14, cooks up to £20, housemaids and bedroom maids £11 to £12, kitchen-maids £10 10s. to £12, experienced nurse girls up to £10, and nurse girls first time out £6 10s. to £8 for the twelve months.

Darlington November Fair was held on the 10th inst. There was a good show of English cattle, and very large of Irish, the number exceeding what has been usual of late years. Prices were higher, with a fairly good sale. English bullocks made from £12 to £15; [illegible] £11 to £13; [illegible] £9 to £11; and yearlings, £6 to £8. There were some very good cattle in the Irish section, being above the average; best [illegible] from £13 to £14; [illegible] young bullocks, £8 to £10 10s.; yearlings, £5 to £6. The show of sheep was limited. Lambs made 3s. or 4s. per head more than of recent years. There was a fair supply of horses, but the quality was not high. Superior [illegible] horses sold at good prices, one Clydesdale [illegible] £70. The only pair of this class was £35 to £45 each. Cobs were a small show, but anything good made a fair price. Good hacks were not very plentiful. Ponies were a fair small show, and commanded about £9 to £12.

MOLASSINE

FOOD FOR HORSES, CATTLE, SHEEP, PIGS, etc.

Replacing an equal quantity of Fodder.

A STAPLE FOOD AND CONDIMENT COMBINED. **Patented in all the principal Countries in the World.**

SOCIETIES.

CENTRAL AND ASSOCIATED CHAMBERS OF AGRICULTURE.

NOTICE OF MEETINGS.

The following MEETINGS of the CENTRAL AND ASSOCIATED CHAMBERS OF AGRICULTURE will be held (by permission of the Society of Arts) at the House of the Society of Arts, John Street, Adelphi, on Wednesday, December 12th, 1900, viz.:—

1.—10.30 a.m., the Business Committee.

2.—11 a.m., the Council Meeting, at which Members of the Council representing either the Central Chamber or Associated Chambers are requested to be present.

AGENDA.

To transact General Business.

To receive Communications.

To receive Reports of Committees (if any).

To draw up the Annual Report of the Council.

3.—11.30 a.m. (or at such hour as the business of the above Council Meeting is concluded), the ANNUAL MEETING OF THE CENTRAL CHAMBER, at which all Deputies and Subscribing Members are requested to be present.

AGENDA.

To receive the Auditor's Report.

To appoint an Auditor for the ensuing year.

To receive the Annual Report of the Council for 1900.

To consider Alterations in the Laws, as recommended by the Business Committee and adopted by the Council on November 6th, 1900. The Business Committee also recommend that Law No. 37 shall in future read as follows, the Alteration consisting of the additional sentence printed in italics:—

37.—The Officers of the "Central Chamber" shall be a "Chairman" and "Vice-Chairman," a "Treasurer," "Auditor," and "Secretary," the retiring "Chairman" not being eligible to the "Vice-Chair" for the space of one year. *The "Council" shall have power to fill up any vacancy caused by the death, resignation, or incapacity to act of any such officer.*

N.B.—A copy of the Laws, including the Alterations proposed, will be sent to any Subscribing Member of the Central Chamber upon application to the Secretary.

To consider the following subjects:—

1. The working of the Agricultural Rates Act of 1896 and the question of its renewal.
2. Tuberculosis and the working of the "Model Milk Clauses" in the Private Bills of Local Authorities.
3. Question of the registration of pig dealers and the inspection and disinfection of their premises.

Associated Chambers and Clubs are requested to consider the above subjects, and to send up any resolutions which they may pass thereupon to the Secretary of the Central Chamber before the Meeting of the Business Committee, at 5 p.m. on Tuesday, December 11th, 1900. Suggestions of subjects for discussion at future Meetings of the Council should be forwarded at the same time.

ERNEST H. GODFREY, Secretary.

ANNUAL AGRICULTURAL DINNER.

SMITHFIELD WEEK, 1900.

Notice is given that the ANNUAL AGRICULTURAL DINNER (under the auspices of the Central and Associated Chambers of Agriculture and the Farmers' Club) will be held during the Smithfield Club Show-Week, in the THRONE ROOM of the HOLBORN RESTAURANT, LONDON, on TUESDAY, DECEMBER 11TH, 1900, at 7 p.m.

The Chairman of the Farmers' Club (Mr. J. R. EVE) will preside, and it is hoped that the President of the Board of Agriculture will be present, as well as his immediate predecessor.

All farmers and others interested in agriculture are invited to attend.

The price of tickets (exclusive of wine) will be as follows:—

If purchased before December 8th, 1900, 5s. 6d. each.

If purchased after December 8th, 1900, 6s. each.

Members and others who propose to attend are requested to apply as soon as possible for tickets, with a postal order for the amount. (Evening dress optional.)

ERNEST H. GODFREY, Secretary.
November 14th, 1900.

AUCTION SALES.

ROTHERHITHE, within about three-quarters of a mile of the Tower Bridge, near the entrance to the proposed new Rotherhithe and Ratcliff Tunnel and the Surrey Commercial Docks.—Very extensive Freehold Riverside Premises and Steam Flour Mills, fitted with valuable modern plant and machinery on the roller system, with granaries, warehouses, engine and boiler houses, dwelling-houses, yards, stabling, etc., now and for many years past in the occupation of Messrs. J. B. and T. H. Perks, and for sale, in its entirety, with possession on completion of the purchase. The property possesses the important frontage to the Thames of about 96ft. 6in., with wharfage and lay-by for barges, frontages of about 98ft. 9in. on the north side, and 104ft. on the south side of Rotherhithe-street, also a long side frontage to Gilham's-court, the total ground area being about 18,000 square feet, exclusive of the site of the old mill stream, which extends to Paradise Street in the rear, and has an area of about 7,400ft. super. The property, from its considerable river frontage, situation, and extent, would be equally suitable for wharfingers, timber merchants, large manufacturing premises, electric engineering works, or other purposes.

MESSRS. DEBENHAM, TEWSON, FARMER, and BRIDGEWATER will SELL, at the Mart, on Tuesday, November 27, at 2, in one lot, with possession, the exceedingly important FREEHOLD PROPERTY known as Rotherhithe Mill, and 9, 11, and 13, Rotherhithe-street, together with the whole of the valuable fixed plant and machinery. The premises comprise on the north side of Rotherhithe-street and abutting upon the River Thames a range of three two-storey granaries, all communicating, and dwelling-house adjoining; on the south side of Rotherhithe-street an open courtyard, with double entrance gates, extensive mill-house of five floors, with all necessary rolling and other machinery, gearing and accessories, engine and boiler houses, with 25-horse power beam engine and two horizontal boilers, tall chimney shaft, mill stones, yards, stabling for thirteen horses, coach-houses, large van shed, harness room, man's rooms, and loft, a dwelling-house, No. 26, Gilham's-court, piece of vacant ground adjoining, also the old mill stream and water course from the River Thames. The mill premises communicate with the waterside granaries by an iron bridge over Rotherhithe-street.

Particulars of Messrs. HARRIES, WILKINSON, and RAIKES, Solicitors, 38, Nicholas-lane, Lombard-street; and of the Auctioneers, 80, Cheapside.

ALDERMASTON MILL, BERKS.—Valuable Freehold Property, situate about a mile from Aldermaston Station on the Great Western Railway, half a mile from the village of Aldermaston and about 9½ miles from Reading and Newbury.

MESSRS. DEBENHAM, TEWSON, FARMER, and BRIDGEWATER will SELL, at the Mart, on Tuesday, December 4, at 2 o'clock, a capital FREEHOLD WATER CORN MILL, with about 12 acres of land, situate on the River Kennett, comprising a brick and slated mill-house of five storeys, fitted with modern roller plant, machinery, fittings, and tackle, and two pairs of stones, with the necessary water power for driving the same, mill dam and two sets of sluices, wheat and flour stores, sparrow-hawk's house, pair of capital cottages with gardens, and one other formerly used as a cow-house; nag stable for four, coachhouse, cart-horse stable for six and cart shed, cattle sheds, cowhouse, piggeries, rick and chaff houses, workshop, etc. There are also flower and vegetable gardens, productive orchard, and several enclosures of rich meadow and pasture land skirted by the River Kennett, which affords excellent fishing. The whole embraces an area of about 17a. 2r. 11p., and is for sale with possession.—Particulars of Messrs. SURR, GRIBBLE, and OLIVER, 12, Abchurch-lane, E.C.; and of the Auctioneers, 80, Cheapside, E.C.

REGISTER OF BRITISH LIVE STOCK BREEDERS.

HORSES.

HACKNEYS.

MOORE, HENRY, Burn Butts, Cranswick, Hull. — Pedigree Stud of HACKNEYS, including many prize-winners; yearlings, two years, and others.—Can be seen on application to Henry Moore.

HACKNEYS.—JOHN N. ANTHONY, Sedgeford, near Lynn, Norfolk, breeder of Pedigree Hackneys. On hand, Colts and Fillies by most of the leading sires.

LLOYD, WALTER, Heaselands, Hayward's Heath, Sussex.—Small but select Stud of PEDIGREE HACKNEYS, Mares, Fillies, and Colts of best blood, including stock by Champion Ganymede, Agility, Winnal Fireaway, Model II., and other noted Stallions, at moderate prices. Appointments to view the stud (which is 1¼ miles from Hayward's Heath Station, L.B. and S.C. Railway), on application to the owner, as above.

CLEVELANDS

F. WILSON-HORSFALL, Potto Grange, Potto Station, Northallerton, Breeder of CLEVELAND BAY HORSES. Winner of more prizes than any man in England with Cleveland Bays for many years at the Royal, Great Yorkshire, and other important shows. Also first prize and gold medal at the Paris Exhibition, 1900. Thoroughbreds and Shorthorns are also bred on these farms. Mr. Wilson-Horsfall, Potto Grange, Northallerton, has sold to Mr. Mellish, Cape Town, South Africa, the well-known Cleveland Bay Stallion Broomgrove Pride 1364. This horse is considered to be one of the best of his breed, and combines the action of a hackney with the limbs and quality of a Cleveland, and has been used at stud at Potto Grange for the last two years.

SHIRES.

MUNTZ, P. ALBERT, M.P., Dunsmore, Rugby. — SHIRE-BRED STALLIONS, COLTS, MARES, and FILLIES. About a hundred of all ages. Prize-winners London and other leading shows. Also high-class Shropshire SHEEP, winners first prize at Royal Agricultural, 1886, second in 1887, and first in 1888.—Apply, THOMAS EWART, Dunsmore Farm, Rugby.

CONCHAR, JOHN, Wylde Green, Birmingham.—Breeder of SHIRES and HACKNEYS. Some gold Colts and Fillies for Sale. Five minutes from Station.

TAUNTON, H. PERCY, Redlynch, near Salisbury, Wiltshire, Shire-bred STALLIONS MARES, FILLIES, and GELDINGS of the most fashionable breeding always for sale at moderate prices. The animals are kept entirely out of doors and in natural condition.

PONIES.

THE LARGEST STUD of SELECTED WELSH PONIES IN WALES.—Dinarth Hall Pony Stud Farm, Colwyn Bay, North Wales. Over 120 Ponies now on hand, including forty Brood Mares of the pure Welsh type, and several high-class Ponies, great goers, with style and action. 150 prizes won in 1898 and 1899. Ponies purchased from this Stud have won first prizes at Manchester, Birmingham, and Maidstone Royal Shows; also first and medal Crystal Palace, 1899. Sale in 1899 included two Entire Ponies purchased by the Government for Cyprus, several to America and France. Stud Horse JULIUS CÆSAR II. 5666, sire of first prize two-year old pony filly, the first of his produce exhibited, London Hackney Show, 1900.

MILLER, W. S., Forest Lodge, Brecon, S. Wales, extensive Breeder and Exporter of the best class of WELSH MOUNTAIN PONIES and COBS. References and particulars on application.

MONTEFIORE, Rev. D. B., Mursley, Winslow, Bucks.—Prize PONIES always FOR SALE. Arab Polo Pony Stallion "Mootrub" (32), winner of a championship, silver medals, and many prizes. Particulars on application.

RAILWAY ANNOUNCEMENT.

GREAT NORTHERN RAILWAY.

LEEDS AND DISTRICT RABBIT AND CAVY SHOW, NOVEMBER 27TH AND 28TH.
LEEDS SMITHFIELD CLUB'S SHOW, DECEMBER 4TH, 5TH, AND 6TH.
YORK POULTRY, PIGEON, AND RABBIT SHOW, DECEMBER 11TH, 12TH, AND 13TH.
MANCHESTER RABBIT, CAT, AND CAVY SHOW, DECEMBER 14TH, 15TH, AND 17TH.

In connection with these important shows, the Great Northern Railway Company are making arrangements for the conveyance of exhibits from stations on, and in connection with their system.

THROUGH RATES.

Rates for the conveyance of the traffic may be obtained on application to anyGreat Northern Station Master or Agent, and the rates will in no case exceed those in force by any other route.

To ensure prompt attention, exhibitors should be careful to address their exhibits "Per Great Northern Railway."

Through vans for the conveyance of exhibits will be run wherever necessary.

RETURN TRAFFIC.

Special arrangements will be made for the return of exhibits, etc., at the close of the respective shows, and exhibitors are requested to mark the return labels "Per Great Northern Railway."

A Great Northern Company's representative will be in attendance at all shows prepared to give exhibitors and others all information with respect to train service, etc.

CHARLES STEEL, General Manager.

LONDON & NORTH-WESTERN RAILWAY.
POULTRY AND PIGEON SHOW,
TO BE HELD AT
MANCHESTER
DECEMBER 14TH, 15TH, AND 17TH, 1900.

For the convenience of Exhibitors at the above Show, the London and North Western Railway Company will arrange the running of Special Through Vans for the conveyance of Poultry, Pigeons, etc., to Manchester, on Thursday, December 13th, by the Trains leaving—

London (Euston), at 8.45 a.m., 12.25 p.m., 2.45 p.m.; Northampton, at 10.29 a.m., 2.29 p.m.; Carlisle, at 8.30 a.m., 1.40 p.m.; Leeds, at 11.30 a.m., 1.45 p.m., 4.0 p.m.; Birmingham (New St.), at 7.20 a.m., 2.0 p.m.; Shrewsbury, at 11.25 a.m., 4.40 p.m.

These will be in addition to the Vans running regularly on the through trains to Manchester.

Consignments from the Branch Lines, and from Nottingham, Peterboro', Oxford, Cambridge, etc., will be placed in these Vans at the various Junctions, thus ensuring direct transit to the exhibition.

Rates for the conveyance of the traffic, which in no case exceed those charged by any other route, can be obtained at the various Stations on the Line.

Arrangements will also be made for the return of the Traffic in Through Vans direct from Manchester at the close of the Show, and Exhibitors wishing to avail themselves of these facilities are requested to order their Consignments "Per London and North-Western Railway."

Exhibitors are requested to be careful to write their names and addresses distinctly on the backs of the direction labels issued by the Show Committee.

The Company's representatives will be at the Show to answer enquiries with regard to the arrangements for the return journey. All information can be obtained of Mr. Robert Turnbull, Superintendent of the Line, Euston Station, London; or from the Company's District Superintendent, Mr. H. Linaker, Exchange Station, Manchester.

FRED. HARRISON, General Manager.
General Manager's Office, Euston Station

HALL'S SANITARY WASHABLE DISTEMPER
(PATENTED)

A NEW SANITARY WATER PAINT,

HAS GREAT ADVANTAGES,
SOME OF WHICH ARE AS FOLLOWS:—

It sets hard, Kills Vermin, and Disinfects.

It is washable in 3 weeks, does not scale, can be Painted or Varnished, and will Stand Inside or Outside.

It is made in Dark Rich Shades as well as in Light Tints, contains no Lead, and does not Turn Black.

It only requires the addition of Water to make it ready for use, so that anybody can apply it.

It is Cheaper, Cleaner, Healthier, and more Artistic than Wall Paper.

It makes an excellent Shading for Greenhouses, the inside quality lasting about 9 months, the outside quality several years.

Sole Manufacturers of "Aperfectol Paints," the best Paints manufactured, and "Rustikol," for preserving woodwork.

Sold by Leading Chemists, Drysalters, and Ironmongers, and Manufactured by—

SISSONS BROS. & Co., LTD., HULL,

from whom Samples, Shade Card, and other particulars can be obtained.

READERS of ADVERTISEMENTS in these pages will greatly oblige and assist us by mentioning MARK LANE EXPRESS when writing to our Advertisers.

BIBBY'S
"CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the "Cream Equivalent" fed Calves as having been fed on New Milk.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

SOLE MANUFACTURERS:—
J. BIBBY & SONS,

SILCOCK'S CALF MEAL
CALF REARING.

To rear Calves economically and profitably use SILCOCK'S SOLUBLE CALF MEAL. Thousands of Calves are reared on it annually; it is a true milk substitute, is very easily digested, dissolves at once in water, gives least trouble in preparing, does not scour, is very economical in use, as one pint makes one gallon of thick gruel, and it fits early for cake feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter-milk, and whey the figures stand at 12½, 9, and 6 per cent. respectively. With the minimum of cost and trouble SILCOCK'S CALF MEAL gives the maximum results. Use SILCOCK'S SOLUBLE CALF MEAL, feed regularly, in right quantity and at correct temperature and you will have little trouble in rearing paying calves.

Price, 12/6 *per cwt., carriage paid. 5 cwt. lots,* 12/-.

POISONOUS TREES.

A correspondent writes in reference to our report of a case in the Grantham County Court which appeared in our issue of the 12th inst., under the heading of "Leaving Hedge Trimmings on the Highway." It may be remembered that the case was one in which one farmer claimed from another for the loss of a heifer which died in consequence of eating yew leaves which the defendant had allowed to remain on the roadside after trimming his fence. The learned judge held that negligence had nothing whatever to do with the matter, and came to the conclusion that neither the person in charge of the animal nor the defendant were aware of the danger of cattle eating yew leaves, but that the case depended upon the fact of the deposit of such trimmings being a nuisance. His honour continued that there was no doubt that to put anything on the highway that was a danger to either persons or cattle lawfully using such highway was a public nuisance, and that it was quite immaterial whether the person who put it there knew or did not know that it was dangerous. The learned judge also added that the defendant had no right to put his hedge trimmings on the highway; whether they were dangerous or not, for such a course practically amounted to using the public highway for a private purpose which could not be justified. This amounted to holding that there was a nuisance, and the result was a verdict for the plaintiff for the value of the heifer. What our correspondent has to say upon the point had perhaps be better set out in his own words:

"Under the heading 'Agricultural Law' of November 12th inst. I note there is a case of a farmer recovering damage through loss of heifer, not because the heifer was poisoned through eating the yew, but because the farmer had placed on the public highway such material that caused the claimed damage. Now, may I ask you to answer me through your valuable paper the question that if a farmer or any other person knowing or unknowing places or has placed upon any public highway [illegible] that in any way injured man, beast, or other property, would the person be liable to such damage? For instance, thorns may [illegible] a horse's or man's foot or puncture a cycle tyre."

We can quite understand the view which our correspondent takes, but from the strictly legal position there is not the least difference between placing a thorn into the foot of a man or an animal or into the tyre of a bicycle. Anything on a highway must be regarded as a nuisance if it interferes with the lawful use of such by any of His Majesty's subjects. Apart from the question of highways, the matter of noxious trees is one of considerable importance, particularly since it has become fashionable to plant trees without either rhyme or reason. There is no implied warranty on the part of a landlord [illegible] trees grow upon the land he lets. The tenant is only in the position of any ordinary purchaser. He must look and judge for himself, and take the consequences. If the vendor is not prepared to comply with the [illegible] contained in the words of the [illegible] to translate it roughly, that the buyer must look after himself when he buys upon a warranty. The case to which our correspondent refers has resulted in a decision which we believe to be good law, although it is not quite in accordance with some of the decisions of a hundred years

ago. The word "nuisance" is an extremely vague term to use, but, apart from technicalities, there can be no question whatever that it is a nuisance to have one's cattle killed through another person's negligence or ignorance—it matters not which. We quite fail to see what ground of complaint our correspondent has. He would be just as reasonable if he contended that it would be right for a man to lay poisoned loaves of bread on the side of the highway. On the other hand, it would be equally absurd to say that a man might leave yew clippings where they might injure or kill other people's cattle, and yet expect that he should not be responsible for such a course. We see no reason to disagree with the decision of the learned judge of the Grantham County Court.

SAMPLES.

By a Man of Mark Lane.

The annual dinner held jointly by the Central Chamber of Agriculture and the Farmers' Club has been fixed for Tuesday, December 11th, when Mr. J. R. Eve, chairman of the Farmers' Club, will preside. Mr. R. W. Hanbury, President of the Board of Agriculture, and Mr. H. Chaplin, M.P., who was President of the Board from 1889-1892, have accepted invitations to be present.

The Right Hon. Robert W. Hanbury, M.P., President of the Board of Agriculture, has appointed Mr. Francis A. Fulford to be his private secretary.

A correspondent wrote to Mr. Balfour in regard to the Agricultural Rating Act, as to the intentions of the Government on the subject in the ensuing Parliamentary Session, pointing out that the Act pressed very heavily on property owners, and that, in his opinion, agriculture was now in a very flourishing condition, thoroughly able to bear its equal share of taxation. The following reply has been received: "November 21st, 1900. —Dear Sir,—Mr. Balfour desires me to acknowledge the receipt of your letter of the 12th inst., and, in reply, to say that he is not at present in a position to make any statement with regard to the Agricultural Rating Act. The intention of the Government on the subject will be announced in due course. They have never seen any reason to regret their policy in regard to it.—Yours faithfully, WILFORD M. SHORT."

The Decimal Association of the United Kingdom, of which Sir Samuel Montagu is president, has issued a circular to members of Parliament, inquiring if they would be prepared to support a Bill for the compulsory adoption of the metric system of weights and measures in this country, after a lapse of two years to be allowed for preparing for the change.

A telegram from Sydney on Monday states that splendid rains have fallen over a large portion of New South Wales. The Minister of Agriculture says the downpour has saved the crops in several districts, and largely improved the prospects of the wheat yield and the harvest generally.

In the second general memorandum on the cotton crop of the season 1900-1901, issued by the Government of India Statistical Department, it is stated that with one exception the reports from the cotton-growing provinces are uniformly favourable. The abundant rain of August and September was on the whole most useful to the crop, though it was excessive in a few tracts in the Punjab and the eastern districts of the North-Western Provinces, where some injury was done. In both provinces, however, the existing conditions are entirely satisfactory, and a yield in excess of the average is expected. In the Central Provinces, Berar, and Madras cotton was sown over an unusually large area under the stimulus of high prices for the fibre which have prevailed for a considerable time, and in all these regions the promise of the crop is excellent.

The one exception to the general prosperity of this crop is in Bombay, where, so far as may be judged from the extremely defective and belated reports which have been received, the crop has been sown on a very reduced area, and in some tracts does not promise as well as it might owing to the absence of rain. The area sown in Gujarat appears to be only about half an average, the people in that famine-stricken area having sown with food grains much of the land which would in an ordinary season have been sown with cotton.

The Department mentioned above has also issued its second general memorandum on the sugar-cane crop of the season 1900. It is reported that in the three great cane-growing provinces of Northern India—Bengal, the North-Western Provinces, and the Punjab—the area planted is quite equal to the average, and the plant is coming on in very favourable conditions. The heavy rains which fell towards the end of August and in September did a little local injury, but its general effect was extremely good throughout the cane-growing region. The yield expected will be at least equal to a full average. In Madras a reduced area was sown, but here also a good yield is expected. The crop in this province is comparatively not important.

The receipts on account of Revenue from April 1st, 1900, when there was a balance of £3,517,047, to November 17, 1900, were £64,959,201 against £63,745,233 in the corresponding period of the preceding financial year, which began with a balance of £8,919,173. The net expenditure was £112,780,891 against £70,655,104 to the same date in the previous year. The Treasury balances on November 17th, 1900, amounted to £4,372,156, and at the same date in 1899 to £3,580,022.

It is understood that the well-known Harvey Clarke Roller Mills at Yarmouth have been acquired by a limited liability company.

The grain steamers now arriving in the Thames are often of so deep a draught that they cannot discharge at the London Docks. As the tendency to large cargoes is not likely to be stopped to meet the exigencies of any one port, London interests are coming to be deeply involved in the provision of means whereby steamers of the deepest draught can discharge cargoes comparatively near the metropolis.

The famous Pillsbury-Washburn Mills show a net profit of £134,000 on the trading of the cereal year ended August 31st last. This must be deemed a satisfactory result on the capital invested.

I regret to note the deaths of Mr. Fordham, of Cambridge and Mark Lane, and of Mr. Edwards, of Ruabon and Liverpool, both respected corn merchants and farmers.

At a conference held at the Ministry of Finance at Vienna, November 23rd, for the purpose of considering the question of the abolition of the sugar bounties, the agreement arrived at in Paris last month regarding the conditions of the abolition of the bounties by France, Germany, and Austria-Hungary was under discussion. The agreement in question provides that as an equivalent for the complete abolition of the bounties by Germany and Austria-Hungary, France, besides abolishing the direct export bounty, shall reduce the indirect bounty, and shall render the production of sugar over and above 10½ per cent. subject to the full tax. A preliminary condition to the conclusion of a binding agreement is that the States which were represented at the Brussels Sugar Conference in 1898 shall make sacrifices of the same kind. After an exhaustive discussion, the experts present expressed themselves in favour of an International settlement on the basis above indicated, but they declared that their final attitude in the matter must depend on the course which the forthcoming Conference in Brussels might take.

At Greenwich Police Court on Monday, Harry Taylor, 26, was fined 40s., and 8d., for damaging 54 quarts of milk, the property of Messrs. Martin, dairymen, of Brockley, by whom he was employed. He was seen by a constable to empty two quart cans of water into the milk he had for sale on Sunday.

A Village Pension Scheme.—The Parish Council of Byfleet, Surrey, have under consideration an interesting scheme with regard to charity money (soon to be submitted to the Charity Commissioners), which proposes that the annual income, amounting to about £100, instead of being distributed, as hitherto, in the form of doles of coals, groceries, bread, etc., should be used for the benefit of the poor and deserving by means of small loans in cases of need, by providing medical aid and comforts in time of sickness, and by the establishment of pensions of 5s. weekly to poor persons of good character who have resided in the parish for five years and who are unable to maintain themselves by their own exertions.

AGRICULTURAL LAW.

A Dumfriesshire Arbitration Award.

An award has just been issued by Mr. James Biggar, Grange Farm, Rev. Dr. Gillespie, and Mr. Sproat, Borgue House, as arbiters under the Agricultural Holdings Act in a reference between the Closeburn trustees and Mr. N. M'Millan, now of Knowe, Kirkconnel, lately tenant of the farm of Townfoot, on the Closeburn estate, Dumfriesshire. The tenant preferred a claim of £527, the largest individual items being £205 for "betterment," in respect of increased fertility of the land owing to good management and application of manures, and £164 for formation of meadows. The balance was made up of £37 for lime and slag applied, and £100 for manurial value of feeding stuffs consumed. The landlords counter-claimed to the extent of £26, but offered a payment of £120 in full settlement. The proprietors have awarded the tenant £124 in all, disallowing the betterment claim, and have allowed the counter-claim to the extent of £3. The tenant is found liable in three-fifths of the costs of the reference, the proprietors in two-fifths, and each party is to pay his own agent.

The Wheat Tides.

Generally speaking, the vast tides of wheat set to the east and north—from the emigrant farmers on the edge of civilisation to the cities of the old countries; from America, Chili, and Argentine to Europe. There are lesser tides to the west and south, as from California to China, from Russia and India to England, from the United States to Brazil; but they are insignificant compared with the vast main tide from west to east. A few years may make great changes in these tides. The rice-eating Chinaman has tasted the food of the white man, and he finds it good. He could consume the present world's crop and still go hungry. Siberia, opened by the Russian railroad, may yet be one of the greatest wheat-producing countries. Australia has been farmed only around its fringes. When a European thinks of food he thinks in terms of wheat. He is the greatest of bread-eaters; where an American eats meat and potatoes he eats meat and bread. Yet in the best of years Europe never produces enough, even including the crops from the vast fields of Russia, to supply her own needs. She is therefore absolutely dependent on the United States, India, Australia, and Argentina.

If an open conflict between the United States and Europe should ever come, the American might go far toward winning his victory by a mere stoppage of the tide of food; he could almost starve his enemy into submission. Five countries of Europe produce more wheat than they can use—Russia, Hungary, Servia, Bulgaria, and Roumania, but their surplus would be sufficient to supply only the needs of Holland, Belgium, Scandinavia, and little Switzerland, leaving unsatisfied the vast populations of Great Britain, Germany, Austria, Italy, and France. It is therefore no wonder that the question of food supply is constantly before the Parliaments of Europe. It is no wonder that the British Government is discussing the feasibility of building national granaries and storing vast quantities of wheat against the emergencies of war or famine. North America is not yet the largest producer of wheat, although the day may not be far distant when it will take first rank. In 1898 American farmers grew over 758,000,000 bushels, or more than one-quarter of the world's production; but Europe produced 1,548,881,000 bushels, or more than one-half the world's production. Asia (mostly India and Turkey) came next, with 421,000,000 bushels. These three continents are the great wheat producers. South America grows only 72,000,000 bushels, less by some 6,000,000 bushels than the production of the single State of Minnesota; Africa grows only 44,000,000 bushels; while Australia, which has been so much heralded as a source of wheat, comes last of all, with only about 35,000,000 bushels, or about the production of the State of Wisconsin, which is far from being first in the list of American States. —*Windsor Magazine*

Kendal Hiring Fair.—There was a large attendance of servants at this fair, held on the 17th inst. Wages asked were lower than the previous week, and consequently more contracts were made. Best men obtained from £16 to £18; second class men, £14 to £16; boys, £8 to £12. There was a scarcity of female servants, and good wages were obtained. First class women obtained £15 to £17; second class, £13 to £15; girls, £9 to £10 for the half year.

Messrs Powell Brothers and Whittaker, Cambrian Iron Works, Wrexham, have recently been awarded the King of Norway and Sweden's silver medal for their potato-raising machine, at the Bratsberg County Exhibition held at Krugero, and also at the Nevenoes County Exhibition at Arendal. This was the only award given for potato-raisers at these shows. As may be imagined, Messrs. Powell Brothers and Whittaker are now experiencing a large demand for their machine in Norway and Sweden, and also in the other potato-growing districts of Europe.

AGRICULTURAL POLITICS.

By a Lobbyist.

I hope my readers will not place too much reliance upon the cleverly-designed journalistic report which declares that Mr. Hanbury, the new Minister of the Board of Agriculture, is simply a warming-pan, and that the post to which he has been appointed will soon be filled by another. The report has this much to commend it, and nothing else—the probabilities of the political situation. Sir Michael Hicks-Beach is, it is generally known, tired of the duties of Chancellor of the Exchequer. He is even averred to be wearied of the political activities of the Lower House, and to sigh for the repose of the Upper Chamber.

Mr. Hanbury, it is also perceived, is not quite in harmony with the duties of the Ministry for agriculture. He is a born statistician, and he has more than once shown that he has that splendid quality in a Chancellor of the Exchequer—the capacity of making his financial statements interesting. Why, then, should not Mr. Hanbury succeed Sir Michael Hicks-Beach? To give artistic verisimilitude to the suggestion contained in this question, it is only necessary to say that Sir Michael Hicks-Beach will consider his active career finished when he has provided for the payment of the war expenditure. This the authors of the original statement readily aver.

It must be confessed that Mr. Hanbury is the roundest of men for the squarest of holes so long as he retains the position of Minister of Agriculture. There is no pretence that he has has any past or has any present associations with the interest. There is no pretension that he has ever made any study of its necessities. I believe frankly that, given time, he would make a good Minister of Agriculture, but that only because of the remarkable capacity of the man. However, this would be an intellectual rather than a sympathetic virtue. It would be a quality of the head rather than of the heart. Perhaps, in the long run, the intellectual value is the superior.

At the same time, I like not to think of a Minister of Agriculture whose equipment at the moment of appointment is want of vivid knowledge and want of sympathy, and who, moreover, is possessed by the belief that he has been thrust into the position simply because of the indisposition to concede him a more important post. This, I fear me, is the present temper of Mr. Hanbury.

I again make no attempt to conceal the fact that he is one of the very ablest men in the Ministry. But we want something more than knowledge, and it is not pleasant to reflect that the man who may have the legislation and economic destinies of agriculture in his control during the next five or six years has hitherto grazed only on the fat uplands of commerce and industry. Able and assimilative as Mr. Hanbury assuredly is, I believe that agriculturists generally would rejoice could they but feel that the story of his being only intended as a Ministerial stop-gap is justified.

I am glad to discover that Mr. Horace Plunkett comprehends that it is not desirable that he should continue to remain at the head of the new Irish Agricultural Department if it be impossible to find him a seat at St. Stephen's. The disassociation of Parliamentary responsibility from the position would mean the robbing it of half its intended significance. It would mean the placing of the Department on an equality with the Irish Office of Works. So many hopes are associated with the Department—hopes which, I am bound to confess, are in a measure due to the personality of Mr. Plunkett—that to reduce it to this weakness and insignificance would be a tragedy.

I should judge from Mr. Plunkett's speech that he himself expects that a seat will soon be placed at his disposal. I fain hope that this may be so. To disconnect Mr. Plunkett at the very outset of its career with an office of which he may be said to be the parent would be a calamity. Apart, however, from this, I am desirous of seeing Mr. Plunkett back in the House, because of my anxiety to discover whether the marked Parliamentary aptitude which he has already revealed will develop, notwithstanding the trammels of officialism. Still, he comprehends that if he cannot return to St. Stephen's he can no longer remain Irish Minister for Agriculture. The Dublin electors would then, in that case, have not only closed the door of official distinction, but, in Mr. Justin McCarthy's historic phrase, would have closed it with a clang.

The Irish land question we have ever with us, but, frankly, I do not believe that Mr. T. W. Russell's new agitation for a compulsory and aggravated scheme of land purchase is likely to

THE RIGHT HON. R. W. HANBURY, M.P.,
PRESIDENT OF THE BOARD OF AGRICULTURE.

catch on. There are two or three reasons which justify this view. In the first place, the Irish and English Tories are determinedly opposed to the reopening of the matter. In the next place, the Irish Nationalists as a body and the English Radicals as a body believe that in the past Irish schemes of land purchase have only enabled Irish landlords, and particularly the worst of them, to get rid of their land at fictitious prices.

In the third place, Mr. T. W. Russell is not the man he once was in British politics. There was a picturesqueness and a fascination about him so long as he hovered on the rear of Nationalism as a kind of irrepressible *franc tireur*. Even Irish Nationalists came to regard him very much as we Englishmen regard De Wet—as a man to be admired because of his intrepidity and dash. However, when he accepted a uniform at a big salary all the glamour departed from him. Even his oratory, which once fizzled and bubbled like champagne, seemed to take unto itself the vivacity of stale beer.

Mr. T. W. Russell, I believe, fancies that he still retains his old place in political esteem. I seriously question this; but, apart from this, I am persuaded that the English electors are tired of making the Irish land question a kind of sore from which the millions of the Treasury are eternally bled into the purses of needy and not too generous landlords. For the moment, I do not discuss his scheme. I only discuss side matters which will have a dominating influence on the movement. It is foredoomed.

I believe that Mr. Soares, who represents one of the Devonshire constituencies—I am not sure if the Barnstaple division is of Portuguese descent. Hence it is, I assume, that he believes that he is capable of giving advice to the English landlord, the English farmer, and the English agricultural labourer. Let me classify the advice of the gentleman:—

1. The interest on every class of investment has been considerably depreciated. The rate of interest at this moment is 3 and 3½ per cent., as compared with the 4, and 5 per cent. of a few years ago. Hence it is that the landlord should be prepared to take a considerably reduced rent.

2. The tenant must, while enjoying such just and equitable terms from his landlord as would enable him to secure a proper return for the money he invests in the soil, remember that he lives in the days of scientific farming, and he must thus abandon the methods of a played-out generation. Moreover, he must see to it that the labourer is well paid and well housed, and is enabled to live a self-respecting life.

3. The labourer should then "put as much heart into the work, and give the farmer the best service he can render."

What is the halcyon picture which the legislator limes with these pigments? A kind of universal happiness depicted as the fate of the gentleman who spent but 19s. 11d. out of his weekly salary of £1. The landlord is to receive less in rent—probably 30 per cent. less. The tenant, paying less in rent, is to spend more in implements and more in wages. The labourer, receiving more in wages, is to give the best work he can. Doesn't he give that now? Somehow or other, I don't see how this is going to redeem agriculture. Will it prevent the tenant farmer, who has to pay more in wages, with only a possible reduction in rent, relapsing into occasional bankruptcy? Will it prevent the never-ceasing immigration into the towns? If Mr. Soares thinks thus, the fact must be due to his having inherited the sensitive imagination which his ancestors cultivated in a warmer clime.

I have heard a whisper that Mr. Henry Chaplin is to receive a peerage. I pray that this may be so. Mr. Mr. Chaplin is one of those men who has won nobility by, in Spenser's beauteous phrase, "brave pursuit of honourable deed." He has been, in the House of Commons, the embodiment of squirearchal manliness and resolution, and, squire though he be, has fought the tenant farmers' battle generously. He would be, perhaps, in an element more attuned to his character than in the House of Common he would be relieved of the attentions of those rude Parliamentary gamins who mistake pert impudence for cleverness and irritating rudeness for wit. Besides, his elevation would show that Conservatism is not entirely bereft of the saving grace of gratitude, and that it possesses still a pregnant memory of vigorous service rendered at the party call, and of faithful devotion to exacting leadership. I should like much to be able to hail Mr. Chaplin "Viscount Blankney."

The [illegible] of the November hirings at Durham took place on the 17th inst. The attendance, both of masters and servants, showed a great falling off from the previous week. The free registry in the Town Hall was again open, and the majority of the engagements were made through this agency. Wages ruled at about the same rate as in the previous week. Boys, £5 to £8; girls and women, £9 to £11; men, £12 to £14.

THE DAIRY.

Where "Prime Dorset" Butter Comes From.

In reference to the recent report of the conversion into "prime Dorset butter" of butter imported from Australia, a correspondent writes: "The growth in the production of 'prime Dorset butter' has been marvellous these last ten years. So vast, in fact, has the industry now become that it may well be regarded as one of the wonders of the closing decade of the nineteenth century. The striking feature of this growth is that it has advanced year by year, notwithstanding that the number of dairy cattle in Dorset has been practically unchanged, that the manufacture of cheese has been greatly on the increase, and that the milk trade with London has yearly assumed larger proportions. There is the mystery. There is little doubt that Australian dairymen are not alone in finding their butter palmed off on an unsuspecting public as the produce of Dorsetshire. Irish, Danish, and Normandy undergo a like metamorphosis."

Relative Values of Mangels and Swedes as Food for Dairy Cattle.*

Of late years when the great depression in agriculture has affected all classes of farmers to a large extent, it has become the duty of those engaged in agricultural pursuits to do all in their power to help one another to tide over the evil time. A great deal of good may be done by the recording of individual opinions as to the selection of crops, stock, manures, etc., by those who have had extended experience, and who have arrived at definite conclusions after long trial. By such means as these farmers may obtain valuable information by which they can extract the uttermost farthing possible out of their holdings, and at the same time improve both their holdings and their own positions, for it should be remembered that the best profit can only be obtained from stock and land by good and abundant feeding, and that starving does not pay with either. The more we judiciously supply to stock or land in the way of food, within limits, the more in proportion we expect to derive, and the greater our percentage profit. If any farmer has thrashed out a valuable truth by long experience, it is his duty to state it for the advantage of his fellows. He can do nothing but gain by such a course.

It is with feelings of this sort that I have decided to write this short paper, hoping by the setting down of my own opinions, based on many years' experience with dairy stock, together with a collection of figures of analyses, etc., gathered from several eminent authorities, to be able to help some over a little difficulty which may have beset them, viz., the decision as to whether mangels or swedes are the more profitable crop to grow for dairy purposes, and

To what Extent the Advantage Exists.

I have found some difficulty, of course, as the figures of analyses vary considerably with different authorities, but by taking averages in some cases, and adopting the exact figures of some scientists in others, I think I am able to verify my statements satisfactorily. Nothing herein set down is guess-work. I have myself had analysed many samples of milk, etc., and where I do not quote my own figures I am always backed up by a recognised authority.

In the records of all the experiments which have been carried out in Europe and America on the relative values of different feeding stuffs for the production of meat, milk, or manure, I am unable to discover any which have for their object the setting-up of the mangel against the swede. This would appear to be due to the fact that they are looked upon as the essential bulky foods of two different seasons; the swede, on account of its comparative early maturity, and poor keeping qualities, being the first to be consumed, at a time when the mangel is not in a fit state for food. The mangel is a very long-keeping root, and on this account may be used months after the swede would have rotted. Where both mangels and swedes can be grown to advantage it is

Most Advisable to Grow Both,

the one for early consumption, and the other for late use. But, unfortunately, this plan is not feasible in many parts of the country. The mangel does not grow well in a light soil, nor in a cool, moist climate, while the swede flourishes best under these conditions. Hence it has become the custom in Scotland and the North of England generally, to use the swede almost entirely to the exclusion of the mangel, while the opposite is the case in many parts of the Midlands and South. Still, even this is only generalising, for many individual farmers the country over are growing both crops. Professor James Long has said:—"There is no food, in my opinion, so cheap or more suitable than the mangel." Long experience with dairy cattle has caused this to become my opinion too, and I will here try to uphold it with evidence.

In estimating the relative values of these two crops as food for cows, it is necessary to closely examine the matter under three headings:—(1) The relative cost of production of a ton of each; (2) the relative feeding value of the same; and (3) the relative value of the residue of the same.

Firstly, as to

The Relative Cost of Production.

As we are only taking relative values throughout, it is not necessary to obtain the actual cost in each case. For both crops the land needs the same cultivation, but for the mangel, in order to obtain a full crop, much heavier dressings of manure are necessary. To replace a 22-ton crop of mangels, twenty tons of farmyard manure are required, while a 14-ton crop of swedes depletes the ground to the equivalent of ten tons of manure only. Again, while one cwt. nitrate of soda and five cwt. slag or superphosphates may be taken as a fair top dressing for swedes, a full crop of mangels will require 2 cwt. nitrate of soda, 3½ cwt. slag or superphosphate, and 5 cwt. kainit. Thus we get these amounts for manure:—

MANGELS.	£.	s.	d.
20 tons manure at 3/6	3	10	0
2 cwt. Nitrate at £8 10s.	0	17	0
3½ cwt. superphosphate at £3 10s.	0	12	3
5 cwt. kainit at £2 10s.	0	12	6
Total	£5	11	9

SWEDES.	£	s.	d.
10 tons manure	1	15	0
1 cwt. nitrate	0	8	6
5 cwt. Superphosphate	0	17	6
Total	£3	1	0

Thus in manure a full crop of mangels costs £2 10s. 9d. per acre more than a full crop of swedes. These 22-ton and 14-ton crops, which I am taking as "full" crops, will seem ridiculously low to some, but are, nevertheless, the average crops. To the above amount we have to add about 2s. per acre for the greater cost of harvesting, and we arrive at the result that it costs £2 12s. 9d. more to produce twenty-two tons of mangels than to produce fourteen tons of swedes. Therefore, the extra eight tons of bulky food costs 6s. 7d. per ton, and if with the above manures we produce twenty tons of swedes and forty of mangels, the disparity becomes even more striking.

Secondly, as to

The Relative Feeding Valu s

of a ton of each. This is the most important point. As we are here concerned with dairy cattle, we will confine ourselves to the question of feeding for milk. Let us look closely at the two anaylses:—

	Mangel.	Swede.
Water	88·00	89·10
Albuminoids	1·10	1·40
Sugar	6·41	5·54
Starch and Fibre	3·59	2·86
Fat	·10	·20
Ash	·80	·60
	100·00	100·00

The first thing we notice is that the mangel contains about 1½ per cent. more dry matter—a considerable quantity out of only 12 per cent. or so contained in each. That is, the mangel has about 1.4 per cent. more dry matter than the swede, or, in other words, eighty-seven tons of mangels will produce as much concentrated dry food as 100 tons of swedes (roughly). This is a point of great importance, and gives rise to another equally striking, namely, the economy in land gained by raising a given quantity of this concentrated food in the form of mangels instead of swedes. For example—to raise eighty-eight tons of mangels on the basis we have adopted only four acres of land are required, whereas to grow the equivalent in swedes—100 tons—we should want seven acres.

Of the constituents given in the last table, only the following amounts are digestible, and, therefore, needing our attention for feeding purposes:—

	Mangel.	Swede.
Albuminoids	1·10	1·30
Fat	·10	·10
Carbohydrates	9·10	6·30

The rule for calculating food values from the analysis is to allow 4s. per unit for albuminoids, 3s. 6d. for fats, and 9d. for carbohydrates (McConnell). In this way the value of the mangel comes out at 11s. 7d., and the swede at 10s. 5d. Taking milk as containing albuminoids 4.2, fats 3.8, carbohydrates 4.5, it is evident that the food which contains the greatest quantities of these constituents is

The most Valuable as a Milk Producer.

We see that the swede has a small advantage as regards albuminoids, and the mangel a large advantage as regards carbohydrates. The swede has an advantage as regards albuminoid ratio, being 1 : 8, as against 1 : 9 for the mangel, the ideal for milkers being 1 : 6.

Taking all things together, we may fairly conclude that for feeding purposes mangels are worth 1s. 2d. per ton more than swedes, being the amount arrived at above. But there are disadvantages to be considered on both sides. The swede gives such a disagreeable flavour to milk as to preclude its use entirely in some districts, and by many individual farmers, while in all places where it is used the utmost precautions are necessary. Swedes must be fed immediately after milking only, or else cooked, or intimately mixed with other foods after having been pulped small.

A great disadvantage of the mangel is that it produces very pale milk, containing fat globules of such minute size that they only rise to the surface of the milk very slowly and incompletely, giving the impression that the milk is poor. That this is not the case may be easily proved by analysis, and I feel safe in asserting from my own experience that the mangel produces milk as rich in butter-fat as the swede does. Still, this disadvantage is a very serious one in a retail milk business, and also renders quite indispensable the use of a cream separator in the butter-making business if anything like the full amount of cream is to be extracted. For cows fed on mangels the old shallow-pan setting system of cream raising involves heavy losses. Of course, the loss of cream in skim milk is great any way without a separator. This is now a generally accepted fact, but it is far greater when extensive mangel feeding is practised.

Thirdly, as to

The Relative Values of the Residues

left by a crop of each root. The manurial residue of a crop is divided into two classes:—(1) That left in the land at the removal of the crop; (2) that returned to the land as manure made by the consumption of the crop. The following analysis, quoted from Mr. McConnell's invaluable "Note Book," will show that, bulk for bulk, the leaves of the swede as a manure are considerably more valuable than those of the mangel:—

	Water.	Albuminoid.	Fat.	Carbohydrate.	Fibre.	Ash.	Organic Matter.
Mangel leaves	90·5	1·9	·5	4·0	1·3	1·8	8·7
Swede	88·3	2·1	·5	5·2	1·6	2·3	9·3

But when we take into consideration the far greater bulk per acre of the mangel crop, and remember that in proportion to the root the mangel grows more leaf than the swede, it is easy to see that the mangel leaves a residue far more valuable than the swede.

As the manurial residue after consumption of a ton of each, Sir J. B. Lawes and Sir H. J. Gilbert, in an article on the value of manures obtained by the consumption of foods for the production of milk, give 2s. 9d. as the value of manure obtained by feeding one ton of mangels to a cow giving ten quarts of milk a day, and 2s. 7d. as the corresponding value for swedes. This means a difference per acre of £1 4s. 4d. in manurial residue after consumption only in favour of the mangel.

As regards the feeding of the leaves to milking stock, my own experience has shown that it is not safe to feed mangel leaves at all, as they have a curious effect on the milk, often making it go bad (not sour) very quickly, and causing endless trouble in the way of complaints from customers. Doubtless this is due to the same property as exists in the roots before fermentation in the "pit" or "bury." It is only safe to feed swede leaves when they are quite fresh, and then with the same precautions as are necessary when the roots are consumed.

From the foregoing collection of figures and evidence it is possible to summarise by drawing the following comparison:—

Advantages of the Mangel over the Swede.

- With the same amount of manure it is possible to produce a bigger crop per acre of mangels than of swedes, and with comparatively small additional outlay, a far bigger crop of succulent, bulky food, such as is required for milking cows.
- The mangel can be stored and kept sound and nutritious long after a swede would have become rotten and worthless under similar conditions.
- The mangel is better able to withstand drought, having a more extended root area.
- The mangel is not affected by turnip fly, nor by finger-and-toe disease, both very destructive to the swede, although it is periodically affected by the less-known mangel fly (*Anthomyia betae*).
- When fed to milkers the mangel does not impart any strong or disagreeable flavour to the milk or butter, as is the case with the swede.
- As a milk producer—bulk for bulk—the mangel is a slightly more economical food.
- The residue left in the land after a mangel crop is far more valuable than that left by the swede crop—area for area.
- The manurial residue of a ton of mangels after consumption is appreciably greater than that of a ton of swedes.
- The smaller fat globules in the milk, the result of mangel-feeding, are of advantage to the cheese-maker.

Advantages of the Swede over the Mangel.

- The swede can be used early in the season, and often comes in useful at a time when the indispensable succulent food is scarce, and at a time when the mangel cannot be used.
- The swede will grow and thrive on a thin soil and in a damp cool climate, where mangel crops are a practical failure.
- The swede need not be sown until danger of mildew and frost has passed, while to ensure a full crop of mangels early sowing is essential.
- As a milk producer, swedes have some advantages:—(a) They produce a milk richer in colour and appearance, and throwing up more cream than mangel-produced milk. These are weighty advantages in the milk trade. (b) The butter from swede-produced milk has naturally a good

* By W. P. J. Allsebrook, in the October "Journal" of the British Dairy Farmers' Association.

colour, while that produced from mangels is always pale in colour.

The leaf of the swede is a good, nutritious, and safe food for milkers, while that of the mangel is unsuitable, and even dangerous.

General Summary.

The respective advantages of these two valuable crops, the one over the other, render it impossible to lay down any hard and fast rules as to the adoption of one to the exclusion of the other, but several valuable conclusions may be drawn.

Doubtless, as before mentioned, where both crops can be grown to advantage, it is advisable to grow enough swedes to tide over the period before the mangels are fit for consumption, and enough mangels to last until the grass is ready for turning out on. There can be no doubt that, from most points of view, the mangel is the more valuable crop to the dairy farmer, and its extensive use is therefore desirable. Where the mangel does not thrive, of course it is useless to grow it, but there are few lands where it will not grow to advantage, if plenty of good heavy farmyard manure is employed. In feeding for production of milk for sale, the swede has high recommendations, but the mangel undoubtedly stimulates a greater flow, and for milk intended for butter-production both have good points —one in point of colour, the other in point of quantity.

Chester Cheese Fair.

The Cheese Fair at Chester took place on Wednesday, when there was a large pitch of about 55 tons of cheese, this quantity being about 20 tons in excess of the corresponding fair last year. The market opened with a good average attendance of buyers, but the quick, sharp business spirit sometimes manifested at this time of the year was not much in evidence. Finest fresh lots were readily sold at from 60s. to 67s.; medium, 54s. to 58s.; and common lots down to 46s. per cwt. A good clearance was made by eleven o'clock.

A County Court Judge on Farm Service.

At the Malton County Court on Wednesday, before his Honour Judge Raikes, Mr. H. W. Pearson made an application in a wages case heard at the last court, and in replying his Honour said Mr. Pearson would be doing a national service by drawing out a form of agreement which would be satisfactory to both sides. The present state of things he thought was enough to drive every labourer off the country side, and he suggested as a reasonable thing that in a case where, say, the wages were £20 a year, instead of dividing it into £5 a quarter they should reckon it at £8 for the quarter containing the harvest and £12 for the other three quarters, also that a month's notice on either side should terminate the agreement. These yearly engagements at present were no doubt satisfactory in the old days when there was no competition, and when men had no idea of going elsewhere; but now at the end of the nineteenth or beginning of the twentieth century this sort of thing did not take at all. They tied a man down with such an agreement, and of course when harvest time came he knew he could get double or treble the wage, and the result was there was discontent on both sides. If they could get some arrangement by which the agreement could be terminated without injury to either side it would be a national benefit. In Yorkshire they were so conservative in past customs, going back some centuries, but he thought the thing should be altered now that everybody could write.

Mr. Pearson said that after the passing of the last Master and Servants' Act he published a small handbook of it, with a form of agreement in the shape of a cheque book, the counterfoil to be signed by the servant, but it was universally conceded by farmers that it was utterly impossible to get the men and lads to put their hands to anything. On the wold farms the men lived in the masters' houses, and seldom came from the neighbouring villages, and accommodation had to be made for them. A large number of lads, in fact, were imported from Norfolk and other parts by people who made a business of it. The matter was full of difficulty—it was not desirable that they should remain as they are, but any alteration would have to be done gradually.

Yearly Hirings of Farm Servants.

A very important decision to the whole agricultural community was given by his Honour Judge Raikes at the Scarbro' County Court on Tuesday. For some little time there appears to have been doubt in the minds of both farmers and farm servants as to whether their contracts for a year could be avoided either by the farmer or by the servant on giving a month's notice, or some reasonable notice, and his Honour Judge Raikes has had several cases of late to deal with, in none of which, however, did this clear and definite point arise. It did, however, arise in a case at the Scarbro' Court. It was an action brought by Coultas Vasey, of Sawdon, farm servant, against John George Monkman, of Brompton, farmer, to recover a sum of £13 6s. 8d., wages from 9th January to 18th August last as wagoner. Mr. Tasker Hart appeared for the plaintiff. On the 5th January plaintiff was hired by defendant as a wagoner at the wage of £20 from that time up to Martinmas. Some little differences arose, and about June plaintiff desired to leave and asked for his wages. The master declined to pay, and informed him that he must complete his contract up to Martinmas. Ultimately the master did offer, if plaintiff would sacrifice £2 as compensation for harvest, he would let him go and pay his wage. This plaintiff declined, and finally on the 18th July gave a written notice, that he would leave at the expiration of one month. On the 18th August he did leave, and claimed £13 6s. 8d. It was sought to show that Vasey's excuse for leaving was that he was not properly fed. This, however, was not supported, and was entirely denied by the two Messrs. Monkman, and was not in the result believed by the judge.

Mr. Hugh W. Pearson, for defendant, submitted that the contract having been entered into after Martinmas to be fully completed within one year, it was a binding contract, that to entitle the servant to be paid any wage at all he must complete his contract, and that if before that time he was either dismissed for any valid or proper reason, such as misconduct, or if he broke his contract by leaving, he forfeited any wage which might have accrued up to the time of such breach of contract. He quoted cases in support of this, and contended that the rule was founded both in reason and in custom, and was incidental to the special nature of agriculture, which varied at every season of the year, so that in winter a servant might be earning little or nothing and have to be kept, whilst at seed time and harvest his services were not only of great value, but that if he was not then ready to carry out his contract incalculable injury might be done to the farmer.

His Honour, in giving judgment, pointed out that in the case now before him the Statute of Frauds did not apply, and that the contract was to be completed within a year, and that as the servant had not established any justification for his breach of contract, it was one and indivisible; that no wage was earned until the contract was completed at Martinmas, and that therefore he must give a verdict for the defendant, which he did. At the same time, his Honour thought the result was unsatisfactory, and that these contracts binding a servant to the soil for twelve months were antiquated, but so long as masters and servants chose to enter into them they must be bound by them, and that therefore the defendant was under no legal liability to pay plaintiff anything, and he was bound to decide accordingly.

Farmers and the Employers' Liability Act.

At a meeting of the East Sussex Farmers' Club last week an address on "Employers' Liability," particularly as affecting farmers, was delivered by Mr. R. H. Bacon, resident secretary in Brighton of the Ocean Accident and Guarantee Corporation, Ltd. In the course of a lucid exposition of the main points of the Act passed last session to extend the benefits of the Workmen's Compensation Act, 1897, to workmen in agriculture, Mr. Bacon said the Act applied to farmers who had one or more workmen in their employ. The compensation to be paid to workmen in respect of injury received while following their employment was 50 per cent. of the amount of wages paid not exceeding £1 per week for an unlimited time in the case of partial or total disablement, and in case of death three years' wages, varying from a minimum sum of £150 to a maximum of £300 where the workmen had dependants. If a man had no dependants the employer was liable for funeral expenses.

An important provision of the Act related to the employment of any workman mainly in agriculture, but partly or occasionally in other work. A farmer might have a small dairy and engage a dairymaid partly in the house and partly in the dairy, and the question was whether the private or domestic employment came under the Act, which appeared to be intended to apply also to the employment of the workman "in other work." The term employé covered everything. A farmer was liable to pay compensation to any employé of a sub-contractor, except those employed in threshing and ploughing, the clause reading: "Where any such employer agrees with a contractor for the execution by or under that contractor of any work in agriculture, section 4 of the Workmen's Compensation Act 1897 shall apply in respect of any workman employed in such work as if that employer were an undertaker within the meaning of that Act. Provided that, where the contractor provides and uses machinery power for the purpose of threshing, ploughing or other agricultural work, he and he alone, shall be liable under this Act to pay compensation to any workman employed by him on such work."

Farmers were not liable for compensation for the first two weeks a man was incapacitated, but some employers liked to pay the injured man from the date of the accident, as, under the Act, a man who was only laid up for a week or ten days could not make a claim. The company which the lecturer represented charged three shillings per cent. on the amount of wages paid for settlement of claims according to the Act, and an additional eighteenpence for payment of compensation from the date of the accident. Having urged the advisability of farmers insuring while rates were low, Mr. Bacon said the Act would come into force on July 1st. Like the Workmen's Compensation Act, 1897, there might be loopholes in it, and litigation might result. The idea, however, was to pay compensation for accidents which might happen to workmen when employed on the farm or off it.

In answer to the chairman, Mr. Bacon said the compensation payable to a man earning £1 per week would be 10s. per week. If the man, after recovering from his injuries, was employed again by the same farmer at 15s. a week, and had previously earned £1 a week, the farmer would be liable to pay the extra five shillings, provided the man could prove that he was unable to earn what he did prior to the accident.

A member remarked that, according to the scale of compensation, a workman was worth exactly the same amount at eighty years of age as at forty. Replying to questions, Mr. Bacon said there were no restrictions as to guarding machinery. Compensation must be paid for accidents, unless contributory negligence or misconduct could be proved. Except in cases where drunkenness was proved, the judge invariably gave the decision in favour of the workman. A man must have been in employment at least a fortnight before he could make a claim under the Act, the idea being that farmers should not be liable for accidents to occasional hands. If a man worked on the farm for three weeks the farmer became liable. Mr. Bacon said he could not say whether a farmer would be liable for accidents which might happen in connection with private employment. Grooms, coachmen, gamekeepers, or other employés, in respect of whom a licence was paid, were not included in the Act.

THE WEATHER.

MONDAY (November 19th).—Scarcely any rain was reported in the morning, the weather having continued dry during the preceding twenty-four hours in nearly every part of the kingdom. The conditions were, however, assuming rather a threatening aspect, and the barometer was already falling in the Northern and Western districts, with a southerly wind and rise of temperature. In London the weather continued dry, and the air was cold, the highest temperature being forty-four degrees. Rather a sharp touch of cold had occurred in the Northern and Western districts during Sunday night, the sheltered thermometer registering several degrees of frost.

TUESDAY (November 20th).—Dull and gloomy weather prevailed over nearly the whole of our islands, and the air was very damp in the south-east of England. The winds were chiefly north-easterly in England and Ireland, and the temperature was somewhat low for the time of year, while slight frost occurred at some of the inland stations during Monday night. In Scotland the wind was chiefly light from the south-west, and in the extreme north the morning was as warm as in any part of the kingdom. The midday temperatures scarcely touched forty-five degrees anywhere in the country. A damp mist fell in London during the greater part of the day, and the highest temperature was forty-six degrees.

WEDNESDAY (November 21st).—The weather was fair in many parts of England, but there was still a good amount of mist and gloom. Rain was measured in the morning in different parts of the kingdom, as the result of the fall since Tuesday, but the amounts were mostly small. Rain fell again at several of the northern and western stations. Northerly and north-easterly winds were blowing over England, and they were very light in force. In Scotland and Ireland the wind was moderate to fresh from the southward. Frost occurred during Tuesday night in parts of our islands, and the midday temperatures were again rather low. The air was drier in London than on several previous days, and the temperature rose to forty-seven degrees.

THURSDAY (November 22nd).—Dull and cloudy weather prevailed generally, but the air was, for the most part, fairly dry. Rain was measured in the morning, as the result of the fall in the preceding twenty-four hours, over the eastern portion of England, as well as at several places in the west of our islands. The winds were mainly northerly, and they were mostly light except on our east coasts. Slight frost had occurred in parts of Scotland and Ireland during Wednesday night, but in most parts of England the thermometer did not fall below forty degrees. The midday temperatures were generally in fair agreement with the average.

FRIDAY (November 23rd).—Fine weather was experienced over England, but rain again fell at many places in Scotland and Ireland. Rain was measured in the morning over the northern and western portions of the kingdom, as the result of the fall since Thursday. Slight frost was again experienced in places during Thursday night, but the midday temperatures were generally rather higher than of late. The type of weather was still very complex, and we were under the influence of two cyclonic disturbances, one having its centre over Northumberland, while the other was approaching our south-west coasts from the Atlantic, and was occasioning a renewal of rough weather. The ground was thickly coated with hoar frost in the early morning in London, and the weather was very fine throughout the day, the sheltered thermometer touching fifty degrees.

SATURDAY AND SUNDAY (November 24 and 25).—The whole type of weather continued thoroughly unsettled over our Islands, and rain fell in nearly every part of the country during the two days. A cyclonic disturbance was approaching our Western coasts on Saturday, but its centre was well out in the Atlantic, although the southerly wind was freshening considerably in the South of Ireland, and the sea was rough in St. George's Channel. On Sunday the disturbance had spread over the western and central parts of our Islands, and the winds were south-easterly in the northern districts; while in the South of England they were westerly. A moderate westerly gale was blowing over the Western portion of the English Channel. Saturday was fine in London, but rain fell heavily during the succeeding night, although Sunday the weather was again fine. The temperature rose to fifty-three degrees in the Metropolis on Sunday, which was seven degrees warmer than on Saturday.

A Farmer's Death from Worry.—An inquest was held on Tuesday on Alexander Rae, aged sixty years, farmer, of Flaxton, near York, who died on Sunday. It appeared that on Saturday the deceased's home was distrained upon, and he was much troubled about the matter, sitting up all night. He died next day after a convulsive seizure. The post mortem examination showed that the cause of death was acute inflammation of the membrane of the brain, probably due to trouble—mental worry. The jury returned a verdict of "Death from acute mening tis."

THE GARDEN.

During the last few days drier but colder weather has prevailed, and the change from the ceaseless rain is decidedly pleasant. Once more work on the land is progressing a little, and potatoes that have been long waiting to be lifted are at last being got out of the ground.

RHUBARB AND SEA KALE.—Strong roots of both these popular subjects may be forced in any warm greenhouse, pit, or shed at any time now. Where there is a mushroom house or shed such work is very commonly done in this, but though right enough for sea kale, which cannot be too white, it is not a good place for rhubarb, which without a certain amount of light is apt to become too pale in colour, sticks of a rich pink or red hue being most in demand. A place beneath the raised staging of an ordinary greenhouse is as good as any for forcing rhubarb, or it may be grown in full light by simply scattering some dry straw or litter lightly over the crowns. Beyond this no covering is necessary, and in a temperature of 55degs. to 65degs., plenty of stout and well-coloured sticks will soon be produced.

The roots of rhubarb for forcing should have been planted at least two years, whether grown from divisions or seed, and the fewer stalks have been pulled from them previously the better. Lay them in closely together on the floor of the house or pit, working some fine, light soil in among them, and finally give a good watering in and cover with litter, as above.

Sea kale roots are usually planted, roughly and rather thickly, in any good-sized pots or boxes, using some good light soil, watering well, and then, unless in a mushroom house or other dark place, cover with other empty pots or boxes inverted over the full ones. The same temperature will answer for this subject as for rhubarb, and in both cases a moist and sweet atmosphere must be maintained around the plants constantly. Sea kale roots must, however, be trimmed before planting, cutting off all the smaller feeders, of the thickness of a cedar pencil or less—these are to be stored in damp sand for the winter, to furnish the root cuttings for next season's crop. Good forcing roots can be grown in one year from these root cuttings, but if seedlings are employed two years' growth is usually necessary.

Fresh mushroom beds may be made up at any time, as required, but those formed in September or October, if well done, will frequently afford regular supplies until long after Christmas. When a bed appears to be getting exhausted, and is found to be dry, it should be uncovered and be given a thorough soaking, using a fine-rosed can and going over the beds time after time, so as to get the water well into it. The water should be tepid, with a good handful of salt, or, better still, of saltpetre, dissolved in each large can or pail; or weak liquid manure may be used very beneficially, also with a little salt in it. Then let the surface of the bed dry for a day or two before replacing the covering. This treatment will often resuscitate a bed wonderfully, and afford several more gatherings.

Lift and store the roots of both beet and celeriac before there has been more than a very few degrees of frost, as both are easily injured in this way. Beet should be lifted very carefully, breaking as few of even the finer fibrous roots as possible, and twisting—not cutting—off the leaves. The foliage and smaller fibres of celeriac should also be trimmed off, and either may then be stored in a clamp (preferably) or in a not too dry shed or cellar. Late-planted celeriac may be covered with a foot of dry litter or fern, and will then be safe until severe frost sets in.

As soon as the planting of fresh fruit trees and bushes has been completed, the pruning of the established plants should receive attention—it is always better to get this done before hard weather sets in.

Taking the smaller or bush fruits first, both gooseberries and currants are frequently pruned in a quite erroneous manner, even by those who ought to know better. As regards the gooseberry and black currant (both of which fruit principally on the young wood formed last season), the best method may be briefly expressed in the words, "thin out rather than shorten." That is to say, leave all the best and strongest of the young growths untouched, or nearly so (except for any unripe tips), but wherever at all crowded thin out the weaker shoots so as to afford the rest free light and air. The young growth of the red and white currants, on the other hand, should be cut back to two or three eyes of their base, so as to form spurs on the main or fruiting branches. Cut away the old canes of raspberries that have fruited, and thin out the young ones to five, or not more than six to each root.

As the chrysanthemums (in pots) go out of flower cut them down to a few inches of stem, and remove, if possible, to a low pit or cool, light house, where they will throw up strong cuttings. Commence to take and insert these already as they become fit.

Dahlias in the open should be cut down as soon as the tops have been blackened by frost, then lift the roots, dry them a little, and store in a shed or cellar where frost cannot reach them.

FARM PROSPECTS.

Cambridgeshire.

The weather during the past week has been anything but favourable from an agricultural point of view. Some very heavy rains and frequent showers have made the land very wet, and greatly retarded wheat-sowing operations. Happily, potatoes and most of the mangolds are made safe. The markets are very much after the stamp of weather, very dull and flat, all kinds of grain (of home production) having a downward tendency, while maize and cakes are the reverse. The potato trade has also slackened during the past fortnight, no doubt on account of the foreign supply. Several farmers are riddling their potatoes over, to lay by till spring, hoping for better prices, while very few are being sent away from this district. Beef and mutton trade are about the same, while pork has an upward tendency, being rather scarce. In-calf cows are good to sell. Butter, 1s. 2d. per lb., and eggs eight for 1s.—W. (November 17th).

Central Bucks.

Prospects Look Worse.

We have now had enough rain to enable us to get on with wheat seeding; in fact, it has been a little too wet last week, but now the wheat goes in heavy and well. It is just our time for planting, as we do not care to put in wheat until November comes in on our hills. Swedes, turnips, and other green crops have immensely improved of late. We had a very fine time for getting the mangolds up, but they did not turn out so heavy a crop as was anticipated. Barley does not turn out very well, as regards sample or yield, and the price gets lower every year. Wheat is a very bad trade—27s. or 28s. does not pay to grow it at. Beef and mutton make a little more money this year, but the cost of cake and other feeding-stuffs counteracts the better prices, so that the position of the feeder is not at all improved. I cannot see that the prospects of the farmer look a bit better; in fact, I think they look worse.—J. T. (November 21st).

East Suffolk

The late wheat sowing is just now the feature of the season. After wet enough to let the ploughs into the dry land, then came heavy rains, so as to keep drilling and other work off for a time. Now a good start has been made, with a prospect of finishing wheat sowing by the end of November. The root crop, mangold, and some swedes, has been carted off crop—mangold, and some swedes—has been carted off for the night, and look cosy and comfortable. A young farmer who keeps careful accounts tells me that on winding up his 1899 crops the least return per acre was for wheat, then barley, beans, oats, and potatoes, in the order named, and, as a whole, no net profit; but that the live stock on the farm

Saved the Situation.

Horses, cattle, sheep, pigs, and poultry all gave a profit. Though we seem to have had a wet time lately, the drains have not all been working, and ponds are not filled yet, so we may have to wait for the new year for a full supply.—J. Y. (November 23rd).

Mid-Sussex.

We have had a very wet time lately, but as yet I have not noticed a drain running anywhere, and after a day's cessation of rain the land walks clean. A very good season was made, and wheat went in very well, and has come up well too. All roots are safely housed. The young clover, trefoil, and trifolium plant is very promising. The meadows are looking green at last after being of a brown colour for months, the weather being open. Stock are looking well.—F. C. C. (November 21st).

Nottinghamshire.

The weather of late has been mild generally, accompanied with miserable rainy weather, which has been very much in evidence; but it is, however, satisfactory to find that in this district (North Notts) wheat sowing has been practically finished under favourable conditions. Most of the seed was sown before the excessively heavy rains set in, or the outlook on the strong clay land would now have been very discouraging. Of course, there are a few laggard farmers here and there who have hardly got any seed wheat sown at all; but that generally is the case, however fine the weather. All such have a season to themselves. The weather favours carting and storing mangolds, turnips, and swedes, of which there are some excellent crops.

The Potato Crop

proved to be a miserable failure on the strong soils. Many tubers were diseased, with a poor turn-out; indeed, a very small crop generally. Some of the early-sown wheat is now showing above the surface, having come up very nicely, and is now making good progress during the mild weather. The stock still run on the pastures during the daytime, thus saving

a lot of winter keep, and it is satisfactory to learn that

Cattle and Sheep

are in a healthy condition. The yield and price of corn are far from being remunerative to the farmer, and this is the chief topic amongst the market folk just now, when rent days and Christmas bills are falling due. It is now Martinmas, and here many contracts are entered into at hirings which are held. Wages have an upward tendency yet, which has prevailed during the recent years, owing to the continued migration of the agricultural labourers into the towns. Thus, in view of a decreased supply, the farmer has been compelled more or less to accede to the extra demands of the farm lads and girls. There yet seems to be an increased growing dislike amongst this class, especially farm lads, to a yearly engagement. The impression is gaining ground with them that release can be obtained on giving a "month's" notice, or forfeiting a month's wage. Of course, most of the hirings are verbally entered into, and in many cases the lads are but young—just out of school. However, there is a

Great Shortage of Hands

for farm work, and the depopulation of the villages will go on for many reasons, viz., chiefly, firstly, there is a dearth of houses; secondly, the lads get more wages in towns; thirdly, they obtain more recreation, and have less time to work, etc. The allotments have thus far failed to entice or keep men on the land. The panacea does not lie there—increased wages is at the bottom, which the farmer cannot afford to pay, with corn at zero prices. With regard to the custom of publicly

Hiring Labour,

this, as every schoolboy knows, dates back to Biblical times; but nowadays pleasure seems to predominate over business, for there are shows, shooting galleries, etc., all in honour of the Feast of St. Martin, which has become a time-honoured institution in North Notts. The outlook here is not of the best on the approach of Christmas.—AGRESTIC (November 22nd).

Norfolk.

The extremely fine autumn of 1900 removed a load of anxiety from the mind, and reduced the labour bill of many agriculturists in this (the Marshland) district. For two months, with scarcely a break, potato lifting was advantageously carried on. The weight per acre will

Not Compare Favourably

with the last three years, but equal to the last ten years' average, and, with present prices, equally remunerative. The roots (mangolds principally) have been secured under most favourable conditions, and wheat sowing almost completed. The restrictions on the Argentine live cattle trade enabled the graziers to dispose of beef and mutton at remunerative prices, and not before urgently needed, for, while the arable lands have responded magnificently to the past brilliant seasons, our pastures have suffered considerably. This, coupled with a long run of low prices for meat and wool, reduced the margin of profit to a minimum. —W. A. N. (November 23rd).

Shropshire.

Weather cold and frosty, barometer between fair and set fair. Beautiful sunshine, drawing out the Lees, and turnip storing busily going on. Mr. Frost, after tripping lightly about on fields, and looking in at our meadows to ask if we were ready for him, comes on harder, ready or not. The turnip crop exceeds expectations, but they may be put in three classes—the large, the middle size, and the small ones. The largest—about 20lb.—fell into good soil, well manured, followed by a saturating rain; the second sort—forming the bulk of the crop—failed to make headway till late, but favourable weather helped them up to 12lb. and 14lb. They look a fair size on the cart. The last lot, after missing the first and second chances, took the third, and try to make up in number what is wanting in bulk; indeed, a second sowing would have been of great advantage this year, though other years it would have been a loss.—J. G. (November 23rd).

Stafford.

On the whole the autumn has been favourable, both to farm work and to farm stock. It is true that for some time past the carting of roots has made rather bad work with the surface soil, but the roots themselves have escaped all damage from frost. Up to the present the consumption of dry fodder has been less than usual, because of the good grazing still remaining in the pastures. The supply in our markets of all meat products from beef to poultry has of late been so full that prices have gone down considerably. At the same time the demand for

Dairy Cows in Milk

or near calving has quite overtaken the supply, and it seems likely that the continually increasing consumption of new milk in our towns will, during the next few months, tax the producing powers of our dairy farmers to the fullest extent. Wheat sown in October has come up well, the condition of the seed having been, as in several preceding years, sound and dry.

South Worcestershire.

After a long spell of wet, miserable weather we are now having a very acceptable change, which was much needed, as work on the land is much behind, and still a good deal of wheat to plant, whilst mangolds, owing to the scarcity of labour, are not all secured. Sheep have had a very uncomfortable time on the roots; the latter are turning out well, much better than they at one time promised, so that there will be no lack of sheep keep, whilst cattle are doing well on the pastures. Corn trade dull and disappointing, and as the yield is bad it will do but little to meet the farmers' ever-increasing expenses, both in labour and tradesmen's bills. Fat cattle, if ripe, are meeting a better trade. Store stock of good quality sell well.—J. W. D. (November 21st).

Westmorland.

The question which most deeply engrosses the attention of the farming community at the present moment is undoubtedly labour, and this has been chiefly caused by recent circumstances—first, by the discharge of the wages account of the several hands, male and female, engaged during last half year, which has largely increased the inroad upon our receipts for agricultural products, the cost of which is so much affected by labour; and, secondly, by the re-engagement of a new staff for the current half year at an equally high rate, if not higher, if the winter is considered, when the quantity of work is considered which short days enforce. This question has been undoubtedly the chief one discussed at the various rendezvous of farmers on market days, apart from their regular business, and the general opinion is that

Education has been the Chief Cause,

Until recently for a farmer to express such an opinion publicly was to lay himself open to a large amount of criti ism and ridicule by the great bulk of speakers and writers who so generously offer us such floods of advice on questions with which they have little or no interest and less experience. Since the Education Department has acknowledged the fact by its recent action I suppose we may be excused for endeavouring to trace cause and effect. There can be no doubt, then, that shortly after compulsory education was enforced the quantity of labour began to decrease, and continued so to do till the school age was raised, since which the reduction in quantity and the increase in price has gone forward with leaps and bounds, and the ridiculous efforts of the department to

Teach Farming in Schools

will be equally unsuccessful so far as restoring labour to the land is concerned, and is more likely to increase than cure the evil. Agriculture cannot be taught with any degree of success, except on the farm, and the longer the youth is kept away from it the less inclination he will have to engage in it, and the slower he will learn the art. There are other questions that affect the question, but education is one. The next question we have to complain of is the almost continuous wet, damp weather we have had for close upon two months, which has seriously retarded the storage of one of the

Largest Crop of Roots

we have had for years, which is, I firmly believe, close upon double the weight of last year's crop. There has been also a serious and altogether unexpected fall in the price of store stock all round.—T. B. (November 23rd).

West Derbyshire.

The weather is exceedingly mild and favourable for all kinds of live stock. Roots have been a much better crop than we have had for some years, mangolds especially have been a record crop. Wheat sowing is nearly all completed; that which was sown early is looking very well. Ploughing is commenced again, after being stopped some time owing to the excessive rains we have had during this last month. Beef and mutton are a drug on the market. Pork is well sold, also store pigs. If the present weather continues it will be very acceptable. Pastures are beginning to look rather brown.—C. C. M. (November 22).

Foreign Prospects.

FRANCE.—General satisfaction is expressed by farmers in respect of the agricultural position. No decision as to "Importation Bonds" has been arrived at by the Senate, and this protracted delay is said to interfere with the sale of wheat, neither sellers nor buyers caring to enter upon engagements while the question remains open.

BELGIUM.—Weather continues mild and open. Antwerp did a steady consumptive trade this week, but forward demand was disappointing.

HOLLAND.—Damp and dull weather interferes with threshings, and supplies of wheat and other grain were moderate at Groningen and other markets, and farmers secured an advance of 3d. per quarter for wheat, rye, and barley.

GERMANY.—Rain has not only proved beneficial to the crops, but has increased the water in the rivers, and thereby facilitated the movement of grain at lower freight rates.

HUNGARY.—Recent weather has been favourable to agricultural interests.

ALGERIA.—Rain has fallen copiously and generally in the province, and farmers now can begin ploughing.

SWITZERLAND.—The sowings have been effected in good conditions and the seedlings are developing well.

ROUMANIA.—Most of the autumn cereals may have withstood the drought look well, but others have so suffered from the want of rain that they will have to be resown. The ploughings for the spring crops are being prosecuted since the rain, and wheat to follow the fields will certainly make very good seed beds, as drought in the autumn is much more detrimental than in the spring, particularly if the winter be snowless.

RUSSIA.—Low temperature prevails over most of the empire, and several rivers are frozen. The closing of the Azov and some Black Sea ports cannot be delayed much longer, and the stream of supplies from the interior must be diverted to those ports that either never suffer from ice closure or are kept open by powerful icebreakers.

UNITED STATES.—The *Cincinnati Price Current* says that rains have favoured the winter wheat crop, which is fully equal to its previous promise. There are only small interior marketings, but there are good offerings of maize in the central regions.—*Bradstreet's*.

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

19796.—R. H. N. Sellar and J. Cook, of Glasgow, for an invention for "Improvements in ploughs."

19972.—A. Quarrie and A. J. Leitch, of London, for an invention for "An improved animal clipper."

19950.—W. J. Shaw, of Liverpool, for an invention for "Improvements in carriers or cases for carrying, transporting, or storing eggs and like fragile articles."

20096.—A. Helliwell, of Keighley, for an invention for "Improved apparatus for rearing chickens and other young birds."

20141.—W. Y. Lister, of London, for an invention for "An improvement in mowing, reaping, and harvesting machines."

20194.—G. H. Richards, of London, for an invention for "Improvements in compositions or compounds for use in agriculture or horticulture."

20196.—W. Jager, of London, for an invention for "Improvements in apparatus for drying seed grain and the like."

Patents Sealed.

14921.—J. Bennet, of Cork, Ireland, for an invention for "Improvements relating to sorting eggs."

THE BALTIC.

Wheat cargoes are not in much request, but there has been no day during the week when a certain amount of trade has not been put through. The tone of the market is steadier since Thursday. American maize cargoes close rather dearer than they opened, and both Argentine and Russian sorts are well held. The demand for oats has temporarily fallen off, but barley cargoes are being dealt in for spring shipment as well as on passage, and there is a very fair amount of business doing in oilseed cargoes. Recorded sales include:—Wheat: New Zealand, 28s. 6d.; Walla Walla, 29s.; Oregon, 30s. 6d.; Azoff, 29s. 6d.; Roumanian, 28s. 6d.; No. 1 Northern, 30s. 9d.; hard Duluth, 33s.; No. 2 red winter, 29s. 6d.; No. 2 hard winter, 28s. 6d.; and new crop La Plata (for February shipment), 28s. 3d. per qr. Maize: American, 19s. 9d.; Argentine, 20s. 9d.; and Galatz, 22s. Barley: Novorossisk, 18s. 6d.; Roumanian, 18s. 6d.; Californian, 26s. 3d.; Persian, 17s.; and Azoff (May shipment), 18s. 6d. Oats: White Libau, 13s. 6d. Linseed: Argentine, 48s.; and Rapeseed, Jamba (May shipment), 29s. 3d. per qr.

The arrivals of grain and seed laden vessels at ports-of-call for the week were 5 wheat (4 California and 1 New Zealand); total, 5.

The sailings of grain and seed-laden vessels from ports-of-call for the week were: — 1 wheat (Limerick); 1 beans (Irving); 1 locust beans (Liverpool); total, 3.

Since January 1, 1900, the total arrivals have been:—309 wheat, 14 wheat and barley, 1 wheat and pease, 7 flour, 12 maize, 1 maize and oats, 26 barley, 19 beans, 10 locust beans, 1 pease, 1 linseed, 5 canaryseed, 2 fenugreek seed, 5 valonea; total, 413.

Last year, during the same time, the arrivals were:—263 wheat, 10 flour, 4 maize, 7 barley, 1 barley and beans, 1 rye, barley, and oats, 10 beans, 2 locust beans, 6 linseed, 6 canaryseed, and 7 valonea; total, 320.

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt: We continue to have a fair demand for new. Barley, both grinding and malting, unchanged. Wheat rather easier on the week. Oats firm. Maize 3d per qr cheaper. Flour declined about 3d per sack.—NIXON, GOWER AND CO.

Mark Lane, Wednesday.—Home-grown wheat continues in restricted supply, and farmers still incline to local markets, where better prices are obtainable. Fine white, 30s; and good red, 30s 6d, 63lb delivered. American descriptions remained anything but encouraging to holders, while stocks on hand continue large, and incoming supplies of foreign weigh heavily. The market for flour again failed to move, while consumptive buying was of the same poor order. The London Millers' Association made no alteration at this afternoon's meeting. Feeding barley continues in small supply and steady. Oats firm, the market being assisted by limited arrivals, while anything but overweighed respecting both American and Russian. The tendency was inclined to further improve. Flat maize fairly steady, with small supplies of American and Odessa on hand, and very little coming along. The market for beans and peas remains featureless, while generally firm for the latter.

Mark Lane, Friday.—English wheat unaltered, while the condition improves, and nearly everything is still sent up to the country exchanges. Foreign unchanged. Flour was likewise unaltered, with insufficient stirring to test the market. The London Millers' Association made no change at their meeting this afternoon. Grinding barley firm, with a hardening tendency, and in short supply. Oats 3d to 6d better for American since last Friday. Government purchases being the main cause for stimulating the trade. Arrivals show an increase, but these go quickly into consumption. Flat maize displays an advance of 3d to 6d on the week, being still scarce. American mixed quoted at 21s ex ship, and 21s 9d to 22s landed. Round corn upheld. Odessa 26s 3d ex quay. The market for beans remains idle.

COUNTRY.

Ashford, Tuesday.—Trade slow for wheat and feeding corn, but rather brisker for barleys, which have been fairly cleared within the last few weeks. White wheat, 29s to 31s; red ditto, 27s to 30s; malting barley, first quality, 30s to 33s; second quality, 27s to 30s; English grinding ditto, 22s to 25s; black oats, 13s to 18s; white ditto, 18s to 22s; tick beans, 32s to 34s; flat maize, 24s; round ditto, 26s to 27s per quarter.

Aylesbury, Saturday.—Good attendance. Wheat firm, at slightly increased rates. Best samples of barley made 1s per quarter above last week's quotations, but inferior grades made quite 1s less. Beans and oats unchanged.

Barnsley, Wednesday.—A fair attendance, but business rather quiet. Values were little altered on the week. Barley met with a very slow sale.

Boston, Wednesday.—A small attendance and a slow trade. Wheat, 26s to 27s; malting barley, 24s to 30s; grinding barley, 22s to 23s; oats, 16s to 18s; peas, 45s to 60s; beans, 28s to 30s; maize, 22s 6d to 23s per qr.

Braintree, Wednesday.—Short supply of wheats, reds making from 28s to 30s per qr. Fair show of barley, prices maintained.

Bristol, Thursday.—Trade very quiet since our last. At to-day's market English wheat was in short supply at last week's prices. Foreign a little inquiry, and prices unaltered. Barley unchanged. American mixed maize obtained rather better prices; other sorts unaltered. Flour slow sale.—GRACE BROTHERS.

Cambridge, Saturday.—During the week the wheat trade has remained in the same lethargic condition which has characterised it for some time past, and, with rather better supplies, prices are hard to maintain. At this market to-day there was a little better supply of wheat and barley. Wheat sold slowly at about last week's price. Wheat, red, 28s to 31s., and white up to 31s per 504lb. Barley was in better request, and made the full prices of last Saturday. Oats and beans scarce and firm.

Canterbury, Saturday.—Wheat quiet, and inclined to be easier. Choice barleys steady; oats firm. Ruling prices:—White wheat, 30s to 32s; red ditto, 29s to 31s; malting barley, 28s to 35s; grinding ditto, 21s to 24s; white oats, 18s to 21s; ditto black, 15s to 20s; peas, 30s to 33s; tick beans, 32s to 33s; mazagans, 27s to 29s; flat maize, 23s to 24s; round ditto, 27s to 28s per qr; winter tares, 6s to 7s per bushel.

Carlisle, Saturday.—Average supply of oats in our market to-day, good sale at full prices. New, 17s 6d to 18s 6d; old, 23s 6d to 26s per 336lbs.—THOMAS ROBINSON.

Chester, Saturday.—There was a little trade passing in English grain, and wheat was unchanged. Oats were steady and rather more sought after, and Indian corn, moving freely into consumption, was 3d to 6d per sack dearer. Quotations:—Wheat, white and red, 4s to 4s 2d per 75lb; grinding barley, 3s to 3s 6d per 64lb; oats, new, 2s 3d to 2s 6d; old, 3s 6d to 3s 9d per 46lb; Indian corn, 10s 6d to 11s 3d per 240lb

Chichester, Wednesday.—Not much wheat on offer, and, with trade quiet, there was no change to record in prices. In other departments business was also slow without alteration. Small attendance.

Colchester, Saturday.—Very moderate supply both of wheat and barley, which sold steadily at last week's prices. Beans, peas, and oats scarce, and fully as dear.—FRANCIS AND CO.

Dorchester, Saturday.—English wheat met a dull trade, last week's prices being barely maintained. Foreign 6d per quarter less money. Dragging trade for malting barley at 1s per quarter cheaper. No demand for feeding stuffs owing to the milder weather.

Glasgow, Wednesday.—There was a small attendance at our Corn Exchange to-day. Wheat steady at last week's prices. Flour pressed for sale at irregular prices. Indian corn firm, but unchanged. Grinding beans and Canadian pease steady, but quiet. Home and foreign oats steady, and held for full prices. Barley steady. Oatmeal firm. Bran and thirds firm, and the turn dearer.—GIBSON AND CLARK.

Glasgow, Wednesday.—Wheat steady at last prices. Flour pressed for sale at irregular prices. Indian corn firm, but unchanged. Grinding beans and Canadian plate steady but quiet. Home and foreign oats steady, and held for full prices. Barley steady. Oatmeal firm. Bran and thirds firm, and the turn dearer.

Hereford, Wednesday.—English wheats difficult to sell, buyers generally demanding concessions of 1d to 2d per bushel on the week. English barley moved more freely, but on the whole values were slightly under last week; fine samples were enquired after. English oats quiet, with a downward tendency except for the very finest and whitest samples. Maize steady for spot parcels. Beans and peas firm without change. Quotations: Wheat, white, 3s 3d to 3s 5d; red, 3s 2d to 3s 4d; barley, 2s 9d to 3s 9d; oats, 2s to 3s; beans, 3s 3d to 4s; maize, 2s 8d to 3s 2d; vetches, winter, 4s to 6s; and spring, 3s 6d to 5s per bushel.

Ipswich, Tuesday.—Moderate supply of wheat. Many samples out of condition. Trade slow at 29s to 30s for reds; white, 32s. Good supply of barley. Trade slow; price unaltered. Oats firm. Maize rather easier. Beans and peas steady.

Leeds, Tuesday.—The rather unexpected decline in the American markets has again checked the firmer tendency in the wheat trade on this side; buyers consequently act with caution to-day, but on the business doing last week's rates are generally maintained. Fine barley is creeping up in value, and inferior sorts are less pressed. Maize 6d lower. Beans and oats steady.—DUNNS AND CO.

Leeds, Friday.—With American wheat again the turn dearer Tuesday's prices are fully maintained, English making from 27s to 32s, and foreign from 28s to 32s, with limited demand. Maize firmly held. Malting and grinding barley, oats, beans, peas, and flour without change.

Leicester, Saturday. — Fair attendance of buyers and dealers, with moderate supplies of home-grown wheats, in very variable condition. Trade quiet, at 27s to 31s per 36 stones. Barley slow trade. Fine oats in better demand.

Lincoln, Friday.—Small supply of English wheats. Trade steady at late rates. Reds, 27s to 28s; whites, 28s to 29s. Foreign whites dull at last week's prices. Fair show of barley, with a firmer trade at prices from 28s to 35s. Oats dull at late rates. Beans, maize, and peas, unaltered.

Lincoln, Friday.—There was a fair attendance at the Corn Exchange, and about an average supply of grain. Wheat sold fairly well at about last week's prices. Oats made a little more money. Barley found a fair sale at late rates. Maize was about 3d dearer, while beans and peas, which were scarce, remained almost unaltered.

Liverpool, Friday.—Wheat firm with a fair consumptive business at full prices to ½d advance. Flour steady with only a very small business passing at last Tuesday's prices for foreign. The Liverpool Millers' Association also make no change in the minimum price of bakers'. Maize has experienced a good consumptive demand, with mixed American making 2d, white and yellow 1d to 1½d per cental over Tuesday's prices. European is scarce and has a fair retail trade at ½d to 1d advance. A better demand exists for Plate, and is making ½d to 1d advance. Barley is unaltered for malting, but a slight improvement is noted in the demand for better brewing sorts; feeding is firmer with a fair enquiry at ½d improvement on Tuesday's currencies. Beans are slow and easier for Saidi, whilst a rather better demand is experienced for flat sorts at 3d per qr. advance. Peas steady but quiet at unchanged prices. Oats steady but quiet at about late rates for English. Foreign sorts quiet at unchanged values. Oatmeal steady but not active at quotations. Oilcake firm with only a moderate demand; prices about the same as last market day.—SEGAR AND TUNNICLIFFE.

Louth, Wednesday.—There was a very small show of all sorts of grain. Wheat met with a quiet trade at 27s to 27s 6d per qr. Barley was a very poor trade. Oats in rather good demand at 17s to 18s per qr. Beans were firm, but most of the samples on offer were in very condition.

Malton, Tuesday.—Average deliveries of barley and wheat whilst oats are nil. Official details:—Wheat (60lb per bushel), 356 qrs 3 bushels, at £1 5s 9d; barley (50lb per bushel), 1,844 qrs, at £1 2s 3d per imperial qr average.

Maidstone, Thursday.—Very little animation in the wheat trade to-day; the tone firm at just about last week's rates. Barley is a dull business, except for prime parcels, which will bring a shade higher than recently. Oats are 3d per qr up from last report. Maize is not purchasable except buyers respond to the slight rise demanded. Beans and peas command full prices, but the demand is by no means active. Winter tares will only move at a reduction. We do not note any alteration in the value of rye, brank, hemp, sergo, or millet.

Manchester, Thursday.—A quiet tone has pervaded all sections of our market again and throughout the week only very moderate transactions are reported to have been arranged. Prices of English wheat show little change. Flour is also little altered, with a retail trade only. Oats, peas, and beans are without new feature. Indian corn is lower by about ½d per cental on the week.

Market Drayton, Wednesday.—Wheat, white, new, 12s to 12s 6d per 225lb; red, new, 12s to 12s 6d per 225lb. Oats, old white, 18s to 20s per 200lb; new, white, 9s 6d to 10s 6d per 200lb. Barley, malting, 13s to 14s per 210lb. Indian corn, 11s to 11s 6d per 240lb. Beans, new, 13s to 14s; old, 17s to 18s per 240lb. Peas, white, 17s to 18s per 240lb.

Newcastle, Tuesday.—The wheat trade is a shade firmer, and all descriptions are firmly held for the full prices current on Saturday, but the business passing is limited. Maize continues in good request at the full prices of last week. Oats, beans, and peas steady. Flour dull.

Newcastle-on-Tyne, Saturday.—The wretched weather has made trade dull for wheat and flour, but feeding stuffs have picked up, although oats, generally, are disappointing to sellers. Malting barley points upward in price, and why not?

Newcastle-on-Tyne, Saturday.—Wheat at our to-day's market ruled quiet and favoured buyers. Oats steady at late rates. Maize firm, and 6d per 480lb. dearer on the spot. Barley quiet, in buyers' favour. Beans and peas unaltered. No change in flour.—JOSEPH POLLARD AND CO.

Northallerton, Wednesday.—A good attendance. The price of wheat was down by about 6d per qr at 27s to 28s; oats, 19s to 20s; long oats, 17s; barley, 22s to 26s per qr.

Northampton, Saturday.—Supply and demand small, and the corn trade very inactive at about the prices of last week. Quotations:—White wheat, 29s to 30s; old red, 29s to 30s; new red, 26s to 28s; barley, 24s to 32s; grinding barley, 20s to 23s; oats, 18s to 23s; old fine, 25s; beans, 28s; old, 35s to 36s; flour, 22s to 26s.

Norwich, Saturday.—Wheat was still in small supply at our market to-day, with a dragging trade and values unaltered. There was a larger supply of barley offering, with a dull trade, prices being nominally the same as last week. Dreary and wet weather has prevailed during the week, but a change has now set in, with bright atmosphere and frosty nights. Wheat, red, 29s to 29s 6d per qr, weight 63lb per bushel imperial. Corn Inspector's return for the week ending November 19th, 1900:—Wheat, 1,873·4, 27s 10d; barley, 13,795·3, 27s 2¼d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat only moderate supply, prices fully supported. Barley, fine samples only inquired for, and for such values maintained. Inferior sorts neglected. Oats and beans sparingly represented, and made full rates.—ROBERT HUBBLE.

Oxford, Saturday.—Quiet market. Prices for wheat and barley quotably unchanged; better inquiry for good samples of barley.

Penrith, Tuesday.—Supplies were again below the average, but there was a brisker trade. New white oats, 18s 6d to 20s 6d; black, 27s per qr; barley, 10s to 10s 6d; wheat, 11s 6d to 12s 6d; rye, 10s per bushel.

Plymouth, Thursday.—There was an average attendance at our corn market to-day, trade being very inactive. Wheat is steadier. Barley and maize unaltered and oats firmly held.—ORLANDO DAVIS AND CO.

Reading, Saturday.—Business proved rather quiet here to-day, although there was a good attendance. Wheat was not in so good supply as usual, and, the demand only being small, prices were slightly inclined to fall. Barley was an average supply, and prices ruled firm, this latter also applying to other descriptions of corn, of which there was the usual quantity.

Ripon, Thursday.—There is no quotable change in prices from last week. Barley has a dull sale. A moderate attendance. Wheat, English, new, 27s to 29s; ditto, old, 31s; ditto, foreign, 30s 6d to 34s 6d; barley, malting, 24s to 28s; ditto, grinding, 21s to 23s; oats, old, 25s to 26s; ditto new, 17s to 19s; maize, round, 24s to 27s; ditto, flat, 23s 6d per qr; beans, old, 1s per stone.

Romford, Wednesday.—Wheat trade unchanged. Only a small supply. Red wheat made 28s to 29s 6d, and white wheat 29s to 32s per quarter.

Salisbury, Tuesday.—There was a small attendance of buyers and dealers at the Corn Exchange to-day, and a very limited supply of grain. Trade was dull throughout, and there was little alteration in prices of a week ago. Quotations: Wheat, 26s to 36s; barley, 20s to 36s; oats, white, 18s to 23s; ditto black, 16s to 18s; beans, 31s to 34s.

Sheffield, Tuesday.—Better qualities. English wheat firm at full prices; damp parcels unsaleable. Foreign wheat slow trade, and shade lower prices taken to force sales. Feeding stuffs unaltered. Prices:—Wheat, white, 32s to 33s; red, 31s to 32s; new, 30s to 31s per 504lb; oats, old white, 26s; ditto, new white, 17s 6d to 19s; ditto old black, 22s; ditto new black, 16s to 17s per 336lb; peas, grinding, 32s to 34s; ditto blue, 53s to 70s per 504lb; beans, Egyptian, 33s; ditto English (new), 31s 6d to 32s per 532lb; barley, grinding, 23s 6d to 24s 6d; ditto malting, 27s to 35s per 448lb; Indian corn, small old, 29s to 30s; ditto American mixed, 23s 6d to 24s per 480lb.

Spalding, Tuesday.—In the corn market wheat was a slow trade at 27s to 27s 6d per qr. Oats were firm, 17s to 18s per qr. Best quality barley sold well. Not much doing in other articles.

Stockton, Wednesday.—There were very few samples of farmers' wheat showing, which made 27s to 30s per qr. The trade in foreign wheat keeps fairly firm, owing to a better inquiry from millers, but prices show no change. Maize, 6d per qr dearer, and oats without alteration on the week. A moderate show of malting barley, which made last Wednesday's prices.

Stratford-on-Avon.—Market well attended, and English wheat in fair supply. Prices showed no quotable change, and a moderate business was done. A good show of malting barley of improved quality. Best samples in demand, and prices firm; commoner sorts neglected. Prices ranged from 26s to 33s per quarter. Foreign wheat a quiet trade, and 3d to 6d lower. Grinding barley 3d dearer. Flat maize, oats, and beans firm, and unaltered.

Sunderland, Saturday.—Slow trade in wheat, which barely maintained last week's prices. Barley and oats unaltered. Arrivals coastwise, oats, 1,120 qrs; foreign nil.—E. AND F. RICHARDSON.

Taunton, Saturday.—Small attendance. Wheat a quiet trade at last week's prices. Malting barley more offers and trade steady. All feeding stuffs quiet and steady.

Wakefield, Friday.—At our market to-day, English and foreign wheats steady at late rates, in the small business doing. Common qualities of barley pressed for sale, the demand altogether being for finer sorts. No alteration in feeding stuffs.—MICHAEL SANDERSON AND SON, LIMITED.

Wakefield, Friday.—Wheat has ruled steady in the interval since Tuesday. Foreign limits have been raised rather than reduced, which checks purchases; and the consumptive demand can best supply its requirements in buying near at hand or spot wheats, prices for which show no alteration. Fine malting barley fully as dear; inferior sorts must again be quoted lower. Maize, beans, and oats unchanged.—DUNNS AND CO.

Winchester, Saturday.—A very short supply of wheat on the market to-day, which met a firm trade, dry samples making more money. Barley in fair request, best lots selling readily at fully late rates. Oats shade dearer. Maize steady, unaltered. Flour, 24s to 25s.—FEAR, COLEBROOK, AND CO., LD.

Wisbech, Saturday.—Short supply of grain. Wheat sold at late rates; red, 28s; white, 28s 6d; old, 30s. Oats 6d dearer, to buy, 18s to 20s. Barley, 24s to 28.—JAMES FLETCHER.

Wolverhampton, Wednesday.—There was a fair attendance, but trade showed no improvement. Wheat was flat, with beans a shade firmer. English wheat, new, 12s to 12s 6d; English wheat, old, 13s per 216lb; oats, old, 15s to 16s; oats, new, 11s to 11s 6d; beans, old, 14s 6d to 15s 6d; beans, new, 12s 3d to 13s per 196lb; maize, 23s 6d to 24s 6d per 480lb.

Worcester, Saturday.—There was rather more inquiry for wheats, and a fair business was transacted at last week's rates. Dull trade for malting barleys. Grinding barley and maize were 3d per quarter dearer, and oats sold at full prices. Wheat: White, 28s to 29s; red, 27s to 28s per quarter.

Worksop, Wednesday.—Fair attendance and moderate supply of grain. Wheat: July maintained the slight increase of last week, whilst best varieties were very dear and oats scarce and dear. White wheat, old, 31s to 32s; red ditto, old, 30s to 31s 6d; white, new, 28s to 29s; red, new, 27s to 28s; best malting barley, 31s to 33s 6d; secondary, 28s to 29s; grinding, 23s to 25s; old white oats, 25s to 27s 6d; old black, 24s to 25s; new white oats, 18s to 20s; new black ditto, 17s to 18s; flat maize, 24s to 25s; round ditto, 28s to 29s per qr.

York, Saturday.—The hirings interfered with the thrashing, and very little wheat was on offer, prices remaining unchanged. The official average prices of grain for the week have been: Wheat, 27s 4d; barley, 23s 7d; and oats, 17s 1d per quarter.

FOREIGN.

The Antwerp wheat market has shown a good tone, the demand having become more active. Field work has been interrupted in France by wet weather, but before the rains commenced wheat sowing had been virtually completed. The young wheats have come up well, and upon the whole the outlook is satisfactory. Transactions in wheat have not increased upon the French markets as millers had hoped. French farmers still showing a disposition to hold on for higher prices. Business in wheat has shown little change at Paris. Flour for consumption has also remained without variation in the French capital. The Marseilles wheat market has presented a quiet tone. At Konigsberg also wheat has been quiet at former terms. Deliveries of wheat have slightly increased upon the Russian provincial markets, but the demand has been inactive. In the Baltic ports business has shown a firm tone; in the Black Sea ports, however, wheat has established a tendency to heaviness, and prices have been rather weaker. The Odessa wheat market has continued quiet, the demand having been inactive for all descriptions; holders have, however, maintained an attitude of reserve, as they are relying on the early exhaustion of disposable stocks and on the approaching closing of some of the Russian ports by ice. There have been some frosts in Southern Russia and snow would be welcome, as it would shelter the young wheats from the rigours of the approaching winter. The quantity of wheat now en route for Europe is returned at 1,225,000qr as compared with 1,340,000qr at the corresponding date of 1899. The total of 1,225,000qr representing the quantity of wheat now en route for the Continent is made up as follows:—France, 145,000 qr; Belgium, 370,000qr; Holland, 220,000qr; Germany and the North, 140,000qr; and Italy, Spain, &c., 350,000qr.

Hamburg, Saturday.—Barley rules dull and our export to England has almost ceased, as even the big brewers leave us without any orders and consider the prices of Saale and Bohemian much too dear. Our home brewers and maltsters are also importing a good deal of Danish and Holstein Island barleys, which class is obtainable remarkably cheap and seems to pay them better than the much dearer home-grown.—FRANCIS M. TH. DUHNE

Hamburgh, Saturday.—With a continuance of mild weather we have a quiet market for all articles. The imports during the week amounted to:—3,160 tons wheat, 1,500 tons rye, 8,543 tons barley, 21,500 tons maize. German wheat is firmly held, and offers from the interior are very scarce. Fine red Holstein, Mecklenburg, and Saale costs 27s 3d to 28s; common Holstein, 25s 6d to 26s 3d per 504lb f.o.b. Foreign wheat in scanty supply; fine River Plate is held at 29s 9d; hard winter No 2 to arrive, at 28s 9d per 480lb c.i.f. Rye quiet. 9 10-15 South Russian is offering at 22s to 22s 6d per 480 lb. c.i.f. Good Bohemian barley has been sold, and is

offering at 33s 9d to 35s 6d ; Saale is selling at 30s 6d to 34s ; Danish and Holstein at 25s to 26s per 448 lb f.o.b. Fine Saale is held at 34s 6d to 38s per 448 lb f.o.b. Russian feeding barley is selling at 17s 9d to 18s per 400 lb c.i.f. There is but a limited demand for mixed maize, but prices remain firm. November delivery is selling at 20s 3d ; December shipment, 19s 3d ; January-March, 19s per 480 lb c.i.f. Hamburg. — JOHN TATLOCK.

Smithfield, Saturday.—Fair supplies were offered this morning, but the trade ruled slow. Quotations :—Fowls : Yorkshire, 2s 8d to 2s 9d ; Essex, 2s 6d to 3s ; Welsh, 1s 9d to 2s ; Surrey, 3s to 3s 6d ; Sussex, 2s 6d to 3s 3d ; Irish, 1s 6d to 1s 9d ; Boston, 2s to 2s 6d ; turkeys (cocks), 6s to 8s 6d ; hen ditto, 4s 6d to 5s 6d ; geese, 4s to 6s ; country ducks, 2s 6d to 3s ; Bordeaux pigeons, 8d to 10d ; feathered, 7d to 9d ; wild rabbits, 7d to 9d ; tame, 1s to 1s 3d each ; Australian, 7s 6d to 9s 6d per dozen ; pheasants, 3s 6d to 4s ; young partridges, 3s 6d to 4s ; old, 2s to 2s 6d ; young grouse, 3s 9d to 4s 9d ; old, 3s per brace ; hares, 3s to 3s 3d ; leverets, 1s 9d to 2s ; wild ducks, 1s 6d to 1s 9d ; pintail, 1s 4d ; teal, 8d to 10d ; snipe, 8d to 10d ; woodcock, 2s to 2s 6d ; widgeon, 1s ; golden plover, 8d to 10d ; black, 6d to 6d each.

Chester, Wednesday.—The supplies amounted to 55 tons, being about 20 tons in excess of last year. There was an average attendance of buyers, but trade was not very brisk, and prices tended downwards. Fine Cheshire made 60s to 67s ; medium, 54s to 58s ; and common, 46s and upwards per cwt.

Glasgow, Wednesday.—Arrivals of cheese were light in Glasgow, but with the overlying stock there was abundance on offer. There was rather more doing in flats at reduced prices. Dunlops and Cheddars were quoted from 52s to 64s per cwt. September-made Canadians are rather easier.

Liverpool, Saturday.—Bacon : The market has ruled firm all week, supplies on the spot being insufficient for the demand, and arrivals are rapidly cleared at quotations which mark a farther advance on the week. We quote, to-day, choice Cumberland cut, 20lb to 22lb, 48s 6d to 52s ; 26lb to 30lb, 47s to 49s ; 32lb to 38lb, 44s to 48s 6d ; long middles, rib-in, 18lb to 22lb, 52s to 56s ; clear bellies, 14lb to 16lb, 56s to 57s ; 18lb to 20lb, 55s 6d to 56s 6d ; Staffordshire cut (lean on), 35lb to 40lb, and Birmingham cut, 33lb to 38lb, 47s to 49s ; clear Staffords (lean off), 40lb to 44lb, and Yorkshire cut, 40lb to 45lb, 44s 6d to 46s 6d ; singed Wiltshire, Canadian, 45lb to 55lb, 53s to 58s ; American, 40lb to 50lb, 44s to 52s ; short clear backs, 12lb to 16lb, 44s 6d to 46s 6d ; 16lb to 20lb, 43s to 44s 6d ; fat backs (export), 30s to 41s ; long clear middles, 35lb to 40lb, 47s to 48s ; 40lb to 45lb, 45s 6d to 46s 6d ; short clear middles, 45lb to 50lb, 39s 6d to 40s 6d ; short middles (rib in), 18lb to 23lb, 47s 6d to 49s ; shoulders, square cut, 12lb to 14lb, 35s to 40s ; 14lb to 16lb, 34s to 37s 6d ; New York cut, 11lb to 13lb 32s 6d to 35s per cwt. Hams meet with a good inquiry, and are dearer, with further higher tendency. We quote choice long cut, 8lb to 12lb, 46s 6d to 52s 6d ; 14lb to 16lb, 45s to 50s ; short cut and A.C., 10lb to 12lb, 47s to 52s ; 12lb to 14lb, 46s 6d to 51s 6d ; 14lb to 16lb, 44s to 49s 6d per cwt. Lard rules in steady request, and prices show no alteration on the week. We quote pails and kegs, 39s to 40s ; prime Western (in tierces), 38s 6d to 39s per cwt. Beef dull and somewhat easier. We quote extra India mess 67s 9d to 71s 6d ; Plate and Packet, 62s 6d to 63s per 304lb. Pork is in limited supply, and rules firm. We quote finest prime mess, 68s to 72s 6d. per 200lb. Cheese.—There is some improvement in the general demand, but dealers are operating mostly in summer goods ripe and steady for use, which have been in free supply at easier prices. Finest fall goods are steady at quotations. We quote finest coloured Canadian, September, 53s to 54s ; white, 52s to 53s ; finest States, coloured, 52s to 53s 6d ; white, 51s to 52s ; summer cheese, ripe and ready, 45s to 50s ; lower grades, in moderate supply, sell from 22s to 38s per cwt. Butter.—The weather has turned somewhat colder ; there is more inquiry for finest butter, in which, however, dealers find best value in Continental produce, and Canadian is selling very slowly. The supply of over-kept and secondary goods is very large, and there is at the moment no inquiry. We quote, fancy fresh made Canadian creamery, in boxes, 102s to 105s ; second quality, 85s to 92s ; finest States (none) ; finest ladles and imitation creamery are in small demand, offered from 74s to 80s ; finest Danish, 110s to 120s ; Australian and New Zealand, 104s to 110s ; Irish creamery, 104s to 110s ; Cork, firsts, 80s ; seconds, 85s ; thirds, 79s per cwt.—HODGSON BROTHERS.

HOPS.

Canterbury, Saturday. — Brewers have been buying largely during the week, and the market is in a very firm condition. Only a limited number of growers now hold any stocks, and these are very steady and confident in their demands. Prices do not exceed previous quotations.

Worcester, Saturday.—A fair trade in new Worcesters, which change hands readily when growers are willing to accept recent values, but the volume of business is to some extent checked by the shortness of supplies and high rates asked by most holders. Yearlings are in request at recent prices, and the supply of these is now very much reduced.

Worcester, Saturday.—Our market is quiet with very little demand for hops, but prices keep firm ; six pockets have passed the public scales to-day, and two during the week, making a total of 16,037 pockets weighed up to date.—PIERCE AND CO.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Vegetables were in fair supply and slow request. Good supplies of fruit met a ready inquiry. Greenstuffs.—Cabbages, 2s 6d to 3s ; savoys, 2s 6d to 3s 6d ; beetroots, 2s to 3s per dozen ; cauliflowers, 2s per dozen ; Brussels sprouts, 1s to 1s 3d per half-sieve ; spinach, 2s per bushel ; carrots, 2s ; turnips, 3s 3d ; parsley, 1s 6d per dozen bunches ; celery, 12s to 15s per dozen ; horseradish, 1s per bundle. Potatoes.—Market-pegs, 11os ; Dates, 80s to 90s ; Imperators, 70s to 80s ; Reading Giants, 80s per ton ; German Saxons, 3s 6d to 3s 6d ; Belgian Markers, 2s 6d to 3s 3d per bag. Fruit.—English apples, 4s to 8s per bushel ; Belgian, 6d to 1s per lb. ; Americans, 13s to 16s per case ; English apples, 3s to 6s per bushel ; Nova Scotias, 15s to 18s per barrel ; English pears, 3s to 8s per bushel ; Californians, 4s to 8s per half-case ; pomegranates, 2s to 2s per dozen ; melons, 1s to 2s each ; tomatoes, 12s to 18s per case ; pine-apples, 2s to 12s per dozen ; pine-apples, 1s 6d to 4s each ; bananas, 5s to 10s per bunch ; chestnuts, 8s to 10s ; Greenoble walnuts, 10s to 14s per sack.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The aspect of the early-sown wheat and rye is thoroughly satisfactory, but the wet state of the surface soil prohibits further ploughing, sowing, and drilling in the majority of instances. The threshings have mostly been of barley; there is too much stained grain offered just now, and there is a general over-supply of medium qualities. Foreign crop news includes favourable reports on the appearance of September-October sown grain in France and Germany, but from South-Eastern Europe the information received indicates that a serious area of autumn corn land will need re-sowing in the spring. The United States have seldom had so favourable an autumn for the winter wheat, which was sown in good time, germinated well, and is now of first-rate aspect. Argentina will soon be reaping the wheat crop of the year, but it is not likely that the fine yield of last season will be equalled. The different cabled messages really resolve themselves for the most part into the question, Will the increased area sown, with its good proportion of virgin soil, balance the decrease in the yield per acre on the older lands? There are no means of getting at the areas sown, and the average yield per acre is an almost equally moot point.

The markets of the past week have been dull for English wheat, which has been firm at twenty leading exchanges out of thirty, but 6d. cheaper at the other ten. The samples are not numerous for the time of year, and there is no undue pressure on sale; but the damp lots predominate and impart a poor tone to the whole trade. There is a good deal of new wheat being fed to poultry and also mixed with rations for the animals of the farm. This will reduce the total to be sent to the mill. The Argentine wheat on offer is not as clean as it might be, and prices are irregular in consequence. American wheat is depressed owing mainly to the cheapness of American flour. Millers who buy the wheat and mix it with English find that they cannot easily sell the resultant flour for the prices accepted for corresponding grades of American. New Zealand wheat finds favour for the long berry variety, and Australian wheat has this autumn asserted a clear price supremacy over Californian. North German wheat is on fuller offer than has been the case for years, and the samples are good value at the moderate price (it averages about 29s.) which is asked. Not only is London well supplied, but Ipswich, Yarmouth, Lynn, and Hull are feeding Suffolk, Norfolk, the Eastern Midlands, and the N.E. of England with a useful type in competition with local produce.

The imports of the week have been as follows:—

	12 Chief Ports.	All Ports.
Wheat, qrs.	259,000	341,000
Barley ,,	126,000	142,000
Oats ,,	127,000	137,000
Beans ,,	9,000	9,250
Peas ,,	13,000	14,000
Linseed ,,	22,000	?
Maize ,,	216,000	278,000
Flour, sacks	181,000	203,000

These figures show that while foreign flour, barley, oats, and pulse are still for the most part only bought by the great cities, the sales of foreign wheat and maize are penetrating by fifty minor ports (or more) into the local and rural districts hitherto sacred to home-grown corn. The absence of linseed returns from the whole list of ports will be noted, but the Government, in issuing monthly and not weekly figures, are, we think, justified. The imports of oilseeds into minor ports are quite trivial, and, in fact, the five ports of London, Hull, Liverpool, Glasgow, and Bristol practically monopolise this branch of the import trade.

The sales of all sorts of breadstuffs last week, including English, exceeded estimated wants, so that stocks in granary, which on 17th inst. were put at 3,125,000 qrs., are put for the 24th at 3,164,000 qrs.

There are now on passage to the U.K.:—

	Qrs.
Californian Wheat	925,000
American ,,	240,000
Argentine ,,	180,000
Russian ,,	90,000
Other Countries	225,000
Nov. 24, 1900	1,660,000
A Year Ago	1,555,000

The quantity of barley on passage is now 565,000 qrs, against 700,000 qrs. a year ago. Present expectations are thus made up:—

	Qrs.
Californian brewing	306,000
Smyrna ,,	50,000
Russian feeding	77,000
American ,,	20,000
Unclassified	112,000
Total	565,000

About half of the unclassified is Persian cheap light feeding barley. None of the fine brewing barley of Chili is on passage.

Of maize the following quantities are afloat:—

	Qrs.
Nov. 24, 1900	650,000
1899	1,195,000
1898	750,000

The present expectations are moderate, and this has enabled holders to put a firm front on what has been until quite recently a sluggish November trade.

The imports of this staple for the forty-six completed weeks of the civil or ordinary year thus compare:—

	Qrs.
1900	10,675,000
1899	12,644,000
1898	11,293,000

Stocks of maize in granary are believed to be small. The current rate of consumption was put at 750,000 qrs. a month in 1895, but many good judges think that fully a million qrs. a month are now used, and the figures above given support this view.

The fact that the estate of the late Mr. Polson has been sworn at £350,000 personalty will surprise no one who has watched the colossal progress made by the trade in maize meal, maize germ meal, hominy feed, corn flour, and the other products of the ground maize grain. Mr. Polson was a pioneer of this trade a quarter of a century ago, but the greatest progress has been made since 1895. Last week in London alone there were received 27,000 cwt. of maize germ meal, 40 cwt. of hominy, 321 cwt. of "American meal," and 51,015 qrs. of maize itself, and it is only the actual maize which is officially reported in the market returns. The demand is constant, the prices are by no means very low, and the new meal has evidently come to stay.

Passing to the seed trade, we may note that the best canaryseed is 2s. dearer on the fortnight, but other sorts of bird seeds are scarcely changed. The best new red English cloverseed realises 75s. per cwt., the best white 78s., and the best Alsyke 80s. How much the seed trade depends upon the sample may be seen from the fact that by no means inferior firms are supplying these seeds at 45s., 50s., and 55s. respectively. But the quantity required to sow an acre is so moderate that "the best and the best only" is the one true policy.

There have recently been good supplies of peas, and with an excellent choice from best to cheapest a very fair business has been put through. Fine large handpicked marrowfat peas top the market at £4 per qr.; unpicked, at a sovereign less, have not been neglected. Dutch peas fetch up to 77s. for the very finest, which are little below the best English in merit. A very good type of pea known as the "Dutch Crown" has been the subject of a steady sale at £3 per qr. New Zealand has recently sent us peas worth 3 guineas per qr., but the supply from this fine colony is never large. Haricot beans are selling pretty well. The finest Italian and Dutch sorts are known as "Cocos," and fetch 60s. and upwards, but excellent hand-picked meeting all usual wants are to be had at 50s., and the good small Hungarian at 43s. are not to be neglected. From Chilé, which sends nowadays so much less to Mark Lane than of yore, come some excellent haricots, for which 47s. to 48s. is demanded. An increased supply of lentils has rendered holders more willing than formerly to meet buyers' ideas, and an augmented business is now resulting. We may quote split Egyptian at 13s. per cwt., and Spanish at 15s., while Indian split are hardly offered. The chief arrivals have been Egyptian. Locust beans are in good supply from the Mediterranean.

FOREIGN CORN TRADE.

The shipments of grain from the chief exporting countries last week were as follows:—

	Wheat. Qrs.	Flour. Sks.	Maize. Qrs.	Barley. Qrs.	Oats. Qrs.
United States ..	260,000	147,000	483,000	12,000	35,000

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

The market to-day was firm, but until November is out no real business is to be anticipated. Finest new white English made 32s., and a very excellent sample went for 31s. The ordinary new red wheat was offered at 29s. or thereabouts. Weight is very fair, but condition is still mostly damp. The foreign wheat most in request was North German and North Russian, while Kansas is offered cheaper than other American kinds while showing uncommonly good value for the money. Finest Australian at 32s. was not without purchasers, in small quantity, of course. Maize was rather dearer on the week for all sorts. Fine and undamaged Argentine, being scarce, made 23s. without difficulty. The market for Indian corn is strongest on the retail side, but a good business on the whole is passing. Feeding barley was 3d. dearer, but no advance could be quoted on malting. Oats were in improved request, and 3d. more money was frequently obtained. Other sales included Saffi canaryseed at 37s., Canadian buckwheat at 28s., torrified barley at 23s. 9d., and Canadian linseed at 63s.; all per quarter.

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

THE MARKET DID NOT IMPROVE AFTER 1.30, BUT THERE WAS NO LOSS OF THE SMALL PRICE ADVANCES MADE DURING THE FIRST TWO HOURS OF BUSINESS.

THE FLOUR TRADE.

MARK LANE, Nov. 26th.

The demand from bakers shows an improvement on last week. There is little change in the price of London makes, but sales are less difficult from the 19th. Cascadia, at 23s. 9d. to 24s., tied in value with good country patents, though some special fancy makes from East Anglia were quoted 26s. per sack. American patents, like the best from the Washburn, Pillsbury, and Morrison mills, were at 25s. or thereabouts. The advices from America come fairly strong to-day, and many operators look for 1s. recovery on this side of Christmas. Choice country bran made 117s., and good broad 106s. per ton on rail. Maize flour, at 16s. 9d. per sack, was in improved request. Other sales included special maize cones at 19s. and ordinary at 18s. per sack.

LONDON TERM MARKET.

This market is held twice a day, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made :—

WHEAT.—	Nov.	Dec.	March.
	s. d.	s. d.	s. d.
Nov. 19 11 a.m.	6 6	6 .. 6	.. 6 8
4 p.m.	6 6	6 .. 6	.. 6 8
Nov. 20 11 a.m.	6 6	6 .. 6	.. 6 8

Nov. 24 11 a.m.	6 6	6 .. 6	.. 6 9
To-day 11 a.m.	6 6	6 .. 6	7 .. 6 8

A few transactions were put through at 6s. 9d. per cental for June delivery. Maize made 4s. 3d. per cental for December, 3s. 10d. for Spring delivery.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

The Term Market (while the "Baltic" is rebuilding) is temporarily situated at the Great Eastern Hotel, No. 190, Bishopsgate Street, ground floor.

The deposit required from members of the Term Market has been fixed at £50 *minimum* and 1s. per quarter margin on any purchases above 1,000 quarters.

PROVISIONS.

London, Monday.—The arrivals from Ireland last week were 3,080 bales bacon, and from foreign ports 7,903 bales bacon. The market has been a very firm one for all bacon, and particularly so for Irish and Danish, both of which were in very short supply. Canadian was in much larger supply, but sold well at about previous rates. Irish, 56s to 62s. ; Danish, 56s to 62s ; Canadian, 52s, 56s, up to 58s. There was a firmer tone about the butter market, and all fine butter was in good demand. Danish, 122s to 124s ; Colonial, 104s to 108s, up to 110s ; Canadian, 98s to 102s. Lard unchanged.

GRAIN AND FLOUR FACTORS' REPORTS.

Flour.—A quiet trade at last week's prices.—T. S. MEDILL, Mark Lane.

Arrivals moderate. Wheat prices fully maintained. Flour held at late prices. Maize 3d. per qr. dearer. Barley and oats unchanged.—COVENTRY, Mark Lane.

A very small trade is being done to-day in milling offals at current rates.—RICHARD DOGGETT, Mark Lane.

Offals : For prompt delivery even lower prices than those of last week have been accepted for small brans. Weather now colder, consequently tone firmer ; sellers in some instances advancing 2s. 6d. to 5s. per ton. No change in broad brans, for which a moderately steady demand continues. —GREENHILL BROS., Belfast, November 24.

Flour.—The sale of flour is extremely slow, and prices decidedly in buyers' favour. Grain.—Indian corn firm at 1½d. per boll decline on the week. Beans dull. Oats in good demand at firmer prices. Barley quiet. Oatmeal in improved demand. Peas are now in smaller supply, and 1½d. to 3d. per boll higher. Mill stuffs.—Bran rather easier. Thirds unchanged. —MCKINNON AND MCDONALD, Glasgow, November 24.

Wheat firm with a fair consumptive business at full prices to ½d. per cental advance. Flour steady with only a very small business passing at last Tuesday's prices for foreign. The Liverpool Millers' Association also make no change in the minimum price of bakers. Maize has experienced a good consumptive demand with mixed American, making 2d. per cental. White and yellow 1d. to 1½d. per cental over Tuesday's prices. European is scarce, and has a fair trade at ½d. to 1d. advance. A better demand exists for Plate, and is making ½d. to 1d. advance. Barley is unaltered for malting, but a slight improvement is noted in the demand for better brewing sorts ; feeding is firmer with a fair inquiry, at ½d. per cental improvement on Tuesday's currencies. Beans are slow and easier for Saidi, whilst a rather better demand is experienced for flat sorts, at 3d. per qr advance. Peas steady, but quiet at unchanged prices. Oats steady, but quiet at about late rates for English. Foreign sorts are quiet at unchanged values. Oatmeal steady, but not active at quotations. Oilcake firm with only a moderate demand ; prices about the same as last market day.—ROSS T. SMYTH, Liverpool, November 24.

THE BALTIC, MONDAY, 1 p.m.

STATE OF TRADE.

Wheat cargoes, though somewhat better on the week, are not improved from Saturday. The forward market is less strong. The maize market is stiff for all cargoes likely to arrive before the end of January. Both oats and barley show a harden ing tendency.

BUSINESS DONE.

WHEAT.— Oregon, 30s 9d, arrived ; Californian, 30s arrived ; Walla Walla, 29s 3d, arrived ; South Australian, 30s 3d, on passage ; Odessa Ghirka, 29s 6d, on passage ; North German, 29s, on passage ; No. 2 Red Winter, 30s, on passage ; No. 2 Hard winter, 29s, on passage ; No. 2 Hard Winter, 28s 9d, December shipment ; best Manitoba, 33s, December shipment; No. 1 Northern, 31s 3d, December shipment ; No. 2 Calcutta, 30s, May shipment.

MAIZE.—American, 18s 6d, January shipment ; Galatz, 19s 6d, May shipment.

BARLEY.—Azoff, 18s 6d, May shipment ; Persian, 17s, on passage.

OATS.—Petersburg, 13s 9d, December shipment ; Canadian, 14s 3d, December shipment.

BEANS.—Saida, 29s, December shipment.

LINSEED.—Libau, 54s 6d, December shipment.

COTTONSEED —Egyptian, £7 1s 3d, arrived.

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough High-street, London, S.E., report : There has been a considerable business done during the past week, as from merchants to brewers, with the natural result that there is a much better inquiry on the open market.

FEEDING STUFFS.

London, Monday.—Linseed Cake : Market dull, nominall unaltered. Cotton cake 2s 6d lower. Decorticated as last Linseed has fluctuated a good deal, but leaves off steady.

English linseed cake	£8 10 0	to £8 15 0	ex mill
American Calcutta linseed cake..	None		ex quay
American Western linseed cake..	7 15 0	to 7 17 6	ex quay
Russian oil cake	7 15 0	to 8 0 0	ex quay
Feeding cake, Samuelson's S.P.F. (10 to 12 per cent. oil)	6 15 0	—	ex warehouse
Decorticated cotton cake	none	—	ex quay
Decorticated cotton meal	none	—	ex quay
London made cotton cake (best)	5 0 0	to 5 2 6	ex mill
Egyptian cotton cake (in bags)	4 15 0	to 4 17 6	ex quay
Burton desiccated ale grains (bags included)	4 12 6		on rail, Burton
Rangoon Rice Meal	4 10 0	—	ex warehouse
Russian linseed in bulk, per 416lbs	2 15 0	to 2 17 0	ex warehouse
Calcutta linseed in bags, per 410 lbs	3 1 0	—	ex warehouse
American linseed in bulk, per 416lb	2 15 0	—	ex warehouse.

—ROBT. AND JOHN HEWETSON.

Beasts	3 10	4 2	4 6
Sheep	4 0	—	—
Pigs	2 10 ..	3 10 ..	4 6

Milch cows, per head £17 to £

British arrivals include as follows :—Scotland, — ; East Counties, 207 ; Midland, Home and Western Counties, 1,313 ; Devon, 50 ; Ireland, 162.

In the beast market there was an increase of 1,760 head compared with Monday last. The arrivals from Scotland were stronger. For both prime and second qualities rates were 2d. to 4d. per 8lbs. lower, though trade was slow ; other descriptions were about 2d. per 8lbs. lower. In the fat cattle entering cows there was more inquiry, and sales were easily effected. Amongst the Irish arrivals were included fourteen stores (yearlings), which were quoted at from £6 to £7 10s per head.

The following are top quotations per 8lb. (sinking the offal) :—

	To-day.	Nov. 27th, 1899.
Scotch	4s 8d to 4s 10d	.. 4s 8d to 4s 10d
Devons	4s 7d to 4s 9d	.. — to —
Herefords	4s 8d to 4s 10d	.. 4s 5d to 4s 7d
Norfolks	4s 6d to 4s 8d	.. 4s 6d to 4s 8d
Runts	4s 6d to 4s 8d	.. 4s 5d to 4s 7d
Lincolns	4s 2d to 4s 6d	.. 4s 0d to 4s 4d
Irish	4s 2d to 4s 4d	.. 4s 2d to 4s 4d
Highland Scots	4s 4d to 4s 6d	.. — to —
Fat cows	3s 8d to 3s 10d	.. 3s 8d to 3s 10d

In the sheep market there was an increase of 650 compared with Monday last ; trade for both wethers and ewes was very dull at a decline of 2d per 8lb, a clearance of the latter not expected. A few lambs were on offer, but met with little inquiry. The supply included about 200 Scotch, 770 Irish, and 1,470 from the Eastern Counties.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class penned :—

	To-day.	Nov. 27th, 1899.
7½ to 8 stone Downs	5s 6d to 5s 8d	.. 5s 8d to 5s 10d
9-stone ditto	5s 4d to 5s 6d	.. 5s 6d to 5s 8d
10-stone half-breds	5s 0d to 5s 2d	.. 5s 2d to 5s 4d
12-stone Lincolns	— to —	.. 4s 8d to 4s 10d
10-stone Irish	4s 10d to 5s 0d	.. 4s 8d to 4s 10d
10-stone Down ewes	3s 10d to 4s 0d	.. 3s 10d to 4s 0d
12-stone half-bred	4s 10d to 5s 0d	.. — to —

Trade for pigs, with a small supply, was slow, but rates ruled firm. Best small breeds made 4s 6d per 8lb.

London Central, Monday.—Good supplies, trade slow. Beef : Carcases, 3s 9d to 3s 10d ; hindquarters, 4s 2d to 4s 6d ; roastings, 5s to 5s 4d. Sheep : Ewes, 3s to 3s 2d ; wethers, 4s to 4s 2d ; hindquarters, ewe, 4s to 4s 4d ; wether, 5s 2d to 5s 6d. Pigs, large, 3s 2d to 3s 6d ; small, 3s 8d to 4s.

St. Ives (Hunts), Monday.—Beasts, 800 ; sheep, 1,100 ; pigs, 509 ; horses, 42. Beef, 7s to 8s ; mutton, 7s to 9s 11d ; pork, 6s to 7s. Fat and store cattle, sheep and pigs fair trade. Milch cows fair show and made prices £13 to £22.

FOREIGN CATTLE.

Deptford, Monday.—Beasts 261. To-day's supply, compared with Monday last, showed a decrease of 1,285, and consisted entirely of shipments from Canada the majority of which were of poor quality. Owing to the small number on offer not being sufficient to cause much competition trade was of a very dragging nature at about last week's rates. The following were the quotations per 8lb, best on offer 3s 9d, and occasionally 3s 10d ; plain ditto, 3s 5d Sheep 172, consisting of Canadians ; quotations and trade not worth noting. The following were the numbers on offer on the corresponding day last year, with the current top rates :— Beasts, 1,066, 4s 5d to 4s 6d per 8lbs, to dress about 720 lbs. Sheep, 986, 4s per 8lbs to dress from 68 lbs to 72lbs.

Liverpool, Monday.—Demand for beef slow but firm, prime quality scarce, and making full rates, other classes also easier to sell. Sheep trade slow, and prices unchanged from last week. Beef, 6¾d to 7¾d per lb ; mutton, 8½d to 9½d per lb. At market: 1,536 cattle and 6,236 sheep.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., write that a very quiet tone now characterises the seed trade. Sowing requirements are now, naturally, few and small, whilst no speculative movement of any importance has yet developed itself. Quotations all round, as regards clovers and grass seeds, are, in the absence of business, without material alteration. There is at present but little inquiry for rye and tares. Full prices, meantime, are asked for rape-seed. In canaryseed the tendency continues upwards ; stocks everywhere proceedingly light ; hempseed, on the other hand, favours buyers. Blue peas and hrr'cots move off slowly on former terms. The few choice long-pod beans now obtainable meet with a ready sale. New scarlet runners of good quality are now offering at moderate rates.

Peterborough Corn Market —Wheat in moderate supply. Trade was just steady at last week's prices. Barley firm, June samples rather dearer. Oats made fully late rates.

Darlington Statute Hirings. On Tuesday the town was very full. There was a great dearth of female servants, and wages ruled high. Dairy women commanded £18 to £20, good domestic servants £13 to £15, young girls £8 to £10 each. Men were also difficult to get, and first-class managing men obtained £28 to £30, ordinary men of experience £25 to £24, young men £18 to £20, strong youths and ploughboys £13 to £16 each, and young boys £8 to £10.

Farmer Starves two Horses to Death.—At Liverpool on Wednesday a farmer named Henry Barton was sent to gaol for three months, and ordered to pay £5 10s. costs, or to suffer further months imprisonment, for starving two horses to death. A veterinary surgeon, who examined the carcases, gave a shocking description of the treatment to which the poor beasts had been subjected. They had eaten the manger in order to satisfy hunger. The prisoner, when arrested, had £60 in his pocket. He had been previously convicted.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

Though the supply of fat beasts at Islington was smaller, trade for both prime and second quality ruled slower. Rates for the former showed practically no alteration in regard to value, though for the latter as well as for middling descriptions rates were decidedly lower, notwithstanding which on Monday a clearance could not be made, a good many being turned out unsold, and for which on Thursday there was no demand. Fat butchering cows met with more inquiry, and therefore made more money, as also did fat bulls, the reason being a short supply. Middling sorts, however, showed no improvement. It should here be noted that the season for consignments from the Midland counties is now drawing to a close, thus marking the opening for Norfolks, which will now take precedence, combined with Scotch arrivals —that is, if higher rates are obtainable; otherwise the latter will come short. At the Foreign Cattle Market there was a decrease of 1,920 in the number sold, compared with last week. Here rates ruled rather firmer, especially for the best States cattle, those from Canada being chiefly of ordinary descriptions. The total number offered for sale on both markets was 4,551—previous week, 6,421—consisting of 1,860 British—increase, 50—and 2,691 foreign —decrease, 1,920. These latter comprised 2,077 from the United States and 614 from Canada. The following were the top rates paid per 8lb. (sinking the offal):—86 to 90-stone polled Aberdeens, 4s. 11d.; 90-stone Herefords, 4s. 10d.; 80-stone Devons, 4s. 9d.; 90-stone Runts, 4s. 8d. to 4s. 9d.; 100-stone Norfolks, 4s. 10d.; 100-stone Lincolns, 4s. 6d.; 95-stone Irish, 4s. 2d. to 4s. 3d.; 90-stone States, 4s. 4d. to 4s. 5d.; 85 to 90-stone Canadians, 3s. 9d. to 3s. 11d.; 100-stone fat cows, 3s. 10d.; 100-stone fat bulls, 3s. 6d. The supply of sheep was confined to the Islington market, and for which trade was decidedly slower at fully 2d. per 8lb. less money on Monday, with a still further decline on Thursday, on which day but few transactions were recorded. Ewes about held their own, whilst for the few lambs on sale there was but little inquiry. The total number penned was 7,270 (previous week, 8,137). Best pens made per 8lb. as follows (sinking the offal):—7½ to 8-stone Downs, 5s. 10d. to 6s.; 8-stone Scotch, 5s. 10d.; 9-stone Downs, 5s. 6d. to 5s. 8d.; 10-stone ditto, 5s. 6d.; 10-stone halfbreds, 5s. 4d.; 12-stone ditto, 4s. 10d. to 5s.; 10-stone Irish, 5s.; 10-stone Down ewes, 4s. Only thirty calves on sale, and these were difficult to cash, the best making 5s. 4d. per 8lb. A full supply of pigs (440), with less demand at lower rates. Best Small breeds were quoted at from 4s. 4d. to 4s. 6d.

Trade in the West.

Trade has again become more active, especially for stores, and dealers are buying freely of the better-class bullocks at a rise of quite 10s. to 15s. a head, the best of which are now making £24 to £30 per pair for finishing off and from £18 to £23 for animals that will require a little longer doing. The milch beast trade is also decidedly better, heavy-milking heifers making £18 to £21 each and the older grades of milchers £14 to £17. In-calvers are also commanding a very active sale, as also are all kinds of young stock. Fat bullocks, despite the approach of Christmas, are scarcely so firm a trade as they were, but mutton, on the other hand, is rather against buyers, as is the case also with veal. Pigs are scarce, bringing as much as they were, except the very neatest weights.

Trade in Ireland.

The number of indifferent, half-finished beasts was very large at Thursday's Dublin market, and quite in excess of demand, so that salesmen found it very hard to effect a clearance. Heavy arrivals of American and Canadian cattle at Birkenhead during the week had a bad effect on Irish trade. Best ox and heifer beef made from 52s. 6d. to 56s. per cwt., and in a few cases 57s. 6d. was touched for extra good lots; second-class beef, 46s. to 50s.; other sorts from 40s. to 44s. per cwt. In the mutton department there was a fair demand for good class hoggets for the English markets at late rates. Best wether mutton was worth from 6d. to 6½d., and in a few cases another ¼d. per lb. was given; ewe, 4½d. to 5¾d. There were a good many more calves on the market, but not of the right sort. The few choice veal calves sold made up to 8½d. per lb., but the rough sorts fetched very little over half that. Prime milchers scarce, and extra springers were picked up actively at from £20 to £24. The commoner descriptions of milch cows also went off freely. There was a limited supply of pork and the market was a brisk one, and prices jumped up fully 3s. per cwt., and an early clearance was made. Ham and middle pigs, 42s. to 44s. per cwt.; heavy bacon and shipping, 41s. to 44s; coarse, 30s. to 38s.

Trade in Scotland.

John Swan and Sons, Limited, give the following as their report on above for the current week:—The supplies of fat cattle on offer this week have been large and the quality generally good. The best class of bullocks have met rather a better demand, all classes being easily cashed at good prices. Fat cows, of which there has been an exceedingly good show, have met a dear trade. The supply of fat sheep was about equal to that of last week. There have been considerably more buyers forward, and the trade was sharp at an advance in price of fully 2s. a head over the previous weeks; this would be both for shop sheep and ewes. A larger show of fat calves met a dead trade, and the largest number of fat pigs that has been offered for some weeks made late rates. In the store market there has been exceedingly little doing. Very few sheep were on offer, and there has been a better inquiry for the best class of ewes and wethers. There was also a very small number of store cattle on offer, but as is usual the week between "Hallow Fair" and "Big Wednesday" there has been very little demand, and the majority of cattle were unsold. A small show of milch cows met a slow trade except for the best class, which were very dear. Quotations:—Top price best beef, 8s. 3d. to over 8s. 6d. per stone; current, 8s. to 8s. 3d. Mutton from 7½d. to 8½d. per lb.

LONDON.

London Central, Wednesday.—Fair supplies, but trade slow. Arrivals of beef included 45 tons Scotch, 510 Liverpool sides, 1,400 hindquarters, and 640 forequarters American refrigerated. Quotations:—Beef, Scotch, short sides, 4s 4d to 4s 8d; long, 4s to 4s 4d; English, 4s to 4s 2d; American, Deptford killed, 3s 8d to 3s 11d; Liverpool, 3s 8d to 4s 10d; American refrigerated hindquarters, 3s 9d to 4s; forequarters, 2s 8d to 2s 10d. Mutton: Scotch, 4s 4d to 4s 8d; English wethers, 4s 2d to 4s 4d; ewes, 3s to 3s 4d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s to 4s 2d; and Dutch, 3s 6d to 3s 10d; per 8lb.

London Central, Friday.—Good supplies, but trade without improvement. Arrivals of beef included 100 tons Scotch, 370 Liverpool sides, 3,500 hindquarters, and 2,400 forequarters American refrigerated. Quotations: Beef, Scotch, short sides, 4s 4d to 4s 6d; long, 4s to 4s 4d; English, 4s to 4s 2d; American, Deptford-killed, 3s 8d to 3s 11d; Liverpool, 3s 8d to 3s 10d; American refrigerated hindquarters, 3s 8d to 4s; forequarters, 2s 8d to 2s 9d; New Zealand hindquarters, 2s 6d to 2s 9d; forequarters, 2s 2d to 2s 4d. Mutton: Scotch, 4s 8d; English wethers, 4s 2d to 4s 6d; ewes, 3s 2d to 3s 4d; Canterbury, 2s 9d to 3s; Wellington, 2s 7d to 2s 9d; Sydney and River Plate, 2s 5d to 2s 6d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s 2d to 4s 8d; Dutch, 3s 6d to 3s 10d; and Irish, 3s 3d to 3s 6d per 8lb.

Islington, Thursday.—Larger supply of beasts than for some time past, and better descriptions met steady demand, fat bulls and rough cattle, however, ruling slow. A small supply of sheep was penned, but trade for both wethers and ewes made slow progress, at about late prices. Quotations:—7½ to 8-stone Down wethers, 5s 10d to 6s; 9-stone ditto, 5s 8d; 10-stone half-breds, 5s 4d to 5s 6d; 10-stone Down ewes, 4s to 4s 2d; 11-stone half-bred ditto, 3s 8d to 3s 10d. Calf trade rules steady, the best on offer making 5s 6d per 8lb, to sink the offal. Pig trade quiet, and prices in buyers' favour. Total supplies:—230 beasts, 690 sheep, 20 calves, 310 pigs, and 5 milch cows.

COUNTRY.

Ashford, Tuesday.—Beef a fair trade, best making 11s to 11s 6d per score, secondary animals, 10s to 11s. Mutton not quite so good, some selling to go home for a week, small Kents and half-breds, 4s 10d to 5s 4d per stone; larger wethers, 4s 6d to 4s 10d; barrens, 3s 6d to 4s. Veal not so dear, 5s 2d to 5s 4d per stone. Pork about same; roasters, 11s to 11s 6d; big hogs about 6d score dearer; small pigs, 10s to 11s 6d.

Basingstoke, Wednesday.—At Raynbird and Sons' saleyard there was a fair attendance of buyers to meet a supply of 42 fat beasts, 50 calves, 392 fat sheep, 344 pigs, and 64 head of dairy and store cattle, for which the following prices were realised:—Fat beasts, £13 10s to £22; fat calves, 70s to 95s; small, 20s to 50s; fat wethers, 32s to 58s; fat ewes, 29s to 39s 6d; fat hogs, 65s to 87s; porkers, 46s to 62s 6d; smaller, 29s 6d to 44s; store pigs, 11s to 21s 6d; dairy cows, £8 to £17 10s. For fat beasts of prime quality there was a brisk trade, and a clearance effected and more money made; other grades maintained late rates. Prime quality Devon steers made up to £22; and heifers, £19 5s; Shorthorn steers, £18 15s; heifers, £16 5s; cows, up to £20 5s. A clearance made of the supply of fat sheep, with an advance on the choice lots of the size and quality to suit the buyer. Heavy sheep made late rates. Prime Hampshire Down wethers and young ewes made 43s 6d, 44s, 40s, 42s, 58s, 55s, 46s, 50s; ten-months-old ditto, 47s, 53s 6d, 55s 6d, 52s, 40s, 35s, 46s 6d, 47s, 45s 6d, 42s, 48s 6d, 46s; Exmoors, 32s; old ewes, 29s, 30s, 31s, 39s 6d, 35s; rams, 48s, 36s, 34s, 45s, 30s. Good milk cows and heifers are in demand, and those on offer to-day realised good prices. Store cattle met a fair inquiry. Fat calves were cleared at a trifle under last week's prices. Fat hogs met a brisk trade. Fat porkers sold readily at an advance all round in prices. Store pigs showed a better trade. Ruling values:—Prime quality Devon beasts, 7d to 7¼d per lb; ditto Shorthorns, 6d to 6¾d; bulls, cows, and inferior, 5½d to 6d; best quality sheep, 8½d to 9d; second ditto, 7¾d to 8¼d; old ewes, rams, and inferior ditto, 5½d to 6½d; fat calves, 6d to 8½d; fat hogs, 8s 6d to 9s 6d; porkers, 10s 6d to 11s 6d; and sows, up to 7s 6d per score.

Boston, Wednesday.—A short supply of useful beasts, and a quiet trade, except for best, which made 7s 6d to 8s; and cow beef, 6s to 6s 6d per stone. Stores, £9 to £15; in-calvers, £20 to £22; heifers, £15 to £17 10s; calves, 60s to 65s each. Wether mutton, 7½d to 8d, and ewe mutton, 5½d to 6½d per lb. Store lambs, 34s to 38s each.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs	2¼ in. and under..	9s 0d
Under 10 sc 10 lbs	Not exceeding 2¼ in.	8s 6d
Under 11 sc 10 lbs	Not exceeding 2½ in.	7s 9d
Under 12 sc	Not exceeding 3 in.	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND Co., Limited, Calne, Wilts.

Cambridge, Monday.—The stock exhibited for sale at this market and the prices obtained were as follows:—Beasts, 912; sheep, 467; pigs, 482; horses, 24. Beef, 7s to 8s per stone; mutton, 4s to 5s 6d; pork, 6s 9d to 7s 6d. A large show store beast, better trade, all sold. Fat beast, a good number to hand, prices quite up to last week. Fat sheep, a little better trade. Stores, very few to hand. Fat pigs, a good brisk trade all round. Stores, fair trade for all classes. Hay, straw, and roots short supplies, and good trade.

Canterbury, Saturday.—A very small supply of sheep, and but little trade. Several lots of Irish calves were sold at from £6 to £6 7s 6d, while yearling bullocks made from £7 10s to £8 10s.

Carlisle, Saturday.—About 300 Irish store cattle were exhibited, there being a good show for the season. The bulk of the cattle were wintering and stall-feeding heifers, and there were also a number of good polled bullocks. The attendance was small, and trade slow. Heifer stirks realised £6 10s to £8 10s; wintering heifers, £11 10s to £12 10s; stall feeding, £13 10s to £15 10s; polled bullocks, to £15 10s. Young pigs a small show and a clearance at 24s each.

Dorchester, Saturday.—There was a heavy offer of stock, especially of barreners, for the most of which there was a very brisk sale at prices showing some advance over recent sales. More ordinary runs also sold well, prices being maintained for anything of a useful stamp. The milch beast trade was also marked by considerable activity, best young milchers making up to £20. Fat beef met a steady sale at about late rates. Sheep through scarcity ruled firm.

Dublin, Thursday.—Well-sustained demand for all prime finished cattle at somewhat better prices. Rough and unfinished sorts more inquired for, and a better clearance effected; but quotations show no alteration. Shipping qualities of sheep in fair demand at last week's prices. Heavy aged wethers more difficult to place at prices favouring buyers. Cattle (best), 30s to 33s per cwt; other descriptions, 26s to 29s per cwt. Mutton, 5½d to 6¾d per lb; extreme, 7d per lb.—GANLY, SONS, AND Co.

Dumfries, Wednesday.—Good supplies met an active trade, prices for best descriptions having an upward tendency. Horned bullocks made up to £19; ditto heifers, to £17; polled bullocks, to £15 15s; ditto heifers to £14; Highland bullocks, to £18; cows, to £13 10s; Cheviot ewes, to 19s; and black-faced ewes, to 15s each.

Hereford, Wednesday.—Prices showed a downward tendency all round. For a large supply of beef there was rather a fluctuating trade; best quality realised not more than 6½d per lb, and secondary sorts 5d and upwards. Small supply of sheep, which met with little demand, best wethers not realising higher than 7¼d, and ewes from 5d to 6d. Calves also a small supply, selling readily at prices up to 8d. Large supply of pigs, which changed hands at late rates; porkers 5d to 6d, and baconers 4½d to 5d. Store cattle a weak trade, but fair demand for store lambs.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 822, calves 57, sheep and lambs 1,008, pigs (fat and sows) 30, sucking pigs 15, pigs (stores, not more than ten) 179, pigs (stores, more than ten) 127, horses 3. Prices of stock: Best beef, 6d to 7d per lb; wether sheep, 6½d to 8d per lb; ewes, 5½d to 6d per lb; veal, 9d per lb; lamb, 8½d per lb; pork, 4½d to 5d per lb; bacon, 4d to 5d per lb.

Ipswich, Tuesday.—Messrs. Robt. Bond and Sons report a short supply of fat cattle and plenty of buyers. Trade was again very brisk for stall-fed animals up to £23 15s. Fat sheep were not numerous; demand and values were about the same as last week. A large supply of calves, all the best for weaning purposes being in strong demand at high prices. Fat swine were well represented, but stores were short; all were in strong request at very satisfactory prices. A large entry of grazing cattle, the quality of which was remarkably good and including some choice lots of Cumberland and Westmoreland steers, also some good polled cattle. There were several buyers in attendance, and although the trade was not so good as last week, most of the lots changed hands. Several cows and heifers were offered and sold without alteration in value; shorthorn cows made up to £21. Mr. Alfred Smith's red polls were sold at the Drill Hall, an excellent trade resulting, heifers making up to 43 guineas; cows, 41 guineas; and bulls, 40 guineas. Numbers at sales and market:—Beasts 945, calves 53, sheep 2,359, pigs 1,250, horses 16.

Leicester, Wednesday.—Very heavy consignments of home-fed bullocks were available, but trade was rather slow for all except choice lots, and prices were 10s to 15s per head lower. Choice bullocks made 6¼d per lb; secondary, 5¾d to 6d; cows, 4¾d to 5¼d; heifers, 6d to 6¼d per lb. Sheep were a large supply, and choice wethers sold freely at 7¾d to 8d per lb; large sheep, 7d to 7¼d per lb; ewes, 5¼d to 6d per lb. Calves flat, at 7d to 7½d per lb.

Leicester, Saturday.—Full supplies of stock in excellent condition, moderate attendance, and trade sluggish at easier prices. Milch cows made £17 to £26 per head. Bullocks, £10 to £15 per head. Young stock neglected.

Lincoln, Tuesday.—There was an average supply of beasts, and a fair trade. Prime beef 7s to 7s 6d, lower qualities 6s 6d to 7s per stone. The number of sheep was small, and trade good. Ewe mutton 6d to 6¼d, wether ditto, 7¼d to 8¼d per lb.

Lincoln, Friday.—Average supply of milch beasts and store cattle, with very little trade doing. Milch beasts, £15 to £20; three-year-old stores, £14 to £15 10s; two-year-olds, £10 to £12; and young stock, £6 to £9. Very few sheep and lambs penned. Lambs, 28s to 34s each.

Lincoln, Friday.—There was a good show of beasts, and a fair trade. Young bullocks £10 to £13, cows £14 to £20. The supply of sheep was small, and trade only fair. Lambs 20s to 34s each.

Malton, Tuesday.—Cattle a good show, both numbers and quality. Best heifers and young bullocks about the same as last week; cows and coarse beef less money. For latter, 6s 6d to 7s, and for the former 7s 6d to 8s per stone was realised. Calves scarce, and sold well. In sheep, nice light-weights were very dear all round, making fully 8d; others, 6d to 7d per lb.

Market Drayton, Wednesday.—Quotations: Beef, prime small 6d to 7d per lb; large 6d to 6½d per lb. Mutton, wether 7¼d to 8¼d per lb; ewe 6¾d to 7¼d per lb. Veal 7d to 8d per lb. Porkets 8s 5d to 9s 6d per score. Bacon pigs 7s 6d to 8s 6d per score, heavy weights 6s 6d to 7s 6d per score.

Newcastle, Tuesday.—Good market. Prices steady except for porkers; over plentiful, and 6d lower. Numbers:—Cattle, 2,163; sheep, 6,036; calves, 65; pigs, 1,331. Prices (sinking the offal):—Beef, 5s to 8s; pork, 5s to 9s per stone: mutton, 5d to 8d: veal, 5d to 8½d per lb.

Newport, Wednesday.—Large supply and brisk trade. Quotations:—Best beef, 6¾d to 6¾d per lb; seconds, 5½d to 6d: best wether mutton, 7½d to 7¾d; ewes, 6d to 6¼d; lamb, 8d; veal, 7d to 7¼d; porker pigs, 10s 3d to 10s 6d per score; bacon pigs, 9s to 9s 3d.

Norwich, Saturday.—The supply of store beasts here today was considerable; business was rather dull, but previous rates were about maintained. The supply of fat beasts was considerable; prices showed little change, ranging at from 7s 6d to 8s per 14lb. Business in store sheep, which were in fair supply, was somewhat inactive; hoggets made 35s to 42s; and keeping shearlings, 40s to 45s per head. Fat sheep, which were offered to a fair extent, were quoted at 8s to 8s 6d and 9s per 14lb.

Preston, Wednesday.—Good attendance and very full supplies of all classes of stock. Business was much brisker than for some weeks past, and better prices were realised. There was a good demand for fat calves. Beef, heifers, and bullocks, 6d to 6¾d; cows and bulls, 5d to 5¾d; mutton, hoggs, and lambs, 7d to 7¾d; tups and ewes, 5¾d to 6¼d; calves, 6d to 8d. At the market—280 cattle, 2,000 sheep, and 80 calves.

Romford, Wednesday.—An average supply of fat beasts, and trade slow. Best animals made 4s 4d to 4s 6d, and

middlings 4s to 4s 2d per stone. Calves in short supply, and trade dearer, at 5s 2d to 5s 4d per stone. Sheep in average supply, and trade about the same. Best sheep made 5s 4d to 5s 6d, and middlings 5s to 5s 2d per stone. A few store beasts on offer, but demand slow. A large supply of pigs, and trade more brisk, in consequence of the colder weather. Small porkers made 4s 4d to 4s 6d, and large hogs 3s 10s to 4s per stone.

Saffron Walden, Tuesday.—Sheep in short supply; good trade. Fat ewes made 50s 6d, wethers 67s 6d, hoggets 57s. Beasts in fair supply; good demand. Ripe Shorthorn heifers made £22, small Shorthorns and Devons £19 15s; milch cows sold up to £14, fat calves £3 17s 6d, and weaneis 44s. Pigs were in short supply, and quite as dear. Large hogs made up to £5, porkers 43s 6d, and stores 32s.

Sheffield, Tuesday.—The show of milch beasts was only small. The best qualities had a quick sale, making £18 to £24; inferior lots, £10 to £15.

Shrewsbury, Tuesday.—Fair trade all round at late prices. Small supplies of calves and sheep. Quotations:—Beef, 6d to 7d; mutton, 6d to 8d; and veal, 6½d to 7½d per lb. Porket pigs, 9s 6d to 10s 6d; and bacons, 8s 6d to 9s 6d per score. Cows with calves, up to £23. Number offered:—939 cattle, 47 cows with calves, 907 sheep, 80 calves, 35 fat, 127 porket, and 563 store pigs.

Spalding, Tuesday.—A good show of fat beasts and a very brisk trade. Best bullocks, 7s 6d to 8s per stone. Stores sold well, and cows and in-calvers were dear. There was a large show of sheep, and trade was slightly easier. The average price of mutton was 7½d per lb.

Stockton, Wednesday.—There were on offer 241 cattle, 309 sheep, and 294 pigs. Best cattle, 7s 6d to 8s; rougher kinds, 6s 6d to 7s. Sheep, 8d; ewes, 6d; tups, 4d to 5d per lb.

Taunton, Saturday.—Small supply, moderate attendance, and slow trade.

Thame, Tuesday.—There was a fair supply of stock at market, and all the best quality met with a sharp trade. There was a good attendance of buyers, and, with few exceptions, all the consignments changed hands. Mr. Bond's sale comprised 101 fat beasts, and a few stores, 152 sheep, 73 fat and weaning calves, and 175 fat and store pigs. Fat bullocks made £16 to £21 15s; fat heifers, £13 to £21; two-year-old barren heifers, £8 to £9 15s; fat wether sheep, 42s to 55s; fat ewes, 35s to 44s 6d; tegs, 30s to 43s; fat calves, £3 to £5 4s; cow calves, 23s to 65s; bull calves, 19s to 47s; fat pigs, 10s per score. Stores made late prices.

Wakefield, Wednesday.—A very slow trade for both beef and mutton, there being a small attendance, with buyers slow to operate. Beef from 5d to 6¼d per lb; small sheep made only 8d, with other qualities 5d to 7½d. Numbers penned—Fat beasts, 1,763; sheep, 2,804.

Wakefield, Wednesday.—There was a good supply of beef, 1,763 beasts being on offer, against 1,598 last week. With the exception of a few lots of Scotch cows and a pen of Lincolnshire bullocks the stock was from the best grazing districts in Ireland, and, generally speaking, the animals were in good condition. The beef trade ruled heavy, and notwithstanding the larger supply, last week's rates were well maintained. Choice heifers, 6¼d per lb; good useful beef, 6¼d; inferior lots, 5d to 6d. The supply of mutton was also larger than last week, 2,864 sheep being penned, against 2,675. The supply included about 30 pens of Irish sheep, and the remainder were from the North and East Ridings and the North of England. Choice young and small sheep changed hands at 8¼d to 8½d per lb; good strong sheep, 7½d to 8d; and ewes and tups, 5½d to 7d. Fat calves made from 6d to 8d per lb. There was a large show of milch cows, many of which were in good condition; a good trade was done, and prices were higher. Best milkers, £22 10s; inferior, £15 to £20. Lean beasts were freely offered, and they met with a steady demand at £11 to £13 10s each.

Wakefield, Wednesday.—There was a larger supply of beef, and prices were a little under last week's quotations, best qualities realising 6¼d per lb. There was a small show of sheep, and the trade in mutton was therefore brisker and better prices were realised; choice little sheep made 8½d; good strong sheep, 7½d; and ewes from 6d per lb; beasts penned 1,763; sheep 2,864.

Worcester, Saturday.—A fair supply of cattle and sheep, and a good entry of pigs. Calves scarce. Slow trade for beef and mutton without change in values. Calves wanted. Pigs, fair trade at late rates. Beef, 6d to 7d; inferior, 5½d to 6d; wether mutton, 8d; ewes, 6d; and veal, 8d per lb. Pork pigs, 10s; and bacons, 9s per score.

Worksop, Wednesday.—There was a better all round show of cattle than for some weeks, and prices ruled higher than usual, whilst the attendance of buyers was also good. Sheep were very dear, making to 66s per head. Beef, best, 7s 9d to 8s 6d; secondary, 7s to 7s 9d per stone. Best wether mutton, 9d; secondary, 6d to 7½d; ewes, 6d to 7d per lb.

FOREIGN.

Yorkhill, Monday.—A sale of Canadian cattle was held in the forenoon, when there were penned in the sheds 243 cattle, landed by the Buenos Ayrean (s), from Montreal. Bullocks, as is generally the case, formed the greater proportion of the total number, while there were also a few bulls included in the shipment. The cattle, as regards quality, were up to the average, many of the beasts being very prime, and showed well. There was a good attendance of buyers, and business was of a better character than that ruling last week—a fact due to the short supply, and the more favourable weather. The deadweight quotations may be given as follows: Best bullocks, medium weight, 58s per cwt, and for really choice up to 60s; heavy prime, 56s; secondary and heavier, 54s; best bulls, to 50s; and secondary and heavier, 46s to 48s.

EGGS.

Tuesday.—Bedale: 7 for 1s. Gainsborough: 7 or 8 for 1s. Settle: 7 or 8 for 1s. Sheffield: 8 or 9 for 1s. Spalding: 7 for 1s.

Wednesday.—Barnsley: 6 or 7 for 1s. Boston: 6 or 7 for 1s. Colne: 2s 8d per score. Dorchester: 1s 2d to 1s 8d per dozen. Goole: 8 for 1s. Hereford: (retail), 8 to 10 for 1s. Keighley: (retail), 6 for 1s. Kirbymoorside: 8 or 9 for 1s. Knaresborough: 6 or 7 for 1s. Louth (wholesale): 10 for 1s. Market Drayton: 6 or 7 for 1s. Market Weighton: 8 for 1s. Masham: 8 for 1s. Northallerton: 6 or 7 for 1s. Stockton: 6 or 7 for 1s. Whitby: 7 for 1s. Worksop: 3s to 3s 2d per score.

Thursday.—Brigg: 8 or 9 for 1s. Driffield: 10 for 1s. Kidderminster: 7 for 1s. Penistone: 8 for 1s. Ripon: 6 or 7 for 1s. Scarborough: 7 for 1s. Wetherby: 6 or 7 for 1s.

Friday.—Chester: 6 or 7 for 1s. Easingwold: 9 or 10 for 1s. Grimsby: Austrian, 6s 6d to 7s 8d; Russian, 6s 3d to 8s. Helmsley: 7 or 8 for 1s. Derby: 6 and 7 for 1s. Leeds: Yorkshire, 18s to 20s per 120; Irish, 13s to 14s; Danish, 10s to 11s 6d; Austrian blues, 8s to 9s; ditto reds, 6s 3d to 6s 9d. Lincoln: 7 for 1s. Nantwich: 6 or 7 for 1s. Otley: 6 or 7 for 1s. Stockport: 5 or 6 for 1s.

BUTTER.

Tuesday.—Bedale: 1s 11d to 2s per roll of 24os. Gainsborough: 1s 2d to 1s 4d per lb. Settle: 1s to 1s 1d per lb. Sheffield: 1s 3d to 1s 4d per lb. Spalding: 1s to 1s 1d per lb.

Wednesday.—Barnsley: 1s 4d to 1s 5d per lb. Boston: 1s to 1s 2d per lb. Colne: 1s 2d per lb. Dorchester: 1s 1d to 1s 4d per lb. Goole: 1s 3d per lb. Hereford: 1s 2d to 1s 4d per lb. Keighley: 1s 3d per lb. Kirbymoorside: 1s 2d per lb. Knaresborough: (wholesale), 1s 8d to 1s 10d per roll of 24oz; (retail), 1s 11d to 2s. Louth: (wholesale), 1s 2½ per lb. Market Drayton: 1s 2d to 1s 3d per lb. Market Weighton: 1s 1d to 1s 2d per lb. Masham: 1s 7d to 1s 8d per roll of 24oz. Northallerton: 2s per roll of 24oz. Stockton: 1s to 1s 3d per lb. Whitby: 1s 1d to 1s 2d per lb. Worksop: 1s 3d to 1s 4d per lb.

Thursday.—Brigg: 1s 2d to 1s 3d per lb. Bristol: finest Canadian, 108s; dairies, 96s to 98s. Driffield: 1s per lb. Kidderminster: 1s 2d per lb. Penistone: 1s 2d to 1s 3d per lb. Ripon: 1s 10d to 2s per single roll of 24oz. Scarborough: 1s 3d to 1s 4d per lb. Wetherby: 1s 3d to 1s 5d per lb.

Friday.—Altrincham: Best makes, 1s 6d per lb. Chester: 1s 3d per lb. Crewe: 1s 3d per lb. Easingwold: 1s to 1s 1d per lb. Grimsby: Choicest Swedish, 122s to 125s per 112lb; Dutch, 112s to 115s; Canadian, 100s to 112s per 112lb. Helmsley: 1s 3d to 1s 6d per lb. Leeds: Danish, 120s to 126s per 112lb; Irish creameries, 102s to 106s; York lump, 15s to 16s per stone; ditto long rolls, 1¼lb, 1s 9d to 1s 11d; fresh butter in 1lb prints, 1s 3d to 1s 6d per lb. Lincoln: 1s 2d 1s 3d per lb. Otley: 1s 7d to 1s 10d per roll of 24oz.

COLONIAL DAIRY PRODUCE.

London, Friday.—Butter.—There is an improved demand for really "choicest" brands of Australian butter, but "finest" grades show no improvement. Values have advanced about 2s per cwt on the week, and "choicest" is now selling at 108s to 110s per cwt., the bulk at the firmer quotation. Although sales at 112s are reported, they are for very limited quantities, and in reality are more retail than wholesale transactions. The Copenhagen official quotation has this week been raised from 104 to 106 kroner, and the market is reported firm. Dutch and French butters are also advancing in price. Irish creameries are diminishing very rapidly, and thus the demand for Australian and New Zealand is likely to improve. Cheese.—There is a firmer tone to the market in Canadian cheese this week, although there is no quotable advance in values. As intimated last week there has been an advance in values in Canada, caused by a scramble of the "bears" to cover their "shorts." The feeling amongst some of the largest receivers from the factories is that prices for finest cool goods will continue firm with an upward tendency. Already values are fully 2s per cwt above their lowest point.—W. WEDDEL AND CO.

WOOL.

London, Friday.—Wool, English, per pocket of 240lb:—Fleeces, Southdown hoggs, £8 to £11; half-bred hoggs, £7 to £8 10s; ditto wethers, £6 10s to £8; Kent fleeces, £6 to £7; Southdown ewes and wethers, £8 to £11; Leicester ditto, £6 to £7. Colonial, per lb:—Victorian, fleece, superior, 1s 4d to 1s 5d; scoured, good, 1s 5½d to 1s 6d; scoured, average, 1s 4d to 1s 4½d; greasy, average to fair, 10d to 10½d; New South Wales, scoured, average, 1s 1d to 1s 2d; greasy average, 7½d to 8½d; South Australian, greasy, average, 6d to 6½d; New Zealand, scoured, average, 1s 2d to 1s 3d; greasy, average, 7½d to 8d; Cape, scoured, superior, 1s 3½d to 1s 4½d; fleece, average, 5½d to 7½d; greasy, average, 5d to 5½d; Natal, scoured, 1s to 1s 1d; greasy, average, 5½d to 6½d; crossbreds, greasy, Victorian, good to superior, 9d to 11d; New Zealand, fine, 8½d to 10d; ditto, medium, 6¾d to 7½d; ditto, coarse, 5½d to 6d.

Bradford, Thursday.—In the wool trade prices are upheld with difficulty, despite the adverse influence of very slight business. Fine Botanys continue firm, and quotations generally are unchanged. There is no change in mohair. In the yarn trade orders for export are very scarce, and at low prices, and the home trade remains quiet. The piece trade is finding a fair inquiry for spring delivery.

Canterbury, Saturday.—Trade without alteration. Kent fleeces make only 6d per lb, and lambs' wool rarely exceeds 4d. Down fleeces, 7½d to 9¼d per lb.

FEEDING STUFFS.

Mark Lane, Monday.—Linseed Cakes: Supplies of foreign come to hand rather more freely, while the demand is extremely limited, buyers generally anticipating lower values. Russians meet a slow sale, and there is no disposition to buy ahead at present prices. Americans offer at slightly reduced rates for shipment, but spot parcels are firmly held. English are not being pressed on the market and maintain their last week's price. Cotton Cakes: Landed parcels of Egyptian have been in improved request at late rates, while English still offer unchanged. Decorticated: Some new seed cake now on passage to London offers at £6 17s 6d, and meal at £6 12s 6d to £6 15s. Rape cakes scarce and unchanged. Maize Germ Meal: A steamer parcel of American just arrived sells freely at a considerable rise in price from last week; English is also in good demand. Rice Meal: There are sellers of Rangood for November-December shipment at £4 8s 9d, and landed parcels remain unchanged.

—PINNOCK BROS., Mark Lane

London, Thursday.—Linseed.—Shortly after the issue of our last report the "Times" published a telegram from La Plata, increasing the quantity of linseed available for export to 500,000 tons. This had the effect of demoralising the market for the time being, and prices seriously declined. Since then, however, it becoming generally believed that the above estimate was considerably exaggerated, the market became steadier, and rates have advanced about 2s 6d per ton from the lowest point. Calcutta to London spot and near at hand 59s, November-December 59s, April-June, 46s 3d. La Plata December-January, 48s, January-February, 46s 6d. Hull closes quieter. Calcutta, April-June, 47s. La Plata, December 51s, December-January, 48s, January-February, 47s. To the Continent Bombay, is quoted February-March, 51s; March-May, 49s 3d. Calcutta, April-June, 48s; La Plata, December 51s; December-January, 48s 6d; January-February, 47s. Linseed cakes quiet. London made, £8 10s to £8 12s 6d. Russian, £7 17s 6d to £8 7s 6d ex dock. American Westerns at £7 17s 6d. Cotton cakes steady. London made £4 17s 6d to £5; Egyptian, £4 15s to £4 16s 3d. Rapeseed is firm. Brown Calcutta to London November-December, 44s; March-May, 40s 6d. To the Continent we quote, Yellow Guzerat, November-December, 52s; March-Mays 46s 6d; Yellow Cawnpore March-May, 44s. Brown Cawnpore November-December, 47s; March-May 40s. Brown Calcutta, October-November, 45s; April-June, 41s. Rapeseed to Hull, prompt 33s. Cottonseed has also increased in value, owing to the Alexandrian market advancing. Spot London, £7, near £7. November £6 17s 6d; December to March £6 16s 3d. Hull spot, £6 16s 3d; November-January, £6 15s. Cargoes, December, £6 17s 9d; January, £6 16s 3d.—THE PRODUCE BROKERS COMPANY, LIMITED

Hull, Tuesday.—To day there is only a small supply of homegrown wheat, which meets a slow sale at last week's prices. Foreign has a drooping tendency, and must be quoted 3d per qr cheaper on the week. Malting barley does not meet a free sale except for finest samples; prices unaltered. Grinding in limited demand at late rates. Oats steady at quite last week's prices. Beans unaltered. Maize dull and rather in favour of buyers. Linseed.—During the whole of the past week there has been a decided slump in the market as regards new crop River Plate. At the close, however, there is a smart re-bound, and values are to-day fully 3s. above the lowest point touched; this description. December shipment is worth 51s, Dec.-Jan. 48s 6d, and Jan.-Feb. 47s 6d. Bombay and Calcutta do not offer at the moment, to this market. Black Sea is nominal. Petersburg 55s, and Riga 54s 6d, but much offering of either description. Cottonseed.—The market showed further weakness during last week, and down to £6 12s 6d accepted spot and passage, but with more inquiry values quickly recovered, and a good business since done in these positions at £6 13s 9d to £6 16s 3d, Nov.-Jan. and Feb.-March, after declining to £6 11s 3d, is, buyers, at £6 13s 9d. Linseed cakes: Spot trade about nil. The only business doing at present is in contract cakes. Hemp.—Firm, unchanged.—KEIGHLEY MAXSTED AND CO.

WATERLOO ROUND FEEDING CAKES, £6 17s 6d PER TON; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £9 5s 0d PER TON; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £9 2s. 6d. PER TON; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £5 19s 0d PER TON. ALL F.O.R. HULL.

MOLASSINE, packed in bags, of 1¼cwt. each. Price per cwt. 7s. 6d. Price per ton, £6 15s., on rail at works, Silvertown, Essex.

HAY AND STRAW.

Whitechapel, Saturday.—The supplies were shorter, and met with a fair demand. Best clover, 85s to 100s; inferior ditto, 80s to 85s; specially picked hay, 92s 6d; good ditto, 80s to 87s 6d; inferior ditto, 50s to 60s; mixture and sainfoin, 70s to 90s; and straw, 25s to 36s per load.

Cumberland, Saturday.—Best selected hay, 80s to 90s; good ditto, 75s to 80s; inferior ditto, 50s to 70s; prime clover, 85s to 97s 6d; good ditto, 70s to 80s; inferior ditto, 60s to 65s; best mixture, 80s to 90s; and straw, 24s to 34s per load.

Leeds, Tuesday.—Business in the warehouses during the past week has shown a slight falling off, but prices remain steady and firm. Quotations:—Meadow hay, 6½d to 7d; clover, 7d to 7½d; wheat straw, 5½d; oat straw, 5d; rye straw (retail), 7d per stone.

Bristol, Wednesday.—Clover hay, 75s to 80s; meadow hay, 70s to 75s 6d; straw, 45s to 50s.

FOREIGN HAY AND STRAW.

London, Saturday.—With continued short supplies, owing to Lighterman's strike, there is very little doing; prices, however, are firmer, and there is more inquiry. We quote Canadian timothy and clover mixture, 83s; Dutch 1st cut clover, 87s 6d; Dutch and French 2nd cut clover, 90s; good Dutch hay, 72s 6d to 75s; inferior Dutch hay, 63s; large bale French wheat straw, 46s 6d; small bale French wheat straw, 43s; small bale French oat straw, 43s, all per ton, delivered by barge alongside wharf.—FULLER AND PRENTIS, 9 and 10 Great Tower Street, E.C.

POTATOES.

Borough and Spitalfields, Saturday.—Arrivals this morning have been moderate, but the trade has been slow, and only superior samples have maintained last week's prices. English: Reading Giants, 3s to 3s 9d; Professor Maerkers, 3s 3d to 3s 9d; Up-to-Dates, 3s 6d to 4s 6d; French and Belgian Magnums, 2s 9d to 3s 6d; Imperators, 2s 9d to 3s 3d; German Magnums, 3s 3d to 3s 9d per cwt.

Goole, Wednesday.—Potatoes: Trade was scarcely so good here to-day; prices about the same, from 80s to 85s per ton; foreign, 3s 6d per bag.

MANURES.

Liverpool, Friday.—The only fertiliser in request at the present time is basic slag, and the transactions on agricultural account are very moderate, owing to the sodden condition of the land. Feeding stuffs are very strong, and in some instances slightly advanced prices paid, but the consumption is only trivial as yet, although with the colder weather of the last few days inquiries have been more active. To-day's values are annexed. At auction yesterday 100 bags Peruvian cotton cake, all faults, realised £6 5s ex-quay, whilst sales are reported of 500 tons Rangoon rice meal on the spot at £4 11s 3d to £4 12s 6d per ton ex store, with some 6,000 tons to arrive, December to April shipment, at £4 2s 6d to £4 6s 3d per ton, according to position, ex ship terms. Nitrate of soda, best quality, i.e., guaranteed 95 per cent. pure, in bags, £8 7s 6d to £8 10s per ton; East India bone meal, in bags, £4 7s 6d to £4 10s per ton; kainit, prime 23 per cent., in bags, £2 7s 6d to £2 10s per ton; palm nut cake, prime, in bags, £5 5s to £5 7s 6d per ton; linseed cake, American, thin oblong, prime, in bags, £7 16s 3d to £8 per ton; linseed cake, English, prime, in bulk, £8 15s to £9 per ton; linseed cake, foreign, round, prime, soft and oily, in bags, £8 15s per ton; cottonseed cake, N.A., decorticated, prompt, scarce, in bags, £7 to £7 2s 6d per ton; cottonseed cake, English, decorticated, prime, very soft, in bags, £7 5s to £7 10s per ton; cottonseed cake, English, undecorticated, prime, in bulk, £4 17s 6d to £5 2s 6d per ton; cottonseed cake (crushed), 20 to 25 per cent. oil, prime, in bags, £7 5s per ton; maize germ meal, prime, in bags, £5 7s 6d per ton; rice meal, Rangoon, as imported, in bags, £4 15s to £4 17s 6d per ton; Indian meal, coarse to fine grinding, prime, in bulk, 11s to 11s 6d per 240lb; Indian meal held tenderly, in bags, £3 5s per qr. 416lb., N.A. rapeseed, new red, fair to good, in bags, nominal; D N S Brand superphosphate of lime, guaranteed, 25 to 27 sol., in bags, nominal; D N S Brand superphosphate of lime, guaranteed, 30 to 31 sol., in bags, nominal; D N S Brand superphosphate of lime, guaranteed, 35 to 36 sol., in bags, nominal; basic slag, prime quality, guaranteed, 30 to 35 per cent. phos., in bags, £1 11s to £1 12s 6d per ton; basic slag, prime quality, guaranteed, 35 to 40 per cent. phos., in bags, £1 13s 6d to £1 14s 6d per ton; basic slag, finest quality, guaranteed, 38 to 45 per cent. phos., in bags, £1 15s to £1 17s 6d per ton, at the public auction depôts.—H. D. N. LANGAR AND CO.

LIVE STOCK.

OUR ILLUSTRATIONS.

We are able this week to add to the interest of our report of the Norwich Christmas Fat Stock Show by reproducing three photographs—one a nice view of the Central Avenue, and the others of champion animals.

The cross-bred heifer Ladysmith won first prize in the class for cows or heifers of any breed other than Shorthorn and Red Polled, not exceeding four years old; the Mayor of Norwich's special prize for the best cow or heifer in the show; the prize of £10 for the best fat animal grazed by a *bonâ fide* tenant farmer resident in the county of Norfolk; and the patrons' prize for the best beast in the show. The winner of the last-mentioned special receives a sum in addition to the class and special prizes, so that its total winnings amount to £100 sterling, with £1 to the herdsman. Ladysmith is the property of Mr. W. E. Learner, Dilham, Norfolk, and was bred by Mr. J. Ross, Meikle Terrel, Fearn, N.B., her sire being Ringleader and her dam Dora. She is two years and eight months old, and her weight is given as 14cwt. 3qrs. 10lb.

The Southdown sheep is one of the pen of three which won the champion prize for the best pen in the show, and a special prize of £5 for the best pen of shearling wethers or ewes in the show. The exhibitor, who was also the breeder, was Colonel Harry McCalmont, M.P., Cheveley Park, Newmarket. The age and weight of the sheep were respectively given as one year ten months and 6cwt. 1qr. 5lb.

STOCK AND SHOW NOTES

By Herdsman.

The annual exhibition of fat cattle, sheep, and pigs by the Smithfield Club will be held at the Royal Agricultural Hall, Islington, on December 10th to 14th, under the presidency of Mr. Leopold de Rothschild, when animals from all parts of the United Kingdom will meet to compete for the valuable prizes offered, amounting to £3,900. The entries for the forthcoming show number 574, and comprise 259 head of cattle, 153 pens of sheep, and 114 pens of pigs, and for the carcase competition fifteen head of cattle and thirty-three sheep.

The chief interest at the coming Smithfield Show will be centred in the competition for the challenge cup for cattle, value £150, presented by Her Majesty the Queen; the challenge cup for sheep, value £100, presented by H.R.H. the Prince of Wales; the £50 challenge cup for pigs, presented by H.R.H. the Duke of York; and the 100-guinea champion plate for the best beast in the show. The amount of prize money which may be won in the various sections is as follows: Champion beast, £235 and the Queen's challenge cup; the champion pen of sheep, £110 and the Prince of Wales's challenge cup; and the champion pen of pigs, £55 and the Duke of York's challenge cup. Naturally these valuable prizes will draw together the finest animals of their respective breeds in the kingdom, the champion cattle, sheep, and pigs from the Birmingham, Edinburgh, and Norwich Shows meeting here in competition.

The animals entered for the carcase competition will be exhibited alive on the Monday of the show up to five p.m., and the carcases on Wednesday and Thursday (seven p.m.) The carcases will be sold by auction on the Thursday of the show at twelve o'clock noon.

In addition to the live stock at the Smithfield Show, a large portion of the Agricultural Hall downstairs, as well as the extensive galleries, is set apart for the exhibition of agricultural engines, machinery, and implements, seeds, roots, etc., all the leading agricultural implement manufacturers being represented with machinery and implements of the most approved type.

In an annexe to the Agricultural Hall, Islington, an exhibition of dead poultry is to be held under the auspices of a committee, of which Sir Walter Gilbey, Bart., is the chairman. The admittance to this exhibition will be free to the public from the Smithfield Club's Show.

The entries for the Royal Dublin Society's Winter Show, to be held on December 11th, 12th, and 13th, have now closed, and the figures give promise of the exhibition being the largest yet held by the society since they commenced the winter shows. Entries of cattle, in the classes of infed, outfed, and artificially sheltered, give an increase of 109 over those of last year, the figures being 562 for the coming show against 453 for last December. All the provinces contribute to this increase, Leinster and Ulster especially, and from the celebrity of their owners as breeders, the stock may be expected to be of the best possible description. Sheep have an increase of two over last year, the numbers being 33 entries against 31 in 1899. These include Long-woolled of the Leicester, Border Leicester, Lincoln, and Roscommon breeds; short-woolled sheep other than Cheviot or Mountain, Black-faced Mountain and Cheviots. Pigs had only one entry last year, while this year they have eight in pens of three.

The dairy section, most of the entries coming from Munster and Leinster counties, and including butter made up in various forms, salted and unsalted, a parcel post class, and cream and honey, gives an increase for this year's show of twenty-eight entries, the numbers for 1899 being 347, and for 1900, 375. Entries of honey have considerably decreased. Farm produce exhibits this year give a big increase over those of 1899, amounting to 154 entries. Last year's were 489, while this year's amount to 643. Malting barley grown in Ireland has 229 entries, the first prize in this section being £15, the total sum presented by the Barley Committee being £230. There will be a show of implements, machinery, etc., in the grounds, and stock will be received at the society's premises, Ball's Bridge, on Monday, the day before the opening of the show, but none will be admitted after that day.

Mr. W. E. Learner's Cross-Bred Heifer, "Ladysmith," Champion Beast at the Norwich Fat Stock Show, 1900.

On Monday Mr. W. Cope, the President of the Royal College of Veterinary Surgeons, presided over a meeting convened by the Animals' Aid Society and Institute at St. James's Hall, Regent Street, to consider the practice of "doping" racehorses. Professor Atkinson addressed the meeting, and then a request was made by the chairman that any gentleman familiar with "doping" should enlighten the audience upon the subject. None of those present, however, had the requisite knowledge, and the proceedings terminated without any resolution being passed.

The Oxfordshire Agricultural Society will hold their next year's show at Thame on Wednesday and Thursday, May 15th and 16th. The entries for implements will close on April 1st, and for stock on April 8th; but entries at double fees may be made for the latter up to April 13th. The secretary is Mr. A. F. Milton Druce, Estate Offices, 16, Queen Street, Oxford.

Messrs. Sexton, Grimwade, and Beck's next special sale of Shire mares, fillies, foals, and geldings will take place on Friday, the 30th inst., at Peterborough Repository. The catalogue comprises close on a hundred animals, selected from the studs of many well-known breeders. Twelve o'clock is the time at which the sale will commence.

Next year's show of the Cambs and Isle of Ely Agricultural Society will take place on Thursday, July 25th, at Cambridge.

The Lincoln Longwool sheep are in demand for Chili. Mr. Anderson, of Chapel Farm, Barton-on-Humber, shipped on Wednesday last a grand Lincoln Longwool ram lamb eight months old—a fine specimen of his breed.

Owing to the restrictions of the Board of Agriculture with regard to the movements of swine in Leeds, the Leeds Smithfield Club will not be able to have a display of pigs at their forthcoming fat stock show unless some special arrangement can be made. Accordingly, they sent a deputation to the Corporation Markets Committee to ask that authority to petition the Board for such a temporary variation of the regulations as will permit of pigs being exhibited at the show, and slaughtered within four days afterwards. It seems that under similar circumstances five years ago the same kind of arrangement was made. The committee—over whose meeting Alderman Knowles presided—will address the Board of Agriculture on the subject.

Of late some very good sales of imported pedigree cattle have been held at Buenos Ayres, the animals offered realising capital prices. The Irish-bred Shorthorn bull, Sign of Wealth, by Sign of Riches, and out of Diadem's Pride, was knocked down at the high price of £504 5s. This bull was bred by Messrs. Orr, of Loughgall, co. Armagh, and when the property of Lord Longford, Pakenham Hall, Castlepollard, was successfully shown at the Dublin and Belfast Shows. At another sale the handsome figure of £708 was obtained for the Shorthorn bull Sultan 73740, formerly the property of Major Alexander, Milford, co. Carlow, and bred by Lord Lovat, Beaufort Castle, Inverness. He was got by the famous sire Merry Archer 67477, out of Maid of Underley 2nd, and proved a valuable stock-getter when in the Milford herd.

The Council of the Hackney Horse Society have recently issued the list of prizes to be awarded at the seventeenth London show, which will be held at the Royal Agricultural Hall on March 5th, 6th, 7th, and 8th next. The classi-

fication has been drawn up on the same lines as last year, with a few alterations which may be noted. It has been decided to still further encourage the breeding of big Hackneys, which are now so much in demand, by dividing the schedule into three sections, viz.: (1) Ponies not exceeding 14 hands. (2) Cobs over 14 and not exceeding 15 hands. (3) Hackneys over 15 hands. There are classes for stallions and mares of all ages and heights, and the two interesting classes for half-bred geldings to be shown in hand have been retained. The cob section comprises two classes, viz., one for stallions foaled in or before 1897, and another for mares of the same age. The pony section contains two classes for stallions and two for mares, applicable to animals two, three, and four years old and over. The three-year-olds must not exceed 13.3 hands, and the two-year-olds 13.2 hands. The attractive single harness classes for mares and geldings not over six years old have again been included. One is applicable to ponies, one to cobs, and two to Hackneys, the latter being divided as follows: Exceeding 15 and not exceeding 15.2 hands, and over 15.2. The show will conclude with the instructive competition for the best sires in produce groups, and the breeders' prizes, sale by auction, and other features have been retained. Entries close on January 21st, and the secretary of the society, at 12, Hanover Square, will forward, on application, copies of the complete prize schedule.

From December 1st to the 8th will be held, at Chicago, an International Live Stock Exposition, and I have received some particulars concerning it. The management of the Union Stock Yards have erected a building 600ft. long and 100ft. wide to be used as additional space for the Exposition. This building has been placed alongside of Dexter Park Amphitheatre, which is 600ft. long and 200ft. wide, constructed of brick and steel, and containing stall room for about 3,000 animals. The new building is being built for Exposition purposes only, and its erection is a strong evidence of what the Exposition will be.

Some idea of the magnitude of the Exposition can be found in the fact that there are 2,230 premiums to be awarded, and that it will take about 750 yards of ribbon for the premiums. There will be, from present indications, more than 10,000 animals, counting all classes, in the competition. Seven foreign countries will have official representation at the Exposition. The Hon. Chauncey Depew, the New York Senator, and a leading member of the Farmers' Club of that city, will attend the opening of the Exposition, and will deliver an address. Altogether the event promises to be the live stock feature of the century in America.

The South Tyne Agricultural Society have hired from Messrs. A. and W. Montgomery the well-known horse Prince of Roxburgh as their premium horse for next season. Prince of Roxburgh is a very highly bred horse, his sire being the old-time champion Macgregor, and his dam Gartland Queen, which was dam of the Glasgow premium horse Casabianca. Prince of Roxburgh is a big, sound, clean-limbed horse of the best quality. He had the Newton Stewart premium last season, Kinross premium in 1899, and the West Teviotdale premium in 1898, and he gave the greatest satisfaction in each of these districts.

The fair at Kenmore, co. Kerry, on Tuesday was a small one, composed of third class cattle, which met a fair demand. Prices: Yearlings, third class, £3 12s. 6d. to £5 10s.; two-year-olds, third class, £4 5s. to £7; three-year-olds, third class, £5 5s. to £7 10s.; springers, third class, £6 to £8 10s. Young pigs, eight to ten weeks old, sold at from 20s. to 25s. each.

Cockermouth Hiring Fair. — This fair was held on Tuesday, when male servants were numerous, and wages showed a substantial drop. Head men secured £14 to £16 for the half year; ploughmen, £11 to £14; strong lads, £7 to £11; boys, £4 to £7. There was no fall in the wages paid to female servants, women getting £9 to £11; girls, £7 to £9; young girls, £4 10s. to £7, with board and lodgings in all cases.

There was but a small supply of stock at Carndonagh Fair, co. Donegal, held on Wednesday, and the animals were chiefly of third-class condition, for which there was a slow demand. Prices:—Calves, third class, £1 17s. 6d. to £2 15s. Yearlings, second class, £6; third class, £3 15s. to £4 10s. Two-year-olds, second class, £8 10s.; third class, £5 10s. to £7. Three-year-olds, third class, £7 7s. 6d. to £7 15s. Springers, second class, £13; third class, £7 5s. to £10 12s. 6d. Young pigs, eight to ten weeks old, sold at from 11s. to 17s. each

CATTLE.

Farmer Stalks his Highland Cattle.

A well-known Lothians farmer, who is far too busy to be much of a sportsman, has, says a correspondent of the *Glasgow Herald*, had a lot of "big game" thrown upon his hands just now, very much to his disgust. This farmer, who is one of the most extensive land owners and stock owners in the country, had bought some considerable time ago a lot of big Highland bullocks, which he sent to graze on an outlying hill farm in his possession. As the farm in question was well fenced and the pasturage was good, the bullocks had required, and got, very little attention from anyone during the summer months, and had, in fact, been roaming about wild on the rough pasture. Possibly, also, there had originally been among them one or two animals in which the feral nature had been developed in an unusual degree, and these animals by their wildness, had brought out the latent wildness in the other members of the lot. In any case the animals had become very wild, so that when the owner recently went to the farm to have a "round-up" of his stocks in view of Hallow Fair he found the Highlanders more dangerous to come to close quarters with than were the so-called wild white cattle in Cadzow Forest. All efforts to "round-up" the cattle were found to be unavailing. There was nothing for it, therefore, but to shoot the animals, and, accordingly, one day last week the owner invaded the farm at the head of a band of sharpshooters, followed by a complete transport service of waggons, hoisting apparatus, etc. It was no easy matter, however, for the sharpshooters to get within range of the wild cattle, but by adopting the tactics of the deer-stalker and the Boer sniper they managed to "bring down" seven of the Highlanders. The carcases of these seven Highlanders were taken away on the waggons, and the stalking of the other Highlanders on the "kopjes" will afford plenty excitement to the owner and his friends during the next few weeks.

Sale of Herefords near Ross.

Mr. W. H. Addis, of Whitfield Court, Marston, near Ross, Herefordshire, having decided to keep a herd for dairy purposes only, his breeding herd of Herefords was dispersed by auction the week before last by Mr. Walter Pye. The catalogue included forty pedigree Herefords, directly descended from the herds of Messrs. Drinkwater (Bernithon), T. W. Brown (Weir End), W. Stallard, J. Rea, and J. Walters. Cows and heifers were in calf to Dr. Nansen, a sire bred by Colonel Bridgford, C.B., and the yearling heifers were by President 17433. The company was not a large one, but intent on business, and fair prices were realised, the following being the principal ones: —

		Gs.
COWS AND CALVES.		
Lovely 4th and her bull calf	Mr. J. Bennett	16½
Her heifer calf	Mr. Rigg	6½
Brown Eyes	Mr. F. Barling (for Lord Llangattock)	18
Her bull calf	Mr. J. Bennett	15½
Blanche	Mr. T. James	15
Her heifer calf	Mr. J. S. Corbett (for Mr. T. N. Jackson)	8
Lemon Girl and her heifer calf	Mr. John Pearce	24½

Guinea 3rd	Mr. C. Barnes	10
BULLS.		
Dr. Nansen (18793)	Mr. E. Lewis	23
Gatacre	Mr. J. Bennett	14½

Sale of Red Polls at Ipswich.

By no means the least important of the series of red-polled cattle sales held during the autumn by Messrs. Robt. Bond and Sons was conducted at the Drill Hall on Tuesday afternoon, when the firm, acting under instructions from Mr. Alfred J. Smith, of Rendlesham, brought under the hammer sixty animals from the Rendlesham and Eyke herds of pedigree red polls. This number comprised nineteen heifers and their first calves, six cows and their five calves, three young heifers, and six young bulls. Mr. R. B. Bond, who disposed of the sixty lots, observed that all the animals were bred by Mr. Smith, and included eight prize-winners at the London Dairy, Royal, Norfolk, Essex, Suffolk, and other shows, while since June, 1896, animals in Mr. Smith's herds had won as many as sixty-one honours at those shows. He added that the average yield of the Rendlesham herd for milk during the present year had been 7,276lbs. per cow, and as Mr. Smith had kept his herds solely for milking purposes during many years, he had returned none but the deepest milkers to breed from. Around the ring there was a good company of buyers, and the bidding was brisk for all the best animals, some of the heifers and bulls fetching high prices. The general results of the sale were entirely satisfactory, as will be seen from the following list of the principal lots sold. The calves it may be noticed, realised from 2 to 6 guineas.

Messrs. Mansell's Store Stock Sale.

Messrs. Alfred Mansell and Co.'s November sale of store stock took place in Shrewsbury Smithfield on the 14th inst. Some 753 cattle passed over the weighbridge and through the sale ring in less than three and a half hours. The restrictions of the Board of Agriculture having been removed, buyers came from long distances to purchase cattle, which until recently could not be allowed to pass into or even through infected areas to get to home feeding districts. The result was a large gathering of buyers, several of whom had come to this mart for the first time, and some record prices were made for both Irish and English cattle. Trade was not only brisk, but good from start to finish, and throughout the entire sale well-bred cattle suitable to take their places in stalls and strawyards were keenly competed for. The following are some of the prices realised: Polled Angus crosses (bullocks)—£13 17s. 6d., £13 10s., £13 5s., £12 5s., £11 15s., and £11 2s. 6d. Polled Angus crosses (heifers)—£12 10s., £11 10s., £10 10s., and £9 17s. 6d. Shorthorn bullocks—£16, £15 10s., £15 5s., £14 15s., and £14. Shorthorn heifers, one and two year-old—£13 15s., £13 5s., £12 12s. 6d., £11 15s., £10 12s. 6d., £10 10s., and £10. Hereford steers—£12 7s. 6d., £12 5s., £12, £10 17s. 6d., £10 2s. 6d., £10, £9 15s., and £9 12s. Hereford bullocks—£16 10s., £16 5s., £15 7s. 6d., £15 2s. 6d., £14 10s., £14 5s., £13 15s., and £13 5s. Hereford heifers—£9 10s., £9 5s., £9, and £8 12s. 6d. Hereford Barrens—£11 5s., £10 15s., £10 12s. 6d., and £9 15s. Cross-bred yearlings—£8 5s., £7 15s., £7 5s., £7, and £6 15s. Cross-bred barrens—£15 2s. 6d., £14 5s., £13 7s. 6d., and £12 15s. Black Welsh runts—£11 10s., £9 17s. 6d., £8 17s. 6d., £8 5s., £8 2s. 6d., £7 15s., and £7 2s 6d. The sale began with a choice herd of Alderney and Jersey cattle, which made satisfactory prices. These were followed by some very useful cross-bred sheep, which readily sold at prices for wethers 40s. 6d. to 37s. 6d., and for ewes 49s. to 38s. 6d. The prices for cattle ranged from 28s. to 38s. 9d. per cwt., many lots making over 35s. per cwt. Messrs. Mansell will hold their next sale at Shrewsbury on December 7th, when a good lot of cattle will be pitched.

Failing to Report Tuberculosis.

A case of considerable importance to dairy farmers was heard at the Manchester City Police Court on the 16th inst., before Mr. Headlam, stipendiary magistrate, under the new Act of the Manchester Corporation, called the General Powers Act. The corporation summoned George Sutton, farmer, of Brigg House, Haslington, who supplies milk to Manchester, for failing to report to the Medical Officer of Health that he had a cow suffering from tuberculous mili-

This was the first prosecution that had taken place under the Act.

Mr. Bell, solicitor for the prosecution, read Section 19, sub-section 4, of the Act, which provides that every dairyman who supplies milk within the city, and has in his dairy any cow affected with or suspected of, or exhibiting signs of tuberculosis of the udder, shall forthwith give written notice of the fact to the medical officer, stating his name and address, and situation of the dairy or premises where the cow is, and any dairyman failing to give notice shall be liable to a penalty not exceeding 40s. Among the samples of milk analysed in July last was one from the defendant's farm, which was found to be affected with tuberculosis. Mr. Lloyd, veterinary inspector, visited the farm and discovered a cow with a tuberculous udder, which was considerably swollen. Prior to this a circular was sent by the medical officer to all farmers supplying milk to Manchester indicating the symptoms by which tuberculosis might be identified. The object of the Act was to remove the onus of discovering the disease from the inspectors to the farmers, and this was why they were supplied with information.

The defendant, who was represented by Mr. Hocking, pleaded ignorance of the existence of the disease, and the stipendiary imposed a penalty of 10s. and costs.

Transactions in Store Stock.

[From the Irish Department of Agriculture and Technical Instruction.]

Fethard Fair (co. Tipperary), held on Wednesday, was a large one, consisting of first and second class cattle, and a small supply of lambs. A good demand prevailed for cattle in forward condition, but small and thin stock were hard to dispose of, and a considerable number were left unsold. The lambs met a fair demand. Quotations:—Calves, first class, £4 17s. 6d. to £5 10s.; second class, £4 to £4 15s. Yearlings, first class, £8 10s. to £9 15s.; second class, £6 10s. to £3 5s.; third class, £5 10s. to £6. Two-year-olds, first class, £12 5s. to £14 5s.; second class, £9 7s. 6d. to £11 15s.; third class, £7 5s. to £8. Three-year-olds, first class, £14 to £15 10s.; second class, £13 2s. 6d. to £14. Springers, first class, £15 to £16 10s.; second class, £11 10s. to £14. Lambs, first class, £1 5s. to £1 7s.; second class, £1 1s. to £1 4s. Young pigs, eight to ten weeks old, sold at 16s. to 18s. each.

There was a small fair at Pettigo, co. Donegal, on Tuesday, composed chiefly of calves and springers, for which there was good demand. Other stores were rather hard to sell. Prices: Calves, first class, £4 15s. to £6 6s. 8d.; second class, £3 10s. to £4 5s.; third class, £2 6s. 8d. to £3 3s. 9d. Yearlings, second class, £5 15s. to £6 13s. 4d.; third class, £4 15s. to £5. Two-year-olds, second class, £7 12s. 6d. to £8 6s. 8d.; third class, £6 15s. to £7 5s. Springers, first class, £15 5s. to £16 15s.; second class, £11 15s. to £14 10s.; third class, £9 10s. to £10 5s. oung pigs, eight to ten weeks old, sold at from 14s. 6d. to 18s. 9d. each.

NOTE.—The figures for the current Year are approximate only.

NORWICH FAT STOCK SHOW.

Mr. Learner wins the Championship.

The Agricultural Hall at Norwich has once more been well filled with fat stock upon the occasion of the twenty-fourth annual meeting of this Association. The total number of entries of stock equalled most previous shows, though there is somewhat of a shortage of cattle, and in this section, too, the display suffered very considerably in quality by the absence of any entries from the Royal farms at Windsor, the stock from that source probably being held back for the larger meetings of Birmingham and London, so that altogether as regards cattle it cannot be said that the show was at all over the average. In one or two of the classes there was also rather a number of indifferent animals. Notwithstanding all this, there were a great many excellent beasts, evenly fleshed, and thoroughly ripe. The weather on the opening day was quite of a seasonable character, very cold and slight rain, so that the cattle did not suffer from a close atmosphere, which is often the case at Norwich, owing to the unavoidably congested state of the hall.

The Red Polled Classes

take precedence in the catalogue, and these were, upon the whole, about an average lot. The younger class of steers was most numerous, but some of these were not any too forward; nevertheless, good, edible beef. Of the nine entries in this class, Mr. J. E. Platt's steer very readily carried off the coveted red card. He was bred by exhibitor, sired by Caistor Minotaur, in symmetry he is not at all to be complained of, and his touch is right and quality good. His live weight is 12cwt. 2qr. 9lb., at a year and ten months old. Competition was very close, and the referee required to settle matters between the second and third steers exhibited by the Exors. of the late Mr. P. K. Blofield and Mr. A. G. Scorer, both bred by their exhibitors and level steers. The second, however, was decidedly the better beef, though not as taking in breed character, and neither was it quite as heavy as it should be. Steers of this breed over two and not exceeding three years, though only four in number, were better up to the mark, rather suggesting that early maturity is not a prominent property in their breed. Again the red card went to Mr. J. E. Platt for a son of Minotaur, bred by the Exors. of the late Duke of Hamilton, and a well-built, evenly fleshed, and thoroughly ripe steer, weighing 15cwt. 1qr. 4lb., at two years and seven months. The second steer was one of the heaviest beasts in the hall, turning the scales at 19cwt. 1qr. 24lb. He was not, however, as shapely or as good and evenly-fleshed as the winner. This bullock was shown by the Honble. Ailwyn Fellowes, who was also his breeder. The reserve card was allotted to an exhibit of Mr. Harvey Mason's, and a fairly good steer of Mr. R. P. Cooper's was c. The cow or heifer class only contained three entries, nevertheless it was here that the champion of the breed was found in the shape of Mr. B. J. Colman's Barbara 3rd, bred by the late Mr. F. E. Colman, and sired by Lord Nork. Barbara is a sweet heifer of two years and nine months; her moulding and style are beautiful, and her quality excellent, well deserving her high reward. A very good heifer of the Hon. A. E. Fellowes' was placed second, and the reserve accorded to another good-fleshed one from the Sandringham herd of H.R.H. the Duke of York.

Shorthorns

came next, and as might fairly be anticipated in a breed that has for such a long time been hard run for export purposes, the classes were very modest indeed. The three steers constituting the class over two and under three years old were very good and fairly even in point of merit, indeed any one of the three might have been first without any great injustice being done to his neighbours. As it was first honours fell to a steer of Mr. W. C. Turner's, thoroughly well fed, and a good weight for age, being 17cwt. 0qr. 24lb., at two years and seven months. in the matter of symmetry he was, however, not quite as neat as the other two entries, both shown by Miss Alice de Rothschild, and each over 16cwt., square, good-fleshed, and nice quality beasts, showing good breeding; both were bred by Baron F. de Rothschild. Cows or heifers of the breed had but a solitary representative in the shape of a very useful, well-fed heifer of Mr. Robert Mattock's, weighing just upon 14½cwt., her age two years and four months. She was awarded the first prize.

Norwich Fat Stock Show. The Central Avenue.

Other Pure Breeds.

The next class was open to steers of any other breed than Shorthorn and Red Polled not less than two or more than three years old. This brought out a capital collection of beasts of various breeds, five in number. Mr. John Wortley was very powerfully represented in this class with a Hereford and a North Devon, either of which was fit for first honours; indeed, many good judges in the early morning thought the Devon the better beast of the two, and others considered the Hereford a safe first, and a very probable champion of the show. When the class was brought before the judges, however, the Hereford walked and showed himself in such good form, as well as possessing great weight and good flesh, that he made an easy winner, the Devon being placed second. The Hereford was bred by Mr. H. F. Russell and was wonderfully well covered all over his roasting parts, failing only slightly in underline and hiad parts; his weight, 17cwt. 1qr. 19lb., at two years and a half, is exceedingly good too. The Devon is a particularly good bullock in his loin and flesh, and also very satisfactory in his summetry and breed character, but nearly three years old and wanting a little of 14½cwt. is not any too big. He was bred by Mr. A. C. Skinner. The third prize

offered in this class fell to the lot of Mr. Henry Casswell for a rattling good Angus, bred by the Messrs. T. R. and H. Casswell, weighing 16cwt. 3qr. 20lb., at two years and nine months, and shapely, with a fine top of well-finished beef. Another very good bullock of the same breed, shown by Mr. R. W. Hudson, was reserved.

Cross-bred Classes.

The next class was open to steers of both pure and cross-breeds, excluding Red-polls, and not exceeding two years old. There were only three entries in this class as compared with a dozen last year. Miss Alice de Rothschild carried off the leading honour with a very neat, good-backed steer by Cabin Boy, pulling up the beam at just upon 14cwt.; Mr. Fred Casswell came second with a well-shaped and good quality Angus cross; and Mr. G. W. Weston obtained reserve with a good looking and well fed steer of Red-poll and Shorthorn cross. There were seven entries of steers a year older under similar conditions as to breeding as the foregoing class, and some very big, good beasts were included in the number. Miss Alice de Rothschild was awarded the coveted position with an Angus and Shorthorn cross, bred by Baron F. de Rothschild, and a winner in the younger class last year; he has given a pretty good account of his time, is over 18cwt., shapely, very ripe, and good in his quality.

Galloway and Shorthorn crossed were accountable for the breeding of the second-prize beast, an exceedingly good quality one, bred in Scotland, and exhibited by Sir Hugh E. Adair; in weight, however, he is considerably lighter than the winner. A blue grey of similar breeding, shown by Mr. W. Le Neve, and a remarkably good steer in all points, was placed third, with an Augus and Shorthorn cross of Mr. Casswell's reserved. There were three or four very big, good bullocks in the mixed class between three and four years old, Mr. J. W. Rowland taking first honour with a very symmetrical, ripe, and heavy Shorthorn and Polled cross, Mr. W. Le Neve was second with a heavy and very ripe Devon, and Sir Hugh E. Adair reserved with a neatish, pure Galloway.

Cows or heifers in this section were not numerous, only four being entered, but they were certainly amongst the plums of the show, and included Mr. W. C. Learner's very sweet and perfect heifer, Ladysmith, bred by Mr. John Ross, and by the favourite old sire, Ringleader. This heifer looked very small last year in the younger class, if memory serves us rightly, and to-day her weight is the greatest fault to be found, as she cannot quite pull up the beam at 15cwt., and is just upon three years old. In shape she is very symmetrical, her flesh is first rate in quality and very evenly laid on, and she is ripe, and were it not for a little weakness at the setting on of the neck she would be very difficult to pick a hole in, so that she well deserved the first place accorded her. Another heifer, half-sister to the last mentioned, shown by Mr. W. Le Neve, and nearly a couple of hundredweight heavier, was placed second, very ripe and thick fleshed, but scarcely as good in her quality as the winner. The other two entries, reserve and h.c., shown by Mr. A. de Rothschild and Mr. R. M. Mills, were also very good and shapely.

Bred and Fed in Norfolk.

The next three classes were for animals bred and fed in Norfolk, and brought out some exceedingly useful beasts, well fed and also good bred ones. Of the younger steers the best were shown by Mr. Frank Neave, Mr. C. H. Learner, and Mr. W. Le Neve. The older class of steers brought out the heaviest beast in the yard, a Shorthorn bred and fed by Mr. W. Le Neve, very ripe and turning the scales at 19cwt. 2qr. 17lb. H.R.H. the Prince of Wales obtained second honours with a well-shaped steer by Crystal Prince, good in quality and well bred; and Mr. C. C. Chapman was reserve. The three winners in the female class of this section were all Shorthorns and level good specimens, shown by Mr. Gowing, Mr. Dimmock, and Mr. Roe.

Small Cattle.

made a very nice little show, nearly all of them being Dexters. H.R.H. the Prince of Wales took the first honours in the steer class with Patriot, who was also first a year ago; he is now certainly thoroughly ripe, but in other respects he has not much to show for his year's keep. It is, however, satisfactory that he takes the champion prize of the small breeds in addition to his first prize. His weight is 9cwt. 1qr. 11lb. Mr. R. W. Hudson and Mr. Blofield were the other winners in this class, and in the females two beautiful heifers very even in merit were shown by Mr. Hudson and Mr. Thorley and placed as named, the former also taking reserve for the champion of the breed. Mr. R. Tait Robertson and Sir Walter Gilbey were also well represented.

Butchers' Classes.

Irish and butchers' classes were filled with some very weighty and good beasts; the chief winners were Messrs. W. and C. Le Neve and Mr. Cubitt.

The contest for

The Championship of the Show

lay between Mr. Learner's heifer and Mr. Wortly's Hereford steer, which were eventually placed in the order named for the championship and reserve, each of them also taking the champion prize as best of their respective sex.

Below will be found our usual table, showing the average daily gain of the prize animals:—

Breed and Owner.	Age.	Weight.	Average Daily Gain.
	Days.	lbs.	lbs.
RED-POLLED. (Steers under 2 years old.)			
1. Mr. J. E. Platt	668	1409	2·10
2. Exors. of Mr. P. K. Blofield	698	1245	1·79
3. Mr. A. G. Scorer	663	1129	1·70
(Steers over 2 and under 3 years.)			
1. Mr. J. E. Platt	949	1712	1·80
2. Hon. Ailwyn Fellowes, M.P. (Rover)	1033	2190	2·12
(Cow or heifer under 4 years.)			
1. Mr. R. J. Colman (Barbara III.)	1017	1472	1·54
2. Hon. Ailwyn Fellowes, M.P. (Aden)	682	1319	1·93
3. H.R.H. the Duke of York	1067	1423	1.33
SHORTHORNS. (Steers over 2 and under 3 years.)			
1. Mr. W. E. Learner	942	1928	2·04
2. Miss Alice de Rothschild (Juryman)	888	1837	2·06
(Cow or heifer under 4 years.)			
1. Mr. R. Mattocks (Heather Belle)	872	1617	1·85
STEERS OF ANY PURE BREED OTHER THAN SHORTHORN AND RED POLLED. (Over 2 and under 3 years.)			
1. Mr. J. Wortley (Hereford, Lord Roberts)	920	1951	2·10
2. Mr. J. Wortley (Devon, Baden-Powell)	1063	1619	1·52
3. Mr. H. Casswell (Aberdeen-Angus, Quadring Pride)	1024	1896	1·85
STEERS OF ANY BREED, EXCLUDING RED POLLED. (Under 2 years old.)			
1. Miss Alice de Rothschild (Shorthorn, Flower Boy)	698	1560	2·23
2. Mr. F. Casswell (Crossbred Poll Angus, Dunsby Fashion)	658	1482	2·25
CROSS OR MIXED BRED STEER. (Over 2 and under 3 years.)			
1. Miss Alice de Rothschild (St. Brieux)	1070	2040	1·90
2. Sir H. E. Adair, Bart.	972	1823	1·87
3. Mr. W. Le Neve (Blue Boy)	1054	1949	1·84
OX OF ANY BREED. (Over 3 and under 4 years.)			
1. Mr. J. W. Rowland (Crossbred, The Boss)	1328	2021	1·52
2. Mr. W. Le Neve (Devon, Handy Man)	1125	1904	1·69
COW OR HEIFER OF ANY BREED OTHER THAN SHORTHORN AND RED POLLED. (Under 4 years.)			
1. Mr. W. E. Learner (Crossbred, Ladysmith)	972	1662	1·70
2. Mr. W. Le Neve (Crossbred, Mayflower)	1039	1876	1·80
STEER OF ANY BREED, EXCLUDING RED POLLED. (Under 2 years.)			
1. Mr. F. Neave (Shorthorn, Shortlegs)	546	1323	2·43
2. Mr. C. H. Learner (Crossbred, Billy)	637	1432	2·24
3. Mr. W. Le Neve (Crossbred, Coleby)	516	1423	2·75
STEER OF ANY BREED, BRED AND FED IN NORFOLK. (Under 3 years.)			
1. Mr. W. Le Neve (Shorthorn, Masterpiece XI.)	1063	2211	2.07
2. H.R.H. Prince of Wales (Shorthorn)	926	1792	1·93
COW OR HEIFER OF ANY BREED, BRED AND FED IN NORFOLK. (Under 4 years.)			
1. Mr. E. S. Gowing (Shorthorn, Star)	851	1459	1·71
2. Mr. J. B. Dimmock (Shorthorn)	1003	1565	1·56
3. Mr. G. W. Roe (Shorthorn, Lady Lovely)	668	1543	2·30
SMALL CATTLE. (Steers over 18 months and under 3 years.)			
1. H.R.H. the Prince of Wales (Patriot)	1047	1040	0·99
2. Mr. R. W. Hudson (Duke of York)	551	882	1·60
(Heifer over 18 months and under 3 years.)			
1. Mr. R. W. Hudson (Duchess of York)	551	885	1·60
2. Mr. J. Thorley (Ringdale Success)	872	904	1·03
3. Mr. Tait Robertson (La Mancha Norma)	926	893	0·96
IRISH CATTLE. (Ox or Steer under 3 years.)			
1. Mr. W. Le Neve (Shamrock)	1033	1985	1·92
2. Mr. C. Le Neve	—	1851	—
(Ox or Steer over 3 years.)			
1. Mr. W. Le Neve (Gamecock)	1155	1842	1·54

3. Mr. G. W. Weston	—	1816	—

Sheep.

The entries of this section were very good, and the quality must be highly spoken of in practically every instance. Southdowns were the strongest classes by far, and succeeded in taking both the champion prizes for sheep and lambs, these honours falling to Colonel H. McCalmont; H.R.H. the Prince of Wales, Mrs. Montefiore, the Earl of Ellesmere, and Mr. Courtauld were also successful exhibitors. The lamb class was especially good, the best pen scaling 4cwt. 0qrs. 22lbs. Suffolks were all in the hands of Colonel McCalmont, the Earl of Ellesmere, and Major Baird, who divided the honours. The best pen of lambs was Colonel McCalmont's, weighing 5cwt. 1qr. 4lbs. Mr. Rush and Mr. Matthews exhibited some famous crosses (Hampshire and Oxford), the former winning for wethers and the latter for lambs, weight 5cwt. 3qrs. 24lbs.

Below we give our usual table showing the average daily gain of the prize animals:—

Breed and Owner.	Age.	Weight.	Average Daily Gain.
	Days.	lbs.	lbs.
SOUTHDOWNS. (Wethers under 23 months old.)			
1. Col. H. McCalmont, M.P.	668	705	1·05
2. H.R.H. the Prince of Wales	637	588	0·92
LAMBS.			
1. Col. H. McCalmont, M.P.	289	461	1·64
2. Mrs. Montefiore	294	424	1·44
SUFFOLKS. (Wethers under 23 months.)			
1. Earl of Ellesmere	—	892	—
2. Major E. W. Baird	668	854	1·27
LONG WOOLLED OR CROSSBREDS. (Wethers under 23 months.)			
1. Mr. T. Rush (crossbred)	637	896	1·40
2. Mr. F. J. Matthews (crossbred)	637	876	1·37
3. F. J. Matthews (crossbred)	637	859	1·34
CROSSBRED LAMBS.			
1. Mr. F. J. Matthews	294	695	2·36
2. Mr. T. Rush	280	648	2·31
SHORT-WOOLLED OTHER THAN SOUTHDOWNS. (Ewes over 3 years.)			
1. Major E. W. Baird (Suffolks.)	1,368	873	0·63
LAMBS.			
1. Col. H. McCalmont, M.P. (Suffolks.)	287	592	2·06
2. Earl of Ellesmere (Suffolks.)	—	543	—

Pigs.

These classes were very good in quality and generally well filled. The Berkshire class contained three entries, Mr. Mitchell and H.R.H. the Duke of York taking the money as named. Tamworths also mustered three entries from Lord Hastings, and Mr. Garrett Taylor; again the honours went in the order named. These pens were exceptionally good. The remaining class was for pigs of other breeds, in which the prizes went to two exceedingly nice pens of Large Whites shown by Mr. W. Mitchell. The champion prize for best pen of pigs was accorded to Lord Hastings' Tamworths, and the reserve to Mr. Garrett Taylor's, of the same breed.

Below we give a table showing the average daily gain of the prize animals:—

Breed and Owner.	Age.	Weight.	Average Daily Gain.
BERKSHIRES. (Over 6 and under 12 months.)			
1. Mr. W. Mitchell	353	1102	3·12
2. H.R.H. the Duke of York	351	1140	3·21
TAMWORTHS. (Over 6 and under 12 months.)			
1. Rt. Hon. Lord Hastings	324	1242	3·83
2. Mr. Garret Taylor	303	1109	3·66
OTHER THAN BERKSHIRE OR TAMWORTH. (Over 6 and under 12 months.)			
1. Mr. W. Mitchell (Large White)	352	1317	3·74
2. Mr. W. Mitchell (Large White)	352	1227	3·48

Roots and Grain.

There were a good lot of roots, and though often somewhat ugly in shape they cut up well. The mangolds were a good collection, though there was only one entry in the class for six long mangolds drawn from a field of not less than five acres, that of Mr. W. Mitchell, of Kirby Bedon, who took first prize. In the next class, for six Globe Tankard or Intermediate mangolds, drawn from a field of not less than five acres, there was a much fuller entry and a very good show, Mr. A. J. Cubitt taking first prize. There were seven entries in the class for swede turnips, some of them being very good indeed, Mr. W. Case, of Tuttington, Aylsham, being first prize-winner.

The wheat was a nice sample for the season, though not so good as in some years, the season not having been too favourable for Norfolk wheat. Barley was of fair quality, Mr. W. Mitchell, who took first and second prizes, being a long way ahead of the other exhibitors. Generally speaking, the Suffolk barleys were superior. Oats were very poor, as the weather was most unpropitious for their harvest. Black oats, on the other hand, were very good, since they stand the weather much better than the white. Mr. F. S. Youngman took the first prize with a very fine sample.

Poultry, Butter, etc.

The poultry classes were better than usual. Three of the four prizes for turkeys fell to Mr. H. Fulcher, of Finningham, who had the satisfaction of beating such prominent exhibitors and rearers of poultry as Messrs. Abbot Bros. In the three classes set apart for ducks, fowls, and game fowls, the well-known firm of Messrs. Abbot Bros. figured prominently, taking all the first prizes, in addition to a second for game fowls. The dressed poultry classes enabled Messrs. Abbot Bros. to add largely to their list of honours. Although unable to secure any award with their three exhibits in the class for geese, the first in which was taken by Mr. Garret Taylor, Messrs. Abbot Bros. received second and third prizes for ducks.

The best sample of butter, the produce of Channel Island cows, was shown by Mr. J. Colman, Mr. Garrett Taylor receiving both the first and second

ALL farm live stock should be given "MOLASSINE" It is an excellent food and condiment combined. See advertisement on back page of this issue.—[ADVT.]

wards from that produced from cows not of the Channel Islands breed. Against him were eleven other competitors, but Mr. J. L. King, of Swardeston, who was showing the best pound of fresh butter entirely the produce of cows not of the Channel Islands breed, had opposition from only three opponents. There were only three entries for ornamental butter, for which Mr. Garrett Taylor was able to claim the first award.

The entries for preserved butter and cheese were not numerous, but the samples were exceedingly creditable, the first prize specimens being in the names of Mr. Garrett Taylor and Sir E. Birkbeck, Bart., Horstead Hall, respectively.

Messrs. Abbot Bros. took both first and second prize awards for hens' eggs. Mr. Garrett Taylor and Mr. J. L. King, of Swardeston, respectively, secured those for preserved eggs.

The competition between the pupils of the Technical Instruction Committee of the Norfolk County Council, conducted under the auspices of the Eastern Counties' Dairy Institute, was particularly keen, there being an entry of twenty-two in the fresh butter classes. The exhibits were above the average, and, with one or two exceptions, the butter appeared to be all that could be desired. It was quite clear, as the result of Thursday's exhibition, that the old objections to Norfolk butter must now disappear, and if only sufficient butter of the quality produced at the show can be obtained in the future there would be no necessity for going further afield. There was only one exhibitor of cheese, Miss Edith Goodchild taking first prize.

Judges.

CATTLE: Messrs. F. W. Shuker, Scorrier, Cornwall, and Mr. T. B. Freshney, South Somercotes, Louth, Lincs; Umpire, Mr. W. Newton.

BUTCHERS' PRIZES (cattle and pigs): Messrs. W. Beer, Capel St. Mary, Ipswich; and W. W. Woolsey, St. Faith's; Umpire, Mr. J. W. Dawson, Aylsham Road.

SHEEP: Messrs. T. B. Stimpson, Bixley; and Mr. Robert Anderson, Cirencester; Umpire, Mr. T. B. Freshney.

ROOTS, GRAIN, AND COTTAGERS' EXHIBITS: Messrs. Clare Sewell Read, Kensington Gardens Square, London; and Mr. W. Case, Tuttington.

DEAD POULTRY: Messrs. B. Stimpson, Bixley; and Mr. F. T. Miller, Norwich.

BUTTER, CHEESE, AND EGGS: Mr. Thomas Latham, Dorchester, Oxon.

Champion and Special Prizes.

CATTLE.

Patron's prize for the best beast in the show, the winner of which will receive such a sum in addition to the class prize and champion prizes, so that the total winnings of the same shall equal £100 sterling, with £1 to the herdsman: Mr. Westmore Edwin Learner, Dilham, Norfolk (cross-bred, Ladysmith); r, Mr. John Wortley, Frettenham, Norwich (Hereford steer, Lord Roberts).

The President's prize of the value of £20, for the best ox or steer in the show: Mr. John Wortley, Frettenham, Norwich (Hereford steer, Lord Roberts); r, Mr. W. E. Learner.

A prize for the best cow or heifer in the show: Mr. W. E. Learner (cross-bred, Ladysmith); r, Mr. William Le Neve, Tunstead (cross-bred, Mayflower).

The members' prize for the best Red Polled beast in the show: Mr. R. J. Colman, Bracondale Woods, Norwich (Barbara III.); r, Mr. J. E. Platt, Howbury Hall, Bedford.

A prize for the best beast in the show, bred and fed in Norfolk: Mr. R. Mattocks, The Green, Burlingham (Heather Bell, Shorthorn); r, Mr. E. S. Gowing, Church Farm, Great Malton (Shorthorn, Star).

A special prize for the best animal in the small cattle classes 14 and 15: H.R.H. The Prince of Wales, K.G., Sandringham, Norfolk (small cattle, Patriot); r, Mr. J. B. Dimmock, Shotford Hall (Shorthorn).

A special prize for the best fat animal, grazed by a bona-fide tenant farmer, resident in the county of Norfolk, exhibited in any of the Society's cattle classes: Mr. W. E. Learner (cross-bred, Ladysmith); r, Mr. W. E. Learner.

A special prize for the second best fat animal, grazed by a bona-fide tenant farmer, resident in the county of Norfolk, exhibited in any of the Society's cattle classes: Mr. W. Le Neve (cross-bred, Mayflower); r, Mr. W. Le Neve (Irish, Game Cock).

SHEEP.

The champion prize for the best pen of sheep in the show, the winner of which shall receive such a sum in addition to the class prize and other champion prizes, so that the total winnings of the same shall equal £15: Colonel Henry McCalmont, M.P., Cheveley Park, Newmarket; r, Colonel Henry McCalmont, M.P.

A special prize for the best pen of lambs in the show: Colonel Henry McCalmont, M.P.; Mr. F. J. Matthews, Bircham Newton, Lynn.

A special prize for the best pen of shearling wethers or ewes in the show: Colonel Henry McCalmont, M.P.; Earl of Ellesmere, Stetchworth Park, Newmarket.

A special prize for the best pen of sheep in the show, exhibited by a Norfolk tenant farmer (whose income is mainly derived from the cultivation of the land), exhibited in any of the Society's sheep classes: Mr. F. J. Matthews, Lynn; r, Mr. F. J. Matthews.

PIGS.

A champion prize for the best pen of pigs in the show: The Right Hon. Lord Hastings, Melton Constable; r, Mr. Garrett Taylor, Trowse House, Norwich.

Prize List.

CATTLE.

Class 1.—Steer of the Red Polled breed, not exceeding two years old: 1, Mr. James E. Platt, Howbury Hall, Bedford; 2, Mr. P. K. Blofield (Exors. of), "Quidenham, Attleborough; 3, Mr. Alfred George Scorer, Flaxmoor, Caston, Attleboro'; r, H.R.H. The Duke of York, K.G., Sandringham; hc, Mr Alfred George Scorer; Mr. James E. Platt.

Class 2.—Steer of the Red Polled breed, not less than two years and not exceeding three years old: 1, Mr. James E. Platt; 2, Hon. Ailwyn Fellowes, M.P., Honingham Hall, Norfolk (Rover); r, Mr. R. Harvey Mason, Necton Hall, Swaffham; c, Mr. Richard P. Cooper, Ashlyns Hall, Berkhamsted, Herts.

Class 3.—Cow of the Red Polled breed, that has produced at least one live calf, or heifer of the Red Polled breed, not exceeding four years old: 1, Mr. Russell J. Colman, Bracondale Woods, Norwich (Barbara III.); 2, Hon. Ailwyn E. Fellowes, M.P. (Adena); 3, H.R.H. The Duke of York, K.G.

Class 4.—Steer of the Shorthorn breed, not less than two years and not exceeding three years old: 1, Mr. W. E. Learner, Dilham, Norfolk; 2 and r, Miss Alice de Rothschild, Waddesdon Manor, Aylesbury (Sultan).

Class 5.—Cow of the Shorthorn breed, that has produced at least one live calf, or heifer of the Shorthorn breed not exceeding four years old: 1, Mr. Robert Mattocks, The Green, Burlingham (Heather Bell).

W. Hudson, Danesfield, Great Marlow, Bucks (Danesfield Lad II.).

Class 7.—Steer of any breed (including cross or mixed breed, but excluding Red Polled), not exceeding two years old: 1, Miss Alice de Rothschild (Shorthorn, Flower Boy); 2, Mr. Fred Casswell, Dunsby, Spalding (cross-bred Poll Angus, Dunsby Fashion); r, Mr. G. W. Weston, Hemblington (cross-bred Red Polled).

Class 8.—Cross or mixed bred steer, not less than two years and not exceeding three years old: 1, Miss Alice de Rothschild (cross-bred, St. Brieux); 2, Sir Hugh E. Adair, Bart., Flixton Hall, Bungay (cros between Galloway and Shorthorn); 3, Mr. William Le Neve, Tunstead (cross-bred, Blue Boy); r, Mr. Henry Casswell (cross-bred Poll Angus and Shorthorn, Quadring Prime).

Class 9.—Ox of any breed (including cross and mixed), not less than three years and not exceeding four years old, and excluding those eligible for Classes 14 and 15: 1, Mr. John W. Rowland, Fishtoft, Boston, Lincs (cross-bred, The Boss); 2, Mr. William Le Neve (Devon, Handy Man); r, Sir Hugh E. Adair, Bart., Flixton Hall, Bungay (Galloway).

Class 10.—Cow of any breed other than Shorthorn and Red Polled (including cross and mixed), that has produced at least one live calf, or heifer of any breed not exceeding four years old: 1, Mr. W. E. Learner (cross-bred, Ladysmith); 2, Mr. William Le Neve (cross-bred, Mayflower); r, Miss Alice de Rothschild (cross-bred heifer, St. Bryde); hc, Mr. R. M. Mills, Bourne (cross-bred).

Class 11.—Steer of any breed (excluding Red Polled), bred and fed in Norfolk, not exceeding two years old: 1, Mr. Frank Neave, Lingwood (Shorthorn, Shortlegs); 2, Mr. Charles H. Learner (cross-bred, Billy); 3, Mr. William Le Neve (cross-bred, Coleby); r, Mr. Frank Neave (Shorthorn, Johnny).

Class 12.—Steer of any breed, bred and fed in Norfolk, not less than two years and not exceeding three years old: 1, Mr. William Neve (Shorthorn, Masterpiece XI.); 2, H.R.H. The Prince of Wales, K.G., Sandringham (Shorthorn); r, Mr. E. C. Chapman, Stud Farm, Alethorpe, Fakenham, Norfolk (Shorthorn, Alethorpe Model).

Class 13.—Cow of any breed, bred and fed in Norfolk, that has produced at least one live calf, or heifer of any breed, bred and fed in Norfolk, not exceeding four years old: 1, Mr. Edward S. Gowing, Church Farm, Great Melton (Shorthorn, Star); 2, Mr. J. B. Dimmock, Shotford Hall (Shorthorn); 3, Mr. George W. Roe, Uphall, Garboldisham (Shorthorn, Lady Lovely); r, Mr. William Le Neve (cross-bred, Princess).

SMALL CATTLE.

Class 14.—Steer, not less than eighteen months and not exceeding three years old, nor exceeding 10cwt. live weight: 1, H.R.H. The Prince of Wales, K.G. (small cattle, Patriot); 2, Mr. R. W. Hudson (small cattle, Duke of York); r, Mr. P. K. Blofield (Dexter, Snowball).

Class 15.—Heifer, not less than eighteen months and not exceeding three years old, nor exceeding 9cwt. live weight: 1, Mr. R. W. Hudson (small cattle, Duchess of York); 2, Mr. J. Thorley, Faringdon, Berks (cross-bred, Ringdale Success); 3, Mr. R. Tait Robertson, Babraham, Cambridge (cross-bred, La Mancha Norma); r, Sir Walter Gilbey, Bart., Elsenham Hall, Essex (Dexter, Dexter Miss).

IRISH CATTLE.

Class 16.—Irish bred ox or steer not exceeding three years old: 1, Mr. William Le Neve (Irish, Shamrock); 2, Mr. Charles Le Neave, East Ruston, Stalham (Irish); r, Mr. William Le Neve (Irish).

Class 17.—Irish bred ox or steer over three years old: 1, Mr. William Le Neve (Irish, Game Cock); 2, Mr. Charles Le Neave (Irish); 3, Mr. G. W. Weston, Hemblington (Irish Shorthorn); r, Mr. Herbert Barcham, Knapton, North Walsham.

BUTCHERS' PRIZES.

(The gift of the Norwich and District Butchers' Association.)

Class 18.—For the best butcher's beast of any breed or age, grazed in Norfolk, which has been the property of the exhibitor for not less than six months: 1, Mr. Algernon J. Cubitt, Sisley Old Hall, Norwich (Irish); 2, Mr. William Le Neve (cross-bred, Faultless); r, Mr. William Le Neve (cross-bred, Paston); hc, Mr. William Charlish, Tharston, Long Stratton (home-bred steer); c, Mr. William Wright, Carleton St. Peter, Norwich (breed unknown).

SHEEP.

Class 19.—Pen of three Southdown wethers, under twenty-three months old: 1, Col. Harry McCalmont, M.P., Cheveley Park, Newmarket; 2, H.R.H. The Prince of Wales, K.G.; r, Mr. George Courtauld, Cut Hedge, Halstead, Essex; c, Mr. Jeremiah Colman, Gatton Park, Surrey.

Class 20.—Pen of three Suffolk Black-faced wethers, under twenty-three months old: 1, Earl of Ellesmere, Stetchworth Park Newmarket; r, Col. Harry McCalmont, M.P., and Major E. W. Baird, Exning House, Newmarket.

Class 21.—Pen of three Long-woolled or cross-bred wethers, under twenty-three months old: 1, Mr. Thomas Rush, Mitchells, Saffron Walden (cross-bred); 2, Mr. F. J. Matthews, Bircham Newton, Lynn (cross-bred); 3, Mr. F. J. Matthews (cross-bred).

Class 22.—Pen of three Short-woolled ewes, not under three years old: 1, Major E. W. Baird (Suffolk).

Class 23.—Pen of three Southdown lambs, lambed in the year 1900: 1, Col. Harry McCalmont, M.P.; 2, Mrs. Montefiore, Worth Park, Crawley, Sussex; r, Mrs. Montefiore; hc, Earl of Ellesmere; c, Mr. George Courtauld; Mr Jeremiah Colman, Gatton Park, Surrey.

Class 24.—Pen of three Short-woolled lambs, other than Southdown, lambed in the year 1900: 1, Col. Harry McCalmont, M.P. (Suffolk); 2, Earl of Ellesmere (Suffolk); r, Mr. Thomas Rush, Mitchells, Saffron Walden (Hampshire Down); c, Major E. W. Baird (Suffolk).

Class 25.—Pen of three cross-bred lambs, lambed in the year 1900: 1, Mr. Fred. J. Matthews (Oxford Down ram, Hampshire Down ewe); 2, Mr. Thomas Rush (Oxford ram; Hampshire ewe); r, Mr. Thomas Rush (Oxford ram; Hampshire ewe); hc, Mr. W. H. Hall (Southdown and Suffolk, first-cross); c, Mr Fred J. Matthews (Oxford Down ram; Hampshire Down ewe); Mr. W. H. Hall, Six Mile Bottom, Cambs (Oxford and Suffolk, first-cross).

SWINE.

Class 26.—Pen of three Berkshire pigs, not less than six months and not exceeding twelve months old: 1, Mr. W. Mitchell, The Vale, Kirby Bedon, near Norwich; 2, H.R.H. The Duke of York, K.G.; r, Mr. William Le Neve.

Class 27.—Pen of three Tamworth pigs, not less than six months and not exceeding twelve months old: 1, The Right Hon. Lord Hastings, Melton Constable; 2, Mr. Garrett Taylor, Trowse House, Norwich.

Class 28.—Pen of three pigs other than Berkshire or Tamworth, not less than six months and not exceeding twelve months old: 1 and 2, Mr. W. Mitchell (Large White); r, and hc, Mr. Solomon Marshall, Flordon, Norwich (cross-bred); c, Mr. Garrett Taylor (cross-bred).

ROOTS, GRAIN, ETC.

Class 29.—Six long mangels, drawn from a field of not less than five acres: 1, Mr. W. Mitchell.

Class 30.—Six Globe Tankard, or Intermediate mangels, drawn from a field of not less than five acres: 1, Mr. Algernon J. Cubitt, Sisley Old Hall, Norwich; 2, Mr. S. Smith, Thorne; 3, Mr. Garrett Taylor.

Class 31.—Six swede turnips, drawn from a field of not less than five acres: 1, Mr. William Case, Tuttington, Aylsham; 2, Mr. Algernon J. Cubitt; r, Mr. William Le Neve; c, Major White, Saxlingham, Holt.

Class 32.—One bushel of red wheat, a sample from not less than 15qrs.: 1, Mr. W. Mitchell; 2, Mr. Garrett Taylor.

Class 33.—One bushel of barley, a sample from not less than 15qrs.: 1, and 2, Mr. W. Mitchell; r, Mr. J. B. Dimmock.

Class 34.—One bushel of white oats, a sample from not less than 15qrs.: 1, The Right Hon. Lord Hastings.

Class 35.—One bushel of black oats, a sample from not less than 15qrs.: 1, Mr. F. S. Youngman, Wilby, Attleboro'; 2, Mr. G. W. Weston, Hemblington.

POULTRY.

UNDRESSED POULTRY.

Class 36.—Cock turkey: 1 and 2, Mr. H. Fulcher, Finningham, Suffolk; r, Mr. Garrett Taylor; hc, Mr. B. B. Sapwell, Aylsham, Norfolk; c, Messrs. Abbot Bros., Thuxton, Norfolk.

Class 37.—Hen turkey: 1, Mr. J. Pyke, 60, Prince of Wales' Road, Norwich; 2, Mr. H. Fulcher; r, Messrs. Abbot Bros.; hc, Messrs. Abbot Bros.; c, Mr. H. Fulcher.

Class 38.—Goose: 1, Mr. Garrett Taylor; 2, Mr. J. Pyke; r, Mr. William Wright, Hall Farm, Carleton St. Peter, Norwich; c Messrs. Abbot Bros. (twice).

Class 39.—Two ducks: 1 and c, Messrs. Abbot Bros.; 2, Mr. J. Pyke; r, Mr. H. Fulcher.

Class 40.—Two fowls: 1 and r, Messrs. Abbot Bros.; 2, Mr Charles Edward Brooke, The Manor, Baynards, near Horsham; c, Mr. Garrett Taylor (twice).

Class 41.—Two Game fowls: 1 and 2, Messrs. Abbot Bros.; r, Mr. Charles Edward Brooke.

DRESSED POULTRY.

Class 42.—Goose: 1, Mr. Garrett Taylor; 2, Mr. J. Pyke; 3, Mr. William Wright; r, Messrs. Abbot Bros.

Class 43.—Two ducks: 1, Mr. J. Pyke; 2 and 3, Messrs. Abbot Bros.; r, Mr. Garrett Taylor; c, Mr. R. J. Colman, Bracondale Woods, Norwich.

Class 44.—Two fowls: 1, Mr. Garrett Taylor; 2, Messrs. Abbot Bros.; 3, Mr. R. J. Colman; r, Mr. Garret Taylor; c, Messrs. Abbot Bros.; Mr. Charles Edward Brooke.

Class 45.—Two Game fowls: 1 and 2, Messrs. Abbot Bros.; 3, Mr Garrett Taylor; r, Mr. Charles Edward Brooke.

BUTTER, CHEESE, EGGS, ETC.

Class 46.—One pound of fresh butter, entirely the produce of Channel Island cows, absolutely free from salt: 1, Mr. R. J. Colman; 2, Messrs. Abbot Bros.; r, Sir Edward Birkbeck, Bart., Horstead Hall, Norwich.

Class 47.—One pound of fresh butter, entirely the produce of cows not of the Channel Island breed, absolutely free from salt: 1 and 2, Mr. Garrett Taylor; r, Mr. E. De Pix, Broome Place, Bungay, Norfolk.

Class 48.—One pound of fresh butter, slightly salted, entirely the produce of cows not of the Channel Island breed, the property of bona-fide tenant farmers, farming under 100 acres: 1, Mr. J. L. King, Swardeston, Norwich; 2, Mrs. E. E. Munnings, Mendham.

Class 49.—Butter ornamentally prepared for the table: 1, Mr. Garrett Taylor; 2, Messrs. Abbot Bros.

Class 50.—Pot of not less than 10lbs. of preserved butter: 1, Mr. Garrett Taylor; 2, Messrs. Abbot Bros.; r, Mr. J. L. King, Swardeston, Norwich.

Class 51.—Norfolk and Suffolk made cream cheese: 1, Sir Edward Birkbeck; 2, Mr. Alfred George Scorer, Flaxmoor, Caston, Attleboro'; r, Mr. Garrett Taylor; c, The Right Hon. Lord Hastings; Mr. R. J. Colman.

Class 52.—Dozen hen's eggs for table use (double-yolked eggs will disqualify the exhibit): 1 and 2, Messrs. Abbot Bros.; r, Mr. H. Fulcher; hc and c, Mr. J. L. King.

Class 53.—Twelve preserved eggs: 1, Mr. Garrett Taylor, Whitlingham Farm Dairy, Norwich; 2, Messrs. Abbot Bros.; r, Mr. J. L. King.

Class 54.—Home-made bread (a loaf of about 2lbs.): 1, Mrs. J. L. King; 2, Mrs. Mitchell; r, Mr. H. Fulcher.

TECHNICAL EDUCATION PRIZES.

PRIZES, offered by the Technical Education Committee of the Norfolk County Council, for students who have regularly attended a Dairy class held in the county:—

Class 55.—Two pounds of fresh butter: 1, Miss Ethel Smith, Pulham Market; 2, Mrs. Emma Williams, Shelfanger, Diss, Norfolk; 3, Miss Ethel May Bird, East Tuddenham.

Class 57.—Best Cheddar cheese: 1, Miss Edith Goodchild, Byland Hall, Bressingham, Diss.

SEEDSMEN'S PRIZES.

PRIZES offered by various firms for competition at the Association Show:—

Class 74.—Six roots, Norfolk Giant Purple-top swede: 1, Mr. T. S. Stroyan, Rockland St. Mary, Norwich; 2, Mr. W. Case, The Hall, Tuttingham, Aylsham; 3, Mr. J. W. Colchester, Gissing, Diss; hc, Mr. J. Palmer, Stokesby, Great Yarmouth; c, Mr. James Bell, Hickling, Norfolk; Mr. B. E. Fletcher, Marlingford Hall, Norwich; Mr. W. P. Smith, Wicklewood, Wymondham.

Class 75.—Six roots, Improved Purple-top swede: 1, Mr. F. T. Learner; 2, Mr. R. F. Yallop, Brooke, Norwich; 3, Mr. F. G. Sculfer; hc, Mr. J. R. Davey, Barnham Broom, Wymondham; c, Mr. W. P. Smith, Wicklewood, Wyondham.

Class 76.—Six roots, Daniels' Norfolk Gate-post mangel: 1, Mr. R. Pilgrim, Kirby Cane, Bungay; 2, Mr. A. Stimpson, Arminghall, Norwich; 3, Mr. B. Stimpson, Park Farm, Bixley, Norwich; r, Mr. J. Palmer, Stokesby, Great Yarmouth; hc, Mr. G. R. Bagshaw, Blofield, Norwich; c, Mr. J. W. Colchester.

Class 77.—Six roots, Orange Globe mangel: 1, Mr. T. S. Stroyan; 2, Mr. W. S. Horn, East Ruston Grange, Stalham; 3, Mr. J. Watts, Spooner Row, Wymondham; hc, Mr. W. Rushbrook, High Street, Sutton, Ely; c, Mr. G. H. Dyball; J. Palmer.

Class 78.—Six roots, Daniels' Golden Tankard mangel: 1, Mr. C. Hart, Aslacton Grange, Long Stratton; 2, Mr. W. S. Horn; 3, Mr. W. Aldous, Wortwell Hall, Harleston; hc, Mr M. Birkbeck; c, Mr W. Barber.

Class 79.—Six roots, Green Round or White turnip: 1, Mr. B. E. Fletcher, Marlingford Hall, Norwich; 2, Mr. W. F. Learner; 3, Mr. J. R. Davey, Barnham Broom, Wymondham; hc, Mr. C. Hart, Aslacton Grange, Long Stratton.

Class 80.—Six roots, field carrot, Daniels' Yellow Intermediate: 1, Mr. W. Barber; 2, Mr. B. Stimpson, Park Farm, Bixley, Norwich; 3, Mr. A. Stimpson; hc, Mr. M. Birkbeck, Postwick, Norwich; c, Mr. J. Woods, White House, Belton.

Class 81.—Three of Daniels' Field cabbages: 1, Mr. J. Palmer; 2, Mr. M. Birkbeck; 3, Mr. W. Rushbrook.

Class 82.—Six bulbs of Mr. G. Townsend's Golden Tankard mangel: 1, Mr. Garrett Taylor; 2, Messrs. Sewell and Barnes, Wingfield; r, Mr. S. Nightingale, Thurne.

Class 83.—Six bulbs of Mr. G. Townsend's Globe mangel: 1, Mr. S. Nightingale; 2, Mr. W. Mickleburgh; r, Mr. W. Hamond, Pensthorpe; hc, Mr. T. Rising.

Class 84.—Six bulbs of Mr. G. Townsend's Orange-post Yellow Intermediate mangel: 1, Mr. S. Nightingale; 2, Mr. S. Wright, Acle; r, Mr. G. Weston, Hemblington.

Class 85.—Six bulbs of Mr. G. Townsend's Defiance or Monarch swede: 1, Mr. R. Harris, Sculthorpe; 2, Mr. T. Rising; r, Mr. F. Neave; hc, Mr. W. Hamond.

Class 86.—Six bulbs of G. Townsend's Green Globe, White Globe, or Purple-top Mammoth: 1, Mr. T. Rising; r, Mr. F. Neave.

Class 87.—Six bulbs of Mr. G. Townsend's Gold Ball: 1,

Mr. John Dawson, Reedham; 2, Mr. R. King, Stoke Holy Cross; r, Mr. W. Hamond.

Class 88.—Nine specimens of Webbs' swede (any one variety), drawn from a crop of not less than three acres: 1, Mr. William Le Neve; r, Mr. S. Smith; r, Sir Harry Bullard, M.P.

Class 89.—Nine specimens of Webbs' mangel (any one variety), drawn from a crop of not less than three acres: 1, Mr. Garrett Taylor; 2, Mr. William Le Neve; r, Mr. S. Smith.

Class 90.—Six roots of mangel, any of Carters' prize varieties: 1, Mr. Garrett Taylor; 2, Mr. S. Smith.

Class 91.—Nine roots of swede, any of Carters' prize varieties: 1, The Right Hon. Lord Hastings; 2, Mr. Frederick T. Womack, Ovington; r, Mr. S. Smith.

Class 92.—Nine specimens of any one variety of Suttons' Improved varieties of mangel: 1, Mr. William Le Neve; 2, Major White; r, Major White.

Class 93.—Nine specimens of Suttons' Magnum Bonum, Crimson King, Suttons' Champion, or any of Suttons' Improved varieties of swede: 1, Mr. William Le Neve; 2 and r, Major White.

Birmingham Cattle Show.

The fifty-second annual Birmingham Cattle and Poultry Show will be held in Bingley Hall, Birmingham, from December 1st to 6th. The entries are as follows:—Cattle, 176; sheep, 56; pigs, 54; corn, 62; roots, 141; potatoes, 80; poultry, 2,535; eggs, 36; pigeons, 1,017; total, 4,157.

This total compares with 4,159 last year and 4,055 in 1898. Her Majesty the Queen is the largest exhibitor of cattle, showing as usual Herefords, Shorthorns, and Devons, and H.R.H. the Prince of Wales is exhibiting two West Highland cattle, Southdown sheep, and a pen of pigs.

The usual challenge cups value £105 each, given by Messrs. Elkington and Co., Mr. J. Thorley, and Messrs. Webb and Sons, will be offered; also the £50 challenge cup, the gift of the proprietor of the *Birmingham Daily Post*, and the Cooper challenge cup for sheep. A special Order has been passed by the Board of Agriculture, so that there will again be an exhibition of pigs, and the hotel and inn keepers of Birmingham are providing a 20-guinea challenge cup in this section. The entries of corn, roots, and potatoes are above the average, and there will be the usual number of attractive stands and implements, etc.

A large number of excursions, at low fares, are announced by the various railway companies.

Colonel McCalmont's Southdown Sheep, one of the Champion Pen at the Norwich Show, 1900.

The Removal of Pigs.—At the South-Western Police Court on Wednesday, Joseph Corke, of High Street, Merton, and Frederick Smith, of White House Farm, Merton Road, were summoned, at the instance of the London County Council, for being concerned in the unlawful removal of fifty pigs. Mr. Collman, who appeared for the Council, stated that the pigs were sold by Smith to Corke, and the latter drove them from White House Farm, which was in the county of London, to his own place, which was in the county of Surrey. No notice of his intention to carry out such a removal was given by the defendants to Mr. Humphreys, the Inspector under the Act, though the latter had warned both defendants against any such proceeding. Mr. Humphreys mentioned that it was contrary to the Order to remove the pigs to adjoining premises, unless a licence was granted. Mr. Collman said that opinion was not strictly accurate. The magistrate: I thought not. In dealing with the case, the magistrate dismissed the summons against Smith, and fined Corke £10, with 31s. costs, reminding him that the maximum penalty was £100.

SOCIETIES.

Suffolk Fat Cattle Club.

A committee meeting of the Suffolk Fat Cattle Club was held at the offices of the secretary (Mr. Robert Bond), Ipswich, on Tuesday afternoon, Mr. J. E. Ransome presiding.

The Secretary announced the receipt of a reply to a letter which he had forwarded to Mr. J. E. Ransome, informing that gentleman that he had been unanimously elected at the general meeting as president of the club for the coming year. Mr. Ransome, in reply, said: "I can only say I shall feel it a great honour to occupy the position, and with the help of the committee shall be glad to do my best to make the next show as successful as its predecessors." (Applause.)

The Chairman stated that the first business was the election of the judges. It was resolved that the following gentlemen should be asked to act as judges:—Cattle, Mr. T. W. Gaze and Mr. B. Stimpson; sheep, Mr. W. Richardson, Lawford, and Mr. J. W. Eagle; swine, Mr. R. Graham and Mr. T. M. Rudland; swine carcase competition, Mr. D. Gobey; roots, Mr. R. Corder and Mr. George Fenn; vegetables, Mr. Gerald Smith and Mr. Sowman; corn, Mr. Alfred Sizer, Mr. Schethes, and Mr. Thomas Mortimer; dairy produce, Miss Martin (Hemingstone), and Miss Simpson, Stonham.

Mr. W. Elphick wrote stating that at a meeting of the Committee of the Ipswich and District Branch of the Meat Traders' Association, held at the County Hotel, Mr. H. Pallant and Mr. G. Dunnett were elected judges for the butchers' prizes, Mr. A. Mudd to act as referee.

The next business was to arrange the conditions of the cattle, sheep, and barley challenge cups. It was decided that challenge cups of the value of 25gs. each should be offered, to be won three years before becoming the absolute property of any exhibitor; one for the best beast in the show grazed in the county, and the property of the exhibitor for not less than six months previous to the date of the show; the second, open, for the best pen of sheep or lambs in the show; and the third for the best bushel of barley grown in Suffolk from a bulk of not less than twenty coombs. Messrs. Fred. Smith and Co., of the Suffolk Seed Establishment, Woodbridge, offered a root challenge cup for open competition, to be won three years, and it was decided that it should be given for the best three distinct varieties, comprising mangold, swedes, turnips, kohl rabi, or carrots, most suitable for feeding purposes, six specimens of each, the roots already entered to be eligible.

Berwickshire.

The twenty-fifth annual meeting of the Berwickshire Agricultural Association was held on Tuesday in the Town Hall, Duns, Mr. Campbell Swinton, of Kimmerghame, president, in the chair. The annual report was submitted and considered. It showed that the income at the last show at Duns amounted to £347 6s. 4d., and the expenditure £388 13s. 5½d., and that the balance at present in favour of the association was £111 18s. 11½d.

Mr. Weatherhead, Preston, chairman of directors, said the directors had this year used their utmost endeavours to reduce the expenditure on the annual show, and had reduced the outlay in all by £8. Still, the directors regretted that the show was a financial success, the receipts not being equal to the expenditure. He was sorry to say they were in a sinking ship. In the year 1895 they had £304 in the bank, and to-day they had only £111. To what this was due he could not say, but he thought they had done their best to cut down the expenditure.

Several members urged that the prize-list should be altered, and the report was adopted. Messrs. Hall, Greenwaybank; Somerville, Broomlees; and Thompson, Manderston, were elected to the committee.

The meeting received with regret the resignation of Mr. John Gibson, secretary, who was awarded a vote of thanks for his services. It was resolved to meet again on December 3rd to appoint a new secretary.

Royal Lancashire.

The annual report of the council of the Royal Lancashire Agricultural Society states that there is a balance of £501 on the year's working. The general balance in the society's favour now stands at £5,299. After referring to the success which attended the annual show, the report states that the council have had under consideration this year the question of the diminished competition for the prizes offered for best cultivated farms, and they unanimously approve the following recommendations of the special committee appointed to inquire into the matter:—

(a) That the prizes for best cultivated farms be withheld until 1902, and be then offered triennially, with a view to the society being enabled to substantially increase the value of the prizes. The committee also recommend that a second prize should be offered in each class, and by these means they hope that better results will be obtained.

(b) That the classification and value of prizes be as follows: For the best arable farm of 150 acres and upwards, first prize £50, second prize £25; for the best arable farm of under 150 acres, first prize £40, second prize £20; for the best stock or dairy farm of 150 acres and upwards, first prize £50, second prize £25; for the best stock or dairy farm of under 150 acres, first prize £40, second prize £20.

(c) That the judges visit the competing farms twice before awarding the prizes, one visit to take place in June and the second in August.

(d) In consequence of the proposed second inspection in August taking place after the show, the committee recommend that the following clause in Rule 15, "The awards for the best cultivated farms shall be declared by the judges at the special general meeting of members held during the annual show in the show yard," shall be transferred to Rule 11 (business of annual meeting).

(e) That the first competitions under these conditions in 1902 be open to all members of the society, including previous winners of any prizes offered by the society for cultivated farms; but that after 1902 all winners of first prizes under the new conditions shall be debarred from competing for six years.

During the past year 43 members have been elected and 56 have been removed through death and other causes. The total number of members at present on the society's books is:—Presidents, 5; vice-presidents, 59; vice-presidents (life members), 2; hon. vice-presidents (life members), 2; life members, 57; hon. life members, 10; annual members, 840; total, 975.

Peterborough.

The annual meeting of the Peterborough Agricultural Society was held on Wednesday, Mr. G. Moore, who presided over a large attendance, read the annual report, which stated that the South African war had been responsible for a smaller attendance at the last summer show. The auditor's statement showed as a result of the year's working a profit of 8s. 4d., the receipts being £3,409 1s. 4d., and the payments £3,408 13s. This was increased to a net profit of £4 18s. 4d. after bringing into the account the assets of the society and making allowance for depreciation of timber and plant and writing off some irrecoverable arrears. The net profit on the year was small, but taking into consideration the heavy expense incurred in providing additional accommodation on the show ground for the great increase of entries, the council of the Society felt confident that the members would regard the financial position of the Society as a very strong and healthy one. The reports were adopted.

Mr. W. G. Moore was re-elected chairman of the council. Capt. W. H. O. Duncumbe, of Waresley, was elected next year's president.

The Entire Horse Committee was elected, to consist of Messrs. W. G. Moore, J. Topham, W. Horrell, and F. W. Griffin. Mr. Rouse was re-elected consulting engineer, Mr. J. W. Gresswell and Mr. Mackinder veterinary surgeons, Mr. W. H. Swallow auditor, and Mr. H. Little secretary.

A discussion was raised on the question of appointing a third veterinary surgeon to assist the two veterinary surgeons, and it was ultimately agreed that the matter be referred to a select committee consisting of the Entire Horse Committee and Messrs. W. G. Maxwell and F. Percival, to consider the

the veterinary surgeons. An advance of £15 a year was made in the secretary's salary.

Show fixtures were made as under:—Summer meeting, July 9th, 10th, and 11th; entire show, March 23rd.

In the evening the annual dinner was held at the Fitzwilliam Assembly Rooms. A short toast list was gone through, and Mr. H. L. Blunt, in submitting the toast of the evening, "Success to the Society," expressed regret at the decision of the Government in appointing as Minister of Agriculture a gentleman whose knowledge of the matters he would have to deal with was not extensive.

Cheshire.

The report of the committee of the Cheshire Agricultural Society, accompanied by the statement of accounts, states that through the lamented death of the Duke of Westminster, K.G., they had lost a patron, and one of the most generous supporters of the organisation, and it was proposed to request the present Duke to fill the vacancy. The show at Congleton proved in every way a success. A debit balance of £1 16s. 8d. had been changed to a credit balance of £98 14s. 7d. The gate receipts were the highest ever taken at a one-day show. During the year thirty-one new members had been elected. The total income had been £1,465, including £375 in subscriptions. The expenditure included £405 showyard expenses, and £602 prizes, cups, and medals.

Norfolk Chamber.

A meeting of the Norfolk Chamber of Agriculture was held at the Agricultural Hall, Norwich, on the 17th inst., Mr. W. T. Learner presiding.

Mr. W. H. Thorold read a paper on the agricultural situation, dealing with the problem from three points: firstly, as regarded the labourer; secondly, that of the farmer; and, thirdly, that of the landed proprietor. The agricultural situation, he said, had so profoundly changed as a result of the legislation of 1842 and 1846, that he feared it was of little use to approach the subject with the ideas of old-time agricultural authorities. They should endeavour to preserve the three agricultural classes, and unless that could be done, everything in British agriculture would be reduced to a state of absolute chaos. The landlord should accord very great latitude to the tenant, so as to secure him a place of some kind in agricultural economics, as it was to be feared that the trend of circumstances in some parts of the country was rather in the direction of the extinction of the tenant altogether, and the reduction of the agricultural classes to two, viz., landlords and labourers.

Such a reduction would be a great public misfortune, as not only would a valuable class be deprived of the means of livelihood, except in some new field of effort, but the stability and safety of the body politic would also be impaired by a further weakening of that sturdy and substantial middle-class which had been a source of national strength and security for many centuries. Years ago foreign competition was practically non-existent, but now the British farmer had to contend with the competition of American, Canadian, Australasian, Indian, and Russian wheat, not forgetting that new and formidable competitor, the Argentine Republic.

The condition of the world's trade had radically altered during the last thirty years, and since the commencement of that period foreign and colonial wheat was delivered with a regularity and swiftness altogether unprecedented. Foreign wheat supplies were subject to many vicissitudes, and the fluctuations in the growth of wheat in the United States during the last three years had not been far less than two hundred million bushels. Two years since the wheat crop of the United States attained the record of 715 million bushels, while this year the corresponding crop was not estimated at more than 515 million bushels.

He proceeded to show that, while there appeared great fluctuations, experience showed that a partial crop failure in one quarter was not unlikely to be more or less compensated for by an abundant yield in another. That had been the case this year, the American crop being appreciably lower and the Argentine crop expanded. Mr. Thorold went on to explain that recent experience of Argentina afforded an illustration of the immense effect of railway extension upon agricultural productions, and Argentina was a new competitor with the British farmer in the matter of wheat production, simply because the dormant agricultural resources of the Argentine Republic had been called into life by the opening out of the interior of the country. While Argentina would have 50 million bushels of wheat available for exportation this year to Europe, that total afforded no indication of the aggregate to which Argentine wheat deliveries were likely to grow in the future. While there was little hope, therefore, of any improvement in wheat prices, there was also equally little chance of any diminution of external competition in the matter of meat prices.

Mr. Thorold then showed by statistics the development that had been made in the frozen meat trade, stating that New Zealand frozen meat of various kinds was received to the extent of 215 million pounds in 1899-1900, as compared with 116 million pounds in 1897, showing an increase of 99 million pounds. It could not be said that these circumstances had been attended with much injury to British graziers, although it had probably the effect of preventing the meat prices from going somewhat higher on British markets. However much the farmer and the landowner might have been affected by the legislation of 1842 and 1846, the agricultural labourer had been scarcely affected at all. While the wages of the agricultural labourer varied in different parts of the country, speaking generally, they had been substantially increased, and the only way in which the agricultural labourer appeared to have suffered from agricultural depression was that some farmers had probably found themselves obliged to employ a smaller number of men upon their occupations.

In referring to the depopulation of the country, Mr. Thorold said there was a tendency all over the world to increase in town population at the expense of rural districts, and in that case they could hardly expect to escape a similar tendency. To some extent there was a reflex movement, the successful tradesman and professional man going into the country. There had been a certain amount of talk of late of making inducements for the labourer to remain on the land by affording him increased facilities for cultivating on his own account, but there were, he contended, great and serious difficulties in the way of that. The position of the tenant farmer appeared to still leave a good deal to be desired: although they had, no doubt, obtained some relief through more or less substantial reductions of rent, and although they were paying little more than five-eighths the normal amount of tithe, they had to face some increase of local taxation.

On the one hand, they had to pay higher wages, and on the other to contend with severe foreign and colonial competition. Farmers had given increased attention to stock and horse breeding, and had reduced in many cases their cereal productions. Farmers should exert all their influence in favour of a steady extension of light railways, as they would greatly facilitate the movement of their stock and produce. Speaking of the landed proprietors as a whole, he said their relations with their tenants were fairly satisfactory, and they had done their best to cope with the extraordinarily difficult circumstances with which they had had to deal during the last 25 years.

A discussion followed, after Lord Cranworth had proposed a vote of thanks to Mr. Thorold. Mr. B. B. Sapwell deprecated the fact that farmers were trying to do with as little labour as possible. That would greatly tend to the depopulation of the rural districts and a serious scarcity of labour. Mr. Sapwell severely criticised the action of the Government in purchasing, during the war, Argentine and Hungarian horses, when a superior class of animal was obtainable in this country for less money.

Mr. Sapwell said that he learned that at a steeplechase held recently in Pretoria, an English horse, standing only 15 hands, easily beat all comers. The horse, which was a thoroughbred, carried its owner, an officer, through the war, and then after his death came into the hands of his groom. He thought these facts showed that the English horse could carry weight and wear, and was much more useful than the inferior stock purchased at high prices in Argentina and Hungary. Norfolk farmers were ready to sell horses between £40 and £50, but the Government instead were buying horses in the countries named at much higher prices, although the class of animal was inferior to the English horse.

Mr. B. Wilson disagreed with Mr. Thorold that it was impossible for the labourer to rise in the world, and he gave instances of farmers now living around him who only a comparatively few years ago were agricultural labourers, yardmen, or teammen. He was also in disagreement as to there being no demand for small holdings, and he pointed out that besides the agricultural labourer there were the small tradesmen, who would cultivate those small holdings. Speaking of the depopulation of the country, Mr. Wilson said it was not only among the agricultural classes; they were also losing the small tradesmen on account of the large towns absorbing all the trade. He urged the need, as a remedy for the depopulation of the country, of the building of better dwellings for the agricultural classes.

Worcestershire Chamber

A special general meeting of the members of the Worcestershire Chamber of Agriculture was held on the 17th, at Worcester, to consider the steps to be taken in view of the combination of agricultural implement makers and agents to abolish the discounts formerly allowed on implements and machinery.

Mr. A. Dudley Clarke presided over a large and representative attendance. A number of implement dealers, he said, and a certain number of implement makers, in the counties of Worcester, Hereford, Gloucester, and Monmouth, had formed themselves into an association on the initiative of the agents with the object of preventing the allowance of more than the stipulated cash discounts off the revised prices. Such a system of trading, the chairman thought, stood self-condemned, as destroying the power of the individual agent to make his own bargain. He moved a resolution deprecating the action of agents and manufacturers in limiting the discount to be allowed, and urging its opposition by all legitimate means. (Hear, hear.)

Mr. T. Parke condemned the action of the implement makers. Mr. J. E. Ward urged the farmers to form such an association as the Western Counties Agricultural Association, and defeat the combination of implement dealers and manufacturers. Mr. W. Stallard and Mr. Pheysey (Stourport) also supported the resolution; and Mr. H. C. Gardner seconded it.

It was decided that the resolution should be forwarded to all agricultural societies and farmers' clubs in the four counties, and also placed on the agenda of the Central Chamber.

Suffolk.

The committee of the Suffolk Agricultural Association met at the Town Hall, Ipswich, on Friday, for the purpose of receiving a deputation from the town of Beccles, desirous of entertaining the Society at the annual show in 1901. Mr. J. A. Hempson presided.

The deputation consisted of the Mayor of Beccles (Col. Thompson Wilson), the Town Clerk (Mr. T. P. Angell), and Mr. F. W. D. Robinson. Colonel Wilson extended a cordial invitation to the Association to visit Beccles, gave the option of having two or three eligible sites free of charge, with a free supply of water, and the hearty support of the Beccles people. The deputation withdrew, and the committee without hesitation accepted the invitation, appointing a committee to view the sites offered. It was agreed to advise the general meeting to ask the Earl of Stradbroke to act as president.

The adjourned annual general meeting of the Association followed, Mr. Hempson again occupying the chair.

Before transacting the business of the meeting, the chairman alluded in sympathetic terms to the loss the Association had sustained in the death of Mr. William Biddell. Besides being one of the oldest and most esteemed members of the Association, Mr. Biddell was one of the most valuable. Only a month ago he undertook the chairmanship of the committee, presumably in his usual health, and now he had passed from them. Mr. Biddell was a member of an old family, who had for generations been men of thorough business ability, leading farmers, and largely engaged in public duties. By his own merit the late Mr. Biddell acquired a higher position than many of them hoped to aspire to, and was returned as a farming member to the House of Commons by the constituents amongst whom he lived. He moved that the members present offer their sincere sympathy to the widow and her family.

Mr. A. J. Smith, in seconding, said they mourned a dear loved friend, and felt that Mr. Biddell's loss to the county was very great indeed.

Mr. J. E. Ransome supported the resolution, and remarked that it was with great regret that he was unable to be present to pay his last respects at the funeral, as he was away from home.

The motion was carried and Mr. A. B. Biddell said he should like to acknowledge on behalf of his relatives the kindly words of sympathy expressed.

The Chairman explained the resolution which the Committee arrived at on receiving the deputation from Beccles, and it was resolved to confirm the Committee's decision to hold the show at that town.

Mr. J. E. Ransome then moved that the Earl of Stradbroke be asked to become president. They all knew the zeal which Lord Stradbroke showed towards agriculture in every way, and there could possibly be no better gentleman to occupy the position as their president. (Applause.)

Mr. P. M. Browne seconded, and remarked that Lord Stradbroke would be the most acceptable president to Beccles people.

The motion was carried.

The date of holding the show was not definitely fixed, it being thought better to consult the Beccles people on the matter. If satisfactory the show will be held on Thursday and Friday, June 6th and 7th.

About half an hour was taken up in discussing a proposition of Mr. Cordy S. Wolton as to the manner the Stock Prize Committee should be elected. Mr. Walton's idea was to get new blood on the committee, and he proposed that the committee should consist of nine members, three of whom retire annually, and should not be eligible for re-election for one year. There appeared to be no unanimity on the matter, and this was withdrawn. Mr. Fred Smith moved a resolution to the effect that a committee of eight be elected annually by the General Committee, to which Mr. Ransome moved an amendment, that the committee consist of nine members, to be elected by the General Committee, and at least three must be fresh men at each election. The amendment was lost by 9 to 7, and the chairman was in rather a dilemma when voting on the resolution was 7 to 7. Eventually the chairman voted against the resolution, making things as they were.

Mr. Philip M. Browne moved, and Mr. J. Toller seconded, "That in Class III., Labourers' Premiums, 'Female dairy servant' shall apply only to those female servants who are employed on premises where the produce of the cows is churned and made into butter, etc." Mr. Cordy S. Wolton said there was practically no competition amongst dairy-maids;

they would soon become as extinct as the dodo. (Laughter.) The resolution, however, was carried.

Other resolutions carried on the motion of Mr. Browne were: "That on the entry forms for Shepherds' Competitions, the date of lambing and the number of shearlings (or ages of sheep) be stated," and "that the annual meeting in the future be held in the third week of November."

The Mayor of Beccles (Colonel Wilson) and Mr. F. W. D. Robinson, Roos Hall, Beccles, were elected members.

The Prize Committee were elected as follows:—Messrs. A. J. Smith, Cordy S. Wolton, S. R. Sherwood, P. M. Browne, F. Paine, Wm. Toller, F. H. Jennings, H. Cross, H. Biddell, L. Digby, J. Flintham. The sub-committee to view the sites offered for the show were appointed as follows:—Messrs. Browne, Sherwood, and W. Toller.

Oxford.

The annual meeting of the Oxfordshire Agricultural Society was held at the County Hall, Oxford, on the 17th inst., Mr. W. H. Ashhurst, president-elect, occupying the chair. The annual report was presented, in the course of which it was stated that "the Committee announce with great satisfaction that the most successful show, with a financial result of £500, will be recorded for the 1900 meeting held in South Parks, Headington, Oxford. Its success was greatly increased by the free hand given by Mr. and Mrs. George Herbert Morrell to the Committee in arranging the buildings and the excellent ground for the horse-ring. The weather, too, was all that could be desired. The thanks of the Society are emphatically due to the Earl of Jersey for the strong and continuous support he gave during his year of office, and also to Mr. and Mrs. George Herbert Morrell for their great generosity in giving the ground and using their utmost influence, as heretofore, to ensure the ends the Society has at heart; to the Mayor of Oxford, for giving every possible facility in his power to make the show a popular and financial success, and to the Local Committee, for its liberal donations towards the special prizes. The Committee are also grateful for the increased help of the County Council, and they feel that the demonstrations and lectures on poultry-dressing, etc., were of the utmost value to many now interested in that branch of industry, which is, and will continue to be, such an important source of income with many farmers and cottagers. Mr. J. F. Mason has consented to accept the office of president-elect, that is president for 1902, when the Society hope to visit the town of Witney. The committee have received an invitation from the town of Thame, through the chairman of the Urban District Council, which they have great pleasure in accepting."

The Chairman, in moving the adoption of the report, on behalf of the residents of Thame and the district, gave the Society a hearty welcome to that town.

Mr. Zacharias seconded the proposition, and congratulated the Society on the success attending the visit to Oxford.

The proposition was carried unanimously.

On the motion of Mr. P. Southby, seconded by Mr. J. Bryan, the audited accounts were passed.

The thanks of the Society were presented to the Mayor and Corporation, the University, the inhabitants of the city and neighbourhood of Oxford, the members of their local committee, treasurers, and hon. secretary, for their zeal in promoting the success of the show, and for their liberal contributions to the prize list; to those who contributed special prizes at the Oxford meeting; to the general managers and officials of the Great Western, London and North-Western, and other railways, for the arrangements made by them in connection with the Oxford Show, and to the Earl of Jersey for the valuable services which he has rendered the Society as president for the 1900 meeting.

Dorset County Barrener Sale.—The annual great county sale of barreners, for so many years associated with the name of Mr. T. Ensor, of Dorchester, came off on Saturday at Dorchester Agricultural Repository, and proved a record in regard to the supply. A good proportion were in high condition. For these the competition was exceedingly brisk, prices all through showing a considerable advance on last year's rates, the best lots making £26 to £36 per pair, and those not in quite so high condition £16 to £24. Devon steers ranged from £20 to £28 per pair, while crossbreds made £25 to £32. Almost every lot was cleared.

Thirsk Hirings.—These hirings were continued on Tuesday, when there was a good attendance of male farm servants, who asked higher wages, but in few instances was any substantial advance obtained on last Martinmas. There was again a dearth of female servants. Managing foremen and hinds received £23 to £24, first ploughmen £18 to £20, second hands £16 to £17 10s., farm boys about £1 for every year of their age; farmhouse female servants £18 to £20, second girls £15 to £16 10s., cooks for town places £18 to £20, general servants £12 10s. to £15, housemaids and chambermaids £11 to £13, nurse girls £9 to £11, and nurses first time out from £6 10s. to £7 10s. for the year.

LITERARY NOTICES.

The fourth annual issue of Baily's Hunting Directory, published at the office of *Baily's Magazine of Sports and Pastimes*, makes its appearance with the opening of the season. Among the more important additions to the yearly increasing contents must be noted the appendix "Sport and War." This opportune feature consists of a long series of lists of hunting men who have gone to South Africa in the Regular Army, in the Imperial Yeomanry, and Volunteers, their rank and mention of promotions and distinctions, and also of misfortunes of war that have befallen them. These lists show convincingly how many good men the Yeomanry and Volunteers owed to the hunting field. An alphabetical list of Hunt servants is a useful new feature. The article "On Summering a Country," and "Drafting Hounds," are excellent, and a distinctly happy idea is that of giving a series of accounts of famous foxhunting runs, with maps. The first, "The Greatwood Run," of the Duke of Beaufort's, is worthy of the priority given it. The accounts of Hunt establishments and the maps have been brought carefully up to date.

There has come to hand a copy of a pamphlet, entitled "Hackney Breeding and Hackney Breeders in Lincolnshire," by "Asmodeus." It is a reprint of a number of articles which appeared in the *Lincoln Gazette and Times*, and which were written in response to a request to prepare a report upon the above subject, and to ascertain as far as possible upon what lines and amongst what classes this industry is carried on in this county, and also what, if any, is the prospect of it being more generally taken up amongst the Lincolnshire farmers. A perusal of the list of members of the Hackney Horse Society discloses the somewhat startling fact that in this, the second largest county of England, with all its wealth of acreage, there are only about a score of members of that society, and of this number not more than about fourteen or fifteen would come under the signification of breeders of Hackneys. It is evident, therefore, that at the present time this county has not very largely taken up this branch of stock raising, and to the cause of this, therefore, the author's inquiries were directed. In order to gauge the opinions of those who have adopted Hackney breeding, he divided the county into districts, went into those districts, and by means of personal and written inquiries, gathered many opinions, and in the pamphlet under notice he reports upon the existing state of affairs, as presented to him in the various replies he obtained, and the personal observations he was enabled to take. The pamphlet will afford interesting reading to all horse breeders, and it may be obtained from the offices of the paper above mentioned, price threepence.

The November number of *Knowledge* has several articles of general interest, the most important perhaps, being the contribution of M. Antoniadi, who gives a graphic description of the great telescope at the Paris Exhibition. This is accompanied by several illustrations, amongst them being a full page one of the great seiderostat of the telescope. Another paper that will be of special interest just now is that dealing with the meteors of November. This forms No. 10 of Mr. E. Walter Maunder's, F.R.A.S., series of "Astronomy without a Telescope." Of the other contents mention may be made of: "Stone Implements on the Gold Coast," "The Pygmies of the Great Forest," "Notes on Comets and Meteors," and "The Face of a Sky for November."

The "Badminton Magazine" for November contains a good variety of sporting articles and fiction. Premier position is given to a story entitled "A Close Finish," by Versturme-Bunbury, dealing with a regimental cricket match. This is followed by "Some Scenes in the Highlands," pleasantly recalled by Alex. Innes Shand. Hunting, as is natural at this period, receives a good share of attention, W. Browne giving an account of a day with "The King's Otter Hounds," and J. Lowndes Randall a description of "Hunting in Brittany: The Last of the Wild Boars," whilst in "Pages from a Country Diary" an amusing hunting story is given. Among the other items of this good number are "Sportsmen in Purple," by Harold Macfarlane; "Some 'Varsity Reminiscences," by T. E. Wells, and "Cold Glories," by Lady Westmacott.

We have been favoured with a copy of a souvenir of the farewell banquet given to the Right Hon. the Earl of Hopetoun, P.C., K.T.G., C.M.G., etc. (Governor-General of Australia), at the Hotel Cecil, on October 3rd. It is issued by the Commonwealth Publishing and Advertising Co., Limited, 28, Martin's Lane, Cannon Street, E.C., the publishers of the *Commonwealth Pictorial*, a monthly social and commercial review of Australian matters. The souvenir is a most exquisite production, and a splendid example of present-day fine art printing. It opens with a description of the Hopetoun estates, followed by details of the farewell dinner, and some particulars of Australasian life and industries. There are numerous extremely interesting illustrations, some of them which are full-page [illegible] being beautifully reproduced. There is a full-page portrait of the guests at the banquet, and of the table, and a key supplied [illegible] two tinted of the principal guests. The [illegible] is worthy to rank as a historical record, and the editor, Mr. C. S. Rutledge, F.R.G.S., F.R.C.I., is to be congratulated on getting together such an excellent publication.

With the close of the Paris Exhibition appears a handsome souvenir of it, issued by the Walter A. Wood Mowing and Reaping Machine Company, of Hoosick Falls, New York, U.S.A., and 36, Worship Street, London, E.C. The souvenir, which is a splendid example of artistic printing, gives an interesting short history of the company and a list of some of the numerous prizes, awards, and diplomas won by Wood machines, as well as special decorations conferred upon the founder of the company, Mr. Walter A. Wood, who died in 1892. The growth of the company has been phenomenal, as the souvenir testifies, as it also does to the wonderful progress made during recent years in harvesting machinery.

POULTRY.

The Trade in New-laid Eggs.

The letter of Mr. E. Brown (secretary of the National Poultry Organisation Society) on this subject, which appeared in our last issue, has called forth the following correspondence:—

Mr. K. B. Baghot-De la Bere, Burbage Hall, Hinckley, writes:—"Mr. Brown's letter on the above subject is full of interest; but I think he fails to realise the difficulty, I may say the impossibility, of obtaining other than a very insignificant supply of new-laid eggs during the late autumn and winter months. At least five-sixths of our British eggs are, of necessity, laid between February and September inclusive, leaving only one-sixth to meet the remaining four months' demand. This, we all know, is wholly insufficient, and this deficiency neither Mr. Brown nor the National Poultry Organisation Society will be able to rectify. Early hatched pullets are at best but shy and intermittent layers through the winter months, and but few hens are sufficiently recovered from their moult to lay before February; hence the scarcity.

"Mr. Brown is, I think, unduly severe on preserved eggs. Eggs pickled in lime-water (the common method of preserving) are good for all purposes except for the egg cup. The buttered or greased egg is, however, after five or six weeks' keeping, as nearly equal to a new-laid egg as a preserved egg can possibly be, and quite fit for the breakfast table—indeed, such eggs are better and fresher than a three days old not greased and left resting on its side.

"If our farmers and other poultry-keepers would preserve the bulk of their eggs during August and September by simply rubbing them with a buttered cloth, and stand them on end, instead of resting them on their sides, they would have no difficulty in getting the new-laid egg price for all the eggs they market in November and December. The public do not care whether an egg is three days old or six weeks, provided it is fresh in taste and appearance. The proof of the pudding (or egg) is in the eating. A score or two of small rings, like napkin rings, can be made of thin cardboard by any child in half an hour, and they answer admirably for storing eggs on end.

"To produce new-laid eggs in winter to sell at three halfpence each is an unprofitable business. The profits are realised in summer, when eggs are cheap, and selling at twelve to sixteen a shilling. And why? Because four times the quantity are produced, and at a less cost for food per head. Winter eggs can only be produced with exceptional care both as to housing and feeding, and this appears to be beyond the [illegible] power of the average farmer, although they of all others are best circumstanced to excel in this particular, owing to the shelter of their ricks and buildings and extensive scratching range.

"The poultry industry of this country is being ruined by that fatally cheap and injurious grain, maize, or Indian corn. If the National Poultry Organisation Society will issue a leaflet drawing attention to the evils of the excessive use of this grain, it will prove of far greater value than 'No. 4 Leaflet—Winter Egg Production,' recommended by Mr. Brown."

"J. M. M.," Perou-sur-Mer, France, points out that "this section of Normandy—opposite Jersey—enjoys the mildest and most even temperature during winter of all Europe. We have eggs in abundance all the year round. To-day, at the little shops in Pirou village, they ask eightpence a dozen; and if some enterprising dealer would get off the beaten tracks, and work this district up, he could make contracts for the year at one sou or less, and secure large new-laid eggs up to many thousands a week.

"A year or two ago a London shopkeeper took from this section many hundreds a week, and, to my knowledge, resold at twopence and [illegible] penny as 'Wiltshire' eggs all through the winter. The [illegible] from Carteret to Granville [illegible] immense quantities of 'hen fruit,' and, being off the line of rail, is rarely visited by the egg collector, as it [illegible] ports."

By Lupulin.

Home Notes.

The Borough.

Several visits during the week to the offices of hop factors have shown me that there is an absence of inquiry by merchants, who appear to be waiting for the realisation of their earlier purchases before they go in for further business. But some very important transactions have been concluded by a brewery firm, who are the largest individual consumers of hops in the United Kingdom, and, perhaps, in the world. Their annual contracts were placed last week, and although these have been probably limited to stocks already held in anticipation by certain merchants, and therefore do not immediately affect the general market, the transfer of such quantities will doubtless result in their early replacement and consequent renewal of activity in the general Borough business. The tone of the trade is therefore fully as healthy and strong as it has been recently, although I have knowledge of some small lots having been released at rather lower prices than the holders have hitherto demanded. These isolated cases are, however, not to be taken or quoted as indices of the general trend of the trade, as they prove nothing beyond the fact that the holders had made up their minds to sell without further delay, and had selected an unfavourable moment for putting their determination into effect. The best informed experts are satisfied that the future of the hop market may be waited for without any doubt or uneasiness, as higher values are inevitable. The only question to be decided is whether, by holding in first hands, growers are to reap the benefit, or, by selling before the advance is established, they will hand the additional profit over to merchants.

I understand that brewers are buying pretty freely of

American Hops,

the value of which is strongly upheld by sellers. During the quiet trade of the preceding fortnight slight concessions were offered by some holders, which were at once taken advantage of by other merchants, who by their purchases are now enabled to assume practical control of the trade. Having entire confidence in the future of the market, these firms are supporting prices, and their expectations seem to have affected the minds of consumers, who are now operating without hesitation. The growing strength of this section will certainly assist the upward movement in the value of English growths.

My remarks on the

Compulsory Branding

of our hops have elicited some criticism from one of our best-known and most advanced planters. He argues that the printing of the name and parish of the grower on the pockets provides a guarantee of quality and management which is appreciated by brewers and induces them to pay higher prices than would be the case if the pockets were not so branded. I concede the force of the argument when, as in this particular instance, the command of capital and its intelligent and skilful use have enabled a planter to attain to a recognised position. It would not be wise for such a position to be lost or endangered by the absence of a name which is accepted as a standard of excellence. But I nevertheless believe that compulsory branding is frequently prejudicial to those whose efforts to attain excellence and its full reward are handicapped in the market by the traditional value given to hops grown in certain districts, whereas if the product of another distrit were tested by its actual brewing value and irrespective of the brand, it would be not infrequently found that full prices would be secured for it. It cannot be denied that there are advantages in the present system to many growers, but I think the balance of disadvantage is against the English industry as a whole, and I should welcome the establishment of the practice of selling and buying hops on their merits as determined by analysis, believing that in the end the emulation aroused thereby would tend to raise the general average of quality and assist English growers in their struggle with competitive foreign growths.

As an illustration which appears to me to assist my argument. I would refer to a shipment of

Hops from British Columbia,

that were recntly brought under my notice. These were grown from Kentish sets, and the samples presented such attractiveness in colour and management, with such perfect ripeness and richness in lupulin, that they were valued at a price quite equal to those of corresponding English growth. They are, therefore, competitors in quality only, but not in market value. Prejudice as to their place of origin would formerly have classed them as of lower grade than our own produce, but as my correspondent admits it is desirable that "hops should be bought for their lupulin," and as modern tendency is in that direction, the value of the British Columbian produce is established on this basis, which, as I consider, is the soundest for all concerned. Such competition as this is an enlarging factor in the hop trade. It cannot be overlooked and must be recognised, and however risky it may be for English growers to "get before the times," it is most desirable that they should at least live up to the advancing tide of circumstances, that they may be able to "meet their enemies in the gate," and confront them before the citadel is captured. I am convinced that we can hold our own, if we put on our armour and prepare ourselves for the battle. "To be forewarned is to be forearmed." Rising facts are warning us, let us accept them at their proper value and act accordingly.

I regret to hear that the

Hop Growers' Conference at Wye

will not be held this year. It appears that some building operations are going on at the South-Eastern Agricultural College, for which reason the annual meeting of planters is abandoned. The interesting and valuable features of preceding conferences cause one to wish that the College Council could have arranged for a meeting at Ashford or some other convenient centre. My regret at the postponement of the meeting will, I am sure, be shared by all those who have derived much pleasure as well as profit from previous discussions at Wye.

Foreign Notes.

Nuremberg.

The quieter tone prevalent on this market, indicated last week, has since become more manifest. Demand having somewhat decreased, and sales being limited to an average of about 300 bales per day, prices have given way to a slight extent. But as supplies are proportionately diminished there is no augmentation of stock, and holders, confidently anticipating an improved demand in the near future, are therefore not pressing for business. It cannot be denied that in the present position of affairs there is an absence of strength, and the immediate tendency perhaps suggests further decline in values. Nevertheless, there is no anticipation that this condition will be other than temporary. A slight revival of the export demand would quickly bring about a reaction, and the market would then speedily regain vigour, and values attain their former level.

Munich.

Sales of hops to brewers have considerably exceeded the new arrivals, so that a reduction of stocks has been affected. Consequentlr, spot quotations have remained steady at recent figures, and there is no indication of any desire on the part of dealers to force business by offering concessions to buyers.

Aischgrund.

Very few hops are available, the greater proportion having been disposed of. Some depression of prices has taken place, consequent upon the smaller demand.

Wurtemberg.

At the most recent market enquiries were few, and the business done was at slightly reduced lrices. Only a small quantity of hops remains unsold.

Rothenburg.

During the past fortnight business has been quiet. Stocks are very limited, and medium qualities are wanted. Prices realised lately have been about equal to previous currency.

Warsaw (Russia),

The yield of Polish hops this year is fully 25 per cent. less than in 1899, only amounting to 30,000 pouds, or about 11,000cwt., but they realised from 40s. to 50s., against 30s. to 40s. last year.

Burgundy.

Although the trade is rather quieter, values have not receded. Current quotations still remain at 105 to 115 francs. The hops remaining in the hands of growers are now reduced to a minimum.

Belgium.

There has been no appreciable change in the character of the hop markets within the past week, although quotations are somewhat variable, and do not manifest quite the same firmness that has recently been evident. Buyers have been more cautious, as they find they cannot so readily dispose of their purchases, brewers being just now rather slow in operating. With some tendency towards lower figures, prices have not actually receded to any extent, although probably any holder desiring to realise would be compelled to give way in order to do business. But it is almost impossible to arrive at exact conclusions concerning a market that is so much influenced by speculation as is the Belgian hop trade, and it is equally difficult to forecast the future course of affairs. From a statistical point of view, weakness should be superseded by strength, and despite the symptoms now in front of us I am inclined to look for an early resumption of firmness, and the possibility of still further advancement in values.

Belgian imports of hops during the first ten months of the present year totalled 1,407,647 kilos, being somewhat larger than in the same period of 1899. English hops figure in the returns at 221,748 kilos, as against 90,657 kilos last year, but the imports from America have fallen off from 87,524 kilos to only 11,575 kilos. Exports from Belgium have diminished during the period named by nearly 250,000 kilos, or to the extent of about 35 per cent.

America.

A strong and active hop market continues in New York, and a much larger business has been done to date than to the same date last year. Exporters are anxious to operate even at the advanced figures which have now been established, and alongside them are the local brewers, who desire to secure their supplies. These influences are felt in the country centres, where buyers are taking up every lot they can get hold of. Growers are naturally taking advantage of the position, and having knowledge of the scarcity are advancing their demands. A fraction over 20 cents has been paid for choice grades, and 16 to 20 cents may now be accepted at present values. Not only in New York State, but on the Pacific coast the trade is getting stronger. Oregons remaining in first hands are now estimated not to exceed 12,000 to 15,000 bales. The outlook is therefore distinctly in favour of still higher prices, which from all appearances must shortly be quoted.

Alleged Extensive Robbery of Hops.

At Southwark Police-court, on Thursday, before Mr. Slade the investigation was resumed of a series of charges of stealing and receiving hops. The cases before the Court were the following: Samuel Wild, 28, foreman to Messrs. Parkes, Son, and Ayling, hop factors, Great Guildford Street, Borough, charged with stealing three pockets of hops, value £25, belonging to his employers; John Langridge, 45, carman, and Alfred George Studd, 39, hop porter, charged with stealing two bags of loose hops, value 30s., belonging to Studd's employers, Messrs. Trier, Mayer, and Co., hop merchants, of Maze Pond, Borough; James Stocker, 53, hop merchant, and his son and assistant, Charles Stocker, 17, charged with feloniously receiving the said three pockets and two bags of hops, and also with stealing and receiving

All official reports and notices of the National Association of English Hop Growers will be printed in the MARK LANE EXPRESS, *which will also contain all current information likely to be of interest and benefit to the members of the society.*

To Hop Growers.—Users of Wire Work should buy the Best English Galvanised Steel Hop Strand, made by Rylands Bros., Ltd., Warrington, Lancs. For prices, &c., apply to their London office, 86, Leadenhall-street, E.C.; or their Sole Agent for Kent and Sussex, Mr. Edward Ball, 3, Newstead-road, Lee, S.E.—[ADVT.]

two pockets of hops, value £16, from Bricklayers' Arms Station, and one pocket, value £8, from Blackfriars Station of the South-Eastern and Chatham Railway Company.

Mr. Bodkin prosecuted on behalf of the Hop Trade Association; Mr. C. Gill defended the Stockers, and Mr. J. D. A. Johnson appeared for Wild. Further evidence was now given, and all the prisoners pleaded not guilty, and reserved their defence, except Studd, who pleaded guilty. They were committed for trial at the sessions. Bail for James Stocker was fixed at £1,000 and for Wild at £100. Charles Stocker was released on £40 bail.

A summons under the Merchandise Marks Acts, for falsely marking three pockets of Sussex hops as Kentish hops, was served upon James Stocker, and heard forthwith. He was committed upon that charge also.

(*For Hop Market Reports, see pages* 687, 689.)

MILLING.

How to Make the Most of Wheat and its Impurities.

Trade in flour has been very dull during the past fortnight, although in some places prices have been reduced 6d. per sack. On the other hand, offals are still in brisk demand, especially bran, which is perhaps more appreciated as a feeding stuff at the present time than ever before. But all sorts of offals sell well, and as the winter approaches there will be a large demand, and prices may go higher than ever. Should this prove to be the case, millers may find it expedient not to pursue the process of flour-making too far in the system, always remembering that the place to stop making flour is where the price of offal approximates with the price of the lowest grade flour made. This, of course, will be determined by local circumstances.

English wheat has not been in good supply of late, the wet weather, no doubt, militating against the operation of threshing, and what we have received has generally been in bad condition, difficult to mill, and giving a low yield. As the season advances we may get better samples. One thing is certain—that the only place of safe storage for this year's wheat is in the stackyard. It should be threshed and milled at once, after having been passed through the dryers. Even in the best of seasons these soft wheats will not lie for long together without damage. No wheats should be stored if they are at all damp—not even the hardest kinds—or if they contain much dirt and other foreign substances. Heated wheat is generally caused by an excess of moisture or an excess of impurities, and it generally happens that when the cause of heat is removed or prevented the heat itself disappears or is avoided. In nearly all cargoes of heated wheat it will be found that there are

Several Grades or Qualities,

so far as the damage done is concerned. A part may have received little or no injury, while some may be so badly heated as to be no good whatever for milling or any other purpose. Slight damage may be remedied by aspirating the wheat, sending it over a warehouse separator, or passing it through a cleaning plant. In the latter case the unpleasant smell will be given off with the steam in the dryers. If one application is not sufficient the process may be repeated. When wheat arrives in good condition it should always be subjected to a preliminary cleaning before storage.

An excess of impurities, especially if weevils be present, will nearly always result in the development of heat, and therefore, in order to guard against the latter, the grain should be passed over a warehouse separator. This machine generally consists of two sieves, the top one being covered with 14 or 15 zinc and the bottom one with about 8 or 9 zinc, according to the class of wheat to be treated. The wheat, on entering the machine, is, of course, fed along the whole width of the top sieve, through which it sinks with all impurities smaller than itself, while everything larger than wheat—sticks, large stones, string, beans, straw, etc.—tails over. The second sieve in turn tails over the wheat, and broken wheat, seeds, and all impurities smaller than itself passes through. Two aspirations are usually employed in this preliminary cleaning, one on the wheat as it enters the machine, and the other as it leaves it. By this means a great deal—in fact, the bulk of the light impurities, straws, chaff, small seeds, weevils, etc., are lifted out, and the wheat can be delivered to the storage bins in a fairly clean condition. A little consideration will show that this machine makes its separations by a difference in size (the sieving parts) and in weight (the aspirating parts). In fact it is

A Separator and an Aspirator

combined, the impurities lifted out by the exhausts falling into the aspirating chambers. Small country millers who only mill very clean wheats may almost finish them off with this machine, and if any other follows it should be a wheat brush. Large millers, however, who have to make very white flours, and who use wheats which contain a fair, and sometimes a large amount of impurities, never trust to the warehouse separator for making separations by size. It suffices to give wheats a preliminary cleaning for purposes of safe storage, and that is all. When such wheat is wanted for milling it is passed over a milling separator, which makes a second and more careful distinction between the pure and the impure. In all well-arranged mills the dust is blown into a dust-room, which should be frequently cleaned out, so as not to allow of any great accumulation. Much of the dust lifted out in this way, too, is very light, and care should be taken not to allow it to escape and disfigure the outside of the mill.

The machine which is called the milling separator, as opposed to the warehouse separator, which is specially adapted for use in silos and granaries for rough cleaning before storage, is usually provided with additional sieves for separating small and broken wheat, cockle, and other seeds. For this reason, even in small mills where only one separator is employed, it is to be preferred to the warehouse separator. In the case of both machines, however, there should be an efficient system of sieving, with carefully arranged exhausts, while the holes in the zinc should not be liable to clog up, and there should be no vibration. There is an especial reason, too, both in the case of large and small mills, for making

As Many Separations as Possible

upon the milling separator or separator and grader. Not only should the large, clean wheat be put to the best account in the manufacture of pure flour, but the small wheat, the barley and oats, where they are found, the cockle, broken wheat, and seeds, can all be put to a useful account, especially where the business of flour manufacture is carried on in conjunction with the manufacture of provender and feeding stuffs generally. In many large mills the grader exists as a separate machine; in others it is combined with the milling separator. It is necessary to grade the wheat for the elimination of barley, oats, cockle, and rye—the latter being the special impurity in Russian and Danubian wheats—and some such an arrangement of sieves as the following will suffice on a combined machine of the kind under present consideration. In addition to the top sieve which tails over the large impurities it will be found that if the second sieve be covered, in the case of wheats which contain these impurities, with 12 zinc, or its equivalent wire number, it will tail over a great deal of long barley corns and oats, which can be ground on stones as a separate product, and sold for a good price as

A Valuable Feeding Stuff,

A sieve covered with 10 or 10½ zinc, as the case may be, would tail over the large wheat to barley cylinders, a fourth covered with 8 or 9 zinc (about 10 wire) would tail over the small wheat to cockle cylinders, and a fifth sieve covered with 6 zinc (18 wire) would deliver broken wheat and seeds, and the dust would pass through. No attempt, whatever, should be made on such a machine to make a separation of rye, for which a separate grading will be necessary. But it will be seen that a machine arranged in this way, with the further aid of barley and cockle cylinders, will make the following separations—large wheat, small wheat, oats, and long barleycorns, smaller oats, and barley, cockle, and broken wheat and seeds. All these products should receive different treatment, and each should be worked up to the best advantage. It will often pay too to convert the smallest of the wheat into offals, instead of reducing it into flour. This question of feed is an all-important one with small millers, and should receive a great deal more attention than it often does. Such machines as have been under review will assist greatly in this object, and it must never be forgotten that in every operation of wheat cleaning and milling the better the separations the better will be the flour, and the more valuable the offals from a money point of view.

MILLER-FARMER.

Penrith Hirings.—The second hiring fair at Penrith took place on Tuesday, and was much better attended than usual. The hirings were very slow, except for strong boys, who got fully last week's wages. Other classes generally had to take from 10s. to £1 less than last week, though females, who were very scarce, practically commanded their own prices.

Gored to Death by a Bull.—At Milverton on Monday an inquest was held on a labourer named William Sloman, of Piel's Cottages, in the employ of Mr. S. Kidner, farmer. It appears that on the previous Friday afternoon a shepherd named Cornish heard the deceased calling the cows from a field for milking. He walked towards the field, in which there was a bull as well, and saw all the cows but one going towards the farm. The remaining cow was near the bull. He could not see the deceased, and stood looking at the bull, when he saw the animal toss the deceased into the air. He fell into a wheel-rut, where the animal pushed him about. Witness, who had two dogs with him, rushed to the deceased's assistance. He shouted to the bull, and the dogs went towards it. The bull then chased them into an adjoining field, and witness shut it in there. He then found that the man was dead. Both witness and Mr. Kidner stated that the bull was generally very quiet, the latter adding, however, that as soon as the animal was fit it would be sent to the butcher. The jury returned a verdict of "Death by misadventure."

BARLEY AND MALT.

By Hordeum.

Date of Harvesting.

The proper time to cut barley is one always in question, but it can be cut, and it remains one of the few points which can be controlled by experienced skill. The state of the weather [illegible] and is likely to remain so. Yet the exercise of judicious care can influence the final results, even as affected by weather, to a surprising extent.

Two farms can lie adjacent to each other, and be as much alike as any two farms can be. The owner of one will show at the end of harvest good stacks well made, with sweet, bright corn and [illegible] properly sweating grain. The other [illegible] heated, and almost useless for the purpose of the maltster or even to feed to

The whole secret is, one man judged properly when to cut, and having begun, worked with prompt [illegible] the other let things drift, and [illegible] to make haste unduly.

Heated Ricks

and immature grain are both proof positive of absence of sound judgment. No conditions of weather excuse either.

It may seem a harsh verdict, reflecting upon a large number of good and true men supposed to be capable farmers. Yet the fact remains no man of sound judgment will ever build a stack that heats, or can he consent to cut immature grain, unless, of course, it happens to be a season when there seems a reasonable prospect of fit ripeness being reached.

Few growers quite realise the true value to a brewer and maltster of perfect ripeness; for, unfortunately, some of those who have given very careful attention to the matter think that over or dead ripeness is what is needed.

Perfect finish to ripening can only be effected in stack by gentle sweating, and this is best induced by cutting at the right stage of ripeness and [illegible] when fit. It necessarily involves

Right Modes of Cutting,

and it is very problematical if any type of self-binding can be so described. Mowing and lying in swarthe possess advantages nine seasons out of ten that have not yet been successfully disputed by any new system tried under right conditions.

Unlimited experience will never be able to fix a date for cutting. The most we can do in the matter at present is to record the facts of each year's experience. Taking the 160 samples sent up to the Brewers' Exhibition, they show amongst other things the following:—Of the total seven only were cut in July, but of that number four gained some kind of award apart from whatever share they may have had in determining the awards for threshing.

One only was cut in September. This [illegible] notice, but purely on the grounds that it was Scotch and a useful type of seed barley. Had it stood on its merits as a malting sample it would have been disregarded. One sample also had no date for cutting assigned, and it may not be unworthy of note that farmers who have sufficient knowledge to enter at this show sometimes do not know or take the trouble to remember when the grain was cut.

In the first week of August harvest had become fairly general, and of twenty-four samples no less than eight, or one-third 33 per cent.), gained awards. In the next succeeding week sixty samples were cut, and of these twenty-four (40 per cent.) won prizes.

The third week ran very close with fifty-four samples and nineteen awards (35 per cent.), whilst the last ten days of the month yielded only fifteen samples with four awards (or under 27 per cent.). This year, therefore, the best harvest week for barley was the second week in August, followed very closely by the third week.

The earliest cut in the year recorded was July 18th, in Middlesex, and it is significant that no Cornish sample was cut prior to August 7th, nor in Somerset until August 14, excepting one on the first week of August.

It is obvious the men who cut late do not think they have much chance at the Exhibition, and probably few late samples would be approved. Yet it is quite certain that a larger breadth of corn stood uncut in the second week of September than ought to have been the case, notwithstanding the state of the weather and of the labour market.

Still, with regard to harvesting generally our farmers can confidently feel clear in the last [illegible] the century they have little really to be ashamed of. As a body, they show intelligent appreciation of action which deserves warm commendation.

Date of Cutting.

Date		No. of samples	No. of prizes	Percentage of prize winners

William Colchester Gold Cup Competition.

The third annual gold cup barley competition took place on Friday morning at Griffin Mills, the headquarters of William Colchester's chemical manure business. The gold cup barley prize consists of a massive cup entirely of gold, and is valued at 20gs. It will be specially engraved with particulars of the competition and the occasion, or the winner may elect to receive the prize in 20gs. cash. Silver and bronze medals were also awarded as second and third prizes. The judges on this occasion were Mr. Thos. Franklin, of Hitchin, whose colleague was Mr. T. S. Damant, of the Ipswich Malting Company; Mr. William Breese, Occold Hall, acting as steward.

This competition was only open to the users of the gold cup barley fertiliser (Griffin brand), prepared and manufactured only at William Colchester's chemical manure and bone-crushing mills, Ipswich, and every ton of gold cup barley fertiliser entitled the purchaser to enter one sample of barley grown with the aid of this manure, and thus two or more tons entitled the purchaser to stage two or more samples at his discretion. The gold cup barley fertiliser may be used with or without farmyard manure, as circumstances may require, but an essential condition is that no form of chemical manure other than this may be utilised in the growth of the sample.

The entries far exceeded in number those in previous competitions, being, in point of fact, more than double those entered last year. There is no doubt that competitions such as these are inculcating a healthy feeling of rivalry among the farmers, not only in Suffolk, but in counties as far south as Hampshire and north to Lincoln and Yorks. Samples in this present competition come from eight counties.

At these works were to be seen new disintegrators for the reduction of bones from the whole sizes in which they are collected into fine powder, and the adoption of the Westinghouse air compressors for the conveyance of acids from different low levels to high ones, by which it is now possible to handle these liquids without coming into contact with the old-fashioned valve and pump business. We saw in course of erection an illustration of the paternal way in which her Majesty's Local Government Board looks after the welfare of those in the cottage as well as those in the mansion. We saw new brick towers being erected by which the few dangerous fumes are dealt with by saturation with water, and the residual conveyed to a seventy-foot shaft. We saw all the different sections of what would otherwise be waste productions, which are prepared and carted to the door of the consumers all the world over. Mr. James Howison, F.R.H.S., is the chemist in charge of the laboratory, and he courteously explained everything within his ken. We saw guano from Damaraland and phosphates from Central Africa, the districts which were originally explored by a private expedition sent out a few years back, in which the firm took a leading part. To-day their travellers go practically to every civilised country, including France.

The entries in the competition included samples from eight counties, the following among others:—Messrs. John Parratt, Wrecclesham, Farnham, Surrey; E. S. Coppen, Station Farm, Copdock, Suffolk; Alfred Dawson, Rushmere, Suffolk; William D. Pratt, Witnesham, Suffolk; Thos. V. Preston, Lamas, Norfolk; R. J. Thurman, Bridge Farm, Semer, Suffolk; D. Watson, Bois Hall, Brentwood, Essex; Edward Auston, Waterhouse Farm, Ardleigh, Essex; Hy. Fulcher, Finningham, Suffolk; H. G. Walne, Kettleburgh Hall, Suffolk; D. S. Carrod, Hill Farm, Felsham, Suffolk; W. A. Fairhead, The Lodge, Thorpe le Soken, Essex; J. B. Bolton, Park Farm, Doddinghurst, Essex; Alfred D. Newson, Old Newton, Suffolk.

The results were as follow:—

Gold Cup.—R. J. Thurman, Bridge Farm, Semer, Suffolk.

Silver Medal and Diploma.—E. S. Coppen, Station Farm, Copdock, Suffolk.

Bronze Medal and Diploma.—Edward Auston, Waterhouse Farm, Ardleigh, Essex.

"Mark Lane Express" Diary.

Nov.
26 and 27. Tunbridge Fat Stock and Poultry Show.
27 and 28. Whitchurch (Salop) Dairy Farmers' Association's Show, at Whitchurch.
27 and 28. Lord Tredegar's Agricultural and Poultry Show, at Cattle Market, Newport, Mon.
29. Sale of Hackneys and Harness Horses belonging to Sir Oswald Mosley and Mr. J. T. C. Eadie, at Rolleston Hall, Burton-on-Trent.
29 and 30. Chippenham Agricultural Association's Show, at Chippenham, Wilts.
30. Sale of Shire Mares, Fillies, and Geldings, at Peterborough Repository.

Dec.
1 to 6. Birmingham Cattle and Poultry Show, at Bingley Hall.
4, 5, and 6. Leeds Smithfield Club's Show, at Camp Road, Leeds.
4. Cowbridge and County Farmers' Club Society's Show, at Cowbridge.
5. Forres and Northern Fat Cattle Club's Show, at Forres.
5 and 6. Redhill Agricultural Show.
5 and 6. Scottish National Fat Stock Club Show, at Waverley Market, Edinburgh.
5, 6, and 7. Royal Dublin Society's Winter Show.
6. Cheese Liverpool and District Cowkeepers' Association's Show, at Liverpool Corporation Haymarket.
7. Weeke Christmas Fat Stock Auction Show.
8. Meeting of the Bath Chamber of Agriculture; Lecture on "Bacon Curing," by Mr. Loudon M. Douglas, A.I.M.E.

Webb and Sons' Root Competition.

The awards in the above competition for the valuable prizes offered by Webb and Sons, the Queen's seedsmen, Wordsley, Stourbridge, for root crops grown from their seed, and with the aid of their special manure, have just been decided. The judges were: Mr. E. Bennett, Patshull Farm, Wolverhampton; Mr. W. Hier Evans, Radyr Court, Llandaff, Cardiff; Mr. Lewis Roach, Quatt, Bridgnorth; and the following is a copy of their awards, from which it will be seen that some heavy crops have been grown this year:—

District 1.—Five acres of Webbs' swede, open to the Counties of Salop, Stafford, Montgomery, Warwick, and Leicester. First prize, £15 15s.: Mr. F. H. Sharrod, Charrington Manor, Newport, Salop, 35 tons 5 cwt. 2 qrs. 24 lbs. per acre; second prize, £10 10s.: Mr. W. Nunnerley, Kenwick, Ellesmere, Salop, 34 tons 7 cwt. 0 qrs. 16 lbs. per acre; third prize, £5 5s.: Mr. Edward James, Donnington Farm, Newport, Salop, 27 tons 14 cwt. 1 qr. 4 lbs. per acre. Three acres of Webbs' mangold. Prize, £5 5s.: Mr. J. E. Weaver, Stone Mill, Stone, Staffs., 58 tons 12 cwt. 3 qrs. 12 lbs. per acre.

District 2.—Five acres of Webbs' swede, open to the Counties of Hereford, Monmouth, Brecon, Glamorgan, Carmarthen, and Pembroke. First prize, £15 15s.: Mr. John Davies, Hoddens Down, Reynoldstone, R.S.O. Glam., 35 tons 12 cwt. 3 qrs. 12 lbs. per acre; second prize, £5 5s.: Mr. A. F. Partridge, Wharton Court, Leominster, 33 tons 5 cwt. 2 qrs. 24 lbs. per acre. Three acres of Webbs' mangold. Prize, £5 5s.: Mr. Philip Price, Howick Farm, Chepstow, 63 tons 10 cwt. per acre.

District 3.—Five acres of Webbs' swede, open to the Counties of Oxon, Berks, Bucks, Wilts, Hants, Surrey, Worcester, and Gloucester. First prize, £5 15s.: Mr. H. W. Stilgoe, The Grounds, Adderbury, Banbury, 30 tons 8 cwt. 2 qrs. 8 lbs. per acre; second prize, £5 5s.: Mr. J. R. Butler, Churchill, Kidderminster, 30 tons 5 cwt. 2 qrs. 24 lbs. per acre. Three acres of Webbs' mangold, open to the Counties of Oxon, Berks, Bucks, Wilts, Hants, Surrey, and Worcester. Prize, £5 5s.: T. Simpson Jay, Esq., Warren Farm, Wimbledon, 54 tons 1 cwt. 1 qr. 20 lbs. per acre.

District 4.—Three acres of Webbs' mangold, open to the County of Gloucester. Prize, £5 5s.: Mr. F. Rymer, High Woolaston, Lydney, 42 tons 14 cwt. 1 qr. 4 lbs. per acre.

District 5.—Five acres of Webbs' swede, open to the County of York. First prize, £10 10s.: Mr. W. Scorer, Skelton, Ripon, 34 tons 8 cwt. 2 qrs. 8 lbs. per acre; second prize, £5 5s.: Mr. J. Barker, Ellerton Hill, Scorton, 33 tons 2 cwt. 3 qrs. 12 lbs. per acre. Three acres of Webbs' mangold. Prize, £5 5s.: Mr. W. Moore, Holtby Manor, Dunnington, York, 49 tons 10 cwt. per acre.

District 6.—Five acres of Webbs' swede, open to the Counties of Norfolk and Suffolk. Prize, £10 10s.: Mr. T. Kidner, Halvergate Hall, Norwich, 39 tons 4 cwt. 1 qr. 4 lbs. per acre. Five acres of Webbs' mangold. Prize, £5 5s.: Mr. S. Nightingale, Scratby Hall, Great Yarmouth, 39 tons 14 cwt. 1 qr. 4 lbs. per acre.

District 7.—Five acres of Webbs' swede, open to the Counties of Bedford, Cambridge, Cornwall, Cumberland, Cheshire, Derby, Devon, Dorset, Durham, Essex, Herts, Huntingdon, Kent, Lancaster, Lincoln, Middlesex, Northumberland, Notts, Northampton, Rutland, Somerset, Sussex, Westmoreland, Cardigan, Carnarvon, Denbigh, Flint, Merioneth, and Radnor. First prize, £15 15s.: Mr. S. S. Raingill, The Grange, Ringway, Altrincham, 48 tons 8 cwt. 2 qrs. 8 lbs. per acre; second prize, £5 5s.: Mr. W. Little, Oulton Hall, Wigton, Cumberland, 40 tons 11 cwt. 1 qr. 20 lbs. per acre.

District 8.—Five acres of Webbs' swede, open to the Counties of Roxburgh, Haddington, Berwick, Edinburgh, and Linlithgow. Prize, £10 10s.: Mr. John Meikle, Grougfoot, Linlithgow, 31 tons 17 cwt. 0 qr. 16 lbs. per acre.

District 9.—Five acres of Webbs' swede, open to the County of Perth. First prize, £10 10s.: Mr. John McLaren, Powside, Errol, 33 tons 10 cwt. 2 qrs. 24 lbs. per acre; second prize, £5 5s.: C. A. Murray, Esq., Taymount, Stanley, 32 tons 8 cwt. 2 qrs. 8 lbs. per acre.

District 10.—Five acres of Webbs' swede, open to the Counties of Forfar, Fife, and Kinross. Prize, £10 10s.: Mr. James Auchterlonie, Leckerstone, Dunfermline, 34 tons 0 cwt. 2 qrs. 24 lbs. per acre.

District 11.—Five acres of Webbs' swede, open to the Counties of Aberdeen, Banff, Kincardine, Inverness, and Elgin. Prize, £10 10s.: Mr. George A. MacLean, Westfield, Elgin, 33 tons 4 cwt. 1 qr. 4 lbs. per acre.

District 12.—Five acres of Webbs' swede, open to the Counties of Dumfries, Kirkcudbright, and Wigtown. Prize, £10 10s.: Mrs. A. Craig, Cumstown Mains, Kirkcudbright, 42 tons per acre.

District 13.—Five acres of Webbs' swede, open to the Counties of Stirling, Dumbarton, and Clackmannan. Prize, £5 5s.: Mr. Alex. Lucas, Craigton Farm, Causewayhead, Stirling, 34 tons 14 cwt. 1 qr. 4 lbs. per acre.

District 14.—Five acres of Webbs' swede, open to the County of Ayr. Prize, £10 10s.: Messrs. J. and W. McKerrow, Dalmilling, St. Quivox, Ayr, 35 tons 12 cwt. 3 qrs. 12 lbs. per acre.

District 15.—Five acres of swedes or turnips, open to the County of Peebles. Prize, £5 5s.: Mr. Charles A. Gracie, Easter Happrew, Stobo, 28 tons 11 cwt. 1 qr. 20 lbs. per acre.

District 1.—Five acres of yellow turnips, open to the County of Lanark. Prize, £5 5s.: Mr. George Findlater, Jerviswood Mains, Lanark, 44 tons per acre.

The second Martinmas hiring fair at Lancaster was held on the 17th inst. There was a large attendance of farmers and servants and a strong demand for all classes of farm labour. Male servants demanded wages slightly in advance of those obtained at Whitsuntide, but failed in most cases in obtaining them. Boys were very plentiful, and a large number were engaged at fairly good wages. The best female servants asked higher rates. First-class men obtained £16 to £20; second class, £12 to £15; youths and boys, £7 to £12; best women, £12 to £14; second class, £8 to £9; girls, £6 to £8.

Farm Fire. £500 Damage.—On Monday night a fire was discovered on the farm of Mr. Reuben Stubbs, an extensive agriculturist, of Little Leigh, between Warrington and Northwich. A workman at Brunner and Monds' Chemical Works, returning from duty about 10.50, noticing a blaze in the stockyard, went to the farmhouse, roused the inhabitants, and, running to the stable, obtained a horse, on which he proceeded to Northwich, where he summoned the fire brigade, which made a smart turn out, and by its means the fire was confined to two large corn stacks, efforts to save which were hopeless. The damage is estimated at £500. The fire is supposed to be the work of an incendiary.

Agricultural Values and Changes.*

(Continued from page 667.)

Difficulties are Frequently Cropping up

in rural districts now under bye-laws really applicable to urban districts only.

The effect of these bye-laws is to make it necessary in all alterations of premises, or any new buildings erected in future, to supply plans and specifications to the sanitary inspector, whether such work relates to a populous district or to a country village, and also to detached farm premises. I think that some exception should be made with reference to an isolated farm house and buildings and also to detached premises in a country village.

The Acts regulating the ventilation, drainage, and area of cow-houses are most important, and have a far-reaching tendency all good in their way, and might be carried out in all new buildings, but it would be a serious and expensive undertaking to remodel altogether the present cow-sheds and premises.

A good deal of dissatisfaction has been felt in the country with reference to the requirements of the model regulations issued by the Local Government Board for the guidance of local authorities in framing regulations under Section 13 of the Dairies, Cowsheds, and Milkshops Order, 1885.

It was felt that the 800 cubic feet of air space required per cow was excessive, and the Council, at the suggestion of the Counties Palatine Provincial Committee, approached the Board on the subject with a view to some modification of this requirement, with the result of eliciting an explanation from the Board to the effect that they did not propose to lay down any requirement as to cubic space in the case of cowsheds, the cows from which were habitually grazed, but no modification of the requirement could be made in cases where the cows were not habitually grazed out of doors.

It is probable that this will to some extent meet the dissatisfaction which prevails on the subject, and will tend to lessen the very considerable additional difficulties with which the milk trade was threatened.

It has been comparatively easy to give my experiences during the past 60 years, and to comment on the difficulties which tenant farmers have had to endure, and also on the sacrifices made by landlords to assist them. But it is not so easy to say what are

The Probabilties of the Future,

and I approach this part of my subject with great diffidence.

There have been from time to time prognostications of a very pessimistic character. It has been said on the one hand that corn growing and meat production are practically things of the past in this country, and that the home market for milk, cheese, and butter is also seriously threatened, while on the other hand more favourable prophecies have not been wanting, nor has there been any lack of practical suggestions for improvement, but in this connection we have, I think, something to learn from the past. Agriculture has seen so many alternations of prosperity and depression in the past, that these facts alone should teach us to look with hope to the future, should encourage us to be patient under difficulties, and make us careful in good times to provide as far as possible for times of depression, as it is in the nature of things that agriculture must always be greatly affected by the seasons, whether they be good or bad. There never was a time when it was more desirable to cultivate the good relations between landlord and tenant which have existed in the past, while, at the same time, it was never more necessary to insist on a strict adherence to the contract of tenancy, especially as regards the maintenance of a good condition of the holding, if these friendly relations are to be preserved. It seems unnecessary to say that the rent which a tenant is called upon to pay should be fairly fixed with due regard to the condition of the land and proximity to railways, roads, and markets, as well as to the convenience of the house and premises (which are so important), and also with reference to rates and charges, whether paid by landlord or tenant, a fair allowance being made for interest on tenant's capital. It is my experience that many of these questions have not been so carefully considered as they should have been, and that no sufficient distinction has lately been made between holdings of different characters and possessed of different advantages.

A great deal has been said about

The Agricultural Holdings Acts

of 1875 and 1883 as well as the new Act of 1900. I do not at this point propose to discuss the latter measure, but I believe that under the two former Acts a great deal was done to improve the agreements with agricultural tenants and the allowances to be made for compensation on quitting. At the same time some diversity of opinion has arisen as to the principle in making these valuations, and in many cases it is difficult, even with every disposition to do so, to arrive at what is fair and just. I will only say here that an outgoing tenant is entitled to a fair remuneration for all unexhausted improvements made by him before entering, taking into consideration the mode of management, but that the incomer should not be called upon to pay for anything for which he

---

* The opening address by Mr. J. Ian Shaw, President, at the ordinary general meeting of the Surveyors' Institution, November 12th 1900.

cannot be recouped in the ordinary way of farming. The question of tenant right is a most important one.

I think there is no doubt that ultimately there must be

A Great Change in Many of the Present Holdings;

the very large farms will probably remain unaltered and be let to the present or other similar tenants at a low rental, in order to avoid the outlay for additional homesteads and buildings. Many of these farms are the result of a strong feeling among many landowners in the Midland Counties 60 years ago and subsequently that small holdings should be thrown together, as it was considered that a farm of from 400 to 600 acres could be better and more economically managed in proportion than the smaller farms, and large homesteads were erected accordingly. This has proved a great mistake, and it is now very difficult to let large farms. The rents of these large farms have gone down very much, in some cases 40 to 50 per cent., and in consequence of the labour difficulty very few tenants can be found to undertake such occupations. I am therefore of opinion that generally large farms in the Midlands should be reduced in size as much as practicable, to farms of, say, 150 to 200 acres or thereabouts, so that the tenant will be to some extent more independent of the labour question, which is now becoming so acute. Certainly the tenants of this class of farms have lately proved the most successful farmers. I have had the satisfactory experience of dealing with men who have been farm labourers, and who by great industry and frugality have succeeded in becoming tenants of small farms of 50 to 100 acres under liberal landlords, and they have generally proved very satisfactory tenants.

What may be described as small holdings proper have on some estates and under some circumstances been, and may, I think, continue to be, very successful, but generally it will be difficult for the tenants of such

Small Holdings

to secure a livelihood without some other means of subsistence. I have for many years had to do with a large number of small tenants, and such of them as carry on some other trade or employment have done fairly well, some of them, for instance, making an income from poultry-farming in favourable localities. It has been proposed that such small occupiers should be provided with means to purchase their holdings, but some of us will remember the abortive scheme of Feargus O'Connor and its unfortunate termination, as well as the failure of other similar societies in the disastrous times of twenty to thirty years ago. My opinion is that this or any other similar plan cannot be compared with the system which at present generally prevails on large estates. Small tenants occupying under a large landowner at the usual moderate rent are better off than they would be if they purchased the freehold of the land and paid or allowed themselves a very moderate rate of interest on the purchase money, and in time of distress (the possibilities of which must be considered in the future as in the past) such cases would prove very unfortunate. What I have said about small tenants also holds good of the large occupiers, whose capital is equally needed for working the land to advantage. The

Low Price of Cereals,

and particularly of wheat, is a serious matter for the farmer. I have already given some averages which show an enormous reduction in prices during lengthened periods. Even taking the last thirty years, it will be observed that wheat has decreased from 53s. 7d. to 27s. 10d. per quarter, barley from 37s. 11d. to 24s. 3d. per quarter, and oats from 25s. 3d. to 16s. 4d. per quarter. As regards wheat, it has been assumed by some persons that cheap bread in this country has been assured for all time to come, and although I cannot see any reason to doubt the continued large production of wheat in America and other parts of the world, it was somewhat surprising to hear from Sir W. Crookes, at the meeting of the British Association at Bristol in 1898, that a scarcity of wheat-growing area was within appreciable distance, and that wheat-growing land "all over the world" was becoming exhausted. He, however, added that England in the matter of wheat-growing is as great as ever it was, seeing that a considerable area might readily be added to our wheat acreage were prices to warrant such a step. This is no doubt correct, and notwithstanding the immense importation of wheat, and the consequent low prices, this view of the question is something to rely upon in the future. According to the late Sir J. B. Lawes and Sir J. Gilbert, Great Britain has produced more per acre of any staple food suited to our soil and climate than any country in the world. Although from a national point of view we should be glad to see more profitable wheat-growing in England, the time may come when it may be of the utmost importance to us to have something to fall back upon. Considering the immense quantity of wheat which we import annually, and the low price paid for it, I do not think the British farmer could be advised to take the risk of waiting for any change; we can only deal with the circumstances of the near future as they arise.

Therefore there seems at present little prospect of wheat proving a paying crop. Barley does not seem to have been affected by the repeal of the malt tax, and the price is low; oats are also at a low price, and all that can be done is to give attention to the production of the best quality of anything most adapted to the farm, including the breeding of horses, cattle, sheep, and poultry. If this is done, the low price of wheat will not so seriously affect the future of farming.

In my opinion

Strong Arable Land should be Reduced to Permanent Grass

wherever possible, and that which is allowed to remain under the plough should have a long rotation of crops, from seven to eight years, three or more years in seeds if practicable, so that the corn crops in the course, although few, may be likely to be productive. While the seeds remain the labour will be small and the expenses kept down to the lowest limit. The land will also be kept in good heart and condition. The system, with the application of lime in each rotation, familiar to me many years ago, has been attended with great success. The management of the grazing lands which suffered from the disastrous floods of twenty years ago might also be much improved.

I have before referred to the milk trade and to milk and butter factories, and also to the better class of butter now made at home on the improved method, which I am glad to find is now much appreciated. I think it most desirable that in the future more attention should be paid to these matters, and that if this were done we might reasonably hope that a good deal of trade in butter at present in foreign hands would be diverted to our own country. I am glad to find that arrangements are being made to secure fair prices for milk by the aid of farmers' associations in various counties.

For the grazing of cattle and the production of milk, nothing is of more importance than an ample supply of good water. In consequence of the great extension of the system of subsoil drainage, the rains now pass away so quickly into the rivers and streams that springs have for some years been very low, and during dry times there has lately been a great scarcity of water both for cattle and for household purposes.

It appears from the experiments of practical engineers that a large quantity of

Water Might with Proper Management be Impounded

without interfering with the necessary river supply. More than thirty years ago I was engaged with the late Professor Anstead and the late Dr. Letheby in testing the flow of water in a great part of the River Derwent in Derbyshire, and we found an immense amount of underground water in the valley of the Derwent which could not be accounted for except by underground springs, which I have since proved and utilised. I should also like to refer to Mr. Mansergh's wonderful work in Wales for the supply of water to Birmingham, where, after providing twenty-seven millions of gallons daily for the necessary compensation water for the rivers flowing from the valley, he estimates an excess of seventy-two millions of gallons daily available for Birmingham and other places, and this water if not so impounded would flow rapidly away and be of no practical use. This illustrates what might be done on a small scale in many parts of England, and I should be very glad if the subject could be taken up by some of our engineering members. But

The Labour Question

is after all the most serious of the difficulties which affect agriculture at the present time, and which will, I fear, continue to do so in the future. All sorts of plans and suggestions have been put forward by way of remedy. Of course, everyone is glad to know of the improved position of the farm labourer as regards cottage accommodation, weekly earnings, and other advantages which he now enjoys, but which fail for some reason to keep him on the land. I fear it is the wife and the growing up children who are in many cases responsible for a good deal of this; but except for the shortened hours of labour in towns and the half-holiday on a Saturday, I do not think that many of the men themselves would care to migrate to the town, particularly as in some cases they are not so well off in weekly earnings in the town as in the country. I could mention many actual instances in support of this view. The old-fashioned plan of having more young men as farm servants to live in their master's house kept the men, as they grew up, more in touch with farming. This system no longer exists, and, as a result, young lads get away from home early without any fixed employment, and drift to the towns, where they can have greater freedom as to working hours and find amusement after the day's work is done. I am afraid also that School Board education, although good in principle, does not increase the feeling of attachment to the land, but rather encourages a distaste for country life. The recent report of Mr. Wilson Fox to the Board of Trade is valuable and interesting as showing the improved position of the agricultural labourer, but it does not give any practical suggestion for bringing back the labourers to the land.

Let us hope that by practical consideration of the labourer and by [illegible] we may lead him gradually to the [illegible] country life will bring more real comfort and satisfaction than life in the town.

Referring to the

Agricultural Holdings Act, 1900,

which comes into operation on [illegible], it will be remembered that a large representative meeting was held in the [illegible] when the whole subject was fully discussed and it was thought by most [illegible] sections made at that meeting were embodied in the Act. There are some points in the Act which may not be satisfactory to those [illegible] but I think views one way or the other [illegible] I think, have been better if we could have had a consolidating Act embodying the provisions of the sections of the Act of 1883 which are retained and the other Acts which are also in force. Without entering upon any further detail I am of opinion that the Act of 1900 may be considered a fair settlement of the question, and I trust that it will be accepted as such both by landlord and tenant.

I have given my own personal experience of agricultural matters in the past, and may perhaps make some suggestions for the future. Although there are still many difficulties to contend with, I think we may reasonably hope that with sufficient capital, and with judgment and care farming in England under ordinary circumstances may yet prove fairly satisfactory.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended November 17, 1900, together with the quantities imported in the corresponding week of the previous year :—

	1899.	1900.		1899.	1900.
	No.	No.		Cwt.	Cwt.
Cattle ..	6,457	8,404	Wheat ..	[illegible]	[illegible]

The Harvest in Orkney.—A Kirkwall correspondent, writing at the beginning of last week gives a melancholy account of the Orkney harvest home. Harvesting there was still unfinished, and part of the crop that was cut eight weeks ago is still lying on the fields. So excessively wet has the weather been that two consecutive dry days was a thing unknown. Such a protracted harvest is never remembered in Orkney before. The crop is a heavy one. In some places it was all gathered long ago; in others none is secured.

Monmouthshire Winter Fair.—This fair was held on Thursday, and the supply of cattle was the largest for many years. Sheep, as usual at this fair, were not numerous. The supply of horses was scarcely up to the average. Pigs were not well represented. Trade in store cattle was dragging, the supply being more than equal to the demand. Best fat beasts sold quickly, as did useful milch cows and cows and calves. The horse trade was scarcely as brisk as formerly, but good heavy carts and smart roadsters changed hands freely; a few two-year-olds on offer were all sold. Cart horses made from £48 to £60; pit horses, £30 to £40; 'bus horses, £28 to £30; two-year-old colts, £25 to £30. Quotations :—Best beef, 6d. to 6½d.; [illegible] qualities, 5½d. to 6d.; [illegible] 7d. to 7½d.; wether mutton, 7d. to 7½d.; ditto, 5¾d. to 6d. per lb.; pork, 10s. to 11s.; bacon, 9s. 6d. to 10s. per score. The following prices were realised under the hammer of Messrs. Nicholas, Davies and Atkins, Monmouth and Newnham :—Heifers, £12 to £16 10s.; bullocks, £15 to £19 10s.; calves, 24s. to 51s.; bullocks, £15 to £19 10s.; calves, 24s. to 51s.; wethers, 45s. to 51s.; ewes, 40s. to 41s. 6d.; lambs, 16s. to 31s. 6d.; bacon pigs, £4 2s. 6d. to £6 12s. 6d.

SOCIETIES.

CENTRAL AND ASSOCIATED CHAMBERS OF AGRICULTURE.

NOTICE OF MEETINGS.

The following MEETINGS of the CENTRAL AND ASSOCIATED CHAMBERS OF AGRICULTURE will be held (by permission of the Society of Arts) at the House of the Society of Arts, John Street, Adelphi, on Wednesday, December 12th, 1900, viz.:—

1.—10.30 a.m., the Business Committee.

2.—11 a.m., the Council Meeting, at which Members of the Council representing either the Central Chamber or Associated Chambers are requested to be present.

AGENDA.

To transact General Business.

To receive Communications.

To receive Reports of Committees (if any).

To draw up the Annual Report of the Council.

3.—11.30 a.m. (or at such hour as the business of the above Council Meeting is concluded), the ANNUAL MEETING OF THE CENTRAL CHAMBER, at which all Deputies and Subscribing Members are requested to be present.

AGENDA.

To receive the Auditor's Report.

To appoint an Auditor for the ensuing year.

To receive the Annual Report of the Council for 1900.

To consider Alterations in the Laws, as recommended by the Business Committee and adopted by the Council on November 6th, 1900. The Business Committee also recommend that Law No. 37 shall in future read as follows, the Alteration consisting of the additional sentence printed in italics :—

37.—The Officers of the "Central Chamber" shall be a "Chairman" and "Vice-Chairman," a "Treasurer," "Auditor," and "Secretary," the retiring "Chairman" not being eligible to the "Vice-Chair" for the space of one year. *The "Council" shall have power to fill up any vacancy caused by the death, resignation, or incapacity to act of any such officer.*

N.B.—A copy of the Laws, including the Alterations proposed, will be sent to any Subscribing Member of the Central Chamber upon application to the Secretary.

To consider the following subjects :—

1. The working of the Agricultural Rates Act of 1896 and the question of its renewal.
2. Tuberculosis and the working of the "Model Milk Clauses" in the Private Bills of Local Authorities.
3. Question of the registration of pig dealers and the inspection and disinfection of their premises.

Associated Chambers and Clubs are requested to consider the above subjects, and to send up any resolutions which they may pass thereupon to the Secretary of the Central Chamber before the Meeting of the Business Committee, at 5 p.m. on Tuesday, December 11th, 1900. Suggestions of subjects for discussion at future Meetings of the Council should be forwarded at the same time.

ERNEST H. GODFREY, Secretary.

ANNUAL AGRICULTURAL DINNER.

SMITHFIELD WEEK, 1900.

Notice is given that the ANNUAL AGRICULTURAL DINNER (under the auspices of the Central and Associated Chambers of Agriculture and the Farmers' Club) will be held during the Smithfield Club Show-Week, in the THRONE ROOM of the HOLBORN RESTAURANT, LONDON, on TUESDAY, DECEMBER 11TH, 1900, at 7 p.m.

The Chairman of the Farmers' Club (Mr. J. R. EVE) will preside, and it is hoped that the President of the Board of Agriculture will be present, as well as his immediate predecessor.

All farmers and others interested in agriculture are invited to attend.

The price of tickets (exclusive of wine) will be as follows :—

If purchased before December 8th, 1900, 5s. 6d. each.

If purchased after December 8th, 1900, 6s. each.

Members and others who propose to attend are requested to apply as soon as possible for tickets, with a postal order for the amount. (Evening dress optional.)

ERNEST H. GODFREY, Secretary.

COW MILKER ! COW MILKER ! ! The celebrated self-acting Cow Milker supersedes hand labour. Milk each cow in four minutes effectually. Price 6s. each, delivered.—Circular, with testimonials, on application, N. BUCHANAN, 9, Sandon Place, Sheffield.

MISCELLANEOUS.

DISTRIBUTOR for Basic Slag sows 7ft. wide ; price £9.—Patentee, T. A. MEGGESON, Stockton-on-Tees.

SWINE FEVER.—Not a cure, but a certain preventative. I have used a preparation of my own make for thirty years, and have never had swine fever ; also, given to sows, prevents them losing or having heated milk, which is the cause of so much loss with young pigs. It keeps feeding pigs healthy, so that they are fit for the butcher in a much shorter time. I will send enough for twenty pigs for six months for 10s.—JOHN WARTH, Farmer and Dealer, Chatteris, Cambs.

CHEAP PORK.—After years of study I can at last bring before pig keepers a Medicated Meal that will produce pork at much less per stone than any other on the market. Try it and publish results is all I ask. Price 9s. per cwt., 140s. per ton, in bags, on rail Chatteris ; cash with order.—JOHN WARTH, Farmer and Dealer, Chatteris, Cambs.

SEEDS, PLANTS, ETC.

CABBAGE PLANTS ! CABBAGE PLANTS !— Autumn - sown, Enfield Market, Early Rainham, Wheeler's Imperial, Red Pickling, Early and Late Drumhead, White and Brown Cos Lettuce.—T. DAVIES, Tangley, Guildford.

SEED POTATOES.—Early, mid-season, and main crop varieties : Challenge, Conquest, British Queen, and Up-to-Date. All of excellent quality and shape, and exceptionally heavy croppers, grown specially for seed from select stocks. Special quotation for autumn delivery. Illustrated descriptive catalogue and prices on application to "Manager," Earl of Rosebery's Home Farm, Dalmeny Park, Edinburgh.

CABBAGE PLANTS, grand, splendid stocks, Early and Large Yorks, Drumheads or Lates, Savoys, etc., 1s. 6d. per 1,000, 10s. per 10,000, prepaid. Bags free. —GILLIES, Northfield, Prestonpans, Scotland, Largest Plant Grower in Britain, steadily patronised by the leading Stock and Dairy Farmers and Market Gardeners.

ROSE TREES, PLANT NOW.—From the Garden of England, 150,000 Show Varieties (named), six, 3s. ; twelve, 5s. 6d., carriage paid. Fruit Tree catalogues free. State wants.—Nursery, M.L., Fruit Co., Ltd., Sittingbourne, Kent.

The Patent "HANDY" GRINDSTONE

Registered.

INVALUABLE TO Farmers, Gardeners, Joiners, Butchers, Amateurs, etc.

AWARDED FOUR SILVER MEDALS BY LEADING AGRICULTURAL SOCIETIES

Attention is directed to this exceedingly useful and effective little Grindstone. It is the only Grindstone fitted with a seat and double treadles, by which arrangement the weight of the operator when seated keeps the machine as steady as a rock, and the double treadles balance the body and prevent the hands from wobbling during the process of grinding. Another special feature is its portability. It is splendid value.

SILCOCK'S CALF REARING.

CALF MEAL

To rear Calves economically and profitably use SILCOCK'S SOLUBLE CALF MEAL. Thousands of Calves are reared on it annually; it is a true milk substitute, is very easily digested, dissolves at once in water, gives least trouble in preparing, does not scour, is very economical in use, as one pint makes one gallon of thick gruel, and it fits early for cake feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter-milk, and whey the figures stand at 12½, 9, and 6 per cent. respectively. With the minimum of cost and trouble SILCOCK'S CALF MEAL gives the maximum results. Use SILCOCK'S SOLUBLE CALF MEAL, feed regularly, in right quantity and at correct temperature and you will have little trouble in rearing paying calves.

Price, 12/6 *per cwt., carriage paid. 5 cwt. lots,* 12/-.

BIBBY'S "CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the "Cream Equivalent" fed Calves as having been fed on New Milk.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

Mark Lane Express Agricultural Journal.

The Only English Journal devoted exclusively to Agriculture.

MONDAY, DECEMBER 3, 1900.

Correspondents are requested to address all communications for the Editorial Department to THE EDITOR, "Mark Lane Express," 1, Essex Street, Strand, London, W.C.

Advertisements, Subscriptions, and business communications should be addressed to THE PUBLISHER, "MARK LANE EXPRESS," 1, Essex Street, Strand, London, W.C.

According to the United States Department of Agriculture's estimate of average farm yields during 1900, the average number of bushels of corn is 25·3 per acre, or a fraction less than a year ago, though much better than in 1898. The yield of buckwheat is estimated at fifteen bushels per acre, which is nearly two bushels below the average for the decade. The potato crop is put at 80·8 bushels, being much above the past ten-year average. The hay estimate is 1·28 tons an acre, which exactly coincides with the average since 1890.

THE SMALL FARM QUESTION.

No fewer than three important papers or lectures recently have had their bearings directly or indirectly on the utility of the small farm system. Mr. John Shaw, in his inauguration address as president for the year of the Surveyors' Institute, treated on small versus large farms, giving distinctly his decided preference for the latter on the ground that his experience as a land agent proved that any farm over 200 acres was unlettable, whereas those from 50 to 150 acres—the chief part of the labour of which the farmer, with the help of his family, could perform himself—were always in demand. Mr. Shaw drew the rather questionable conclusion from this that the opinion so generally current a quarter of a century go, that large farms are more economicly worked than small ones, was a fallacy. Scarcely does it follow that because big holdings are not in demand that they cannot be worked more economically than small ones if they can be occupied by men of ample capital. They can be rented often 50 per cent. less than smaller holdings cost, an important factor in the account bearing on economic working, and labour-saving machines and implements dispense with manual hands very largely. Then, again, although Midland farmers may be found in Mr. Shaw's own district capable of dealing with the labour of a farm between a hundred and a hundred and fifty acres without hiring, many of that class in other districts have to hire a great deal. Indeed, as a rule, it will be found, taking the kingdom generally, that the occupiers of from one hundred to two hundred acres are the farmers just now feeling the pinch of labour scarcity most severely.

At a meeting of the Royal Statistical Society about ten days since a very startling picture was held up to view by Mr. T. A. Weldon, on the revolutionary change in the population of town and country from the commencement of the century until 1891, when the last census was taken. While the density of the rural population, which was 100 persons to the square mile, had only increased to 130 in 1891, the total of the country people being 4,721,252 at the former period and only 5,534,000 at the latter, the inhabitants of towns had increased from being only 36 per cent. of the entire population to be 64 per cent., after the lapse of ninety years. We may be well assured that the disproportion has marvellously increased in the nine years since 1891. Mr. Weldon could only [illegible] by taking the last census tables; but when the next numbering of the people takes place, which will be very soon, it will be found that the country has not increased to many inhabitants as the towns.

A great many the lately engaged [illegible]

in the vain endeavour to solve the problem how to bring back population to the land again. We make use of the word "vain" because projects hitherto tried have lamentably failed, and it does not appear that many of those at present put forward as remedies meet entirely the exigencies of the case. Hodge has fallen out with the avocation of his fathers. His intense dislike to farm servitude is deep-rooted. Apparently he will accept any other toil as preferable to that, and even inviting him to come back to the land as his own master has not suceeeded perfectly well, as both legislative and patriotic schemes for increase of small holdings have not proved effective enough to remedy the evil.

At the Women's Institute on November 23rd, a very remarkable lecture on the decrease of rural population, and how to keep the land from going out of cultivation as the result, was delivered by Mrs. Chamberlain, of the Women's Agricultural and Horticultural International Union. After stating, truly enough, that the absorption of popular attention by the war in South Africa had prevented this subject from receiving the consideration which seemingly it demands, she propounded the question, "Is the land to go out of cultivation?" To this she gave an emphatic negative. Women would have to take the matter up, she said, after which she unfolded a pleasing Utopian scheme, showing the way in which it would have to be done.

In the first place, estates are to be cut up into small holdings for the occupation of Mrs. Chamberlain's army of women farmers. Three or four of the latter are to pool their small savings for capital, that they may occupy one of the little farms, but working separately, one at gardening, another taking charge of pigs and poultry, and a third, presumably, going in for dairy work. Who is to perform the rough work, such as filling dung carts, harnessing horses, and ploughing was not stated. Perhaps the ladies would prefer for some male creature to do that sort of thing, if one can be hired; but apart from this there would seem to be some few difficulties in the way of working successfully so charming a project. "First catch your hare," Mrs. Glasse would say, and although the ladies of present times accomplish many difficult things, and are rapidly elbowing what has been in the past deemed the stronger sex out of counting-houses, correspondence bureaux, and even printing offices, we are not quite sure that the owners of large estates would be able or willing to provide all the small holdings required. Women have often proved the best of farmers, but they were individual agriculturists, and there is no knowing how the ladies would agree after pooling and electing to live together.

Then, again, where is the necessary capital to come from for working Mrs. Chamberlain's scheme? Those who happen to have those small savings she would have pooled are, we fear, of the upper class of governesses, schoolmistresses, and music teachers—poor distressed ladies who have seen better days, but still manage by hard work and frugality to put away a little for a rainy day. These do not all belong to the big army of teachers, sempstresses, and clerks, who get such a wretched pittance for what they do. Desirable as it may be to ease the towns of thousands of such, they have no money to pool, so that it appears that in most cases the capital would have to be provided as well as the small holdings.

Moreover, the greatest difficulty of all, perhaps, would be to conquer the aversion young ladies of the labour class have at present to menial duties. Mrs. Chamberlain, it is true, argued that social movements usually worked downwards, and that when working women saw their cultured sisters taking delight in gardening, poultry-keeping, etc., they might be induced to follow their example. Perhaps so, but we apprehend we shall have to wait a great many years before this scheme, as well as many another pretending to deal with what is getting to be a matter of urgency, will serve the object.

AGRICULTURAL POLITICS.

By a Lobbyist.

Mr. Hanbury is, in one respect, frank. He has had no previous experience either of farming or of agricultural politics; but he will, he says, do his best. This is an excellent admission, so far as it goes. Let me, however, put this question to Mr Hanbury, who certainly is one of the ablest men in the Ministry. He is a great figure in the industrial world of the north. How would he care to have as the director of his industrial destiny a man who had to confess immediately after employment that he knows nothing about the business?

How would he care to have as his representative a man whose first confession is that of ignorance? Of course he would reject such a person at once, and decide that he should not be an officer of his. I am bound to say that Mr. Hanbury has not the one fatal defect of unrelieved ignorance. He knows his limitations. It is impossible, said Jeremy Taylor, "to make people understand their ignorance, for it requires knowledge to perceive it." Mr. Hanbury has this knowledge.

I see that the right honourable gentleman is to attend an agricultural dinner. Well, let me put another question to Mr. Hanbury, which I know he will, with his characteristic honesty, readily answer: Supposing he rose as Minister of Agriculture to reply to the toast of "Agriculture," and made the following confession: "Gentlemen, I rise to reply to the toast of 'Agriculture,' and I have to confess that I know nothing about the subject on which I have to speak. I have control of the legislative destiny of the interest; I know nothing of it. I have the power of directing it either along the path of ill-fortune or success; I am absolutely ignorant of the path which should be pursued. I have to array myself in the agricultural garb; and I tell you frankly I do not know how to get my hands into the traditional smock-frock."

What would be the comment of Mr. Hanbury himself to this indication of Mr. Hanbury's qualifications? Mr. Hanbury is enthusiastic in his expressions of sympathy with agriculture. "There never was," says Pope, "any party, faction, sect, or cabal whatsoever, in which the most ignorant were not the most violent; for a bee is not a busier animal than a blockhead." We want neither bees nor blockheads at the head of our great administrations. The fault of Mr. Hanbury's appointment does not, of course, lie with Mr. Hanbury. It lies with our political system.

Now, I have again and again confessed to the great ability of Mr. Hanbury. No man can, indeed, be possessed of a keener sense of it than I am. To what, then, must we attribute the fact that the first speech delivered after his appointment to the position of Minister for Agriculture contained not the slightest indication of policy or purpose? Mr. Hanbury is not a statesman of the Melbourne type—he is not the type of politician who, being appalled by the difficulties of a political position, would ask, "Can't we leave it alone, then?" He is the last man in the world to imagine that the economic problems which concern agriculture have been solved by the passing of the Agricultural Holdings Act Amendment Act. He is, in fact, a statesman who would prefer to shape a career for himself.

How comes it, then—this I again ask—that his first speech betrayed not the faintest indication of a policy? It will be urged, perhaps, that it was early to expect such an indication. To that I make the obvious reply that the agricultural world had the right to know something of the designs of a statesman who to it is really an unknown quantity. The failure to convey this knowledge would, in the case of a man of lesser calibre, be interpreted to mean indifference. The fact is—and it would be foolish to disregard it—that Mr. Hanbury has been given a position for which he had no desire, and with which he, I fear, has little sympathy. He had to be subjected to the necessities which confronted Lord Salisbury.

Of course, it would be a stupid mistake to imagine that the House of Commons will in the December sitting devote even a passing attention to agriculture. When the Parliamentarians assemble to-day they will do so for one specific purpose; and excepting a few splenetic anti-Ministerialists, and excepting the young politicians upon whom the fascination of a Parliamentary life has not palled, they will be glad when that purpose has been accomplished.

Besides, it would be a mistake in the first session of the new Parliament to obtrude the agricultural question on the attention of the legislators. The House of Commons can never give a prolonged and a sustained attention to one subject, always excepting Ireland. It would be recalled, the moment any attempt was made to attract its sympathy for the benefit of the farmer, that the last session of the previous Parliament was largely given up to that interest, and that the most significant measure which it produced was designed to give the farmer a more defined legal interest in the value which his skill and money have given to the soil. This memory would be sufficient to chill all sympathy and warmth.

If I may venture to give advice to those politicians who prefer to be known as Agricultural M.P.s, I would suggest that they should play a waiting game. The lurid issues of the war will excite so intense an interest that it will be impossible to concentrate attention on any important legislative ambition. Then, too, it must not be forgotten that the political atmosphere will be rendered still more exciting, still more electric, by the meditated arraignment of Mr. Chamberlain.

This waiting time should be occupied by a careful digestion of the report of the Commission on Local Taxation. I myself do not believe that this report will effect a revolution. Still there is no reason why the more valuable of its suggestions should not be carried into legislative effect. The waiting time should thus really be a time of preparation. The report could be discussed with local Chambers of Agriculture; Parliamentary opinion might be formulated by means of practically-worded, concise resolutions; and local politicians might thus become familiarised with the idea that taxation reform is inevitable. This would be a much more beneficial work than the intrusion of petty ideas into a chamber charged with a great Imperial duty. The report of the commission must not be permitted to become the grave of the taxation grievance.

Of course, vigilance will be required in another direction. The war will have to be paid for. Whatever money may be exacted from the Transvaal, it is certain that a portion of the cost of the campaign will fall upon the British taxpayer. I do not pretend that Sir Michael Hicks-Beach is possessed by any savage desire to unduly mulct the land and the interests associated with it; but I do know that there will be a resolute attempt made to save the towns. It must not be forgotten that there is a considerable body of politicians who regard Sir William Harcourt's death duties, not as the completion of a great financial resolution, but rather as the inception. I do not want to adopt the Cassandra rôle and to be eternally prophesying dismally. I repeat, however, that these men must be watched. Hence, I contend that the two first duties of the agricultural members should be to seek to give effect to the proposals of the report of the Commission on Local Taxation, and to safeguard the agricultural interest in any new scheme of taxation.

The New President of the Board of Agriculture.

The Right Hon. R. W. Hanbury, addressing a meeting at Preston on Monday last, made some reference to his appointment to office, and to the work of his Department. He said that in regard to the high office to which he had been appointed he had only two regrets. The first was that there did not seem likely to be so much work in it as he had grown accustomed to while practically representing in the House of Commons two important Departments. (Laughter.) It would certainly not be his fault if the Board of Agriculture did not to the fullest extent of its powers try to serve the agricultural interest of this country. (Cheers.) He would put his shoulders to the wheel, that nothing might be left undone to promote the interests of the oldest and perhaps the least prosperous of our industries. (Renewed cheers.) His second regret was that he was not connected with an office more directly bearing upon the interests of his constituents, but he showed how important a bearing the relative decline in the rural population had upon the rate of wages, and the condition

of manufacturers in the towns, and how serious a circumstance it was from a patriotic point of view that the country population, upon whom we must always draw for the defence of the Empire, should have proportionately so greatly declined from what it was at the beginning of the century. (Cheers.) It was not for him now to give an opinion on what the causes of the depopulation of the country districts were, but he ventured to think that the education given in our country villages had not been the kind of education which would best fit children for a rural life. He was glad to think that something had been done by a Preston man, Sir John Gorst, to remedy this state of things, more, indeed, than by any other man living—(cheers)—and he also pointed to the high excellence and great usefulness of the agricultural school at Preston. (Renewed cheers.) He did not admit with regard to any department of the Government that it was absolutely necessary to have an expert at the head of it. We did not set a soldier over the War Office, or an admiral over the Admiralty, or a banker over the Exchequer, or a colonist over the Colonial Office; it was not necessary to get an expert farmer to be President of the Board of Agriculture. (Laughter.) The Board, he was glad to say, abounded in experts, and what was needed at their head was power of administration and power of organisation. (Cheers.) Whether he possessed those virtues he was not going to say; in the two offices he had already filled he had had plenty of opportunities of showing. (Hear, hear.) Every penny he possessed came not from foreign investments, but from his own properties, either its surface or its minerals, which he had been happy enough to discover. His interest in the land of the country was very close, and he would yield to none in his concern for the development of special branches of rural industry, such as dairy farming. (Cheers.)

The *Morning Advertiser*, in discussing Mr. Hanbury's speech, considered that the feeling uppermost in that gentleman's mind was "one of personal disappointment. He would not pretend, he said, to regard his promotion to the office he now holds (with a seat in the Cabinet) with exuberant satisfaction; he expressed regret that he did not seem likely to have so much work as when he practically represented two great departments—the Treasury and the Post Office—in the House of Commons, and seemed to assert with unnecessary emphasis the undeniable truth that appointments to the high offices of State ought to be influenced by nothing but public interest and personal fitness. But it may console Mr. Hanbury to know that if the office of President of the Board of Agriculture (with a seat in the Cabinet) is not so high a one as his merits would entitle him to fill, there is no one who doubts his entire competence to fill it. The office is a new one, and its importance will be very much what he makes it. He sees well enough what it would be desirable to accomplish. If he can do anything to bring back prosperity to the oldest and most important industry in the country, and staunch the flow of the rural population into the towns which is steadily draining the life-blood out of agriculture, he will have deserved more highly of his country than if he had reformed the War Office and reorganised the Postal Service; and if he fails, everyone will know that it was not from want of energy, ability, clearsightedness, or power of organisation, but because a national tendency is too strong a thing for any man to battle against."

"Mr. Hanbury (says the *Morning Post*) is modestly determined to do his best at the Board of Agriculture, and, though it may be regretted that some wider field was not found for his abilities, we have no doubt that his best will be a good one. His plea for Ministers of general administrative capacity, as opposed either to mere experts and animated Blue-books, or to persons with no political qualifications, is decidedly courageous. It is also seasonable; and we trust that it will be inwardly digested at the War Office, the Admiralty, the Irish Office, and in other places where Blue-books and official minutes have for years maintained an unfortunate supremacy. Despite the performance of the town-recruited regiments in the Army, Mr. Hanbury's warning that we must look to the rural population as the first line in our national defensive force is most timely. Nothing but good can come from an intelligent application of the evils of the rural exodus and a willingness to apply such remedies as may be found to be practicable."

"As regards the functions which have devolved on Mr. Hanbury himself (remarks the *Standard*), with the graceful accompaniment, as he mentioned, of Cabinet rank, he did not pretend to be exuberantly satisfied. Few statesmen, we imagine, in this imperfect world, are absolutely content with their lot. The drop of bitterness in the cup of politcal delight which has been presented to the Member for Preston is, we gather, that he cannot find in his new office any adequate scope for his energies. He has been, so to speak, demoralised into a morbid craving for responsibility by having, in the last Parliament, to answer for two great Departments of State. He has borne the load of the Treasury and of the Post Office, and now he is expected to keep in condition with nothing but agriculture to employ his muscle. We believe that, as Minister of Agriculture, Mr. Hanbury will find abundance of work to do quite worthy of his proved ability, and we have every confidence that he will do it, to the advantage of the country and to his own credit. Preston, like other great manufacturing centres, cannot be indifferent to the fortunes of that great industry on which in the last resort the well-being of England depends. If the rural districts are becoming depleted, it is because the bone and sinew of the rural population flock to the towns. Cut off the source of recruitment in the villages, and the physique of the class which labours in the great towns will before long show a grave deterioration. If only to maintain a nursery for the industrial community, it is a national interest to keep a healthy and prosperous body of farmers and labourers on the soil. How to improve existing conditions is a large and involved question. But Mr. Hanbury laid stress on one highly pertinent feature when he spoke of the unsuitability of the present type of elementary teaching for the rising generation of agricultural labourers."

LETTERS TO THE EDITOR.

The Chamber of Agriculture and its Legislative Programme.

Sir,—There were so many unsatisfactory features about the discussion on this subject at the last meeting of the Central Chamber, that I think a more profitable examination might well take place in the columns of your paper.

In the first place the discussion was limited by the chairman to the resolution proposed by Mr. Bowen Jones—that copies of the statement prepared by the Business and Parliamentary Committees should be sent to the various Ministers in the Government. No amendment could be moved to the statement itself, and no resolution as to the priority in importance of the various proposals in the statement. We were not even asked to approve the statement before sending it up to the Government; a most extraordinary course, seeing that it had not been before the Council previously.

The whole history of the statement is unsatisfactory. In the first place, it was supposed to be the programme to which every candidate for Parliamentary honours in an agricultural constituency would be asked to pledge himself. The resolution responsible for this statement was passed on the 29th May last, and was, I believe, the sequel to a resolution proposed by me, and unanimously agreed to by the Shropshire Chamber, that it was desirable that we should have an agricultural programme issued by the Chambers of Agriculture before the General Election. It was surely possible to prepare such a statement, and issue it before the General Election; but, as a matter of fact, the statement was not before us until the election was practically over, and, as far as I know, no candidate in an agricultural constituency was ever asked to support it.

Then, too, such a serious step as the issuing of an agricultural programme ought never to have been taken without the endorsement, and amendment if necessary, of the Central and Associated Chambers. To say that because, at some time or another, the Central Chamber has expressed certain pious opinions in the form of resolutions, that those resolutions are to stand as the first legislative requirements of the agricultural interest, is, it seems to me, absurd, and that opinion is fully borne out when one examines this particular statement.

The first serious omission I have to mention is that there is absolutely no mention made of the necessity for legislation relating to agricultural tenancies. This omission would almost imply that the Chambers of Agriculture are content with the useless and abortive Agricultural Holdings Act passed last session. I think I may safely say that almost unanimously the members of the various Chambers condemn that Act as utterly inadequate, and a grave breach of faith on the part of the late Government with the agricultural community. A deplorable incident of the General Election has furnished an unanswerable argument to those of us who assert that the English tenant who farms well has no real security in his holding. The conduct of Lord Hastings and his agent towards Mr. Burrell Hammond and Mr. Cooper, tenants against whom no fault could be brought except that they refused to prostitute their political and religious faith at the bidding of their landlord, must emphasise the fact that no programme of agricultural legislation will be worth anything at all, which does not demand that the same security of tenure and the same equity and justice be given to the English tenantry as is enjoyed by their Irish neighbours.

And the statement is weak throughout. As the last will and testament of a moribund body it might pass, but as the programme of a chamber claiming to be the most representative voice of the greatest industry in the country, sent out, too, at a time when that industry is in a most depressed condition, it is beneath contempt. To issue a weak programme, intended as the agricultural demand at a General Election, and to send it out after the election is over, argues a lamentable want of vitality, that the Chambers, I believe, the existence of the Chambers of Agriculture themselves, at any rate, as bodies representing the tenant farmers. The slap in the face administered by the late Government over the Agricultural Holdings Act, accompanied as it was with the undisguised contempt Mr. Walter Long never hesitated to show towards the Central Chamber, and followed by the publication of the weak and inadequate statement, too late to be of any service, may well make tenants ask whether it would not be better that they should have an organisation of their own for the protection and furtherance of their own particular interests.

Space will not allow me to take the items of the statement seriatim, but I will just refer to those relating to "Beer Duties and Brewing Materials, and the "Fraudulent Sale of Foreign Meat, two questions that are of the gravest moment to arable farmers. The resolutions relating to brewing materials are those on which the agitation in favour of a Pure Beer Bill was based. That Bill I have no hesitation in saying we are tired of hearing about. To the House of Commons the Pure Beer Bill was a godsend in that it gave them a humorous and laughable entertainment, and they enjoyed themselves as much as they could have hoped to do had they been present at a farce. But, as an agriculturist, I submit that we have too long furnished the House with its amusement, and I think the time has come when some other industry might serve the very useful purpose of sharpening the wits of the legislators.

In place of the defunct resolutions which appear in the statement, it is suggested that "No brewer be allowed to make beer containing more than 20 per cent. of malt substitutes, and that those substitutes be defined," shall take their place. The returns of substitutes used, published in your paper, where it was shown that in some districts the use of substitutes had reached 60 per cent., backed up as it is at the present time by the alarming disclosures of arsenical poisoning from the use of substitutes in beer-making, give us a strong case.

Then as to the fraudulent sale of foreign meat. The resolution in the statement is, "That in the interests of both producers and consumers all retail vendors of imported dead meat be registered, etc." Why the wise men of the Central Chamber included the words "imported dead meat" they only know. We suggest that the resolution read "foreign fed meat," which will include the imported meat killed in this country as well as the frozen meat. It is perfectly reasonable and just to ask this. No one denies that much of the Birkenhead and Deptford killed meat is sold as English. It may be quite as good as our meat, but to sell it as such is a fraud, not only on us but on the purchaser.

My principal reason in writing to you is, however, to urge that either the Chamber of Agriculture shall put its house in order, and enter on a fresh and more vigorous campaign for the furtherance of tenant farmers' interests, or that failing this we tenant farmers withdraw from the Chambers, and form an association of our own, and thereby show the country that the agricultural industry has an organised opinion which must be listened to.

Hinnington, Shifnal. FRED HORNE.

Promoting Wheat Cultivation.

Sir,—Mr. G. E. Francis has just issued a circular in favour of sliding scale import duties on wheat to the members of the Central and Associated Chambers of Agriculture, in which various far-fetched statements appear, amongst these the reckless one that "Bonuses are an evil and impracticable, but even if practicable, could only be of benefit to the farmer, except at a cost to the nation of many millions a year, which would never be sanctioned."

If he knows what evil a bounty on home-grown wheat would be, surely he should have mentioned it. If he does not, as I believe is the fact, he should not have made such a statement if he wishes to be taken seriously.

About the practicability he does not appear very certain, first writing that they are impracticable, then expressing a doubt of that by "and even if practicable." A bounty on home-grown wheat need not cost the nation a farthing, as it would cause a decrease in the price of wheat, as bounties on other articles always have; therefore, the revenue to pay it might be obtained in such a manner by import duties on wheat, as to cause the price to be the same as were there neither a bounty nor an import duty on wheat. Thus the exporters of wheat would furnish the revenue to pay a bounty. The object of the bounty being to give a fixed return from wheat-growing would be accomplished if it varied according to the price.

The effect of the sliding scale import duties on wheat of 1828 and of 1842 was to cause the returns from wheat-growing to be most uncertain. In 1829 an Act was passed that when the price of wheat was below 64s. per quarter an import duty of 27s. 8d. per quarter should be levied; when between 64s. and 69s. this was reduced to 16s. 8d.; and when the price exceeded 73s. the import duty was 1s. per quarter.

It did not favour the avowed desire of keeping wheat at 64s. per quarter. In 1834 the price was 46s. 2d., and in 1835 39s. 4d. In 1839 it rose to 70s. 8d. per

quarter, and this, it is stated, resulted in farmers, whom the continued distress of twenty-five years had taught to refuse leases at the rents asked, to be called upon to pay an additional 10 to 30 per cent. for their holdings. No sooner were the rents readjusted to the landlords' supposed advantage than prices began to decline.

In 1842 an Act was passed by which the import duties on wheat of 1829 were slightly reduced. The scale was intended to keep wheat steady at about 56s. but in 1843, owing to an abundant harvest, wheat declined to 50s. 1d. per quarter.

It matters not whether the scale be fixed for 64s., 56s., or 40s. per quarter, what happened from 1829 to 1846 would take place now were sliding scale import duties on wheat.—Faithfully yours,

31, Cavendish Square, W., THOMAS G. READ.

PRACTICE WITH SCIENCE.

Sewage Farms.

There are, says *Engineering*, three purposes which sewage farms are made to serve: (1) To purify sewage; (2) to grow crops; and (3) To provide comfortable berths for those employed on them. Now, it is only when the second is given a very subsidiary place, and the third no place at all, that success is attained. The great point is to get a pure effluent—that is the product of the farm; the crops are by-products. Yet greed and incompetence have been the two evils that have ruined sewage farming, and it is only when the reins are in the hands of strong and capable men who can defy economical temptations, either from within or from boards and committees, that it has a fair chance. The Aldershot Camp Farm, a successful instance of sewage farming, has two important points in its favour, but these are partly balanced by several inconveniences. Its one grand feature is its soil. Although by no means uniform, this may be described as pure sand for a depth of several feet. It preserves its open texture, and a newly-prepared seed bed is almost as heavy walking as the seashore above high-water mark. It makes, in fact, an ideal *nidus* for bacterial action; indeed, it is too ideal from the agricultural point of view, for the nitrates are rapidly washed through it, and there is little or no accumulation of fertilisers in the soil, such as would occur if it contained some alumina. Unfortunately, the land is very nearly level, and it is only by great care in alignment that sufficient fall can be obtained in the drains. The other important feature is that no storm water comes to the farm. A few weeks ago we (*Engineering*) visited it, going over every part, and can testify from personal experience that it is quite free from nuisance, and that it fulfils its purpose most satisfactorily. It deals with the sewage of about 20,000 persons, the amount received being about a million gallons a day, as the water supply is very liberal. The farm, as described in *Engineering*, has been converted by intelligent treatment from a nuisance and a continual menace to health, into a model establishment in which all the operations go on in a regular and ordinary manner, and in which waste animal products are broken up by the kindly operations of Nature into their original innocuous elements, and many of them are utilised as plant food, to re-enter the cycle of supporting, first, the lower creation and then man, and finally returning to the farm for a second conversion. All this is effected without annoyance to the neighbourhood.

THE DAIRY.

Preston Christmas Cheese Show.

The Christmas cheese show and fair at Preston was held on Tuesday, and was well attended by buyers, dealers, and farmers. The pitch, which was a record one, consisted of 152 lots and 2,660 cheeses, an increase compared with last year's corresponding fair of 34 lots and 590 cheeses. The demand was somewhat slow, but ultimately a clearance was effected at similar prices to those realised last fair. Quotations:—Common, 50s. to 55s.; medium, 57s. 6d. to 62s. 6d.; best, 65s. to 72s. 6d. per cwt. The prize lots were sold by auction, and caused some spirited bidding, one lot reaching 102s., 3s. below the record price.

The prize winners were as follows (the prices realised by their respective lots being given in parentheses):—Class 1—1, G. Whittaker, Kirkland (86s.); 2, W. Proctor, Goosnargh (68s.); 3, H. Bamber, Sowerby (68s.); 4, W. Stuart, Sowerby (70s.); 5, T. Shorrock, Balham (74s.); 6, J. Bee, Bullsnape (70s.). Class 2—1, T. Sanderson, Treales (96s.); 2, T. Braithwaite, Balham (76s.); 3, J. Rayton, Treales (70s.); 4, W. Pearson, Elswick (70s.); 5, T. Rich, Whittingham (68s.); 6, C. Gates (sen.), Goosnargh (68s.). Class 3—1, T. Braithwaite, Balham (102s.); 2, E. Barton, Barton (81s.); 3, G. Whittaker, Kirkland (78s.).

FIRST CLASS representatives and agents required throughout the United Kingdom for the sale of "MOLASSINE"—Write for particulars to the "MOLASSINE" CO., LTD., 36, Mark Lane, London, E.C.—[ADVT.]

Whitchurch Cheese Fair.

The monthly cheese fair at Whitchurch was held on Wednesday, when the pitch was a very big one—fully 140 tons, of which about half was show cheese, the annual dairy show taking place on Tuesday and Wednesday. Much difficulty was experienced in locating such a large quantity, and often traffic was congested. Dealers were exceptionally numerous, and all were anxious to do business. There was an excellent demand for the show cheese, which was sold at from 70s. to 85s. per cwt., Mr. Dutton's (Burleydam) champion cheese being purchased by a Manchester firm at £100 per ton. "Card" cheese, especially first, second, and third prizes, was quickly bought up, the quality showing an improvement on previous years. Indeed, there was an all-round excellence. There was also more life in the fair cheese than last month, and nearly the whole of it was sold at prices that must have been satisfactory to the vendors. Although not quite equal to last year, the best dairies realised from 60s. to 68s., and medium and lower grades from 51s.

FARM.

Heavy Crops of Turnips.

Considering that the ten years' average yield of turnips, including swedes, in England is only 12.69 tons per acre, and that of Scotland 15.25 tons, while the highest average for any county in Great Britain is 19.53 tons, it is astonishing to read of crops exceeding 40 tons in Ayrshire. In a competition decided in that county a few days ago, out of fifteen crops of which the weights were given by the judges, eleven were declared to exceed 40 tons, and the other four 39 tons per acre. The judges "selected for weighing a drill which was about as good as they could find, and took that as the average yield of the crop." But, although by this improper method the weight per acre was exaggerated, the crops must have been tremendous, and it is no slight feat to produce even a row of swedes weighing at the rate of 40 tons per acre. It appears that the competitors prepare an acre specially for the annual competition, the farmers or their sons doing all the work. They plough the land in the autumn, manure, and sow it carefully in narrow drills, select the best plants in thinning, and leave them at just the right distance from each other. Thus the test is quite an uncommon one; but it is none the less a valuable object-lesson. If, by such careful management, anything like 40 tons per acre can be produced, to say nothing of 44 tons 12cwt. 2qrs. per acre, the recorded weight of the first-prize crop, without an extremely costly outlay on manure, such management must be highly remunerative. Unfortunately, the quantities of manure used by the competitors respectively are not given in the report. Great crops, however, have been grown this season in other parts of Scotland than the Land of Burns. In the Angus competition for the best ten acres of swedes, the first prize was awarded to the grower of a crop reported by the judges as nearly 31½ tons per acre. In this case twenty loads of farm manure were ploughed in, and 4½cwt. of a special manure sown in the drills. Another crop was a little over 31 tons, a third being less than 2cwt. short of that quantity, and seven between 25¾ and 30½ tons. In a competition of four acres, moreover, the crops were reported to weigh from 25½ to over 31½ tons per acre. A much greater weight was credited to the winner of the first prize for four acres of yellow turnips, namely, nearly 37½ tons. The crop was sown on the 29th of May, twenty-five loads of farm manure having been spread on the stubble before it was ploughed. In the drills 3cwt. per acre of superphosphate and 1cwt. of sulphate of potash were sown. Four other competitors are credited with 31 to nearly 36 tons. Such crops of swedes and yellow turnips could not be grown in the east or south of England, or, indeed, in any other division of Great Britain than the north, by means of any possible treatment of the land.

Carlisle Hirings.—There was a large attendance of masters at the second hirings, held at Carlisle on the 17th inst. Men and boys in search of places were also numerous. Women were scarce. The wages asked were quite as high as those obtained the previous week, and few engagements would be made at lower figures.

Malton Martinmas Hiring Fair—At this fair, held on the 24th ult., farmers hired readily. There was a very large attendance of farm men and youths, but again a dearth of females, both for farm and domestic service, and these commanded good wages all round. Foremen, £24 to £28; first ploughmen, £18 to £20; second hands, £17 to £18; strong lads, £14 upwards; boys just going out, £6 to £7 per annum, with board and lodging; farm girls, to manage the dairy, £19 to £21; generals, £15 to £16; cooks, £17 to £20; housemaids, £13 to £16; young girls, £7 to £10 per annum.

International Live Stock Exposition.

A correspondent sends us the following particulars of the International Live Stock Exposition which was announced to open on Saturday last at Chicago, U.S.A., and continue all this week:—

"Now that the entries in the competitive classes at the International Live Stock Exposition are about all made, the immensity of the show is made apparent. The only thing that now remains is for the people to come to Chicago and see the greatest collection of pure blooded, royally pedigreed, silkiest coated, beef-producing cattle ever put into one aggregation; the best and highest-priced lot of sheep seen at one time; the smoothest lot of porkers in America; and the staunchest finest 500 draught horses the eye of man ever gazed on.

"In the breeding cattle department there are about 1,200 entries. In the breeding sheep department the entries will number 700, with the hogs a close second.

"In the fat car lot classes of cattle (sheep and hogs) no entry is required; but from advices received at the office of the Exposition, about 200 cars will be sent in.

"The sales of cattle, sheep, and hogs will be confined to selections from the very best herds in America. The four cattle associations—Herefords, Shorthorns, Aberdeen-Angus, and Galloways—each of which will be represented by 100 head of animals in the sales, have sent men out to pass on the quality of the offerings, with instructions to turn down anything not up to requirements.

"The display of the numerous by-products by the packing houses will be interesting to everybody, whether interested in the live stock industry or not.

"The slaughter tests will demonstrate the uselessness of over-feeding, and 'tallow' will be a passport to favour at the 'International.'

"The exhibitors number about 400, of whom 25 are from Canada, with Scotland and England represented.

"The list of judges as selected represents the greatest collection of live stock experts that ever passed on the merits of animals at a live stock show.

"Most of the railroads have announced a rate of one fare plus 2dols. for the round trip, and the attendance will doubtless be large. Advices indicate the presence of a large number from that section."

NOTE.—The figures for the current year are approximate only.

POISONED BEER.

THE USE OF MALT SUBSTITUTES.

Seventy Deaths.

Over Twelve Hundred Persons Poisoned.

In Manchester and several other towns in the North and Midlands of England a large number of consumers of beer have been suffering from peripheral neuritis, or arsenical poisoning, and a number of deaths have occurred. How this came about was regarded as a mystery, but the labours of public and other analysts have traced it to beer, and through the beer to the use of invert sugar instead of malt. This invert sugar is prepared with sulphuric acid, and in the sulphuric acid so used have been found certain percentages of arsenic. An inquest has been opened on one of the victims, but the whole facts of the case are not likely to become known for a month, to allow analysts to make exhaustive inquiries. The case has special concern for farmers, as they have always, like ourselves, advocated the manufacture of beer from barley malt and hops only, all substitutes being made illegal, or made the subject of explicit declaration. The question is commented on by "Hordeum" in another column, but the following extracts from correspondence which has appeared on the matter will be interesting.

Mesrs. Bostock and Co., of Liverpool, have admitted that they have discovered arsenic in the sulphuric acid used by them in producing sugar supplied to brewers, and they state that they have advised all their customers to stop using their products. A representative of the firm suggests that his is not the only company supplying sugar tainted with arsenic.

A meeting of Lincolnshire agriculturists was held at Boston on Thursday to consider the alleged extensive adulteration of beer, as shown by the wholesale poisoning of beer consumers at Manchester and elsewhere, and it was resolved to convene a public meeting at an early date to agitate for legislative measures to ensure the brewing of pure beer from malt and hops. Mr. Chaplin and Sir Cuthbert Quilter, M.P., are to be asked to co-operate in the movement.

At a conference of Kent and Sussex hopgrowers held at Tunbridge Wells on Friday it was stated that beer poisoning had extended to London, an instance being given in which a barrister was suffering. The use of cheap commodities in brewing, it was urged, was the cause of beer impurities, and it was a matter of national importance that the practice should be at once stopped. It was suggested that where beer was adulterated the casks should be labelled in the same manner as food stuffs. A resolution was unanimously adopted urging the Government to compel brewers to use malt and hops in beer manufacture.

A correspondent suggests that "if the House of Commons will be honest and do its duty, it will pass a Bill for beer to be made from malt and hops only, two wholesome ingredients. In doing this it will confer a boon on English agriculture by making barley-growing a source of profit, instead of, as at present, a loss, and will give the nation a wholesome drink. Barleys this year are almost unsaleable, not so much because their quality is unsatisfactory, but because maltsters are displacing malt with glucose. The very cattle of this country have their food protected from adulteration, whilst the working man has his every-day drink made from anything the brewer thinks well to use."

Another correspondent asks whether "it is not time that the Inland Revenue officials insisted that beer should be made from malt and hops only? At present, beer is defined as 'a fermented saccharine infusion, bittered with a wholesome bitter.' This allows chemical swills of all sorts to be sold to the public."

Having in mind the numerous cases of poisoning (the result of drinking adulterated beer) in Manchester, Salford, Liverpool, and other places (adds another writer), one naturally thinks of the rejected Pure Beer Bills of the past, and wonders whether anything will be done in the future to ensure that the moderate consumer of beer shall be strengthened rather than weakened by its consumption, or are the brewers' interests too strong? Here should be a fine field for the new President of the Board of Agriculture, whose views on the subject should at this present juncture specially interest the electors of Preston. That the use of chemical preparations in the manufacture of beer is largely on the increase is evident to anyone who has studied the advertisements in the trade journals during the past ten years. The agitation in favour of pure beer has been largely credited to the farmer's hope for a better market for his barley, which naturally carried small weight with the British public, who long since classed the British farmer as of no account and not wanted. We shall see whether they are content to continue poisoning themselves. Failing legislation, it appears to me that the brewers, having practically done away with free houses, where a glass of beer brewed from malt and hops only could once be obtained, must now, for their own sakes, put a wholesome article before their customers, or the deaths from, and numerous cases of, peripheral neuritis will cause a panic among beer-drinkers. The brewers in either case must do a good turn to the temperance cause.

Again:—"The trouble which has come upon us in the unfortunate disclosures of the last few days, showing that a very large number of beer drinkers are being stealthily poisoned, is the natural and necessary outcome of a piece of mischief which was originated many years ago. Amongst the many disastrous blunders which characterised the official life of Mr. Gladstone, few were more pregnant of evil than his substitution of a beer duty for a malt duty; as he thereby left it open to the brewers to use any sort of substitute they might fancy in place of malt, which opportunity was promptly made use of by a large number of them. In fact, Mr. Gladstone's most pernicious action was simply a premium on bad beer. In the spring of this year the Chancellor of the Exchequer imposed a war tax of one shilling per barrel on beer. The Burton brewers, and others whose position was strong enough to bear the impost, decided not to ask their customers to pay this addition, and it is easily conceivable that the smaller fry, anxious to stand well with their customers, were driven to other expedients for further reducing the cost of production, and this most serious outbreak, of which at present we do not know the extent, is the result. If, as I have endeavoured to point out, the trouble is thus traceable to a bad enactment, the remedy lies with the Government. Let the tax revert to malt as before, and let the use of either malt or hop substitutes (*e.g.*, sugar or strychnine) be made penal, and then—even if he has to pay a trifle more for it—the English beer-drinker will at least feel that the national beverage is not a subtle means of closing his earthly career."

Another indivdual remarks that "some of the patients suffering from peripheral neuritis, due to arsenical poisoning, are not beer-drinkers at all, but it is not stated whether they are whisky-drinkers. I once heard of the practice of 'rectifying' whisky by means of water and dilute sulphuric acid. If that practice anywhere prevails, and the sulphuric acid is not pure, then the arsenical poisoning would occur in persons drinking the whisky. Also, whisky, as it comes from the still's eye, is as colourless as distilled water, and I think it is safe to infer that other agents besides sherry-casks are used to produce the deep brown colour often imparted to whisky, especially some Irish whisky. I have often heard of the use of distilled water, Valencia raisins, and green tea as producing in the beverage the mildness of age."

The foregoing is carried a little further:—"Is beer the only beverage that is likely to be contaminated by the impurities of commercial sulphuric acid? Effervescing mineral waters are carbonated from a mixture of chalk and sulphuric acid. The sulphuric acid is admitted to be the source of the evil in beer, then why may not mineral waters be included in the same category? This question may be more strongly emphasised with the knowledge that where pounds of sulphuric acid are used by brewing sugar manufacturers, tons are required for the production of mineral waters."

Then a correspondent tries to assure the public on this point by saying:—"The scare occasioned by the discovery of arsenic in cheap beer has extended to mineral waters, and this arises from the similarity of 'saccharum' used by brewers and 'saccharin' used by mineral water manufacturers. Please allow me to point out that saccharine or saccharum, the article used by brewers, is an invert sugar, made by the action of a mineral acid—chiefly sulphuric acid—upon low class sugar or glucose. This product is fermentable. 'Saccharin,' which is used by mineral water manufacturers, is an entirely different article, being one of the derivatives of coal tar, all of which prducts are antiseptic in their influence. 'Saccharin' is forbidden by law in the manufacture of ale and stout, on account of difficulties in connection with the Excise, though it is absolutely harmless in every respect, and is used largely for pharmaceutical purposes as well as in the manufacture of mineral waters. The public may be assured there is no danger of any kind in mineral waters, as there is none in beer brewed without chemical substitutes."

"The revelations at Manchester, Liverpool, and other places of the deaths due to poison which has been traced to the chemicals used in the manufacture of beer will" (says a "Temperance" writer) "afford Mr. Hanbury an opening for his energies, and enable him to serve the agricultural interests of this country by at once adopting measures to introduce a Bill into Parliament legalising the manufacture of beer from pure malt and hops only. Why this great trade is allowed to drug the people with chemicals and adulterations of so noxious a kind as to produce insanity and death whilst other manufacturers and dealers are subject to heavy penalties for adulteration in comparatively trivial matters such as, for instance, chicory in coffee, margarine in butter, or water in milk—is only one more proof that this vast trade is omnipotent. The Temperance party have been powerless in their endeavours to bring reforms, essential to the well being of the people, in the licensing laws, and these revelations in the manufacture of beer show the free hand that is allowed to the trade to loot upon the people poisonous drugs as a substitute for malt and hops—the one a profitable poison, the other a sound if not more costly, less profitable, and certainly in its effects less morbid, less demoralising, and more wholesome."

Dr. T. N. Kelynack, of Manchester Royal Infirmary, and Lecturer on Pharmacognosy at Owens College, has given his experience over a period of six months, during which time out patients' departments of the hospitals and the union infirmaries have been flooded with patients revealing the symptoms that are now the subject of notice in many parts of the Midlands, leads him to some important conclusions. He states that the patients are "invariably beer drinkers." In most instances they have sought assistance on account of the weakness and pains in the limbs, variously described as "pins and needles," "numbness," "pricking," "like walking on hot bricks," and scalding. Some complain chiefly of their difficulty in walking, while other persons declare themselves "paralysed," and unable to get about. In a few instances the pains are more general, sufferers seeking advice for "rashes," and itching of the body, but generally, remarks Dr. Kelynack, the poorer patients affected have not been particularly observant of their pigmentation. In some of the patients, however, the increasing darkening of the skin has been the chief feature to attract notice. This writer states that "frequently, but by no means always, the appearance is 'alcoholic.' The face is usually dusky, the eyes watery, and often with tears visibly overflowing. Sometimes there is distinct puffiness, especially about the eyelids. Walking is usually difficult, and the patients progress in a gingerly or ataxic manner. In bad cases there is much general wasting. The temperature in severe cases may be raised." So great in some instances is the influence on the nervous system that "patients often dread to be touched, and sometimes cannot bear even a sheet to rest on the feet. Cramps may be much complained of, and the respiratory system is affected, being much congested, while even the appetite is lost."

Up to Saturday there were some 1,200 known cases and nearly seventy deaths from the beer poisoning epidemic.

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, of whom all information relating to Patents, Designs, and Trade Marks, may be obtained free of charge.

20370.—G. J. Kingsbury, of Finsbury, London, for an invention for "An appliance for dividing bulk butter into pats of any predetermined weight or size."

20685.—F. J. Lloyd, W. Thorp, and W. Weddel, of London, for an invention for "Improvements relating to the treatment of milk, cream and butter."

20790.—W. Schafer, of Liverpool, for an invention for "Improvements in and appertaining to feed apparatus for threshing machines and the like."

20700.—J. Campbell, of Glasgow, for an invention for "Cheese press."

Patents Sealed.

15270.—E. Mandel and Co., of Nyirbator, Hungary, for an invention for "Improvements relating to ploughs, agricultural."

15289.—C. E. Anderson, of South Bend, Indiana, U.S.A., for an invention for "Improvements relating to ploughs, agricultural."

15794.—M. Liesengang, of Hammersdorf, Nr. Braunsberg, East Prussia, Germany, for an invention for "Manuring and fertilising."

At the Martinmas Hirings at Kirkby Moorside on Wednesday, there was a large attendance of both masters and servants. Girls, first time out, asked £7 to £9; older girls, £11 to £17; girls able to manage a dairy, £17 to £19; cooks and housekeepers, £24 to £26; boys, first time out, £5 to £10; ploughboys, £11 to £13; waggoners, £19 to £21; foremen, £26 to £30 per year.

Goole Martinmas Hiring Fair.—This fair took place on Wednesday, and was well attended by farm servants. Some little hiring was done, wages ranging as high as £30 per year was given for really first-class hands; ordinary first hands, £24 to £26; second hands, £16 to £18; lads, £5 to £10. Female servants were in good demand and commanded good wages.

THE GARDEN.

The days are very short, and dark too, as a rule, now; in fact, it is the dullest time of the year, but "turn of the days" will be here again very soon, and then we shall be once more looking forward to the spring. With the exception of certain subjects under glass, vegetation is now at a standstill. With a very few exceptions all our crops have been gathered in, and we can now enjoy a brief breathing space.

Looking back, the season, as a whole, has been a far from satisfactory one. Last winter was mild, but the spring proved late, cold, and wet, and consequently outdoor crops of all kinds were unusually backward, and in many cases poor also. When the warm weather did at last set in, growth was very rapid, owing to the frequent showers, but the dreaded potato disease, from which we have been practically free for a few years, put in an early appearance, and an early and stormy autumn rendered the summer an unusually brief and by no means satisfactory or profitable one. Green vegetables of most descriptions were remarkably plentiful towards the close of the summer, but the potato crop generally is by no means up to the average, and not as sound as it ought to be.

The great feature of the year, from a horticultural point of view, is the extraordinary crops of hardy fruits generally, and of plums and apples in particular, that of the former having been one of the heaviest on record.

Having cleared away all exhausted crops and rubbish, etc., and put everything ship-shape for the winter, the preparation of the various plots and beds for next season's crops should receive attention. For nearly all vegetables the ground can scarcely be dug, or rather trenched, too deeply, or manured too freely, and as all such work takes time, it should be commenced as early as possible. Of course, it is unnecessary to trench the entire garden every year—even if possible, such a course would be undesirable. Once thoroughly well trenched and manured, a plot ought to afford good crops for three or four years, with an occasional forking over and light surface dressing, so that the whole area should be operated on in rotation, going, if possible, a little deeper every time. If the subsoil is good, a moderate quantity may be brought up to the surface occasionally with benefit.

The crops which chiefly require deeply-worked and newly-manured ground are peas, cauliflowers, dwarf and runner beans, Brussels sprouts, onions, leeks, and celeriac. In the case of celery, the manure is, of course, applied immediately before planting, and the next year such a plot will usually grow excellent crops of peas, beans, or anything requiring a deep and rich root run. For most of the usual run of root crops such as carrots, parsnips, beet, etc., the ground, though deep and mellow, is better not to have been recently manured, as this tends to produce forked and misshapen roots, so that it is a good plan to grow these, as far as possible, on plots or beds that have been deeply worked and freely manured for a previous crop.

Some very light, porous, and sharply-drained soils should not be manured, as a rule, until shortly before planting or sowing the crops, as the manure is quickly washed out of such a formation. Such ought not to be worked too frequently, either, though they should be rendered deeper, if possible, and an occasional dressing of lime is also desirable in such cases.

When pruning old or large apple or other fruit trees (standards) the point to be aimed at is to thin out the growth wherever this is crowded in the least, especially in the centre of the head, which ought always to be kept well open. Remove any branches that touch or cross each other, and any diseased, exhausted, or "snaggy" wood also, of course. Cutting back the young wood in such cases to any extent should be avoided—if fruitful it is wrong, and if the growth is too gross and barren branch-pruning will only make matters worse; there is no remedy but root-pruning for this.

Of course, in pruning dwarf, bush, or pyramid trees most of the young growth must be cut back, more or less, but remember that here also pruning will only render strong growth stronger, and unless the roots are in proper condition it is useless. There are also some kinds of apples which fruit chiefly on the points of the young shoots, and these must, of course, not be cut back to any extent. Such are Lady Sudeley, Irish Peach, Golden Noble, Gascoine's Seedling, Prince Arthur (Smart's), Yorkshire Beauty, and a few others.

It is by no means necessary to fill all the summer flower-beds with "Dutch" bulbs alone (hyacinths, tulips, etc.). Such, though very gay in the spring, have a very bare and cheerless aspect through the winter, and the garden generally will look much better if some of the beds are filled with neat evergreen shrubs. Aucubas, Pernettyas, and other berry-bearing plants, and others with hardy spring-flowering plants of various kinds. Wallflowers, both single and double, are always fragrant and welcome, and then there are the pansies, violas, violets, primroses, cowslips, and many more. Many exquisite combinations may be formed by the judicious use of such materials.

Plant Ixias and Sparaxis bulbs on a warm and sheltered border of light soil, and cover with a few inches of cocoanut fibre refuse.

THE WEATHER.

Monday (November 26th).—The weather was generally fine over England, and in many places the sun shone brightly for several hours. The sky was for the most part overcast in Scotland, and rain fell at some of the Irish stations. The cyclonic disturbance which had its centre over our islands on Sunday had moved away to the eastward, but the wind remained southerly under the influence of a fresh disturbance which had arrived from the Atlantic. The midday temperatures were high for the time of year, and in many places the thermometer exceeded 50deg. In London the day was fine, and the temperature rose to 52deg., which is 5deg. above the average.

Tuesday (November 27th).—A mild, south-westerly wind was blowing over our islands from the Atlantic, and the air was thoroughly charged with moisture. Rain had fallen generally since Monday, and in the northern and western districts the measurements were large. A shallow cyclonic disturbance was situated to the north of Scotland, and a fresh disturbance was approaching our west coasts. The storm signals were hoisted in the west and south, and in the course of the day the outlook became threatening. The rain area was extending eastwards, and a moderate gale was blowing at the entrance of the English Channel. The mid-day temperatures were again high, especially in the south. In London the morning was fine, and the temperature rose to fifty-two degrees, but rain set in during the afternoon.

Wednesday (November 28th).—Dull and gloomy weather prevailed in most parts of England and Ireland, and rain again fell in many places. The principal rain measured in the morning, as the result of the fall since Tuesday, occurred over the southern portion of our islands, and in the north-eastern and central parts of England no rain had fallen. The cyclonic disturbance which was approaching the Irish coasts on Tuesday had arrived over the western portion of the English Channel, and under its influence the winds were easterly over a large part of the kingdom. Frost occurred in Scotland early in the morning, and the temperature was changing irregularly during the day, but readings were generally lower than on Tuesday. The weather was wet and dull in London, and the highest temperature was forty-nine degrees.

Thursday (November 29th).—Cloudy and damp weather was experienced in most parts of our islands, and rain again fell in places. The fall of rain, measured in the morning for the preceding twenty-four hours, was not generally large, except on the coasts of the English and St. George's Channels. The cyclonic disturbance, which had its centre over our south-west districts on Wednesday, had, apparently, dispersed, but a small disturbance had appeared near the Isle of Wight, and, under its influence, the winds were easterly over nearly the whole country. The temperature was, for the most part, slightly below the average, and the mid-day readings scarcely touched fifty degrees anywhere in our islands. The day was dull in London, but there was scarcely any rain, and the highest temperature was forty-nine degrees.

Friday (November 30th).—The weather was fine in nearly all parts of the British Islands, and the air was generally rather colder. An area of high barometer readings was situated over Scandinavia, and there were regions of low readings over south-west Europe, while, between these different systems, in the United Kingdom, the winds were easterly. Very little rain had fallen since Thursday in any part of the country. The highest temperatures were between forty-five and fifty degrees, and a further fall of temperature was not likely. The day was fine in London, and the highest temperture was forty-six degrees.

Saturday and Sunday (December 1st and 2nd.)—During the past two days very unpleasant weather maintained its hold over the whole of the United Kingdom, nearly every neighbourhood experiencing densely overcast skies, a very dull and gloomy appearance of the atmosphere, and a general prevalence of great dampness each day. There was, however, little actual rain, except in the south-west of Ireland, where more than an inch and a-half is reported to have fallen. The sun was visible in only a few places for a short time. Southerly to easterly winds prevailed on all coasts, but with one or two exceptions they were weak all through. Temperature was fairly uniform, most of the day and night readings being between forty degrees and fifty degrees.

Selby Hiring Fair.—There was a very large attendance of farm servants at the Martinmas Fair at Selby on Monday. A good amount of hiring was done, and wages again ruled high. Foremen obtained £26 to £30, waggoners and second hands £20 to £25, boys who can plough £12 to £18, and young boys £8 to £12. Female servants were somewhat difficult to obtain. Girls who can cook received up to £25, housemaids £14 to £19, general servants £12 to £16, young girls £10 to £12, and nurse girls £8 to £10.

"Mark Lane Express" Diary.

Dec.
4, 5, and 6. Concluding days of the Birmingham Cattle and Poultry Show, at Bingley Hall.
4, 5, and 6. Leeds Smithfield Club's Show, at Camp Road, Leeds.
4. Cowbridge and County Farmers' Club Society's Show, at Cowbridge.
5. Forres and Northern Fat Cattle Club's Show, at Forres.
5 and 6. Redhill Agricultural Show.
5 and 6. Scottish National Fat Stock Club Show, at Waverley Market, Edinburgh.
6. City of Liverpool and District Cowkeepers' Association's Show, at Liverpool Corporation Haymarket.
7. Wadhurst Christmas Fat Stock Auction Show.
7. Sale of Fat Cattle, Sheep, and Pigs, the property of the Earl of Crewe, at Crewe Hall Home Farm.
8. Meeting of the Beds Chamber of Agriculture; Lecture on "Bacon Curing," by Mr. Loudon M. Douglas, A.I.M.E.
10. Meeting of the Farmers' Club; Paper on "Swine Fever and the Methods Adopted by the Board of Agriculture for its Suppression," by Professor Axe.
10. Lynn Christmas Fat Stock Show.
10 to 14. Smithfield Club Show, at the Royal Agricultural Hall, Islington.
11, 12, and 13. Yorkshire Fat Stock Society's Show, at York.
11, 12, and 13. Royal Dublin Society's Winter Show.
11. Meetings of the Councils of the Shire Horse Society, National Sheep Breeders' Association, Shorthorn Society, Smithfield Club, and British Dairy Farmers' Association.
11. Annual Agricultural Dinner, held under the auspices of the Central Associated Chambers of Agriculture and the Farmers' Club, at Holborn Restaurant.
12. Meeting of the Council of the Hackney Horse Society.
12. Meeting of the Council of the Royal Agricultural Society.
12. Council and Annual General Meeting of the Central and Associated Chambers of Agriculture.
12. Vale of Aylesbury Fat Stock Show, at Aylesbury.
12. Guildford Agricultural Association's Show, at Guildford Cattle Market.
12 and 13. West of England Fat Stock and Poultry Society's Show.
12 and 13. Chichester Fat Stock Show.
13. Meeting of the Council of the Hunters' Improvement Society.
13. Sale of Young Shorthorn Bulls, at York Cattle Market.
14. Croydon and District Cowkeepers' and Dairymen's Association's Show, at Croydon Cattle Market.
14. Romsey Agricultural Society's Show, at The Abbey, Romsey.
14. Meeting of the Council of the Polo Pony Society.
17 and 18. Suffolk Fat Cattle Club's Show, at Ipswich.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended November 24, 1900, together with the quantities imported in the corresponding week of the previous year :—

	1899.	1900.		1899.	1900.
	No.	No.		Cwt.	Cwt.
Cattle ..	7,082	9,250	Wheat ..	1,223,600	1,006,860

* Great Hundreds.
† Included with Other Fruit prior to 1900.
‡ Entered by the Bushel prior to 1900.
§ Included with Other Vegetables prior to 1900.

An important general meeting of the Monmouthshire Chamber of Agriculture will be held on Tuesday, December 4th, at 2.15 p.m., at the Beaufort Arms Hotel, Chepstow. The business is as follows:—1. Elect new members, etc. 2. Minutes of meeting at Maesyewmmer on October 25th, and any matters arising therefrom. 3. Report of Cattle Diseases Committee of Central Chamber (November). 4. The working of the Agricultural Rates Act of 1896, and the question of its renewal. 5. Tuberculosis and the working of the "Model Milk Clauses" in the Private Bills of local authorities. 6. Question of the registration of pig dealers and the inspection and disinfection of their premises. 7. Consider circular letter from Cheshire Chamber containing 5 resolutions *re* swine fever. 8. Consider circular from Worcestershire Chamber respecting recently formed association of agricultural implement makers and agents in counties of Worcester, Hereford, Gloucester, and Monmouth.

All farm live stock should be given "Molassine." It is an excellent food and condiment combined. See advertisement on back page of this issue.—[Advt.]

FARM PROSPECTS.

Aberdeenshire.

The Martinmas term has again come round, and farmers have got their purses once more emptied. Wages having been so very high during the past half year, a big dip had to be made. At the earlier hiring fairs for the winter half year wages ruled high, but at the markets immediately preceding the term the general tendency has been easier. At all the fairs servants have been plentiful, and a good many men of the most expensive class have not found places. There can be little doubt that a little after the term wages must fall, for, as far as can be seen, there is to be

Remarkably Little Work

during the winter months for builders and the allied trades, hence labourers are not required. Farm work is generally well advanced for the season of the year. As threshing proceeds it becomes the more manifest that the crop is not to be a good yielding one, either as regards barley or oats. The former is to be at least eight bushels short per acre of an average crop, and the weight per bushel from 3lb. to 4lb. below the current weight of last year. Oats will not be so deficient in returns, but still the crop will be under an average, and the weight of grain will be at least 2lb. per bushel under the ordinary weight. Such are the results of a wet, cold, and sunless summer. A memorable season it will be to north-eastern county farmers, as their incomes will be low, and wages, manure, and feeding stuffs are all higher than they have been in recent years. There is still no appearance of the silver lining to the dark cloud that for so long now has overhung British agriculture.—J. B. (November 27th).

Berkshire.

There has been a full quantity of rain during the month of November, but no more than was needed, for the land was dry and water was scarce in many places. The wheat is nearly all planted, excepting a few pieces which could not be finished till the roots were cleared. The forward sown has come up and looks well, and the rye, winter oats, and tares never looked more promising than they do at the present time. The young clovers are a good plant, but the trifolium is very doubtful, as from the dry weather it is very backward. Mangolds were an extra good crop, and have been secured in good condition without any damage from frost. The swedes and turnips are generally good, so that there will be

Plenty of Sheep Keep

Hay does not improve much in price, and straw is very cheap. There has been a good quantity of feed in the meadows, but there is not much goodness in autumn grass, for, although it will keep store cattle, we hear great complaints in the falling-off of the supply of milk, and artificial feeding has to be resorted to to keep up the quantity and quality. Sheep have done well, for the weather has been very open, and there has been plenty of keep without breaking into the hayricks much. Prices keep about the same, although the trade is very dull. It is useless to say much about labour, for it is more scarce than ever, and how the work will be done is a mystery, and much more so how the money will be found to pay the higher wages which are demanded, with the bad yield of corn and low prices.—J. L. (November 29th).

Mid-Essex.

Wheat sowing is finished, and ploughing is doing well. Wheat and barley are a very disappointing trade for prices, and my former estimate of two quarters per acre less is by recent thrashings fully confirmed, and with greater expenses and less assets this will prove

A Worse Year than for Several Years.

About the only improvement in prices is pork, which just at present is dear, but store pigs are not so dear. Good barleys are wanted, but on account of the drought just before harvest they are very scarce. Store cattle are dear, and also feeding stuffs. Lambs have not done at all well as to places, several dying, and taking everything into consideration this year will be a very bad look-out for the farming interest. Whether the present Government will attempt to remove some of the burdens from a very much overburdened branch of industry is being anxiously watched in rural districts.—Mid-Essex (November 29th).

North Wilts.

It is probable that in the century which is now fast drawing to a close there have been few years in which the weather on the whole has been more favourable to agriculturists, although there have been many, especially for cereals, when the crops have been much more abundant. As for those on the pastures in this district there has been little in this way to be desired. As for the late autumn, it has deserved to rank among the very finest known. Among the drawbacks are the dearness and scarcity of labour. Stock of all kinds have done well, but the prices in beef and mutton have not undergone much improvement. The epizootic disease which has appeared in such a mysterious way in this county appears to have again been stamped out by the precautions taken.—(November 30th.)

Shropshire.

The land, after being soaked with rain, is benefited by a few dry days, suitable for threshing. We hear the hum of the machines sounding very steady, telling us work is going on at the farms. Dryer weather is desirable for all farm work, and the rising barometer says it is coming. Although the wet prevents working the land, especially clay land, turnip carting continues on the roads. All turnips not topped are still growing in size. Turnip hods grow bigger, while turnips are sounder and bigger than expected. With the open weather, winter keep is saved. Early lambs will soon be here, but their little bleats are not heard yet.—J. G. (Nov. 30th).

West Cornwall.

October was a very fine month, and roots made good growth. Mangolds are a good crop, and got in in fair condition. Turnips in most places are good. With a good crop of hay and straw farmers have plenty of winter feed, but beef will have to fetch a fair price to pay, as cattle are dear to buy. There is still good grass keep, and cattle out are doing very well. November has been a very wet month, rain day after day, which has hindered the work on the land. Wheat is about all sown, and the early-sown is looking nice and strong.

The Cauliflower Trade

here has been awfully bad. The mild weather has brought them all in together, and markets glutted. Hundreds of crates have blown, and hundreds sent away for nothing, so the prospects in this line are not very bright. Apples, as all know, have been a glut, and no good to growers. Worthless sorts are no use at all in a season like this, and the sooner the trees are rooted up and replaced by good quality the better for all concerned. When will our English growers learn the lesson that the Americans have learned, viz., to grow only the best, and when grown to market them in a proper manner, and so save in this county the enormous amount of money we send abroad.—F. C. (November 28th).

Wilts and Berks.

Work on farms in this neighbourhood is forward. Season very mild. Wheat sowing mostly finished, and plants forward. Roots, average crop, and growing still. Hay, an average crop and, generally speaking, well secured, and the prospect of winter keep good. Cattle and sheep doing very well. Corn prices low. Wheat turns out better in sample than first expected and a fair yield. Barley, with the exception of a few prime lots, sample and yield disappointing. Oats below average, both in sample and yield.—(November 29th.)

York.

We, in the Darlington district, are practically flooded out. For weeks, nay, for months, it has rained almost every day, and work on the land has continued under very adverse conditions. There are potatoes still in land—a good many it is to be feared—and a large area of turnips still to deal with. Very litle wheat has been sown. Farmers intended putting a good acreage, but the weather has stopped it. Even on the dryest soils no attempt can be made. There is no prospect of any better weather, and at the time of writing it is threatening to rain heavily. It has been

One of the Worst Years

the farmers of this district have experienced. Corn is yielding badly, and selling at a wretched price. The high price of cakes and feeding-stuffs—a curious anomaly—has made fat stock almost unprofitable. There are more

Farms Advertised to Let

than has been the case for at least ten years, and it is probable rents will once more decline. W. P. (November 28th).

Foreign Prospects.

France.—An open season like the present may be suitable for autumn-sown crops, but it markedly interferes with the demand for flour and relatively for wheat. Trade in Paris, as well as in the provinces, is singularly quiet, another obstacle being the delay of the Government in dealing with the contemplated modification in the customs tariff. Foreign wheat participates in the dulness overshadowing home trade.

Belgium.—With continued mild weather and a shrinkage in demand, business in Antwerp has run in narrower channels, with an inclination towards buyers to the extent of 3d. to 6d. per quarter on the week.

Holland.—Weather dull and damp, checks threshing, and thereby limits supplies, but these latter seem equal to demand, and at inland markets wheat, rye, and oats are nominally unchanged, while barley went back 6d. per quarter. Rotterdam and Amsterdam have had quiet trading.

Germany.—Official reports of autumn-sown crops show conditions fully up to the average. Mild weather modifies consumptive demand, and Berlin was dull and easier, and Hamburg quiet.

Hungary.—The autumn-sown cereals are developing everywhere in satisfactory conditions. Budapest reports a dragging wheat trade, and quotations mark a drop of 6d. per quarter on the week.

Russia.—The average temperature in most of the Empire, the west excepted, has been below the normal. The rainfall was not abundant, and in most of the southern governments ran was absent. Central and eastern provinces are snow-covered. The Moskwa, the Northern Dwina, and Baltic are closed by ice. Interior markets continue quiet with dull inquiry and small arrivals, but no change in values. In the south-west region the feeling was weaker. In the lower Volga grain supplies were slack. Oats were weaker in the earlier part, but barley maintained a firm position, other cereals remaining inactive.

India.—The latest telegram from the Viceroy reports that rain is still wanted in Bombay, the Karnatak, Deccan, and Gujarat. Otherwise prospects are satisfactory.

United States.—Rain has been beneficial to northern and central parts of California, putting the early sown grain in excellent condition. In the San Joaquin Valley farmers were holding off for heavy rain, the soil being too dry for farm work.

Argentina.—Our Buenos Ayres cable states that advices from the agricultural districts speak of unfavourable weather conditions. *Daily News.*

Rangoon Ricemeal.

This article continues to hold a chief place as a feeding article. A very large business has been done in it during the past few weeks at 105s. per ton, or in four tons lots or over at 102s. 6d. per ton, bags included, delivered buyers' own station. An analysis of a parcel recently arrived, as analysed by Dr. Bernard Dyer, has been sent to us by Messrs Elliott, Lang and Co., Limited, of Catherine Court, Seething Lane, E.C. For the purpose of comparison is also given a copy of analysis of other feeding articles:—

[COPY.]

Analysis of a recent arrival of Rangoon ricemeal by Dr. Bernard Dyer, Dorking, Agricultural Laboratory, Reigate Road, Dorking, Surrey, and Member of the Institute of Chemistry of Great Britain and Ireland, Cornwall, Essex, Hants, Herts, Leicester, Norfolk, West Suffolk, and East Sussex; and Author of Reports to the Royal Agricultural Society of England, &c.

Owing to the large percentage of oil in Rangoon ricemeal it is very valuable as a winter feeding article. It is one of the best foods the farmer can use, as nearly all kinds of stock eat it readily on account of its pleasant smell and taste. The following are the various modes in which the stock should be fed:—For horses, about a quart a day should be given, sprinkled over their chaff. It gives them a beautiful sleek appearance, and is used by many horse dealers for putting their horses into prime condition before selling them. If given to horses, however, too freely, it causes them to grow too fat and lazy. For dairy cows, about one gallon to five quarts a day should be given, mixed with their other food or roots. This will keep them in good condition, improving their supply of milk and imparting no disagreeable taste to the butter. For rearing beasts rice meal should be used in the following proportion, viz., one-fourth meal to three-fourths of other food. For young calves 1 to 2 handfuls should be given with the other food, and very often it will induce calves off their feed to eat properly, and in exceptional instances they will eat it when all other foods fail to attract. Here the fine rice meal may have a slight advantage over the ordinary rice meal. For pigs it is very useful as a fattening food, as it may be given to them in large quantities from 10 to the time of killing. Pigs that are intended for pork can be fed wholly on rice meal, but it will be found that when fed on rice meal only half the feed is pork what is got when fed on maize meal, as it does not lay on fat. Pigs fed on rice meal only are liable to scour, and the quantity of their food must be regulated accordingly. The meal for sows and young pigs should be soaked and left to stand awhile before being used, but old pigs should have their rice meal fairly dry. The best results are obtained when pigs are fed on rice meal when they are fed on maize meal. Poultry keepers will find it a good wholesome food when mixed with barley meal.

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt,] the trade remains much the same as noticed last week. Barley, both grinding and malting, steady. Wheat quiet at about late rates. Oats, 3d to 6d per qr dearer. Maize firm. Flour unaltered.—NIXON, GOWER AND CO.

Mark Lane, Wednesday.—There was again next to nothing done in English wheat, local markets taking what little is sent up and prices have not varied since last Monday. Very fine white, 31s ; good red, 30s, 63lb delivered. The flour market was neither better nor worse, but while granaries continue so well stocked, consumers still hold aloof, taking into consideration as well the present position of wheat. The London Millers' Association kept their quotations at last Monday's decline. Grinding barley remains scarce and firm. Persian, 17s 3d to 17s 6d ex ship, and 17s 9d to 18s ex quay ; Azov, 19s ex ship to come up, 18s 6d to 19s ex quay. Oats well maintained, and supplies soon go into consumption. American mixed clipped quoted at 14s 9d ex ship, 15s 3d ex quay. Maize upheld, and in small supply. Sound River Plate remains very scarce. English beans firm. Foreign featureless.

Mark Lane, Friday.—Both wheat and flour were again disappointing to sellers. Very fine white, 31s ; and good red, 30s 63lb delivered. American descriptions continue in ample supply on spot, and the quantity of foreign coming forward shows no abatement. The flour market shows no improvement, while granaries remain heavily supplied, and the tendency is to weakness. Of feeding stuffs, grinding barley is again steady, being unaltered. Persian, 17s 3d to 17s 6d ex ship, 17s 9d to 18s ex quay ; Azov, 18s ex ship to come up, and 18s 6d to 19s ex quay. Malting neglected excepting useful qualities. Oats firm, and Russian rather dearer on the week. Flat maize tended a shade easier, round corn being firm. The supply on hand is still kept down.

COUNTRY.

Ashford, Tuesday.—Trade for wheat very dull and lifeless, prices being 1s lower on the week. Barley sold very well at late rates, and most descriptions of feeding corn were without material change. Rough maize was very firm. Prices :—White wheat, 29s to 30s ; red ditto, 27s to 29s ; white oats, 16s to 22s ; black ditto, 13s to 19s ; English feeding barley, 22s to 25s ; foreign, 20s 6d to 23s ; malting barley, 25s to 33s ; tick beans, 32s to 34s ; mazagans, 28s to 31s ; flat maize, 23s to 24s ; round ditto, 27s to 28s per quarter.

Aylesbury, Saturday.—Thin attendance. Wheat quiet at last week's prices. Other grain unaltered.

Banbury, Thursday.—Wheat, white (old), 27s to 29s per qr ; wheat, red (new), 27s to 28s 6d per qr ; oats (new), 15s to 20s per qr ; oats (old), 16s to 18s per qr. Wheat, both English and foreign, a quiet trade at about the rates of last week.

Boston, Wednesday.—A small attendance, and trade slow. Wheat, 26s to 27s ; malting barley, 24s to 31s ; grinding barley, 22s to 23s ; oats, 16s 6d to 18s ; beans, 28s 6d to 29s ; maize, 22s 9d.

Bristol, Thursday.—Trade continues dull. At to-day's market English wheat was in good supply, and made late rates. Foreign would barely make last week's prices. Grinding barley, maize, and oats unaltered. Flour not much inquired for.—GRACE BROTHERS.

Cambridge, Saturday.—During the week the wheat trade has been quiet, and prices show no appreciable change. Supplies are scanty and condition is mostly very poor. At this market to-day there was a small supply mostly in poor condition ; any dry late made quite as much as last week, but damp was neglected and rather cheaper. Wheat, red, 27s to 30s ; and white, up to 30s per 504lb Barley was steady in price, with a better demand. Oats and beans quite as dear.

Canterbury, Saturday. — Wheat dull and cheaper. Barley slow. Oats maintain values. Ruling prices : White wheat, 30s to 31s 6d ; red ditto, 29s to 30s 6d ; malting barley, 28s to 35s ; grinding ditto, 21s to 24s ; white oats, 18s to 21s ; ditto black, 15s to 20s ; peas, 30s to 33s ; tick beans, 32s to 33s ; mazagans, 27s to 29s ; flat maize, 23s to 24s ; round ditto, 27s to 28s per qr ; winter tares, 6s to 7s per bushel.

Carlisle, Saturday.—Good supply of oats in our market to-day, quick sale at late rates. New, 17s 6d to 18s 6d ; old, 23s 6d to 26s per 336lbs. —THOMAS ROBINSON.

Chester, Saturday.—Wheat having been freely delivered to local mills during the week, prices were inclined to be lower. Oats steady, but slow trade in beans and barley. Indian corn, in better supply, was 3d per sack lower. Quotations :—Wheat, white and red, 4s to 4s 2d per 75lb ; grinding barley, 3s to 3s 6d per 64lb ; beans, 4s 8d to 5s 6d per 80lb ; oats, new, 2s 3d to 2s 6d ; old, 3s 6d to 3s 9d per 46lb ; Indian corn, 10s 9d to 11s per 240lb.

Chichester, Wednesday.—Fair attendance. Wheat was in moderate supply, but business ruled quiet, and prices were 6d per qr lower. Trade in feeding stuffs was also slow, and there were no particular changes in prices. Flour about the same as last week.

Colchester, Saturday.—Supply of wheat moderate. Slow trade at last week's prices. Barley not freely offered, quality mostly poor. Slow trade at unaltered prices. Beans, peas, and oats few offering, prices favouring sellers.—FRANCIS AND CO.

Dorchester, Saturday.—Owing to the damp weather English wheat is not coming to hand in such good condition, and prices have dropped 6d qr. Foreign met a dull trade, at about 6d qr cheaper. Dragging trade for malting barley. Feeding stuffs quiet.

Gainsborough, Tuesday.—Small show of wheat. Trade dull at late rates. New white wheat, 27s to 28s ; red ditto, 26s to 28s ; white oats, 20s to 22s ; black ditto, 18s to 20s ; grinding barley, 23s ; English beans, 30s ; peas, 27s ; small maize, 27s 6d ; flat ditto, 23s per qr ; bran, £5 ; sharps, £6 ; barley meal, £6 10s per ton.

Glasgow, Wednesday.—There was a small attendance at our Corn Exchange to-day. Wheat very quiet at a decline of 1½d to 3d per boll on the week. Flour is quite a drug on the market, and values very irregular. Indian corn steady at a reduction of 3d per boll on last week's prices. Canadian peas firmer at 1½d to 3d per boll advance. Foreign oats firm, and the turn against buyers ; home oats quiet and unchanged. Grinding beans dull, at unchanged prices. Barley steady. Oatmeal quiet. Bran and thirds steady at late rates.—GIBSON AND CLARK.

Hereford, Wednesday.—Moderate supply of English wheats, with a tendency in buyers' favour. Practically no demand for English barleys, except for very finest qualities, which are scarce ; common grades must be written a turn lower. Oats quietly steady. Beans firm. Maize easy. Quotations : Wheat, white, 3s 3d to 3s 5d per bushel ; red, 3s 2d to 3s 4d ; barley, 2s 9d to 3s 9d ; oats, 2s to 3s ; beans, 3s 8d to 4s ; maize, 2s 8d to 3s ; vetches, winter, 4s to 6s ; and spring, 3s 6d to 5s.

Ipswich, Tuesday.—Fair supply of wheat. Trade quiet at about last week's rates. Reds, 29s to 30s ; white, 32s. Moderate supply of barley. Fine samples in request, at fully late rates. Other descriptions slow of sale. Oats firm. Maize the turn dearer. Beans and peas without alteration.

Leeds, Tuesday.—The trade has just about held its ground during the past week, as, notwithstanding a limited demand, holders of wheat insist upon full prices, spot values ruling more or less below the cost of import. Supplies of English barley are beginning to decrease, and prices, especially for fine qualities, are well maintained. American maize 9d dearer. Beans and oats unchanged.—DUNNS AND CO.

Leeds, Friday.—Slow demand for both English and foreign wheats at a slight reduction upon Tuesday's prices. New English making from 27s to 29s ; old, 30s to 32s ; and foreign from 28s to 32s. Maize fully maintains Tuesday's advance. No material change in barley, beans, peas, oats, or flour.

Leicester, Saturday.—Fair attendance, with moderate supplies of home-grown wheats, but only fine samples in request, which realised 27s to 31s per 36 stones. Barley a dragging trade. Fine oats in good demand.

Lincoln, Friday.—Moderate supply of English wheat. Trade steady at easier rates. Reds, 27s to 28s ; whites, 28s to 29s. Only good barleys looked at, prices 28s to 35s. Oats, peas, beans, and maize all dull at late rates.

Liverpool, Friday.—Wheat quiet, with a retail trade generally at ½d under Tuesday's prices. Flour steady, but only a very quiet business passing at last market day's prices for foreign. The Liverpool Millers' Association made no change in the minimum price of bakers. Maize has experienced a fair trade for mixed American, but prices are 1½d lower owing to free arrivals. European has a fair inquiry at unchanged prices. Plate quiet at a general decline of 1d. Barley for malting is very dull, with little doing, prices favouring buyers. Feeding has a moderate trade at an occasional ½d improvement. Beans are slow, prices the turn easier. Peas steady, but quiet, at last Tuesday's quotations. Oats firm, with a better demand at late rates for English. Foreign kinds receive more attention, and firmly held at an advance of ½d for American clips. Oatmeal firm, with a fair trade doing ; prices in sellers' favour. Oilcake steady, but only a moderate business passing at last Tuesday's prices.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—The weather has not been recently the description to stimulate business, as the damp affects the condition of grain. Our wheat trade to-day was firmer, and select parcels an exceptional slight advance, but inferior qualities neglected, though holders will not recede. Barley of best sorts in demand at full rates, but common lots are a drug, and only to be got rid of by making allowances. Oats continue to hold a firmer position. No alteration to note in beans, peas, or maize, nor is there any change in the quotations for rye, tares, hemp, brank, sergo, or millet.

Manchester, Thursday.—English wheat has lost 3d per qr. on the week, and foreign ½d to 1d per cental. Trade quiet throughout the week. Flour continues slow of sale, but no change in prices can be named. Oats are steady at late rates in English descriptions ; foreign rather dearer. Barley ½d per bushel higher. Indian corn is ¾d per cental dearer. Peas and beans unchanged.

Newark, Wednesday.—Wheat repeated prices. Barley a dull trade, especially for the lower grades. Oats and beans unaltered.

Newcastle, Tuesday.—A thin attendance. All descriptions of wheat were held for Saturday's full quotations, but the demand was far from active. Maize in good request, and prices favour sellers. Beans and peas firm. Other articles without material change.

Newcastle City-on-Tyne, Saturday.—Wheat inactive for all descriptions, buyers acting independently, no change to quote. Malting barley disappointing, so far, but expected to improve later. Oats irregular, and leaning more to buyers. Beans and peas at nominally late rates. Maize, as a consumptive trade, is good, although it looks shaky ahead. Flour steady, usual at this time. Rains every day.

Newcastle-on-Tyne, Saturday.—Wheat at our to-day's market ruled quiet and prices favoured buyers. Maize firm, and dearer on the spot, easier to arrive. Beans and peas steady and last week's prices maintained. Barley steady for fine qualities, common sorts neglected. Oats were held for last week's prices ; demand, however, was not active. Flour no change.—JOSEPH POLLARD AND CO.

Northampton, Saturday.—Unfavourable weather limits the attendance of farmers and the general conditions and supply of farm produce. Business was very dull and inactive at about last week's prices. Quotations :—White wheat, 29s to 30s ; red, old, 29s to 30s ; red, new, 26s to 28s ; barley, malting, 24s to 31s ; barley, grinding, 20s to 23s ; oats, 18s to 22s ; old 23s to 25s ; beans, 28s to 36s ; flour, 22s to 25s.

Norwich, Saturday.—No new feature in the wheat trade since last week, the supply being small, with an inanimate trade. Barley in large supply, with values unaltered. Wheat, red, 29s to 29s 6d per qr, weight 63lb per bushel imperial. Barley, 27s to 29s for average runs, fine lots rather more. Corn Inspector's return for the week ending November 26th, 1900 :—Wheat, 2,518, 27s 5½d ; barley, 12,402-7, 26s 1½d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat only in moderate supply, and made full rates. Fine barleys scarce, and values well supported ; inferior lots, which formed the bulk of the supply, neglected. Oats and beans sparingly represented, and made full rates.—ROBERT HUBBLE.

Oxford, Saturday.—Small attendance, very quiet for wheat at about last week's prices. Little barley offering, best qualities make full prices, and fair inquiry for medium.

Peterborough, Saturday.—There has been a slow trade for wheat to-day, with prices about the same as last week. Less barley offering, and it made quite as much money. Oats firm at full prices.—THOMAS HILL AND SON.

Plymouth, Thursday.—Business at our corn exchange today was still as much inactive as last week. Barley and maize are unchanged from last week's prices. Wheat is quiet, and oats dearer.—ORLANDO DAVIS AND CO

Ripon, Thursday.—Only a small attendance. A few samples of barley, which are of inferior quality, are on offer, but bad to sell. Wheat, English, new, 27s to 29s, according to condition ; ditto, old, 31s ; ditto, foreign, 30s 6d to 34s 6d ; barley, malting, 24s to 28s ; ditto, grinding, 21s to 23s ; oats, old, 25s to 26s ; ditto new, 17s to 19s ; maize, round, 24s to 27s ; ditto, flat, 23s 6d per qr ; beans, old, 1s per stone ; bran, £5 per ton.

Romford, Wednesday.—Wheat trade slow at last week's prices. A very small supply, and several samples out of condition. Red wheat made 28s to 29s 6d, and white wheat 29s to 31s 6d per quarter.

Reading, Saturday.—Business here to-day proved very slow, despite a much larger attendance than usual. The wheat trade was rather easier than of late, and where sales took place rates ranged from 27s to 30s. The quantity of barley on offer was above the average, and business ruled fairly good, last week's prices generally prevailing. Oats, beans, and peas sold at recent quotations.

St. Neots, Thursday.—Small supply of wheat, and slow trade for it at previous prices. Useful qualities of malting barley met a fair inquiry, and realised fully as much money ; but there was not a great quantity offering.—ELWOOD AND SON.

Salisbury, Tuesday.—There was a large attendance of buyers at the Corn Exchange to-day, and with a very limited supply of grain, trade was dull. Wheat met a firm trade, at last week's prices. There was little change in barley and oats. Beans the turn dearer. The following were the quotations :—Wheat, 28s to 33s per qr ; barley, best, 32s to 36s ; ditto secondary, 26s to 30s ; oats, black, 16s to 20s ; ditto white, 18s to 22s ; beans, 32s to 35s.

Sheffield, Tuesday.—Moderate attendance. Wheat : English and foreign held firm at last week's prices. Flat maize a shade dearer on the week. Beans and oats are firm at late rates. Quotations :—Wheat, white, 32s to 33s ; red, 31s to 32s ; new, 30s to 31s per 504lb ; oats, old white, 26s ; ditto, new white, 17s 6d to 19s ; ditto old black, 22s ; ditto new black, 16s to 17s per 336lb ; peas, grinding, 32s to 34s ; ditto blue, 53s to 70s per 504lb ; beans, Egyptian, 33s ; ditto English (new), 31s 6d to 32s per 532lb ; barley, grinding, 23s to 24s ; ditto malting, 27s to 35s per 448lb ; Indian corn, small old, 29s to 30s ; ditto American mixed, 23s to 24s per 480lb.

Spalding, Tuesday.—At the Corn Exchange to-day wheat was a slow trade, at last week's price of 27s per qr. Oats were firm, selling at 17s to 18s. Barley a slow trade at late rates. Not much doing in other articles.

Stockton, Wednesday.—Very few samples of English wheat, which made 28s per qr. During the week the trade in foreign wheat has kept steady, with a moderate inquiry from millers, and a decline in price of 3d to 6d per qr is quoted. Maize 6d easier. Oats unchanged. Small show of malting barley, but no change in price.

Sunderland, Saturday.—Little grain on offer. Wheat quiet at late rates. Barley slow. Oats steady. Arrivals, coastwise, nil. Foreign wheat 1,000 qrs.—E. AND F. RICHARDSON.

Wakefield, Friday.—We have a dull market for wheat today, and in the small business done a reduction of 3d per quarter under last week's prices is accepted. We have a good supply of barley, the greater portion being poor quality, which meets with scarcely any enquiry. Finest qualities sell at late rates. No alteration in feeding stuffs.—MICHAEL SANDERSON AND SON, LIMITED.

Wakefield, Friday.—The wheat trade has been extremely slow during the past week, and on the business doing buyers have had a slight advantage, otherwise the position remains unchanged, foreign limits being too high to admit of fresh transactions with any margin of profit. Barley in moderate request at late rates. Maize 3d dearer. Oats very firm. Beans steady.—DUNNS AND CO.

Winchester, Saturday.—Wheat in very short supply on our market to-day, which met a slow trade at fully late rates. Best barleys in fair demand, inferior descriptions difficult to quit. Oats and maize unaltered. Flour 6d cheaper.—FEAR, COLEBROOK AND CO., LD.

Wisbech, Saturday.—A moderate supply of grain. Wheat 6d lower, red 27s, white 28s, old 30s. Oats firm at late rates, 17s 6d to 20s. Barley : Little offering.—JAMES FLETCHER.

Wolverhampton, Wednesday.—There was a good attendance of farmers and dealers, but very little business was transacted. Wheat was somewhat flat, at easier rates. Oats, old, 15s to 16s ; ditto new, 11s to 11s 6d ; beans, old, 14s 6d to 15s 6d ; ditto, new, 12s 3d to 13s per 196lb ; maize, 23s 6d to 24s 6d per 480lb.

Worcester, Saturday.—Business was again slow for both English and foreign wheat, and prices with difficulty maintained. Barley, oats, and round maize unaltered. Flat maize rather firmer. English wheat, white, 27s to 28s ; red, 26s to 27s per quarter.

York, Saturday.—Wheat continues scarce, and owing to the indifferent quality prices are difficult to maintain. Fine white wheat, 28s to 29s ; and red and mixed, 27s to 28s. per quarter of 36 stones. Good samples of malting barley realise quite as much money. Inferior slow of sale. Oats scarce and firm. The averages of the week from the official corn return have been : Wheat, 26s 8d : barley, 23s 8d ; and oats, 16s 3d per quarter.

FOREIGN.

The Antwerp wheat market has been supported by a regular demand to meet the requirements of consumption. The weather has been mild and somewhat rainy in France, and the young wheats have in many localities made sufficient progress to enable them to resist frost ; a little cold weather would be welcome, as it would have the effect of checking injurious vegetation and noxious insects. The area of country devoted to wheat this year in France is considered to be equal to that of 1899. Although we have now reached the close of November, the French provincial wheat markets have shown surprisingly little change ; it is stated, however, that millers, having in some cases run short of supplies, have been obliged to accept the rather higher terms insisted on by holders ; and French farmers still appear to have an impression that a period of higher prices is close at hand. Last week's sales of wheat at Marseilles amounted to 15,500 quintals. The Paris wheat market has shown little change, flour for consumption has also remained at about former rates in the French capital. Disposal wheat has been quiet at Konigsberg ; the Dantzic wheat market has shown little change. The deliveries of wheat upon the Russian provincial markets have been restricted, but the demand has been somewhat inactive, and scarcely any alteration has been noted in prices. In the south-west of Russia the tendency of business has been rather weak ; in the districts watered by the Lower Volga, business has also presented little activity. The Odessa wheat market has shown a weak tone in sympathy with the dulness of business in the great American centres. The weather has been mild and rainy in Southern Russia ; wheat sowing has been completed under satisfactory conditions. The quantity of wheat now en route for Europe is returned at 1,205,000qr., as compared with 1,265,000qr., at the corresponding date of 1899. The total of 1,205,000qr. is made up as follows:—France, 110,000qr. ; Belgium, 340,000qr. ; Holland, 230,000qr. ; Germany and the North, 180,000qr. ; and Italy, Spain, etc., 345,000qr.

Hamburg, Saturday. — Mild weather continues, and our market is in a quiet state, but prices are not lower, there being no pressure to sell. The imports during the week amounted to : — 7,225 tons wheat, 4,655 tons rye, 17,658 tons barley, 16,390 tons maize. German wheat is offered sparingly, the difference in price against foreign (in the interior about 5s per qr.) being considered too wide, and holders are awaiting a more reasonable proportion of prices. Fine red Holstein, Mecklenburg, and Saale is held at 27s 3d to 28s ; common sorts at 26s to 26s 9d per 504lb f.o.b. Fine River Plate is selling at 29s 9d, hard winter No. 2 to arrive is offering at 28s 9d per 480lb c.i.f. Hamburg. There is not much doing in rye. 9 10-15 South Russian is held at 22s to 22s 6d per 504 lb. c.i.f. Hamburg. Offers of finest malting barley are scarce, and Saale is held at 36s to 39s ; fine Bohemian at 37s to 38s f.o.b. Good Saale is selling at 31s 6d to 34s ; good Bohemian at 34s to 35s ; Pomeranian at 28s 9d, Holstein and Danish at 25s to 26s 6d per 448 lb f.o.b. Russian feeding barley quiet at 17s 9d to 18s per 400 lb c.i.f. Hamburg. Mixed maize meets a slow sale. Prompt deliveries are offering at 20s to 20s 3d ; December, January, February shipments 18s 9d per 480 lb c.i.f. Hamburg.—JOHN TATLOCK.

Otley: 6 or 7 for 1s.

COLONIAL DAIRY PRODUCE.

London, Friday.—Butter.—The demand for "choicest" and "finest" brands of Australian butter cannot be met at the moment owing to the very late arrival of the s.s. Cuzco which has thrown the market all out of gear. It is reported that after another voyage the Cuzco will be withdrawn from the Australian service. The Whakatane from New Zealand is also a few days late, and the consequence is that next week large supplies of butter will be on hand. It is fortunate that the Oruba, due on December 8th, has only 8,800 boxes of Australian butter aboard or these late arrivals of steamers would have brought about a glut of butter. Prices have advanced 2s per cwt. on the week in sympathy with the general rise in price of butter. "Choicest" may now be quoted at 110s to 112s per cwt., but the greater part is sold at 110s. "Finest" brings 102s to 106s. Canadian butter may be quoted in Manchester at 110s to 112s for "Choicest," but in London 102s to 104s is the top value. The supplies from Canada are falling rapidly away and the total import of Canadian butter since 1st of May this year is 5,000 tons below the corresponding period of 1899. The Copenhagen committee has acted prudently in not again raising the official quotation, as it is pretty evident the trade in this country would not follow the rise. The price of Danish is already 14s per cwt above Australasian, and it is not probable that any higher value will be reached this side of Christmas. In the secondary quality of butter there is a very big demand for Russian or Siberian, which has been such good value for some time that other secondary varieties have been passed aside in favour of the new comer. The price of Russian, however, is advancing and the quantity diminishing rapidly so that American, which is also very good value, will have a chance of meeting a better demand. Supplies of Argentine butter are very late this year, only about 325 cwt having arrived since 1st September, while last year 1,325 cwt arrived, or just 1,000 cwts more. Cheese.—There is more demand this week for Canadian cheese on the "spot," and a firmer tone, but no real change in values, which augurs well for the trade as soon as the Christmas demand sets in.—W. WEDDELL AND CO.

PERRY AND CO.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

There has not often been a month so good for the farm and so bad for mere humanity as that which we have just left behind us. In the months from April to September the interests of men and crops "jump" together, but the cold wet period which is of service in certain agricultural junctures is always hated by the human beings exposed to it. Moreover, the dull leaden skies and the dense atmosphere which depress humanity are no injury, but rather the reverse, to the fields, from which they check evaporation. After summer heat and drought the soil requires a certain saturation with moisture before the autumn-sown crops—from tares and rye to the leading cereal itself—can make an effective start on their plant life and growth. The country during December will benefit from a colder and dryer air. A correspondent whose knowledge of French agriculture is specially good assures us that he has seldom, if ever, seen the French fields looking so well as at the present moment. The official reports from Germany are also thoroughly satisfactory. Statistics, so called, are to hand from Argentina, but the area returned as under wheat is known to be by no means up to the truth, and so long as wheat land is specially taxed we must look upon the returns as always much within the mark as to the yield per acre; an exact estimate is of extreme difficulty, for while virgin soil yields three qrs. per acre, the yield from land repeatedly cultivated without manure quickly sinks to one qr., and the total area under cultivation represents every stage, from that of absolutely fresh soil to the fields that are practically "played out."

Recent markets have been very dull, but there is a better feeling making itself manifest, and when the Smithfield week brings farmers to town in goodly numbers we may expect to see a decided revival in business The miller buying at Mark Lane from December 10 to 17 will not have to pay cash before the same dates in January, and his accounts for 1900 will show a better balance than if he had bought in November.

The demand for English, good American, and good German and South Russian wheat is better than that for Californian Walla or La Plata kinds. The Argentine includes some excellent wheat, but shippers are unwise in sending so much of the grain in a dirty condition.

The supplies of breadstuffs last week were smaller than the wants of the same seven days. This had not recently been the case, and so the relief felt was appreciable.

	Qrs.
English wheat	108,000
Foreign wheat	235,000
Foreign flour	138,000
Total	481,000

The stocks in granary on the 1st inst. were estimated at 3,078,000 quarters, a quantity which shows a ten per cent. increase on the total held at the commencement of the cereal year.

Breadstuffs supplies for the past three months of the cereal year (Sept. 1 to Nov. 30) are thus estimated:—

	Qrs.
English wheat	1,491,000
Foreign wheat	4,354,000
Foreign flour	1,898,000
	7,743,000

The requirements for a quarter of the year at thirty millions a year would be 7,500,000 qrs., and the stocks in granary indicate that these wants have been actually those of the period. The total breadstuffs supplies for the first three months of last cereal year were 7,240,000 qrs.

Breadstuffs shipments for the first three months of the shipping year, August 1—November 30, are estimated at the following total, flour being reckoned as wheat on the British Government basis:—

	Qrs.
The United States	6,200,000
Russia	3,690,000
Roumania	2,130,000
Argentine	1,350,000
Canada	650,000
Australasia	215,900
All other countries	750,000
Total	14,985,000

In the same period of last shipping year a total of about fourteen millions was exported.

There were on the 1st inst. 1,678,000 qrs. of wheat on passage, against 1,500,000 qrs. a year ago and 1,395,000 qrs two years ago. Details of the present quantity are as follows:—

	Qrs.
Californian	960,000
American	260,000
Australasian	200,000
Argentine	200,000
Russian	50,000
Turkish	5,000
Total	1,675,000

There are 360,000 sacks of flour on passage, against 390,000 sacks a year ago and 480,000 sacks in 1898.

The following quantities of spring corn are ascertained to be now on passage to the United Kingdom:—

	Maize. Qrs.	Barley. Qrs.	Beans. Qrs.
December 1, 1900	580,000	610,000	9,000
,, 1899	1,020,000	590,000	7,500
,, 1893	780,000	595,000	17,000
,, 1897	490,000	735,000	12,000

The maize at present on passage includes 480,000 qrs. of flat or American; the barley includes 300,000 qrs. of Californian; and the beans are all African, though the ports whence they were despatched range from Tangiers in Morocco to Alexandria in Egypt. There are 50,000 qrs. of linseed coming from Russia, 25,000 from the U.S.A., and 2,000 qrs. from India, but all the linseed on passage from Argentina is consigned to Continental ports.

American stocks in merchants' hands on 1st instant thus cabled:—

	Dec. 1, 1900. Bushels.	Dec. 1, 1899. Bushels.
Wheat	84,524,000	83,397,000
Oats	18,751,000	11,689,000
Maize	10,920,000	17,494,000

These figures do not include the three States west of the Rocky Mountains.

The week's imports of spring corn include 162,000 qrs. of barley, 187,000 qrs. of oats, 290,000 qrs. of maize, 9,000 qrs. of beans, 14,000 qrs. of peas, 39,000 qrs. of linseed, 5,000 qrs. of rapeseed, and 4,000 tons of cottonseed. Prices for none of these staples show any material retail change on the seven days.

The following changes on the month are to be noted in flour:—

Town whites, 6d. down.
Town households, 6d. down.
Paris average, 4d. up.
London top price shows no alteration.

The market in the U.S. is weaker than it was in the middle of November, but it is thought that stronger advices are likely to come to hand with December. Thursday was a species of Bank holiday in America, and there has been no real resumption of business since. With a new week, however, we may expect to get full and useful quotations of the chief American kinds of flour. There is an excellent sale of maize flour, and we also hear of a steady demand for flaked maize.

THE BALTIC.

The San Francisco Corn Trade Association has made up standard samples of No. 1 Californian wheat, No. 1 milling Californian wheat*, choice milling wheat*, Chevalier barley, No. 1 bright feeding barley*, and dark feeding barley*. Those samples marked by an asterisk are new standards. The London Corn Trade Association show the samples at their offices.

The arrivals of grain and seed laden vessels at ports-of-call for the week were 6 wheat (1 Melbourne, 1 Port Augusta, 1 Rosario, 2 San Francisco, 1 Tacoma); 1 Pease (mazagan); total, 7.

The sailings of grain and seed-laden vessels from ports-of-call for the week were: — 8 wheat (1 Antwerp, 2 Cardiff, 1 Dublin, 2 Hull, 1 Maryport, 1 Plymouth); total, 8.

Since January 1, 1900, the total arrivals have, been:—315 wheat, 14 wheat and barley, 1 wheat and pease, 7 flour, 12 maize, 1 maize and oats, 26 barley, 19 beans, 10 locust beans, 2 pease, 1 linseed, 5 canaryseed, 2 fenugreek seed, 5 valonea; total, 420.

Last year, during the same time, the arrivals were:—270 wheat, 10 flour, 5 maize, 9 barley, 1 barley and beans, 1 rye, barley, and oats, 10 beans, 2 locust beans, 6 linseed, 6 canaryseed, and 7 valonea; total, 327.

A fair amount of business has been done in cargoes, but nearly all of it has been for future shipment. Cargoes near at hand are neglected. In wheat we have to record four cargoes of Argentine new crop sold for February shipment at 27s. 9d. This is an ugly feature of the trade for spot holders, but the flood of new La Plata wheat will hardly strike our shores much before Easter. Other wheat sales are Duluth, 32s. 6d.; Hard Winter, 28s.; Australian, 30s.; and Bulgarian, 28s. 3d., all for January shipment. A cargo of Indian new crop for April shipment was sold on Saturday for 30s. 6d., and one for May at 30s. Maize sales have included American at 20s. 3d., and Odessa at 22s. 6d. Barley sales have comprised Novorossisk at 18s. 6d. and Persian at 17s. Other sales are Canadian peas at 27s. 9d., fine black Swedish oats at 18s. 3d., and Smyrna beans at 27s. 6d. per qr.

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

The wheat market to-day was disappointing, as many persons had looked for recovery as soon as November was past, and the tone to-day was barely steady. English, however, was in pretty good request at 28s. to 32s. per qr., while Duluth wheat at 34s., Manitoba at 33s., Californian at 30s. 9d. to 31s. 3d., Walla at 30s. 6d., Australian at 30s. to 32s., and Taranrog at 29s. to 30s., all had a fair to good sale. British barley sells pretty well for English 448lb. kinds, which range from 27s. to 39s. per qr. The price of Russian is about 3d. dearer on the week, but for Californian brewing barley there was not much sale, and prices were rather in buyers' favour. New Tartary oats at 18s. 9d. are looked after, as are new white at 18s. 6d. per qr. Foreign oats are an improved trade, and 3d. advance may be quoted in 304lb. as well as in 320lb. descriptions. Maize was firm for spot trade, but weaker for futures. Peas were steady for English, but weaker for Canadians. Egyptian beans at 31s. to 32s. are 1s. cheaper from November terms, and there is a fall of half-a-crown per ton in cottonseed. But linseed poppy seed and rapeseed are, despite increased supplies, maintained at a high level of value. Sesame also is dear, and no concessions are made in oilcakes as a rule.

CLOSE OF THE MARKET.

By Telephone, 2 *p.m.*

THE MARKET CLOSED WITH WHEAT AND MAIZE DIFFICULT TO PLACE, BUT OATS AND FEEDING BARLEY WERE A FAIR SALE.

THE FLOUR TRADE.

MARK LANE, Dec. 3rd.

There was a fair retail demand for London sorts to-day, but prices were rather lower for both whites and households. Country flour was a somewhat poor sale, and prices must be quoted a trifle lower for most makes. American flour is rather lower on the week for all the chief patents, and also for the serviceable baking grades. Hungarian flour is steady, but with only a slow sale. French continues out of favour. Australian, a small supply, is held for full rates. Wholemeal is about 2s. 6d. per ton lower, but there is an equal rise in wheat germ meal. Bran is dearer for all the chief kinds, but we note no change in pollard, and middlings start December with lower prices than prevailed in November. The same remark will apply to maize germ meal, which is 2s. 6d. lower, though maize cones, flour, and starch all maintain fully previous values.

LONDON TERM MARKET.

This market is held twice a day, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made :—

WHEAT.—	Dec.	March.	June.
	s. d.	s. d.	s. d.
Nov. 26 11 a.m.	6 7	6 8	6 9
4 p.m.	6 7	6 8	6 9
Nov. 27 11 a.m.	6 7	6 8	6 9
4 p.m.	6 6	6 8	6 9
Nov. 28 11 a.m.	6 6	6 8	6 9
4 p.m.	6 6	6 8	6 9
Nov. 29 11 a.m.	6 6	6 8	6 9
4 p.m.	6 5	6 8	6 8
Nov. 30 11 a.m.	6 5	6 8	6 8
4 p.m.	6 5	6 8	6 8
Dec. 1 11 a.m.	6 5	6 8	6 8
To-day 11 a.m.	6 4	6 7	6 7

The maize sales for future delivery include 4s. 3d. per cental for December, and 3s. 11d. for February.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

The Term Market (while the "Baltic" is rebuilding) is temporarily situated at the Great Eastern Hotel, No. 190, Bishopsgate Street, ground floor.

The deposit required from members of the Term Market has been fixed at £50 *minimum* and 1s. per quarter margin on any purchases above 1,000 quarters.

PROVISIONS.

London, Monday.—The arrivals from Ireland last week were 3,293 bales bacon, and from foreign ports 7,000 bales bacon. The continued scarcity of bacon has caused a further advance in prices, and during last week Irish and Danish were 6s and Canadian 3s 4s dearer, Irish and Danish 64s to 68s; Canadian, 56s to 61s. The butter market was steady, with rather improved prices for finest Colonial. Quotations were :—Danish, 120s to 124s; Colonial, 106s, 110s, to 112s; Canadian, 100s to 104s. Lard :—Irish, good demand, 54s to 64s; American, slightly easier, 38s 6d to 40s 6d.

GRAIN AND FLOUR FACTORS' REPORTS.

The trade for milling offals is unaltered from last Monday. Buyers are holding off for lower prices, which come slowly.—RICHARD DOGGETT, Mark Lane.

Only a moderate inquiry has been experienced for wheat to-day; and occasionally, to effect sales, a slight reduction from last week's values has had to be conceded. Maize is 3d. lower on the week. Barley is unaltered. Oats unchanged.—W. P. WOOD AND CO., Mark Lane.

Flour, a quiet trade at last week's prices.—T. S. MEDILL, Mark Lane.

Wheat trade quiet, white qualities about 6d. per qr. lower. Flour unchanged. No change in the value of maize, barley, and oats.—COVENTRY, Mark Lane.

The seed market continues inactive and uninteresting, but the general tone is firm, with an expectation of improving prices when general buying commences. The supply of new English red continues very light. There are ready buyers for the few good samples offered, but inferior lots are not easy to place. Clovers generally and trefoil are unaltered in value. Grasses are steady. Spring tares are held above buyers' views. Canary-seed firm. Blue peas and haricot beans quiet.—JOHN PICARD AND CO., Mark Lane.

Offals.—The demand for bran is only moderate, the consumption so far being smaller than usual at this season. No change to report in prices. Pollard is also not much in demand.—GREENHILL BROS., Belfast, December 1.

Flour.—There is no improvement to note in the demand for flour, and prices are again 3d. to 6d. lower. Grain.—Indian corn is in better supply, and 3d. per boll lower. Foreign oats and peas are in good demand at 3d. advance. Barley in buyers' favour. Canadian oatmeal 6d. per sack dearer. Mill stuffs.—Bran and thirds unchanged.—MCKINNON AND MCDONALD, Glasgow, December 1.

Wheat quiet with a retail trade generally at ½d. per cental under Tuesday's prices. Flour steady, but only a very quiet business passing at last market day's prices for foreign. The Liverpool Millers' Association make no change in the minimum price of bakers'. Maize has experienced a fair trade for Mixed American, but prices are 1½d. per cental lower owing to free arrivals. European has a fair inquiry at unchanged prices. Plate quiet at a general decline of 1d. per cental. Barley for malting is very dull with little doing, prices favouring buyers. Feeding has a moderate trade at an occasional ½d per cental improvement. Beans are slow, prices the turn easier. Peas steady but quiet at last Tuesday's quotations. Oats firm with a better demand at late rates for English. Foreign kinds receive more attention and are firmly held at an advance of ½d. per cental for American clipped oats. Oatmeal firm with a fair trade doing, prices in sellers' favour. Oilcake steady, but only a moderate business passing at last Tuesday's prices.—ROSS T. SMYTH, Liverpool, December 1.

THE BALTIC, MONDAY, 1 p.m.

STATE OF TRADE.

Wheat cargoes for future shipment are 3d. lower, but there is an improved inquiry at the concession. Cargoes on passage are very slow of sale. Maize is firmer for American. Barley cargoes are weaker for brewing, but stronger for feeding types. Peas are in better request, but only at a slight decline. Oilseeds are lower for spring shipment.

BUSINESS DONE.

WHEAT.— Oregon, 30s 6d, arrived; Walla Walla, 29s 6d, January shipment; Argentine, 29s 9d, December shipment, old crop; ditto, 29s 3d, February shipment, new crop; Australian, 30s 3d, February shipment, new crop; Calcutta Club, 30s, May shipment, new crop; No. 2 Hard Winter, 28s 6d, January shipment; Kansas, 28s 9d, January shipment.

MAIZE.—Galatz, 22s, prompt shipment; Argentine, 20s 9d, on passage; American, 17s 9d, January shipment, new crop; American, 17s 6d, February shipment, new crop.

BARLEY.—Crimean*, 18s 9d, prompt shipment; Persian, 17s 3d, arrived.

OATS.—Petersburg, 13s 9d, prompt shipment; American Mixed, 14s 3d, prompt shipment; Canadian, No. 2, 14s, prompt shipment.

PEAS.—Canadian No. 2, 27s 1½d, prompt shipment.

DARI.—Smyrna, 25s 6d, prompt shipment.

BUCKWHEAT.—Canadian, 27s 3d, prompt shipment.

LINSEED.—Argentine, 45s 6d, February shipment.

CANARYSEED.—Saffi, 36s, prompt shipment.

RAPESEED.—Fine French, 60s, prompt shipment.

* Crimean ports are free from ice.

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough High-street, London, S.E., report: There has been rather more inquiry during the past week, the principal demand being for the lower-priced hops. Holders are very firm, and many bids of a shilling or two less than nominal values have been refused.

CATTLE.

Metropolitan Market, Islington

Monday, Dec. 4th, 1900.

	British	Total	Dec. 4th, 1899
Beasts	1,650	1,650	—
Sheep and lambs	5,820	5,820	—
Calves	10	10	—
Pigs	170	170	—
Milch cows	45	45	—

Quotations per stone (sinking the offal).

ENGLISH.

	Inferior	Second	Prime.
	s. d.	s. d.	s. d.
Beasts	7 10 to 8 2	8 4 to 8 8	8 10
Sheep	8 2 to 8 8	8 10 to 9 0	9 4
Lambs	9 0 to 9 4	9 6 to 9 8	10 0
Pigs	7 10 to 8 0	8 2 to 8 4	8 6

Milch cows, per head £18 to £—

British arrivals include as follows: Scotland, 1,650; Eastern Counties, 290; Midland, Home and Western Counties, 1,000; Devon, 30; Ireland, 94.

Though the supply in the beast market was large, the trade had a slow nature, prices were 1d. per stone lower. Arrivals from Norfolk were a trifle heavier, and included a number of forward butchering cows and bulls, these meeting with a fair inquiry, as also did the few lots of Irish.

The following are the top quotations per stone (sinking the offal) :—

	To-day	Dec. 4th, 1899
Scotch	8s 8d to 8s 10d	8s 8d to 8s 10d
Devons	4s 7d to 4s 9d	— to —
Herefords	4s 9d to 4s 10d	4s 6d to 4s 8d
Norfolks	4s 3d to 4s 5d	4s 6d to 4s 8d
Runts	4s 6d to 4s 8d	4s 5d to 4s 7d
Lincolns	4s 8d to 4s 9d	4s 8d to 4s 9d
Irish	4s 2d to 4s 4d	4s 2d to 4s 4d
Fat cows	3s 8d to 3s 10d	3s 8d to 3s 10d

In the sheep market there was a decrease of 1,000 head in the supply, including 500 Irish, 150 Scotch, and 1,000 from the Eastern Counties. Trade for both wethers and ewes was firmer, both in regard to tone and value, a clearance however not being expected. Lambs were more difficult to dispose of.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class penned :

	To-day.	Dec. 4th, 1899.
7½ to 8 stone Downs	5s 6d to 5s 8d	5s 8d to 5s 10d
9-stone ditto	5s 4d to 5s 6d	5s 6d to 5s 8d
10-stone half-breds	5s 0d to 5s 2d	5s 2d to 5s 4d
12-stone Lincolns	— to —	4s 10d to 5s 0d
10-stone Irish	4s 10d to 5s 0d	4s 8d to 4s 10d
10-stone Down ewes	3s 10d to 4s 0d	4s 0d to 4s 2d
5-stone fat lambs	5s 10d to 6s 0d	— to —

For pig trade was dull, the demand being less though rates were not lowered; best small breeds making 4s 6d per 8lb.

London Central, Monday.—Fair supplies, trade slow. Beef: Carcases, 3s 8d to 3s 10d; hindquarters, 4s 2d to 4s 6d; roastings, 5s 2d to 5s 6d. Sheep: Ewes, 3s to 3s 4d; wethers, 4s to 4s 4d; hindquarters, ewes, 4s to 4s 4d; wether, 5s to 5s 4d. Pigs: Large, 3s 2d to 3s 4d; small, 3s 8d to 4s.

St. Ives (Hunts), Monday.—Beasts, 568; sheep, 800; pigs, 515; horses, 8. Beef 7s to 8s; mutton 7s to 8s; veal, pork, 6s to 6s 6d. Fat and store cattle, sheep and pigs for trade. Milch cows, fair show and trade, prices £14 to £22.

FOREIGN CATTLE.

Deptford, Monday.—Beasts 970. To-day's supply, compared with Monday last, showed an increase of 500, and consisted of 364 from the United States and 606 from Canada. With regard to quality, it was rather below the average, taking the supply as a whole, consequently the best on offer sold more readily at an advance of 2d per 8lb. Canadians met a slow sale so far as ranchers were concerned. The following were the quotations per 8lb offals given in:—90 to 95 stone States, 4s 5d to 4s 6d; second quality ditto, 4s 2d. Best Canadians, about 95 stone, 4s to 4s 2d; ranchers, 3s 6d to 3s 10d. No sheep on the market. The following were the numbers on offer on the corresponding day last year, with the current top rates :—Beasts, 1,602, 4s 5d to 4s 6d per 8lbs, to dress about 800lbs. Sheep, 2,307, 3s 10d per 8lbs, to dress from 88 lbs.

Liverpool, Monday.—Demand slow for all classes of cattle, particularly middling quality, of which the supply largely consisted, at considerably lower prices. Trade very slow for sheep, and prices lower all round. Beef, 6½d to 7½d per lb; mutton, 8d to 5½d per lb. At market: 1,812 cattle and 5,356 sheep.

FEEDING STUFFS.

London, Monday.—Linseed Cake: Trade quiet; there is not much pressure to sell and values show but little alteration. Cotton cake is a good trade and prices steady. Decorticated cake still unobtainable on spot; meal very scarce on spot. Linseed has fallen 1s to 1s 6d, but now tends dearer.

English linseed cake	£8 10 0 to £8 15 0	ex mill
American Calcutta linseed cake	None	ex quay
American Western linseed cake	7 15 0 to 7 17 6	ex quay
Russian oil cake	7 15 0 to 8 0 0	ex quay
Feeding cake, Samuelson's S.P.F. (10 to 12 per cent. oil)	6 15 0 —	ex warehouse
Decorticated cotton cake	7 0 0	ex quay 2s all'we
Decorticated cotton meal	6 17 6 —	ex quay
London made cotton cake (best)	5 0 0 to 5 2 6	ex mill
Egyptian cotton cake (in bags)	4 16 3 to 4 17 6	ex quay
Burton desiccated ale grains (bags included)	4 12 6	on rail, Burton
Rangoon Rice Meal	4 12 6 —	ex warehouse
Russian linseed in bulk, per 416lbs	2 15 0 to 2 17 6	ex warehouse
Calcutta linseed in bags, per 410 lbs	2 18 0 3 0 0	ex warehouse

—ROBT. AND JOHN HEWETSON

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., write that the past week's previously limited business in the trade for field seeds. As regards cloverseeds, with the exception of a few orders coming from the North of England, very little business is now passing. Meantime prices are said to keep steady, and supplies everywhere are in moderate compass. For fine samples of mustard and rapeseed full rates are asked. The demand for tares and rye continues meagre. Canaryseed presents a strong appearance; stocks in London, Liverpool, and indeed everywhere else, prove extremely light. Millet, maw, and hempseed move off slowly on former terms. There is no quotable alteration on the week in other descriptions of bird seeds. Some fine Canadian Winter Vetches and longpod beans are now obtainable at reasonable figures.

Worksop Hiring Fair, held on Wednesday, was not largely attended. Boys and young men asked advanced wages, and the ruling quotations were from the former £8 to £14, and for the latter £16 to £20 per year. There was practically no public hiring of horses, and in the private contracts [illegible] vances of wages were asked.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

The market at Islington on Monday was extremely quiet, there being rather less demand for all grades, nevertheless no alteration in regard to the value of either prime or second quality could be noted. On the other hand, middling descriptions, of which the supply was chiefly composed, met with a very dragging trade, with a marked downward tendency in value. On Thursday no transactions with regard to fat beasts were recorded. Fat butchering cows were in steady request, and though shorter in number were no dearer, buyers declining to advance, though much pressed. Fat bulls and rough cattle throughout the week met with rather forced sales and were easier in price. At the foreign cattle market, with a light supply, trade was firm both in regard to tone and value, last week's rates governing all transactions. The total number of beasts offered for sale was 4,389, consisting of 1,980 British and 2,409 foreign, these latter comprising 2,108 from the United States and 301 from Canada. The following were the top rates paid per 8lbs. (sinking the offal):—80 to 90-stone polled Aberdeens, 4s. 10d.; 80-stone Devons, 4s. 9d.; 90-stone Herefords, 4s. 9d. to 4s. 10d.; 80-stone Highland Scots, 4s. 6d.; 90-stone polled Norfolks, 4s. 8d.; 90-stone Runts, 4s. 8d.; 95-stone Dublins, 4s. 4d.; 95-stone Waterfords, 4s. 2d. to 4s. 3d.; 90-stone States, 4s. 5d.; 85-stone Canadians, 3s. 10d.; 100-stone fat cows, 3s. 8d. to 3s. 10d.; 100-stone fat bulls, 3s. 2d. to 3s. 4d. The sheep trade was practically confined to the Islington market, and was one of the slowest noted this year; though lower rates by from 2d. to 4d. per 8lbs. were accepted, a clearance could not be made either of wethers or ewes. A few lambs were shown on Monday, but were difficult to dispose of. On Thursday the transactions recorded were few and far between. The total number penned was 8,782, previous week 7,270, consisting of 8,610 British, increase 1,340, and 172 Canadian. Best pens made per 8lbs. as follows, sinking the offal, 7½ to 8-stone Downs, 5s. 8d.; 8-stone Scotch, 5s. 8d.; 9-stone Downs, 5s. 6d.; 10-stone ditto, 5s. 4d.; 10-stone halfbreds, 5s. 2d.; 10-stone Irish, 4s. 10d. to 5s.; 12-stone halfbreds, 4s. 10d. to 5s.; 10-stone Down ewes, 3s. 10d. to 4s.; 11-stone halfbreds ditto, 3s. 6d.; 5-stone fat Down lambs, 5s. 10d. to 6s. Only 30 calves were on the market, and these difficult to sell. Best were quoted at 5s. 4d. per 8lbs. Pigs were shorter, numbering 370, trade for which was slow at less money. Best small breeds made 4s. 6d. per 8lbs., sinking the offal.

Trade in the West.

The feature of the past week has been the buoyancy of store stock, especially barreners, which are dearer by fully 20s. to 30s. a head than was the case last year, some of the best lots in very forward condition making up to £34 per pair, ranging downwards to £18 or £19. Good milchers also meet a very free trade from £16 to £21 each. In-calvers are equally wanted at extreme rates. Store sheep keep well up in value. Present rates for beef have but little bearing on the Christmas trade, which many are anticipating, as most of the bullocks now offering are of a very ordinary stamp, selling at 10s. to 11s. per score, with a few touching 11s. 6d. Mutton promises to be dear, some of the best even now making 8½d., whilst both veal and pork, judging from indications, will be decidedly dearer for anything suitable for the coming festive season.

Trade in Ireland.

The flooded state of the country was probably the cause of a large falling off in the supply of cattle at last Thursday's Dublin market. The inquiry for really good beef was active at late rates, and second-rate cattle commanded somewhat firmer prices. Prime heifer and ox beef made from 52s. 6d. to 56s., and some extra choice lots from 57s. 6d. to 60s.; second quality, 47s. 6d. to 50s.; and inferior, 42s. 6d. to 45s. The storm, bad trade, and increased supplies had a depressing effect on the mutton department. Prime wether mutton made from 6½d. to 6¾d. per lb.; ewe, 5d. to 6d.; and inferior, 4¾d. to 5d. Good hoggets for the English markets sold at from 44s. to 54s. each. A large number of all classes were unsold at the close of the day. Veal calves of well-fed quality were readily placed at last week's price, viz., 7d. to 8d. per lb., but inferior calves were not worth more than from 4½d. to 6d. per lb. A great scarcity of prime milch cows has been noticeable for several weeks past. The few choice ones left sold readily at from £19 to £21, but the supply was chiefly confined to cows of a very inferior quality. The pig market was much firmer in tone, although supplies were larger; medium weights being particularly in demand at slightly advanced rates. Nice medium pigs sold at from 44s. to 46s., and coarse from 32s. to 38s. per cwt.

Trade in Scotland.

John Swan and Sons, Limited, give the following as their report for the current week:—The number of fat cattle on offer this week has been fairly large. For the best qualities of home-fed, there has been an active demand, and prices quite as high as the previous week, but secondary descriptions have been slow to sell without change in value. Sheep have been much under an average supply, a good demand, and prices the turn higher than the previous week, more especially for those adapted for shop purposes. Fat calves and pigs very dear. This being Big Wednesday market, there was a large supply of store cattle on offer. The great proportion were of a very secondary description. For cattle in forward condition and the best class of stirks, there was plenty demand, and those got sold out at fairly satisfactory prices, but a large proportion of the rougher descriptions were left unsold. A small supply of store sheep—these met a good inquiry and a clearance effected at fully previous prices. Quotations:—Top best beef, 8s. to 8s. 6d. per stone. Mutton from 7½d. to 8¼d. per lb.

LONDON.

London Central, Wednesday.—Fair supplies offered, but trade slow. Arrivals of beef included 45 tons Scotch, 707 Liverpool sides, 1,500 hindquarters, and 800 forequarters American refrigerated. Quotations:—Beef, Scotch, short sides, 4s 4d to 4s 6d; long, 4s to 4s 6d; English, 4s to 4s 2d; American, Deptford killed, 3s 8d to 3s 11d; Liverpool, 3s 8d to 3s 10d; American refrigerated hindquarters, 3s to 3s 8d; forequarters, 2s 6d to 2s 8d. Mutton: Scotch, 4s 4d to 4s 6d; English wethers, 4s to 4s 4d; ewes, 3s to 3s 2d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s to 4s 4d; and Dutch, 3s 8d to 4s 8d per 8lb.

London Central, Friday.—Good supplies, but trade generally slow. Arrivals of beef included 85 tons Scotch, 430 Liverpool sides, 2,600 hindquarters, and 1,800 forequarters American refrigerated. Quotations: Beef, Scotch, short sides, 4s 4d to 4s 8d; long, 4s to 4s 4d; English, 4s to 4s 2d; American, Deptford-killed, 3s 8d to 3s 11d; Liverpool, 3s 8d to 3s 10d; American refrigerated hindquarters, 3s 10d to 4s; forequarters 2s 9d to 2s 10d. Mutton: Scotch, 4s 2d to 4s 6d; English wethers, 3s 10d to 4s 2d; ewes, 2s 10d to 3s 2d; Canterbury, 2s 9d to 3s; Wellington, 2s 7d to 2s 9d; Sydney and River Plate, 2s 5d to 2s 6d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s 2d to 4s 8d; Dutch, 3s 8d to 4s; and Irish, 3s 4d to 3s 8d per 8lb.

Islington, Thursday.—Good number of beasts for Thursday's market, but demand quiet, and rates barely steady. Small supply of sheep, little demand for both wethers and ewes, late quotations, however, being without change. 7½ to 8-stone Down wethers, 5s 10d; 9-stone ditto, 5s 6d to 5s 8d; 10-stone half-breds, 5s to 5s 2d; 10-stone Down ewes, 3s 10d to 4s; 11-stone half-bred ditto, 3s 6d to 3s 8d. Calves in small supply; steady, best on offer making 5s 6d. Pigs in good supply, easier, Neat small 4s 2d to 4s 4d per 8lb, to sink the offal. Total supplies:—220 beasts, 350 sheep, 20 calves, 280 pigs, and 5 milch cows.

COUNTRY.

Ashford, Tuesday.—The supply was rather small in anticipation of next week show market. Best beef went up to 11s 6d, and cows with suet with them were a bit dearer than last week, making up to 10s per score. Mutton and veal remained unchanged, the former going a little over 5s, and the latter to 5s 6d per stone. Pork dear, roasters fetching 10s to 11s per score. Store trade quiet.

Basingstoke, Wednesday.—At Raynbird and Sons' sale-yard there was a fair attendance of buyers to meet a supply of 41 fat beasts, 36 calves, 473 fat sheep, 278 pigs, and 52 head of dairy and store cattle, for which the following prices were realised:—Fat beasts, £12 to £19; fat calves, 70s to £5; small, 20s to 50s; fat wethers, 40s to 56s; fat ewes, 26s to 38s; fat hogs, 65s to 95s; porkers, 45s to 59s; small, 34s to 42s; store pigs, 12s to 26s 6d; dairy cows, £8 to £19 5s, etc., etc. Prime quality fat beasts are wanted, and make full prices. Second-class beasts are still a slow trade, and difficult to clear. Fat cows, if really good, meet a better trade. All classes of fat sheep and lambs met a brisk inquiry, the late sellers having the best of the business, choice sheep of moderate weights selling at extreme prices. Hampshire Down wethers and young ewes made 48s 6d, 49s, 41s, 45s 6d, 51s 6d, 52s, 56s, 50s, 46s, 49s 6d, 48s, 44s, 41s; 11 months old ditto, 54s 6d, 46s, 52s 6d, 38s 6d, 41s 6d, 56s, 45s 6d, 39s, 36s, 48s, 51s 6d, 48s, 46s 6d, 42s 6d, 32s 6d, 29s; crossbreds, 42s; ewes and lambs, 80s; old ewes, 35s, 25s, 27s, 38s, 28s 6d, 26s; Dorset ewes, 36s; rams, 29s, 48s, 51s, 34s, 46s, 47s, 45s 6d, 43s, etc., etc. With a short entry of milch cows prices ruled high for all descriptions. Store cattle met a dull trade. Fat calves are dearer, and met a clearance at an advance on late rates. Fat hogs sold readily at a slight advance on last week's prices. Fat porkers continue a brisk trade at prices in favour of the vendor. Store pigs met a better inquiry. Ruling values:—Prime quality Devon and polled beasts, 7d to 7½d per lb; ditto Shorthorn ditto, 6d to 6¾d per lb; bulls, cows, and inferior ditto, 5½d to 6d per lb; best quality sheep, 8½d to 9d per lb; second ditto, 7¾d to 8d per lb; old ewes, rams, and inferior, 5½d to 6¾d per lb; fat calves, 6¾d to 9d per lb; fat hogs, 9s to 10s; porkers, 11s to 12s 6d per score.

Birmingham, Tuesday.—A fair supply all round, and trade reported fair. Best Hereford heifers, 7d; shorthorns, 6d to 6½d; bulls and cows, 4½d to 6d; calves, 6d to 7½d; wether sheep, 7½d to 8¼d; ewes and rams, 5d to 6½d; lambs, 7½d to 8¼d per lb.

Boston, Wednesday.—An extremely quiet trade. Best beef, 7s 6d to 8s; cow beef, 5s 9d to 6s 3d per stone; young steers, £12 10s to £15; heifers, £10 10s to £17 10s; in-calvers, £19 to £22; calves, 55s to 65s; wethers, 7½d to 8d; ewes, 5½d to 6d per lb; lambs, 35s to 45s; strong wether sheep, 47s to 50s.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs —	2½ in. and under.. ..	9s 6d
Under 10 sc 10 lbs	Not exceeding 2½ in. —	9s 0d
Under 11 sc 10 lbs — —	Not exceeding 2¾ in. —	8s 8d

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND CO., Limited, Calne, Wilts.

Cambridge, Monday.—The stock exhibited for sale at this market and the prices obtained were as follows:—Beasts, 994; sheep, 517; pigs, 410; horses, 13. Beef, 7s to 8s per stone; mutton, 4s to 5s 4d; pork, 6s 9d to 7s 6d. A large show store beasts, only a few small lots left over. Fat beasts, a good show, trade brisk. Fat sheep, not so good as last week. Stores, very few shown. Fat pigs, a good brisk trade at fully late rates. Stores, trade not quite so good. Hay, straw, and roots, short supplies.

Canterbury, Saturday.—A large supply of useful bullocks, but very little doing. Yearlings ranged from £6 to £8, and cows and calves sold at about £16. A small supply of sheep, rough ewes realising 22s 6d. and good half-breds from 35s to 41s per head.

Carlisle Saturday.—The show of Irish store cattle for the market following the last of the fairs in this part of the country, viz., the Stones Fair at Newcastle, was above the average, consisting of about 200 polled bullocks and wintering and stall-feeding heifers. The attendance of buyers was small, and trade quiet at £8 10s to £10 10s for wintering heifers, to £14 10s for stall-feeding specimens and £10 to £13 10s for polled bullocks. Pigs a small show and slow sale at 23s to 24s.

Chichester, Wednesday.—Wet weather had an effect on the attendance, and business generally was quiet. Fat mutton and beef were without change. Not so many store sheep penned as on the last occasion, and business was still inclined to drag, though marking an improvement on the previous market. The best of the sheep went off well. There was an unusually large supply of pigs, and in this department trade exhibited a good deal of activity. Small porkers were again in demand, but larger sorts did not sell quite so rapidly.

Doncaster, Tuesday.—Rather poor supplies of cattle and sheep, and moderate attendance; trade active, and late prices firm. Beef, 7s to 8s per stone; mutton, 5½d to 7½d; small cross-breds, 7½d to 8d; veal, 7d to 8½d per lb.

Dorchester, Saturday.—There was a large offer of cattle, but only a dull trade was experienced. Sheep were only in moderate supply.

Driffield, Wednesday.—The show of beef was light, and the quality inferior. Prices were rather lower, making 7s to 7s 6d per stone. A moderate supply of mutton, with an easier trade; shearlings, to 7½d; ewes, 5½d to 6d per lb. A fair show of grazing lambs, which made more money, at 30s to 36s per head. Store beasts moved off slowly.

Dublin, Thursday.—Numbers in market: Beasts, 4,3 6 (decrease 463); sheep, 6,189 (increase 122); calves, 89 (decrease 3). Prime finished cattle scarce, and made fully late rates; rough and thinly-meated sorts, unchanged in price from last week, but the clearance, notwithstanding the large decrease of numbers, was not so good. A small supply of stall-feds met with fair inquiry. Worse trade for sheep, and a clearance difficult to effect. Cattle (best), 30s to 32s 6d per cwt; rough and thin sorts, 25s to 29s per cwt; stall-feds, 31s to 33s per cwt. Mutton, 5½d to 6¾d per lb. Extreme, 7d per lb.—GANLY, SONS, AND CO.

Dumfries, Wednesday.—Average supplies met a good demand at late rates, horned bullocks fetching up to £19; horned heifers, to £15; polled bullocks, to £18; polled heifers, to £14 10s; West Highland bullocks, to £17; calving cows and heifers, to £13; black-faced ewes, to 26s; and half-bred shearlings, to 45s.

Edinburgh, Wednesday.—Larger supply of sheep, and a fair trade was done. Cheviot Dinmonts, 29s to 32s; black-faced wethers, 22s to 28s; grey-faced lambs, 22s. For best cattle there was a good demand. Horned bullocks, £11 to £14; polled, £10 to £14; shorthorn cows, £26 to £27; Irish, to £20; Ayrshires, to £19.

Glasgow, Wednesday.—The supplies of cattle and sheep are less than last week. Sheep a sharper trade. Cattle in fair demand. Top Scotch cattle, 68s per cwt; top Irish, 60s to 62s; top mutton, 8¼d per lb; secondary, 7¾d. Dead meat slow; values of mutton, however, better. Best States beef, 5¾d per lb; best Canadians, 5¼d to 5½d; cows, 4¼d to 4¾d.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 742, calves 39, sheep and lambs 678, pigs (fat and sows) 29, pigs (stores, not more than ten) 199, pigs (stores, more than ten) 149, horses 1, colts 1.

Ipswich, Tuesday.—Messrs. Robt. Bond and Sons report a short supply of fat beasts, and a good attendance of buyers, trade was brisk at the high prices recently current. Well-finished animals reached £25 15s. The fat sheep pens were fairly full; the demand was somewhat slow. Shearlings made up to 62s. Calves for weaning were numerous, and in strong demand; those by pure-bred bulls made up to 71s. Fat calves up to 85s. Fat swine were again sharply competed for at fully late rates, but stores were somewhat cheaper. This being the last special sale of grazing cattle for the year 267 steers and heifers were forwarded. A choice lot of polled Scots sold well. The attendance of buyers was large. Several cows and heifers were forwarded, those fresh-calved showing a good supply of milk were in considerable request up to £20 5s. Heifers up to £13 5s. Numbers at sales and market:—969 beasts, 44 calves, 923 sheep, 1,536 swine, 38 horses.

Leicester, Saturday.—Full supplies of stock in excellent condition. Trade flat, at lower rates. Milch cows in good demand, at £16 to £26 per head. Bullocks, £10 to £15 each. Young stock flat.

Lincoln Tuesday.—About an average supply of beasts, and a fair trade. First quality beef made 7s 6d to 8s, and secondary 6s 6d to 7s 6d per stone. The show of sheep was good, and trade was slow. Ewe mutton made 5½d to 6d, and wether ditto, 7d to 8d per lb.

Lincoln, Friday.—Supply small, and trade generally slow. Milch beasts, £14 to £20; three-year-old stores, £14 to £15; two year old, £10 to £12; and young stock, £6 to £8. A few pens of lambs offered; they may be quoted from 25s to 40s each.

Newcastle, Tuesday.—Good supplies; stock of superior quality. Prices steady. Numbers:—Cattle, 2,151; sheep, 5,812; pigs, 1,055; calves, 49. Prices (sinking the offal):—Beef, 5s to 8s; pork, 5s to 9s per stone; mutton, 5d to 8d; veal, 5d to 8¾d per lb.

Newport, Wednesday.—The quotations were: Best beef, 6d to 6¼d per lb; secondary, 5d to 6¼d. A few pens of sheep and lambs, but trade was dull.

Norwich, Saturday.—The show of store beasts here to-day was smaller than of late, but was still of about average importance; business ruled quiet at former terms. Fat beasts were offered to a fair extent; trade was quiet at former rates. The supply of store sheep was larger than of late; hoggets were quoted at 32s to 42s, and keeping shearlings at 42s to 46s per head. The supply of fat sheep showed some falling off. The business passing was effected at 8s to 8s 6d and 9s per 14lb.

Romford, Wednesday.—An average supply of fat beasts, and trade about the same. Best animals made 4s to 4s 6d, and middlings 4s to 4s 2d per stone. Calves in short supply, and trade fair, at 5s 2d to 5s 4d per stone. Sheep in good supply. Best sheep made 5s 4d to 5s 6d, and middlings 5s to 5s 2d per stone. The pig trade showed an improvement. Small porkers made 4s 4d to 4s 7d, and large hogs 3s 10d to 4s per stone.

Salford, Tuesday.—There was again an increase in the number of cattle on offer. Trade ruled slow, and buyers obtained a reduction on last week's prices, 6½d per lb being the extreme top. The supply of sheep was also larger. Choice quality was scarce, and met with a fair demand at last week's top figure, but all others sold slowly at prices in buyers' favour. A smaller supply of calves, and a better trade at higher prices. Quotations:—Cattle, 5d to 6½d; sheep, 6½ to 8¼; calves, 5½d to 7¾d per lb. At market:—Cattle, 3,026; sheep, 7,284; calves, 116; pigs, 67.

Sheffield, Tuesday.—Show of milch beasts was only small. The best qualities met with a ready sale. Best lots made £18 to £25; secondary, £13 to £17.

Shrewsbury, Tuesday.—With a fair demand and prices firm trade was generally good. Cows with calves and store cattle brisk with smaller supplies. Quotations:—Beef, 6d to 7¼d; mutton, 6d to 8d; and veal, 6½d to 8½d per lb. Porket pigs, 9s 6d to 10s 6d, and bacons, 8s 6d to 10s per score. Cows with calves, up to £23. Hay up to £4. Number

offered :—837 cattle, 37 cows with calves, 795 sheep, 68 calves, 54 fat. 144 porket, and 505 store pigs.

Spalding, Tuesday.—A good show of fat beasts, and a brisk trade at 7s 6d to 7s 9d per stone. A large show of stores, and not much demand ; young stores were very low. The best descriptions found purchasers. In the sheep market there was a large number penned, and trade was rather slower. Best mutton made up to 7½d per lb.

Stockton, Wednesday.—There were 124 cattle, 400 sheep, and 409 pigs on offer. Best cattle were a better show, and trade firmer, prices ranging from 7s 6d to 8s ; rougher kinds, 6s 6d and 7s per stone ; sheep, 8d ; ewes, 6d to 7d ; and tups, about 5d per lb.

Thame, Tuesday.—There was a smaller supply of stock which was not of the usual good quality ; no doubt the best are being kept back for the Christmas sale. Trade was in buyers' favour, but mutton and calves met with a good trade. Mr. Bond's sale comprised 67 fat beasts, 118 fat sheep, 61 fat and weaning calves, and 277 fat and store pigs. Fat bullocks made £17 to £20 ; fat heifers, £13 to £19 15s; fat wethers, 43s to 52s ; fat ewes, 34s to 48s 6d ; fat calves, £3 to £4 11s ; cow calves, 25s to 56s ; bull calves, 17s to 49s ; fat pigs, 10s per score. Stores were easier in price.

Wakefield, Wednesday.—Fair average market, both for supply of stock and prices prevailing. Best beef made 6½d per lb ; other qualities 5d to 6d. Small sheep, 8d per lb ; average sorts, 7½d ; and ewes and tups, 5½d to 6d. Numbers penned :—Fat beasts, 1,794 ; sheep, 3,112.

Worcester, Saturday.—Fair supplies of cattle, sheep and pigs, and rather more calves on offer. Trade quiet, with very little change in values, except for pork, which was dearer. Beef, 6d to 7d ; inferior, 5d to 6d ; wether mutton, 7½d to 8d ; ewes, 5d to 6½d ; and veal, 7d to 7½d per lb. Pork pigs, 10s to 10s 6d ; bacon, 9s per score.

Worksop, Wednesday.—A larger show of stock than for several weeks, and best qualities of beef met with a ready sale at 7s 6d to 8s per stone. Better show of sheep ; best wethers, to 8d ; ewes and other sorts, 6d to 7d per lb.

York, Friday.—Calves, 8d ; small sheep, 8d ; large ditto, 7d ; and ewes, 6d per lb. Small pork pigs, 6s 9d ; large ditto, 6s 3d to 6s 6d ; and bacon pigs, 5s 6d to 6s per stone.

FOREIGN.

Deptford, Wednesday.—Beast supplies totalled 632 head against nil on Wednesday last, and comprised 592 United States and 40 Canadian. Trade ruled firm at 4s 2d to 4s 5d for the former, and 3s 8d to 3s 10d the latter per 8lb, to sink the offal.

POULTRY AND PROVISIONS.

Smithfield, Saturday.—Fair supplies were offered this morning, but the trade ruled dull ; the tendency however, was to improvement. Quotations :— Fowls : Yorkshire, 2s 3d to 2s 9d ; Essex, 2s 6d to 3s ; Welsh, 1s 8d to 1s 10d ; Surrey, 3s to 3s 6d ; Irish, 1s 6d to 1s 9d ; Sussex, 2s 9d to 3s 3d ; Boston, 2s to 2s 6d ; geese, 4s to 5s : turkeys, cocks, 6s to 8s 6d ; hens, 4s 6d to 6s ; country ducks, 2s 6d to 3s ; Bordeaux pigeons, 8d to 10d ; feathered, 7d to 9d ; wild rabbits, 8d to 10d ; tame, 10d to 1s 2d each ; Australian, 7s 6d to 8s 6d per dozen ; pheasants, 3s 6d to 4s ; young partridges, 3s 6d to 4s ; old, 2s 3d young grouse, 3s 9d to 4s 6d old, 3s 6d per brace ; hares, 3s to 3s 3d ; leverets, 1s 9d to 2s 6d ; wild ducks, 1s 6d to 1s 10d ; pintail, 1s 6d ; teal, 8d to 10d ; widgeon, 1s ; snipe, 8d to 10d ; woodcock, 2s to 2s 6d ; golden plover, 9d to 11d ; black, 6d each.

Glasgow, Wednesday.—There were a few fresh arrivals of cheese. The market is well stocked with all classes. The chief inquiry was for Dunlops, Cheddars being rather neglected. Holders of Cheddars are willing to make concessions. Cheddars and Dunlops 50s to 64s per cwt. There was a limited inquiry for separate made Canadian cheese.

Liverpool, Saturday.—Bacon : With continued scarcity of supply and fair consumptive demand the market has ruled firm, and for some cuts higher prices are quoted. We quote to-day choice Cumberland cut, 20lb to 22lb, 48s 6d to 52s ; 26lb to 30lb, 46s 6d to 49s ; 32lb to 38lb, 44s to 48s 6d ; long middles, rib-in, 18lb to 22lb, 51s to 55s ; clear bellies, 14lb to 16lb, 55s 6d to 57s 6d ; 18lb to 20lb, 55s 6d to 56s 6d ; Staffordshire cut (lean on), 35lb to 40lb, and Birmingham cut, 33lb to 38lb, 47s 6d to 49s ; clear Staffords (lean off), 40lb to 44lb, and Yorkshire cut, 40lb to 45lb, 44s 6d to 46s 6d ; singed Wiltshire, Canadian, 45lb to 55lb, 53s to 59s ; American, 40lb to 50lb, 44s to 52s ; short clear backs, 12lb to 16lb, 44s 6d to 46s 6d ; 16lb to 20lb, 43s 6d to 44s 6d ; fat backs (export), 40s to 41s ; long clear middles, 35lb to 40lb, 47s to 48s ; 40lb to 45lb, 45s to 46s 6d ; short clear middles, 5lb to 50lb, 40s to 40s 6d ; short middles (rib in), 18lb to 23lb, 48s to 49s ; shoulders, square cut, 12lb to 14lb, 35s to 40s ; 14lb to 16lb, 34s to 37s 6d ; New York cut, 11lb to 13lb 2s 6d to 35s per cwt. Hams are firmly held, but the inquiry is only moderate. We quote choice long cut, 8lb to 12lb, 46s 6d to 52s ; 14lb to 16lb, 44s to 49s ; short cut and A.C., 10lb to 12lb, 46s to 52s ; 12lb to 14lb, 46s 6d to 52s ; 14lb to 16lb, 44s to 49s 6d per cwt. Lard is in quiet request, and the turn in buyers' favour. We quote pails and kegs, 38s to 39s 3d ; prime Western (in tierces), 38s to 38s 9d per cwt. Beef a slow sale at recent values. We quote extra India mess, 67s 6d to 71s 6d ; Plate and Packet, 62s 6d to 65s per 304lb. Pork is in limited inquiry. We quote finest prime mess 67s to 71s 6d. per 200 lb. Cheese.—The demand has further improved, and is now more general for all grades, but there is no material alteration to report in value. We quote finest coloured Canadian, September, 53s 6d to 54s ; white, 52s 6d to 53s ; finest States, coloured, 52s to 53s 6d ; white, 51s to 52s ; summer cheese, ripe, ready goods, sell from 46s to 50s, and lower grades, in light supply, are offered from 22s to 40s per cwt. Butter.—There is a firmer tone to the market, and for strictly choicest fresh goods higher prices are readily obtainable, but secondary qualities, which are plentiful, are freely offered at irregular prices. We quote fancy fresh made Canadian creamery, in boxes, 105s to 110s ; second quality, 82s to 95s ; finest States (none) ; finest ladles and imitation creamery, 74s to 80s ; finest Danish, 114s to 124s ; Australian and New Zealand, 104s to 110s ; Irish creamery, 106s to 112s ; Cork, firsts, 93s ; seconds, 87s ; thirds, 81s per cwt.—HODGSON BROTHERS.

Newport, Wednesday.—The quotations were :—Carrphillies, 60s to 65s per cwt ; fancy dairies, 66s to 68s ; doubles, 60s to 63s ; truckles, 56s to 65s ; and Cheddars, 56s to 60s per cwt. A short supply, and a brisk demand.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Good supplies of greenstuffs evidenced a very quiet sale. Potato trade slow. Fruit was in good supply, and met with good support. Greenstuffs :—Cabbages, 1s 6d to 2s 6d ; savoys, 2s 6d ; beetroots, 2s 6d per tally ; cauliflowers, 2s per dozen ; Brussels sprouts, 1s to 1s 3d per half sieve ; spinach, 1s 6d to 2s per bushel ; carrots, 2s to 2s 6d ; turnips, 2s to 3s ; parsley, 1s 6d ; radishes, 6d per dozen bunches ; celery, 12s to 14s per dozen rolls ; horseradish, 10d to 1s per bundle ; English onions, 5s per cwt ; Valencia, 6s to 6s 6d per case. Potatoes :—Main-crops, 100s ; Snowdrops, 90s to 100s ; Up-to-Dates, 80s to 90s ; Reading Giants, 70s to 80s ; Imperators, 70s per ton ; German Markers, 3s 6d to 3s 9d ; Belgian, 2s 6d to 3s per bag. Fruit :—English grapes, 9d to 2s ; Belgian, 2s 6d to 3s per bag. Fruit :—English grapes, 9d to 2s ; Belgian, 6d to 1s per lb. Almeria, 10s to 16s per barrel ; English apples, 2s 6d to 6s per bushel ; Nova Scotian, 10s to 16s per barrel ; English pears, 3s to 6s 6d per bushel ; peaches, 3s to 12s per dozen ; Australian oranges, 10s to 12s 6d per case ; pineapples, 1s to 4s each ; bananas, 5s to 9s per bunch ; chestnuts, 6s to 10s ; Grenoble walnuts, 10s to 12s 6d per sack.

POTATOES.

Borough and Spitalfields, Saturday.—The arrivals this morning have been moderate, but with the trade dull prices have had a downward tendency. English : Reading Giants, 3s to 3s 9d ; Professor Maerkers, 3s 3d to 3s 6d. Up-to-Dates, 3s 6d to 4s 6d ; French and Belgian Magnums, 2s 9d to 3s 3d ; Imperators, 2s 6d to 3s ; German Magnums, 2s 9d to 3s 3d per cwt.

Goole, Wednesday.—Potatoes : Good attendance and a fair trade was done at 80s per ton. Best samples of Up-to-Dates made 85s.

FOREIGN POTATOES.

Hamburg, Saturday.—Potatoes report : Market rules very firm here ; there are still a good many orders in the market from Great Britain, but supplies are falling off considerably, as most farmers have closed their pits for want of frost. Also for spring shipment there is a fair demand, but offers not obtainable yet. I quote 1¾ inch riddled flight soil magnum bonums, 2s 6d to 2s 9d ; Professor Maeker, 2s 3d to 2s 4½d ; blue giants, 2s to 2s 1½d, all per bag of 50 kilos. or 110lb. English, f.o.b. steamers here, nett cash.—FRANCIS M. TH. DUHNE.

WOOL.

London, Friday.—Wool, English, per pocket of 240lb :—Fleeces, Southdown hoggs, £8 to £11 ; half-bred hoggs, £7 to £8 10s ; ditto wethers, £6 10s to £8 ; Kent fleeces, £6 to £7 ; Southdown ewes and wethers, £8 to £11 ; Leicester ditto, £6 to £7. Colonial, per lb :—Victorian, fleece, superior, 1s 4d to 1s 5d ; scoured, good, 1s 5½d to 1s 6d ; scoured, average, 1s 4d to 1s 4½d ; greasy, average to fair, 10d to 10½d ; New South Wales, scoured, average, 1s 1d to 1s 2d ; greasy average, 7½d to 8½d ; South Australian, greasy, average, 6d to 6½d ; New Zealand, scoured, average, 1s 2d to 1s 3d ; greasy, average, 7½d to 8d ; Cape, scoured, superior, 1s 3½d to 1s 4½d ; fleece, average, 5½d to 7½d ; greasy, average, 5d to 5½d ; Natal, scoured, 1s to 1s 1d ; greasy, average, 5½d to 6½d ; grossbreds, greasy, Victorian, good to superior, 9d to 11d ; New Zealand, fine, 8½d to 10d ; ditto, medium, 6¾d to 7¾d ; ditto, coarse, 5½d to 6d.

Bradford, Thursday.—The recent buying in merino tops is not maintained, and business is small. Prices remain unchanged for all sorts, and though wool is now strongly held a slight reaction is probable. Mohair is not wanted, except some fine sorts. In the yarn trade only single tube yarns are in any appreciable demand. The general tendency of the market is to favour buyers.

Canterbury, Saturday.—There is a slight improvement in the demand, and best lots occasionally make ½d per lb more money. Supplies are now very limited. Kent fleeces are quoted from 6d to 6½d, and lambs' wool from 4d to 4½d ; half-breds, 6½d to 7d ; and Downs, 8d to 10d per lb.

Liverpool, Wednesday.—The sixth and last series of periodical wool auctions for this year began on the 20th instant, East India being catalogued on that and two following days, and sundry descriptions yesterday and to-day. The new arrivals of East India wool reached 12,760 bales, but importers held over 4,540 bales out of the 5,645 bales they withdrew in September, and of 17,371 bales catalogued about 11,500 bales were sold ; the home trade taking fully 8,000 bales, America 1,950 bales, and France 1,450 bales. The selection on the whole was on a mediocre character, a large proportion of the shipments being in a very dirty condition ; most descriptions, however, were represented, though medium and fair yellows were exceptionally scarce. The supply of native skin and goat hair was large, comprising nearly one-eighth part of the offerings. A good attendance of home buyers was attracted, but only two Frenchmen put in an appearance, while America sent moderate orders, and with fair competition a decided gain on September currency was obtained. Vicanere and Joria whites were steady ; Kandahars a shade dearer ; medium to good yellows, as well as piecy whites and yellows, rose ½d to ¾d per lb. ; hard whites, greys, native skin, goat hair, Persians, etc., sold without material alteration. Arrivals for the January auctions are 5 850 bales, so that with what is held over and afloat we look for a total of about 20,000 bales.—RONALD AND RODGER.

FEEDING STUFFS.

London, Thursday.—Linseed.—Demand has been moderate, and with sufficient supplies being shipped, prices have given way a little. Calcutta to London spot, near at hand and November-December, are quoted 57s 6d, April-June, 46s. La Plata December-January, 46s 9d, January-February, 45s 6d. Hull very quiet. Calcutta, April-June, 46s. La Plata, December, 50s, December-January, 46s 9d, January-February, 45s 6d, Azoff, afloat, 55s 6d. To the Continent Bombay is quoted, February-March, 51s 6d ; March-May, 48s 6d. Calcutta, April-June, 46s. La Plata, December, 50s 9d ; December-January, 47s 3d ; January-February, 45s 9d. Linseed cakes quiet. London made, £8 10s to £8 12s 6d. Russian, £7 17s 6d to £8 7s 6d ex dock. American Westerns at £7 17s 6d. Cotton cakes steady. London made £4 17s 6d to £5 ; Egyptian, £4 15s to £4 16s 3d. Rapeseed quiet, prices tending downards. Brown Calcutta to London November-December, 44s ; March-May, 40s. To the Continent we quote, Yellow Guzerat, November-December, 52s ; March-May, 46s 3d ; Yellow Cawnpore March-May, 43s. Brown Cawnpore November-December, 47s 6d ; March-May, 39s 9d. Brown Calcutta, October-November, 45s ; April-June, 40s 6d. Cottonseed.—Owing to weakness in Alexandria, prices have declined on this side. Passage London, £6 16s 3d, December to March £6 11s 3d. Hull spot, £5 13s 9d, December to March, £6 10s. Cargoes, December, £6 12s 6d ; January, £6 12s 6d.—THE PRODUCE BROKERS COMPANY, LIMITED.
